INTERSTATE COMMERCE ACTS ANNOTATED

1977 SUPPLEMENT

VOLUME 22

TABLE OF VOLUMES COVERED BY ANNOTATIONS

This Supplement covers the following volumes, in part:

- United States Reports, 386, 389, 392, 393, 396, 397, 399-402, 404, 406, 409, 412
- Federal Reporter (Second Series), 387, 393, 398-402, 404-407, 409, 411-413, 415, 417-419, 422, 425, 427, 428, 432, 434, 436-439, 441, 442, 444, 446, 447, 454-457, 462, 464, 468
- Federal Supplement (District Courts), 239, 243-245, 253, 259, 260, 263, 268, 270, 271, 277, 279, 282-329, 331-334, 336, 337, 339, 342-344, 346-355, 359, 363, 364, 368, 371, 374
- Interstate Commerce Commission Cases, 320, 322-342
- Motor Carrier Cases, 93-115, 117, 118

Note

Public Law 94-210, Railroad Revitalization and Regulatory Reform Act of 1976, February 5, 1976, 90 Stat. 31, amended Part I of the Interstate Commerce Act. The following sections of Part I were amended by this act but were received too late for publication in volume 22:

§ 1(5)
§ 1(6)
§ 1(12)
§ 1(14)(a)
§ 1(18)
§ 1(19) repealed
§ 1(20) repealed
§ 1(21) repealed
§ 1(22) repealed
§ 1a
§ 5
§ 5(2)(a)
§ 5(2)(f)
§ 5(2)(g)
§ 5(2)(h)
§ 5(3)
§ 5(5)
§ 5(8)
§ 5(10)
§ 5(14)
§ 5(16)
§ 5(17)
§ 5a
§ 5b

TITLE 49—TRANSPORTATION

INTERSTATE COMMERCE ACT

[See Table of Cases for history of cases indicated by asterisk (*)]

Short title.—This act may be cited as the Interstate Commerce Act. (Sept. 18, 1940, c. 722, § 1, 54 Stat.899.)

National transportation policy.—[Unchanged. See vol. 11, p. 8954.]

Historical note, see vol. 11, p. 8954; vol. 21, p. 16227.

Notes of Decisions

Volume 11—p. 8954; Volume 12—p. 10109; Volume 13—p. 10861; Volume 14—p. 11341; Volume 15—p. 11887; Volume 16—p. 12513; Volume 17—p. 13139; Volume 18—p. 13919; Volume 19—p. 14925; Volume 21—p. 16227

2. The Commerce Clause.—[Vols. 16-19, 21].—Relief sought by taxi company holding exclusive franchise from New Orleans Aviation Board to provide passenger service at Moisant International Airport, in suit to enjoin limousine service of interstate passenger carrier from operating on airport grounds, denied. In view of recognized right of the states to regulate interstate commerce for the suitable protection of people of the state, the Board has a right to impose reasonable rules and regulations upon concessions and other parties who use the airport; also, an exclusive franchise between a state or city, whose charter is derived from the legislature, and a local company that deals with intrastate commerce would appear to be proper; however, neither plantiff cab company nor the Board, through the exclusive franchise, or the Board through failure to negotiate with defendant carrier—authorized to provide interstate passenger service directly to and from the airport—may exclude defendant from operating on the airport grounds without interfering with and placing an undue burden on interstate commerce.—Toye Bros. Yellow Cab Co. v. Irby, 305 F. Supp. 905 (910-11)*.

Seizure of the Civil War locomotive "General" which State of Georgia claims to own, pursuant to writ of attachment obtained in Tennessee court by City of Chattanooga, when it was being shipped by rail from Louisville, Ky., to Kennesaw, Ga., constituted an undue and unlawful burden on interstate commerce in violation of the Commerce Clause. Mere fact that a shipment is moving in interstate commerce does not, alone, render it immune from attachment in a state court proceeding where the court has jurisdiction; however, Georgia was not a party to the City's suit, was not served with process, and would not be bound by decision therein. In such circumstances, the writ of attachment not only constituted an undue burden on interstate commerce, but also constituted a taking of the State's property without due process of law. Georgia's claim to ownership and possession of "General" may not be treated apart from its claim that wrongful seizure of its property moving in interstate commerce violated the Constitution; lower court's dismissal of the suit for lack of jurisdiction is reversed and the cause remanded.—State of Georgia v. City of Chattanooga, Tenn., 406 F. 2d 830 (832-4).

5. National Transportation Policy, In General.—[Vols. 11-19. 21].

Adequate Transportation System: [Vols. 17, 19, 21].—Considering §13a in relation to the NTP and recognizing (1) the basis and relation to the history and present condition of the nation's rail passenger system, (2) fact that the railroad's passenger train service is an integral part of the national rail passenger system, (3) that the debilitated condition of this service in many ways reflects an intensification of national economic and technological trends, (4) the history of imbalanced public policy choices as between the railroads and other forms of transportation, and (5) the record of the rail industry's generally poor attitude and effectiveness in performing passenger transportation, discontinuance of all of considered trains is not warranted. Although justified by §13a(1), the authorized train discontinuances will not "solve" New Haven's passenger service problem; the time, responsibility, and opportunity have arrived for the rail industry and appropriate public authorities to reverse the broad trends apparent throughout this proceeding and, by a responsible cooperative effort, to restructure and strengthen rail passenger service throughout the country.—New York, N.H. & H. R. Co. Discontinuance, 327 I.C.C. 151 (153, 224-5).

The standard which should guide cooperative effort negotiations concerning the future of carrier's passenger service is that all sides, including the public in general, the States, the railroads themselves, and railway labor organizations, should make a *reasonable effort* to achieve a satisfactory result. Close scrutiny will be given to the good faith and efficacy of the cooperative efforts of all parties in any future passenger train discontinuance case. In this connection, the privately-owned railroad, as a "common carrier" in its broadest sense bears an initial obligation to provide service to all segments of the public, both freight and passenger, as the public may require and be willing to pay for on a reasonable basis. This general obligation can be nullified only by an Act of Congress and particular services offered by the railroad can be discontinued only with the express or tacit permission of the States or of the Commission under §13a.—Id., pp. 220, 225.

However, the concept that public policy, and particularly that of States threatened with rail passenger service discontinuances, should be responsible for underwriting all losses incurred by the railroad from those services, and for paying such losses in accordance with carrier's determination of amounts is entirely inconsistent with the obligation of the railroads to sustain and improve essential economically viable passenger services. Its endorsement would, in effect, totally discourage railroads from investing in the maintenance and improvement of their passenger operations; i.e., the reasonable effort required of it so as to put those services on a break-even basis or better.— Id., p. 222.

In matching railroads' reasonable effort to sustain and improve essential rail passenger services, the public through its governmental representatives must be willing to provide a reasonable level of support for these services; i.e., that level of financial or other public assistance which will stimulate the carrier to initiate or, if already initiated, continue its own reasonable effort to sustain and improve essential and economically viable passenger services. However, such public support should not be limited solely to the contribution of direct or indirect financial assistance but must encompass joint governmental-carrier programs to determine, on the basis of current and projected demand patterns, what services actually are essential to the public and at what level they should be maintained or modified, rational investment of capital, research, and technological skills therein, and rational reformation of rate and service concepts no longer responsive to public demand or productive of acceptable levels of patronage and revenue.—Id., pp. 222-3.

The railroad must accord to promotion of its economically viable passenger service the same reasonable effort as when it is threatened by competitive forces; i.e., service improvements, long-range market analysis, rate information, capital investment in research and technological achievements applicable to passenger operations, and sound analysis of the real costs of providing passenger services with a rail plant used also for the provision of freight services. And, since this concern to preserve viable service has taken into consideration the stake of railway labor in the achievement of such result, railway labor should cooperate fully in the industry-government efforts that are necessary to restructure and strengthen passenger service. However, when chronic and worsening deficits persist despite carrier's having made a reasonable effort, for a reasonable period of time, then point has been reached demonstrating unwillingness on part of public either to sustain the services through patronage or by assuming a fair share of the cost of maintaining such services.—Id., pp. 217-8, 220-21.

Since the Commission is required to promote adequate and efficient service, when scope of pending application is area-wide, it must consider many factors related to the maintenance of a balanced transportation system, including existence of sufficient carrier capacity to encourage competition, incentives for real innovation and improvement in service, and constraint against monopolistic motor carrier operations. Instant record shows that extensive operations are being conducted by at least four common carriers of considered commodities which, in effect, make up the core of the Birmingham, Ala.,-Florida system, and, while the Commission has a policy to encourage competition, it must balance this against wasteful duplication of services and creation of excessive capacity which would adversely effect continuance of efficient operations by existing carriers. Thus, although record reveals some genuine dissatisfaction with part of the existing service, it also shows existence of untried motor carrier capacity which should be allowed to absorb additional traffic and to operate at a more efficient level before comparable services of applicant are added.—Terminal Transport Co., Inc., Ext.—Birmingham, 103 M.C.C. 699 (715-6).

The Commission is charged with promoting "safe, adequate, economical and efficient service;" therefore, it should take notice of, foster and encourage technological advancements in order to effect sound regulation and see that the resulting benefits are not withheld from the shipping public. Thus, since utilization of equipment to its fullest capacity is economically sound, considered "truckload lot" restrictions, which prohibit segments of the motor carrier industry and shipping public from full utilization of present-day transportation methods, are repugnant to the public interest and the national transportation policy, and should be removed.—Removal of Truckload Lot Restrictions, 106 M.C.C. 455 (487)*.

See also Great Northern Pac. & B. Lines, Merger—Great Northern, §5(2), n. 3; Restrictions on Service by Motor Common Carriers at §204(a) (1), n. 1.

Applications, operating authority: [Vols. 17, 19, 21].—Argument of plaintiffs (protestants in Commission proceeding) that, in granting additional passenger authority to applicant, the Commission's consideration of a "balanced passenger transportation 'system'" changed or contradicted the criteria enunciated in the *Pan American* case, 1 MCC 190, is without merit; especially since the Commission's evidentiary conclusions and holdings point to an orderly consideration of the elements of that case. Furthermore, assuming, arguendo, that the Commission's "balanced transportation" theory did modify the *Pan American* standard, that modification is best described as supplemental and not contradictory. And when supplemental principles stated by the Commission are imbedded in both the national transportation policy and the primary statutes governing economic regulation and competition, their invocation can only be salutary.—The Short Line, Inc. v. United States, 290 F. Supp. 939 (943-4)*.

In the National Transportation Policy, Congress stated guidelines for the promotion of adequate transportation systems and the avoidance of ruinous competition. Language therein reflects a concern over fair competition in the industry which the courts had previously voiced; and, since its enactment, the courts have held that the policy is a guide for the Commission and that its decisions and the Act must be read in the light thereof. Generally, absent a competing carrier, the Commission may authorize a new service shown to be needed and, where there is service, it may even authorize competition in order to compel adequate service; however, its powers over competition are not all- inclusive, and any destructive competition resulting from a grant of authority may give rise to a private antitrust action. Thus, if the national policy is applied in reviewing grant of authority to intervenor (without a finding of inadequacy of existing service) which permits it to offer the same service plaintiff provides, the court cannot approve a certificate which is inconsistent with the findings and the inconsistency is such that existing carriers might be endangered.—Drum Transport, Inc. v. United States, 298 F. Supp. 667 (669-70, 672-3)*.

Under the national transportation policy the Commission is required to promote an adequate and efficient transportation service; accordingly, in motor-carrier application proceedings, it must consider such factors as the existence of sufficient carrier capacity to encourage competition, incentives for real innovation and improvement in service to the public, and constraint against monopolistic motor carrier operations. In light thereof, grant of additional authority to applicant between Birmingham, Ala., and the Florida Panhandle would create needless duplication of services and excessive capacity which would tend to adversely affect continuance of efficient operations by the several existing carriers. Denied.—M. R. & R. Trucking, Co., Extension, 105 M.C.C. 69 (80, 83)*.

The promotion of safe, adequate, economical, and efficient service and the fostering of sound economic conditions in transportation are among the aims of the national transportation policy guiding the determination of public convenience and necessity in application proceedings. Efficient and economical two-way motor operations which eliminate the added cost of empty return movements benefit the shipper and their carriers alike. The return-traffic problem of specialized carriers including those operating with tank vehicles persists and is not easily remedied because of the many facets of interest in competitive transportation which must be fairly administered. The overall record before the Commission does not supply the necessary detail for insight into the problem on an industrywide basis, nevertheless, the Commission recognizes the propensity of carriers and their shippers to resolve mutual problems by the use of novel transportation schemes which should not be thwarted when such schemes are lawful and the need for such service is supported by substantial evidence. Within the confines of this record, some furtherance of a two-way transportation system is warranted.—Rogers Cartage Co., A Corporation-Extension, 110 M.C.C. 139 (147, 148)*.

See also Almeida Bus Lines, Inc., Extension, case, §207(a), n. 25 *Existing carriers.*; Specialized Transp. Services, Inc., §209 (b), n. 20; Truck Transport, Inc., v. United States, §207 (a), n. 25.

Combination, strong railroads: [Vols. 15, 19, 21].—See Great Northern Pac. & B. Lines, Merger—Great Northern, §5(2), n. 7.; Southern Pac. Co.—Control—Western Pac. R. Co. case, §5(2), n. 7

Competition and ratemaking: [Vols. 11-19, 21].—The Commission must recognize the overriding problem today facing all common carriers—the heavy and increasing diversion of traffic into unregulated channels. It is essential for management to seek ways to recapture or retain this traffic if regulated carriers are to improve and consolidate their relative positions; with so many economic factors favoring diversion to unregulated carriage, experiment and ratemaking innovation is the only feasible approach, and, so long as experiments are not clearly unlawful, they should not be discouraged. Unless the Commission is to dictate carrier policy, measures designed to provide better and less expensive service than shippers can provide for themselves must be given a fair chance to develop through exercise of managerial discretion.—Reduced Exceptions Ratings Based on Density, 323 I.C.C. 341 (345)

Defendants' claim that competition at issue herein is market competition is incorrect. Market competition occurs when different commodities or geographic areas compete for same customers. Situation herein is carrier competition as two or more carriers are competing for same traffic between the same two points.—Great Lakes Ship Owners Assn. v. Chicago & N.W. Ry., 337 I.C.C. 287 (293-4)

See also Motor Vehicles, Kansas City, Mo., to Southwest, at §1(5), n. 289; Wine, Pacific Coast to the East case, §15a(3), n. 2.

Cost of service: [Vols. 12, 13, 17, 19, 21].—See American Commercial Lines, Inc. v. United States, under ***Inherent advantages***, below.

Destructive competition: [Vols 11, 19, 21].—Proposed reduced commodity rates of southern rail carriers on all freight, minimum 10,000 pounds in straight or mixed shipments, designed to recapture some of high-rated merchandise and l.c.l. traffic lost to private and regulated motor carriage, are not shown to constitute a destructive competitive practice. Costs of protestant motor carriers are not shown, nor is it shown that they possess any inherent advantages that would be impaired by the proposal. The proposed reductions are not detrimental to respondents' revenue requirements, but on the contrary may be reasonably expected to produce a substantial net revenue increase; and protestants' fear that they will divert substantial traffic is not enough, alone, to warrant a finding of destructive competition. [See 372 US 744.]—Freight, all Kinds, Southern and IFA Territories, 323 I.C.C. 730 (739).

Competition which protestants will be forced to meet as a result of respondent's proposal to reduce motor class rates, minima 5,000 and 10,000 pounds, is not shown to be "destructive" within meaning of the national transportation policy. While the evidence indicates that protestants, particularly the motor carriers, will be required to make widespread reductions in their rates and that the result will be a net loss of revenues to many carriers, those circumstances, standing alone, do not constitute destructive competition in light of the fact that proposed rates generally exceed respondent's fully distributed costs by a substantial margin. In considering the statutory requirement of the need in the public interest of adequate and efficient transportation service at the lowest cost consistent with the furnishing of such service, the Commission may condemn reduced rates which cover fully distributed costs (including a reasonable profit) only in the most compelling circumstances; no such compelling circumstances having been shown, proposed rates cannot be found competitively destructive.—Volume Class Rates, Transcontinental Territory, 325 I.C.C. 735 (740)*.

Establishment of proposed reduced transcontinental incentive rail rates on wine does not constitute a destructive competitive practice, as urged by protestant Sea-Land (which, on the record, must be regarded the low-cost mode), within rationale of decision in 372 US 744. Principles enunciated in, and rationale in, the cited decision relate solely to intermodal competitive rate adjustments; instant proceeding, on the other hand, does not involve the same issue since considered rate adjustment was not prompted or established for purpose of intermodal competition, but to enable west coast shippers to compete in markets in official and southern territories.—Wine, Pacific Coast to East, 326 I.C.C. 119 (151-5)*.

Moreover, on reconsideration, the Commission does not require carriers to withhold counter action until diversion of traffic actually takes place. And, in view of the Supreme Court's conclusions in the cited case that (1) "something more than even hard competition must be shown before a particular rate can be deemed unfair or destructive", and (2) all reduced rates which force the competitive low-cost mode to go below its fully distributed costs might "not unduly impair that advantage", obviously, the court did not intend to prescribe a mechanical formula for the Commission to apply whenever the issue of destructive competition is presented. Record shows that nonregulated carriage is the major source of competition, and, in such circumstances, regulated carriers may lawfully reduce their rates below the fully distributed cost level of another regulated carrier which competes to some extent for the traffic.—Id., 329 I.C.C. 167 (173-5)*.

Where, on further hearing, all-barge is shown to be the low-cost transportation mode, and reduced limited-transit rail rates exceed barge rates and barge fully distributed costs and revenues therefrom exceed railroads' out-of- pocket costs, fact that the rail rates cause diversion from the barge line affords no basis for finding a destructive competitive practice has occurred. Rates may be established at levels below fully distributed costs where there is competitive necessity therefor; and if a carrier is prohibited from establishing a reduced rate that is not detrimental to its own revenue requirements, merely because the rate will divert traffic from others, then carrier is thwarted from asserting its own inherent advantages of cost and service. Therefore, absent a showing of genuine threat to continued existence of a service uniquely capable of filling a transcendent national defense or other public need, rates in question cannot be found to constitute a destructive competitive practice.—Grain from Idaho, Oreg. & Wash., to Ports in Oreg. & Wash., 326 I.C.C. 358 (366-8)*.

In addition, prior holding that considered limited-transit rail rates constituted a destructive competitive practice against truck-barge transportation mode is not supported when the record, on further hearing, does not permit reliable determinations to be made as to costs of the truck portion of truck barge movement.—Id., pp. 363-4.

Because of loss of traffic since initiation of defendant railroads' plan II TOFC rate of 163 cents on activated carbon, minimum weight 60,000 pounds per shipment loaded in 2 trailers, from Marshall, Tex., to New York, N.Y., and related points, complainant Sea-Land insists that the coastwise water carriers must have a rate differential in order for them to share in the traffic. Railroads' TOFC fully distributed cost, excluding deficits, is 158.5 cents per 100 pounds, and including deficits is 165.3 cents per 100 pounds; its rate level is above complainant's out-of-pocket costs. Where complainant fails to prove that it is the low-cost mode of transportation either on an out-of-pocket or fully distributed basis of comparison, and that the assailed rate is below defendants' out-of-pocket cost for the movement involved, the principles of the *New Haven* case have no application. The rate assailed is therefore not shown to be unjust and unreasonable, or in contravention of the national transportation policy.—Sea-Land Service, Inc. v. Baltimore & O. R. Co., 326 I.C.C. 708 (709-11, 712).

Proposed reduced rail TOFC per-flatcar charge, which is shown to be compensative on an out-of-pocket basis, and which would improve railroads' overall revenue position, would not constitute destructive competition when protesting water carrier failed to establish that motor-water-motor transportation is the low-cost mode for considered traffic and, as such, is entitled to protection pursuant to provisions of the national transportation policy and §15a(3). Therefore, despite the fact that evidence indicates that proposed rail rates will have an adverse effect on volume of certain Sea-Land traffic, protestant's argument that proposed TOFC rates threaten existence of a service uniquely capable of filling a transcendent public need, is not persuasive.—Canned or Preserved Foodstuffs from Fla. to N.Y. & N.J., 326 I.C.C. 776 (780-2)*.

Commission found that defendant's tariff provision requiring a minimum-annual-volume of coal created destructive competition because shipper, to receive the lower rate, must ship approximately 85 percent of its annual consumption of coal by defendant thus foreclosing the availability of this traffic to other carriers.—Great Lakes Ship Owners Assn. v. Chicago & N.W. Ry., 337 I.C.C. 287 (293-4)

Defendant's reliance on *VEPCO, New York Harbor*, and *Unit Train* cases, as cited herein, to prove that the national transportation policy does not apply is ill-founded. Carriers claiming injury in those cases were not subject to Commission's jurisdiction and were not entitled to claim protection of the national transportation policy. Complainants herein are steamship companies holding and using certificates from this Commission and are entitled to protection from destructive competition. Schedules ordered canceled.—Id., p. 292-3.

Assailed tariff requirement conditioning application of unit-train rate on tender of a minimum annual-volume of 850,000 tons of coal found to be a destructive competitive practice as the ultimate result of such requirement is to prevent competition of a substantial portion of the relevant market in violation of "initial handicap" doctrine formulated in *New York Central*, 194 F. Supp. 947, 951.—Great Lakes Ship Owners Assn. v. Chicago & N. W. Ry., 341 I.C.C. 272 (278-283)*

There are certain modes, such as foreclosing other modes subject to act from competing, which because of their pernicious effect on competition and lack of redeeming virtue are presumed unreasonable and unlawful without an elaborate inquiry as to precise harm which they cause.—Id., p. 284.

Described practices of respondent Greyhound are shown to be unreasonable and inconsistent with commitments it made in eight earlier §5(2) proceedings, in which it acquired passenger authorities surrounding petitioner's routes and, thereby, attained near monopoly in the area; are competitively destructive and contrary to the national policy. Greyhound intended statements in earlier proceedings, as to public benefit and no harm to existing carriers or service, to amount to assurance that it would not unnecessarily disrupt existing practices or traffic patterns without regard to the competitive effect; acquisitions were approved on findings of consistency with the public interest and respondent, by later modifying arrangements then in effect for its own gain, created situation which is no longer consistent therewith. Greyhound's failure to abide by commitments it made to obtain encircling authorities, without sound reason, constitutes destructive competition, is inconsistent with public interest, and provides good cause for supplemental proceedings, notwithstanding the prior consummations and issuance or certificates.—Mt. Hood Stages, Inc.—Petition for Modification, 104 M.C.C. 449 (459-63)*.

Exemption: [Vols. 12, 13, 14, 16, 18, 21].—In determining whether the contiguous-municipalities exemption of §203(b8) should be removed as to traffic between Detroit, Mich., and Windsor, Ontario, effect of transportation performed thereunder on regulated carriers authorized to serve Detroit must be evaluated, under directive of the national policy to foster sound economic conditions among the carriers and discourage destructive competitive practices. Thus, factors which would not be controlling in fixing commercial-zone boundaries assume greater importance. But although petitioners regularly interline their Detroit traffic with Canadian motor carriers, including shipments moving to and from Canadian or United States points beyond the border cities, and the exemption subjects a part of their total volume to diversion to unregulated carriers, less than 2 percent of shipments handled by them in foreign commerce are shown to have moved solely between Detroit and Windsor. This small amount of traffic is not important enough to warrant exercise of the Commission's power to remove an exemption designed by Congress for general applicability.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (714-5)*.

And though the number of shipments handled between Detroit-Windsor and points beyond, under separate arrangements made by shippers with the exempt local carter and the line-haul carrier, has increased over the past 10 years, the effect on petitioners of diversion of the small percentage of their traffic represented by such shipments is relatively slight. Moreover, removal of the exemption would preclude the local cartage operations declared to be covered thereby in 154 F. Supp. 431, and no reason now appears for altering the conclusion reached in the Commission's 69th annual report that such a result would not be in public interest; nor would it contribute to the promotion of efficient service contemplated by the national policy. Something more definite and precise respecting effect of the sought relief on exempt local carters, authorized short-haul carriers, line-haul operations within the United States, and the public interest generally, is required to justify removal, in whole or in part, of the exemption conferred by §203(b8).—Id., pp. 716-7.

Commission found that neither the Act nor the national transportation policy precludes the issuance of a certificate of public convenience and necessity authorizing operations as a common carrier by motor vehicle to an agricultural cooperative performing exempt transportation under section 203(b)(5) of the act. This issue is considered one of general transportation importance.—American Farm Lines Common Carrier Application, 114 M.C.C. 30 (41-42)*.

For motor carriage of articles to be mailed see Armored Carrier Corp. v. Security Dispatch, Inc. Case, §202(b), n. 20.

Inherent Advantages: [Vols. 13, 14, 16-19, 21].—The District Court erred in rejecting Commission decision disapproving appellee railroads' rate on ingot molds, reduced to meet barge-truck competition, which (though above rail out-of-pocket cost) was substantially below railroads' fully distributed costs; also, the court erred in the grounds on which its judgment was based, i.e., (1) that the Commission's use of a comparison between fully distributed costs of the two transport modes to determine inherent cost advantage was not consistent with provisions, and legislative history, of §15a(3) and the national transportation policy, and (2) that it failed to adequately express its reasons for deciding that fully distributed, rather than out-of-pocket, cost was the appropriate basis for determination of which mode was the low cost mode for considered traffic and its reasons for disallowing the proposed rate.—American Commercial Lines, Inc. v. Louisville & N. R. Co., 392 U.S. 571 (574-5)*.

While the meaning of "inherent advantage" is not spelled out in the statute, fallacy of railroads' argument, and lower court's holding, that Congress intended by that term to refer to situations in which one carrier could transport goods at a lower out-of-pocket cost than another, is that it renders the term inherent advantage essentially meaningless in context of the language and history of §15a(3). Lower court read the statute as reflecting Congressional intent that, in most cases, inherent advantage should be determined by comparing out-of-pocket costs and held that the Commission failed to justify its use of a comparison of fully distributed costs as the proper basis for determining which of the competing modes had the inherent advantage; however, neither relevant statutes, their legislative history, nor the *New Haven* case, 372 US 744, relied on heavily by the parties, requires the Commission to use either out-of-pocket or fully distributed costs as a measure of inherent advantage; rather, as the cited decision said, the appropriate measure "may be" neither. It "may be" that after due consideration another method may prove to be preferable in such cases, but initial determination of that question is for the Commission.—Id., pp. 581-4. 590.

After noting its past consistent use of fully distributed costs for determining which of two competing transport modes has an inherent cost advantage, that a rulemaking proceeding on the whole question was then pending before it, and that legislative history of §15a(3) indicated that Congress intended a comparison of fully distributed costs when it referred to the national policy in that section, the Commission concluded that proposed rail rate would undercut barge-truck combination's ability to exploit its inherent advantage by forcing barge and truck carriers to go well below their fully distributed costs to regain traffic which, if rates of both modes were the same, would move entirely by rail; it further found that, due to lower rail out-of-pocket costs, appellee railroads would be able to outlast their competitors in any rate war if they were allowed to set rates on an out-of-pocket basis. The Commission had ample authority to deal with the matter as it did, and its reasons for finding that proposed rail rate would impair inherent advantages enjoyed by the barge-truck service were adequately articulated; reversed and remanded to District Court with instructions to affirm the Commission's report and order.—Id., pp. 575-9, 592-4.

Protestant motor carrier's cost evidence does not meet the burden of proving that protestant is the low-cost mode of transportation on shipments of canned goods from the Pacific coast to eastern destinations and is not therefore entitled to protection of an inherent advantage from destructive competition by respondent railroads.—Canned Goods, Between Pacific Coast and the East, 332 I.C.C. 55 (68).

The use of open-tariff TOFC service by carriers would not be in contravention of the national transportation policy which states "to provide for fair and impartial regulation of all modes of transportation subject to the provisions of the Act, so administered as to recognize and preserve the inherent advantages of each***," when it was found that all TOFC service is inherently bimodal in that its basic characteristic is the combination of the inherent advantages of rail and motor transportation: the railroad's ability to provide efficient line-haul transportation of huge volumes of freight for great distances at high speed; and the motor carrier's ability to provide door-to-door, and if necessary job- or farm-site, pickup and delivery.—Substituted Service—Piggyback, 322 I.C.C. 301 (329)*.

—Also TOFC service could even be said to be trimodal, because added to the two factors already mentioned is its ability to combine in a type of container service many small shipments—a type of service which has become associated with the business of the freight forwarder.—Id., p. 329.

The shipping public is entitled to benefit from the inherent advantages of water carrier service, including low-cost transportation, even though motor and rail transportation is available. Shippers and communities are entitled to adequate transportation service by water, with its inherent benefits and advantages, upon proof of need therefor.—Coyle Lines, Inc., Extension, 323 I.C.C. 386 (392, 393).

See also Grain from Idaho, Oreg. and Wash. to Ports in Oreg. and Wash., under *Destructive Competition*, above; Southern Pac. Co.—Control—Western Pac. R. Co. case, §5(2), n. 7; Wine, Pacific Coast to the East case, under *Destructive Competition*, above.

National defense: [Vols. 12, 15-21].—The national defense clause may not be applied so freely as to nullify the more particularized mandates of the national transportation policy, absent extraordinary circumstances which genuinely threaten the continued existence of a transportation service that is uniquely capable of filling a transcendent national defense or other public need. The fact that surviving carrier's parent holding company is controlled by a Canadian corporation does not constitute such a circumstance and does not warrant denial of the application.—Ryder Truck Lines—Control and Merger, 104 M.C.C. 328(334).

Reduced rates: [Vols. 14, 19].—The maintenance of reduced joint rates with the use of less than 70-ton cars could be accomplished only at the expense of revenue losses to the carriers concerned. The primary consideration is how to achieve a balance in rail transportation costs between competing shippers under similar transportation conditions without unduly sacrificing the revenues of the carriers. Since the evidence established substantial savings from the use of the larger cars and there is nothing in the record to establish any extra cost in providing such cars, these savings to be accomplished through innovations in equipment, service and technological efficiencies should be promoted and fostered under the national transportation policy, rather than discouraged, and passed on to all shippers in competing origins.—Coal, Ky., Tenn. and Va. to North Carolina, 329 I.C.C. 572 (586)*.

Rule of ratemaking: [Vols. 13, 18, 19, 21].—Principle that the "legislative discretion implied in the rate-making power necessarily extends to the entire legislative process, embracing the method used in reaching the legislative determination as well as that determination itself," expressed in other Federal agency decisions, is equally applicable to rate regulation carried out by the Interstate Commerce Commission, especially where the determination made on an interim basis is in general accord with both the legislative history of relevant statutes and the results in prior Commission decisions. Accordingly, since a rulemaking proceeding was then pending before the Commission in which the whole question of a proper standard of costing in situations involving intermodal competition was being examined in depth, the Commission had ample authority to decline to deal with appellee railroads' broad contentions in their individual rate case. District court erred in failing to recognize that authority, and in refusing to permit the Commission to exercise its judgment in a proceeding it believed would provide the most adequate record for resolving the problems involved.—American Commercial Lines, Inc. v. Louisville & N. R. Co., 392 U.S. 571 (578, 590-3)*.

Stopoff privileges: [Vol. 17].—See Stopping-in-Transit Charges and Restrictions, at §1(6), no. 566.

Through routes, joint rates: [Vol. 12].—See Atchison, T. & S. F. Ry. Co. v. United States, §3(4), n. 10, and §4(1), n. 2.

Water carriers: [Vols. 11, 14-16, 18, 21].—See Wine, Pacific Coast to the East case, under *Destructive Competition*, above.

10. Coordinated service.—[Vols. 13, 14, 17-19].—The underlying policy of §5(2)(b) governing applications by railroad-controlled motor carriers filed under §207 requires the Commission to recognize and preserve the inherent advantages of all modes of transportation and, necessarily, to restrict rail entry into the motor carrier field. It is of particular importance that intermodal competition between various rail and independent motor carriers be retained to prevent the blurring of statutory distinctions between the separate modes of service, which would be contrary to the overall public interest and the national transportation policy.—Great Northern Ry. Co. Extension, 96 M.C.C. 699 (702, 706).

Grant of a motor common carrier certificate to an air freight forwarder, restricted to traffic having an immediately prior or subsequent movement by air is a step towards achieving intermodal coordination, and possibly a step towards alleviating the small shipments problem. The Interstate Commerce Act does not prohibit certification of an air carrier as a motor common carrier nor does it impose a special burden of proof on an air carrier entering the motor carrier field.—Direct Air Freight Corp.—Common Carrier Application, 106 M.C.C. 785 (790-91).

Economy of operation: [13, 14, 17, 18].—See §25, n. 2

Key point condition: [Vols. 12-19, 21].—Applicant's operations over its routes are restricted to service which is supplemental to that of parent railroad, and in order to insure that applicant's motor operations remain subordinated to parent's rail service, certain points on its routes have been designated as key points, the effect of which is to prevent all-over motor service from being rendered and to insure that it remains a true substituted motor-for-rail service and does not become an independent motor operation. The removal of Laredo as a key point could result in the institution of a new competitive service, regardless of applicant's disavowal of this intention; and more basically the removal of this restriction would allow applicant to offer a service not now offered by its parent railroad company. Denied—Missouri Pac. Truck Lines Ext.-Removal of Key Point, 99 M.C.C. 754 (755, 759).

Although removal of applicant's Omaha, Nebr., key-point restriction would result in operating economies, it might result in the impairment of protestant Crouch's motor operations. Therefore, in order to protect Crouch from excessive and unwarranted competition, a restriction is substituted prohibiting applicant from transporting any traffic moving between Omaha, on the one hand, and St. Joseph and Kansas City, Mo., on the other, except that having a prior or subsequent movement by rail.—Missouri Pac. Truck Lines Extension, 100 M.C.C. 677 (682-3).

Modification of key-point restriction at Poplar Bluff, Ark. was approved to enable applicant to perform substituted motor service from St. Louis to destinations in Missouri. Applicant has shown that such operations would accomplish economies and needed improvements in rail service. Complete removal of such restriction is denied as all-motor movements are not the basis for economies and improvements in service and would divert significant traffic from protestant.—Missouri Pac. Truck Lines, Ext.-Key Points, 111 M.C.C. 383 (387-8)

Application to modify key-point of Abilene, Tex. so as to provide motor carrier service solely for REA express shipments between Dallas-Fort Worth and intermediate point along route of movement to key-point of El Paso, Tex. approved. Modification results from discontinuance of two trains handling such traffic; inability of protestants to meet needs of REA; and applicant's satisfactory service under temporary authority.—Texas & Pacific Motor Transport Co.-Modification, 111 M.C.C. 389 (393).

Restriction of applicant's authority to only those express shipments having prior or subsequent movement by rail found not justified as it would foreclose applicant from traffic it formerly or presently handles and would preclude applicant from rendering a complete and rounded service on all tendered express traffic.—Id., p. 394.

Restrictions, auxiliary, supplemental service: [Vols. 12-19, 21].—When Commission granted rail-subsidiary respondent considered authority subject to key point limitations, it intended to preclude respondent's all-motor service between Los Angeles and Phoenix. However, about 2 months after authority granted respondent instituted joint-line motor carrier service between Los Angeles and Phoenix in conjunction with San Diego Forwarding Company, a motor common carrier; the practical effect of this joint-line service was to allow respondent to perform an all-motor movement by having its interlining carrier perform service to or from point a short distance beyond geographical limit of Los Angeles key point. Since under these circumstances considered motor service is no longer subordinate to parent railway's service, authority granted in prior report must be modified in order to insure that respondent's service is limited to that which is auxiliary to and supplemental of rail service. Authority modified by substituting restriction that all shipments must have prior or subsequent movement by rail for present key-point restriction.—Santa Fe Trail Transp. Co., Extension, 103 M.C.C. 164 (169-71)*.

The restriction "regardless by whom loaded" recommended by the examiner to be placed in the certificates of both specific commodity carriers in order to preclude the handling of commodities which because of their size and weight require the use of special equipment for the purpose of protecting protestant heavy haulers should not be used in any grants of operating authority. As long as applicants themselves do not use mechanical devices for loading and unloading, it is completely immaterial how the loading and unloading is done. Use of labor-saving devices by consignors or consignsees would have no effect upon the transportation services which applicants provide, either insofar as it effects the commodities which they transport or the equipment which they use. The Commission specifically found in 53 M.C.C. 277 (the St. Johnsbury case) that the use of modern devices for the economical and expedient loading, unloading, and handling of freight should not be denied any class of shipper. Therefore, the burdensome restriction upon operating rights (regardless by whom loaded) is contrary to the national transportation policy and should be rejected herein and in any future applications.—Herr's Motor Express, Inc., Extension- Wheeling Steel 108 M.C.C. 626 (633, 635)*.

Substituted freight service: [Vols. 12-15, 17-19, 21].—The Commission concluded in *Substituted Freight Service*, 232 ICC 683 that the service substituted for common carrier service is itself common carriage and cannot be performed by motor vehicle in the absence of appropriate motor common carrier authority; that the substitution of one form of transportation for another where the shipper otherwise directs would be a breach of the contract of carriage; and that the routes over which substituted service is performed and the parties performing it must be fully set forth in lawfully filed tariffs.—Substituted Service—Piggyback, 322 I.C.C. 301 (331)*.

One carrier may make use of the service which another carrier holds out to the public generally. So long as the first carrier is operating *qua* carrier and gives the public proper notice through its tariff, it can substitute another's service for its own in this way.—Id., p. 333.

When TOFC service is offered by a rail carrier to the public generally, there is nothing to preclude its use by motor or water common or contract carriers, in lieu of their all-highway operations in the performance of authorized transportation between authorized service points, or by for-hire carriers engaged in transportation which is exempt from economic regulation. To the extent that this finding differs from that expressed in any of the Commission's previous decisions, such decisions are overruled.—Id., p. 336.

Trailer-on-flatcar service, generally: [Vols. 18, 21].—There can be no doubt of the benefit which TOFC service has already rendered the railroads in allowing them to recapture traffic lost to competing modes of transportation, and especially to private motor carriage. Also benefiting have been the motor carriers which have been provided with an opportunity, through the use of plan I TOFC service to obtain efficient line-haul transportation and thus to help themselves even while their business helps their rail competitors; the freight forwarders, which have been afforded an economical means for transporting the small shipments which they consolidate; and most important, the shippers and the general public which ultimately reap the benefit of the increased efficiency and economy that are invariably the result of the combination of competing forces so that each operates in the area where it functions best.—Substituted service-Piggyback, 322 I.C.C. 301 (322)*.

The record clearly supports the conclusion that it would be in the public interest to lay down, through formal rules, certain guidelines for TOFC service and practices. These rules would aid in furthering, not restricting, the growth of piggyback, as providing some standardization of industry practices and as a means of insuring that piggyback service is made available to all persons who are able to make effective use of it.—Id., p. 323.

15. State regulations; police power; cooperation generally.—[Vols. 13-17, 18, 19, 21].—It is well established that regulation of interstate commerce by the states is not invalid as long as there is a real relation to suitable protection of people of the state and requirements of the regulation are reasonable; therefore, New Orleans Aviation Board, (established by legislature of Louisiana) has the right to impose reasonable rules and regulations upon concessions and other parties who use Moisant International Airport. However, even though an exclusive franchise to serve the airport had been granted to local taxi company, the city Board, as proprietary owner of the airport, may not exclude an interstate carrier or passenger who complys with its reasonable regulations for use of the facilities, including the access ways and ramps.—Toye Bros. Yellow Cab Co. v. Irby, 305 F. Supp. 905 (910)*.

PART I

INTERSTATE COMMERCE ACT; RAILROADS

Chapter 1, Title 49, U.S. Code

[See Table of Cases for history, parallel citation, of cases indicated by asterisk(*)]

Section 1. Regulation in general; car service; alteration of line.—(1) Carriers subject to regulation.—[Unchanged. See vol. 9, p. 6969.]

Amendments, see footnotes, vol. 1, pp. 157-158, vol. 6, p. 4537; historical notes, vol. 1, p. 158, vol. 9, p. 6969. vol. 21, p. 16272.

(Cross Reference)

Section 6 of the Emergency Rail Facilities Restoration Act, Pub. Law 92-591, Oct. 27, 1972, 86 Stat. 1304, which pertains to line abandonment, provides as follows:

"(a) Except as provided in subsection (b) of this section, and except for the conveyance of facilities pursuant to subsection 4(c)(3), all abandonment of facilities and services shall continue to be subject to the appropriate provisions of the Interstate Commerce Act.

"(b) The damage or destruction caused by the natural disasters of June 1972 to any railroad facility, equipment, or service therefrom, of a railroad obtaining assistance under this Act, or any action taken pursuant to this Act affecting any railroad, shall not be evidence in any proceeding before any Federal agency or in any court in which line abandonment is an issue. Any violation of this section shall be deemed to be prejudicial."

The Regional Rail Reorganization Act of 1973 [P. L. 93-236, 87 Stat. 1021, 45 U.S.C. §791] states: "The provisions of the Interstate Commerce Act (49 U.S.C. 1 et seq.) *** are inapplicable to transactions under this Act to the extent necessary to formulate and implement the final system plan whenever a provision of any such Act is inconsistent with this Act."

Notes of Decisions

Interstate Commerce and Application of Act Thereto

1. Interstate commerce defined. —[Vols. 1, 6, 9, 11-13, 15, 19].—Commission, citing *Osborne*, 306 ICC 155, and *McWilliams*, 100 F.Supp. 66, found that rail switching movements within a single State, following interstate movements by unregulated water carriers performing transportation of commodities under exemption of §303(b) of the Act, are in interstate commerce and are subject to the Commission's jurisdiction.—Monsanto Company v. Alton & So. Ry. Co., 339 I.C.C. 319 (321-3)

8. Rail-water movement partly between points in same State.—[Vols. 1, 6].—Railroads were entitled to charge interstate, rather than lower intrastate, rates on bananas that were carried in chartered vessels from tropic ports to California ports, immediately unloaded into waiting rail cars, and shipped by rail from California ports to banana wholesalers within that State. The waterborne segment was not a movement by common carrier, within §1(1), since mere continuity in transportation is not tantamount to a common "arrangement" with the connecting railroad for a continuous carriage or shipment; however, under provisions of §1(2)(a), the domestic leg of a through movement of shipments to or from a foreign country is subject to Commission regulation even though the rail portion thereof is wholly within one State. Accordingly, interstate rates are found applicable on considered shipments whether or not the waterborne movement was by private or common carrier.—Long Beach Banana Distributors, Inc. v. Atchison, T. & S.F. Ry. Co., 407 F. 2d 1173 (1177-80).

17. Continuity of movement.—[Vols. 1, 6, 9, 17, 19, 21].—See Long Beach Banana Distributors, Inc. v. Atchison, T. & S.F. Ry. Co., n. 8, above.

23. Transshipment of export or import traffic.—[Vols. 1, 6, 9, 12, 18].—See Long Beach Banana Distributors, Inv. v. Atchison, T. & S.F. Ry. Co., n. 8, above.

Foreign Commerce

51. Foreign commerce defined.—[Vols. 1, 6, 9, 15, 19].—Criteria such as form of contract, billing, and when, where, or to whom title to the goods passes are not controlling on whether the commerce is interstate, foreign, or intrastate; the key question is whether the transportation within the United States was a continuation of the movement which commenced outside the United States. Complainant's continuing intention was to have the goods moved from the European origin either to an inland U.S. customer or, if not sold, to a warehouse, and it designated the port of entry before the articles left Europe; thus, its continuing intention was to reship all inbound traffic in continuous movement, and passage of 5 days' time before removal of unsold goods to its warehouse was immaterial. And while complainant argues that it "received" the goods in the United States, the involved traffic, including shipments moving to destinations both within and beyond the State of the port of entry, was moving as a continuation of the foreign commerce and not as separate and distinct movements in domestic commerce, and the property was received from origins not located in the continental United States.—Southern States Cooperative, Inc. v. Baltimore & O. R. Co., 323 I.C.C. 400 (403-4).

52. Transportation to or from a foreign country.—[Vols. 1, 6, 9, 12, 13, 15-19, 21].—The unequivocal language and plain meaning of §1 (1) (a), as amended by the Transportation Act of 1920, confirms Commission's authority to regulate tariffs of joint rates and through routes by rail and water carriers between the United States and any foreign country, to extent that the transportation takes place within the United States. It is of no consequence that we lack power over participating carriers. Our jurisdiction over such joint rates is not diminished merely because we can issue order affecting those rates only against domestic carriers subject to our authority. See *Canada Packers*, 385 US 182.—International Joint Rates and Through Routes, 337 I.C.C. 625 (627-29).

The elimination of the word "adjacent" from the statute by the Transportation Act of 1920 broadened Commission's jurisdiction to include traffic between the United States and any foreign country. Commission's subsequent decisions to refuse to accept filing of tariffs establishing joint rates on such movements was self-imposed and unfounded.—Id., p. 628-9

Commission concluded that record herein did not show any particular need for a general rule on filing of tariffs which establish joint rates on import-export traffic between carriers subject to our jurisdiction and water carriers of foreign commerce subject to jurisdiction of the Federal Maritime Commission. Appropriate rules were adopted in the prior report, 337 ICC 625, and are affirmed. Commission reaffirms also that we have the authority to accept such tariffs for filing.—International Joint Rates and Through Routes, 341 I.C.C. 246 (247-8)*

56. Canadian traffic.—[1, 6, 9, 11-13, 17-19].—The Commission has jurisdiction over divisions of revenue received from rail single-factor volume commodity rates from Canada by United States carriers and their costs for the transportation. Such evidence is germane with respect to whether the rates are so low as to cast a burden on other traffic (compare 310 ICC 349, 351).—Sulphur, Canadian Origins to East St. Louis, Ill., 326 I.C.C. 288 (292-3).

Common carriers, and application of Act Thereto

66. Common carriers defined.—[Vols. 1, 6, 9, 11, 14, 18, 19, 21].—Commission found that terminal company that once conducted carfloat and railroad operations as agent for other carriers is itself a common carrier, inasmuch as such services were available to the general public. Agency relationship does not preclude this finding (see Brooklyn, 249 US 296) as common carriage is determined by the nature of service performed, not what a carrier calls itself.—Status of Bush Terminal, Inc., 342 I.C.C. 550 (562-65)

101. Carriers subject to the Act; generally.—[Vols. 1, 19, 21].—See Boston & Maine Corp. Discontinuance case, 324 I.C.C. 418, §13a, n. 2.

Section 1. (2) Transportation subject to regulation.—[Unchanged. See vol. 9, p. 6980, amendment, vol. 19, p. 14953.]

Amendments, see footnotes, vol. 1, p. 222, vol. 6, p. 4559; historical note, vol. 1, p. 158.

Notes of Decisions

Volume 1—p. 222; Volume 6—p. 4559; Volume 9—p. 6980; Volume 14—p. 11348; Volume 19—p. 14953.

Internal Affairs not Subject to Federal Regulation

1. In general.—[Vols. 1, 6, 19].—In action against railroad seeking refund of part of freight charges collected for rail transportation of bananas (carried to the United States from tropic ports in chartered vessels) from California ports to banana wholesalers within that State, railroads were entitled to charge interstate rather than intrastate rates for the rail movement which originated and terminated wholly within California, regardless of whether or not the bananas were brought into the United States ports by private or common carriers. Upon arrival at California ports, the bananas were immediately unloaded into waiting rail cars and moved to the wholesalers; thus, the waterborne segment was part of a through movement from a foreign country to a United States point.—Long Beach Banana Distributors, Inc. v. Atchison, T. & S.F. Ry. Co., 407 F. 2d 1173 (1177-8).

Under provisions of §1(2)(a), that the Act does not apply to transportation "wholly within one state and not shipped to or from a foreign country to or from a place in the United States, as aforesaid," the "and not" clause specifies an exception. Application of that exception would make transportation wholly within one state subject to Commission regulation, but it would not make the foreign part of a through movement subject thereto; thus, whether the foreign part of a through movement comes within "purview" of the Act is of no concern. Moreover, since phrase "as aforesaid" does not operate to limit foeign part of the total through movement to common carriage, its inclusion in the "and not" clause does not preclude application of the clause where foreign part of a through movement is by private water carrier. Accordingly, interstate rate was applicable on considered shipments whether or not the waterborne movement was by private or common carrier. Decision in Chicago, M. St. P. & P. Ry. v. Campbell River Mills Co., 53 F. 2d 69, overruled insofar as it requires a contrary result.—Id., pp. 1178-81.

3. Intrastate rates.—[Vols. 1, 6, 9, 19].—The Commission has no jurisdiction to determine applicability of purely intrastate rates; its function is to determine the applicable interstate rates and whether or not undercharges exist. As to any intrastate shipments of involved traffic, the Tennessee court, which is holding in abeyance one defendant's undercharge suit pending outcome of instant proceeding, is the proper forum for according defendants the relief they are found entitled to.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (110).

Section 1. (3)(a) Definitions.—[Unchanged. See vol. 9, p. 6982, amendment, vol. 11, p. 8963.] [54 Stat. 899.]

Amendments, see footnotes, vol. 1, p. 229, vol. 6, p. 4562; historical notes, vol. 1, p. 230, vol. 9, p. 6982.

Historical Note

Public Law 93-627, 88 Stat. 2136, states that a deepwater port and storage facilities serviced directly by such deepwater port shall be subject to regulation as a common carrier in accordance with the Interstate Commerce Act, as amended; and whenever the Secretary [of Transportation] has reason to believe that a licensee is not operating a deepwater port, any storage facility or component thereof, in compliance with its obligations as a common carrier, the Secretary shall commence an appropriate proceeding before the Interstate Commerce Commission or he shall request the Attorney General to take appropriate steps to enforce such obligation, and where appropriate, to secure the imposition of appropriate sanctions.

Notes of Decisions

Volume 1—p. 230; Volume 6—p. 4562; Volume 9—p. 6983; Volume 11—p. 8963; Volume 12—p. 10118; Volume 13—p. 10869; Volume 14—p. 11348; Volume 15—p. 11895; Volume 16—p. 12521; Volume 17—p. 13150; Volume 18—13932; Volume 19—p. 14954; Volume 21—p. 16275.

Agencies Included as Common Carriers

1. Lessors and lessees.—[Vols. 1, 9, 13, 21].—See United Transp. Union case at §1(3)(a), n. 11.

2. Receivers, trustees, fiduciaries.—[Vol. 1].—A common law business trust formed to obtain tax benefits, to acquire all outstanding stock, rail line, property and franchises of nonoperating rail carrier and to substitute itself as lessor under an outstanding 99 year lease with the operating carrier is a common carrier within the meaning of §1(3)(a) of the Act.—Pittsburgh & W. Va. R.—Pur.—Pittsburgh & W. Va. Ry. Co., 330 I.C.C. 593 (596).

Terminal Carriers

11. Wharfage and terminal companies.—[Vols. 1, 6, 9, 11, 14, 15, 18, 19, 21].—Pittsburgh & Conneaut Dock Co. (P & C), a terminal company, was found to be a common carrier under §1(3)(a). This finding was based not on the carrier's corporate charter or declared purpose but on the nature of its operations including common law concept of "holding out" its service to the public. See *Stimson*, 275 US 207, and *Bush Universal*, 342 ICC 550. P & C's services include switching, loading and unloading, storage when necessary, and actual transport of goods moving in interstate commerce with P & C equipment over track owned or leased by P & C, and thus P & C has all the necessary elements of an interstate rail carrier.—United Transp. Union v. B & L E and P & C, 342 I.C.C. 849 (855).

The fact that P & C's operations are performed pursuant to a lease agreement between affiliates does not alter applicable statutory tests nor does fact that P & C does not perform line-haul service but restricts its operations to terminal activities alter our conclusion that P & C is a common carrier. Such terminal operations are a necessary part of interstate transportation rendered by P & C and these operations are "held out" to the public as substantiated by publishing in said affiliate's tariffs of the charges for P & C's terminal services.—Id, p. 855-56

Railroad, Construed

30. "Railroad" and "railway".—[Vols. 1, 9, 19, 21].—Commission found each line involved herein to be a line of railroad, or extension thereof, as defined by criteria in *New Orleans*, 366 F. 2d. 160, especially as each line serves substantial territory, handles foreign commerce, handles traffic movements part of transportation haul from shipper to consignee, and render service to the public generally.—Missouri-Kansas—Texas R. Co. Abandonment, Okla., 338 I.C.C. 728 (748-9).

Transportation, Construed

51. Terminal and station services.—[Vols. 1, 6, 9, 14, 16].—Commission, applying standard in *Allegheny* case, 277 ICC 119, found the involved performance of carfloat, switching, classification, and delivery services as an integral part of interstate rail transportation to be that of a common carrier.—Status of Bush Terminal, Inc., 342 I.C.C. 550 (564).

Section 1. (3)(b) Control construed.[Unchanged. See vol. 11, p. 8967.]

Cross Reference

For construction of §1(3)(b), see §5(2), n. 45, 46, in volumes 12, 13, 14, 15; §20b, n. 50, Boston & M. case, v. 17.

Section 1. (4) Duty to furnish transportation and establish through routes; division of joint rates.—[Unchanged. See vol. 11, p. 8967.]

Amendments, see footnotes, vol. 1, p. 253, vol. 11, p. 8967; historical note, vol. 1, p. 253, vol. 21, p. 16276.

Notes of Decisions

Volume 1—p. 255; Volume 6—p. 4577; Volume 9—p. 6995; Volume 11—p. 8968; Volume 12—p. 10120; Volume 13—p. 10871; Volume 14—p. 11351; Volume 15—p. 11838; Volume 16—p. 12523; Volume 17—p. 13152; Volume 18—p. 13932; Volume 19—p. 14955; Volume 21—p. 16276.

Carriers to Provide and Furnish Transportation

1. General nature of duty.—[Vols. 1, 6, 9, 14, 18, 19].—Railroad, as a common carrier, is obligated to receive, carry and deliver all goods tendered to it for transportation; and, once its neglect or refusal to transport goods is shown, it must present a defense or excuse for such nonperformance. A carrier that neglects or refuses to transport goods is liable without proof of negligence unless it affirmatively proves that ensuing loss to shipper resulted from one of the causes which will ordinarily relieve it from liability for failure to fulfill its obligation. Thus, in shipper's action to recover for loss it suffered when defendant railroad discontinued service to its lumber mill, and in which railroad's defense was that tunnel cave-in (resulting in suspension of service) was an act of God, defendant had the burden of affirmatively proving that the cave-in was caused by a massive earth movement which, itself, was an act of God; that cave-in was not due to further deterioration of the tunnel; and that defendant had not been negligent in its maintenance of the tunnel.—Johnson v. Chicago, N., St. P. & P.R. Co., 400 F. 2d 968 (971-2).

Furthermore, railroad cannot be excused from failure to fulfill its duty to deliver all goods tendered, if the interference in its service could have been avoided by forethought, carrier must anticipate problems and provide against them and, in performance of its duties, it must exercise care and diligence. Accordingly, even where freight service is prevented by an act of God, or the public enemy, there must be an affirmative showing that carrier did everything in its power to carry out its absolute obligation to transport goods since, although shipper's loss due to nondelivery is caused by an act of God, or other excepted cause, there is liability on the carrier if its own negligence is so mixed with the excepted cause as to be an active or cooperating cause of the failure to perform its carrier obligation.—Id., pp. 972-4.

See also Coal, Ky., Tenn. and Va. to North Carolina, at §15(3), n. 2.

4. Jurisdiction of Commission and of courts. —[Vols. 1, 6, 13-15, 17].—Based upon views expressed by the Supreme Court in *Pennsylvania*, 242 US 208, the Commission has taken the position that enforcement of railroads' §1(4) duties, except as entrusted to us by other provisions of the statute, rests with the Courts and not with us. Complaint dismissed for lack of jurisdiction by this Commission.—Duralite Co., Inc. v. Erie Lackawanna Ry. Co., 339 I.C.C. 312 (314).

Although the Commission has limited jurisdiction to enforce the common carrier duty required by section 1(4) [Duralite Co., 339 ICC 312; U.S. v. Pennsylvania R. Co., 242 US 208], there is no jurisdictional obstacle in proceedings which also involve resolution of issues under other sections of the Act.—Cancellation of CRI & P & Soo Line Rates—Livestock, 340 I.C.C. 463 (467)*.

See also Asbury v. Chesapeake & O. Ry. Co., §8, n. 111.

For Whom Transportation to be Provided

9. Shippers.—[Vol. 1].—A shipper has the right to rail service to the point such rail service ends (herein Flexi-Flo terminals) and shipper may designate any authorized motor carrier to take delivery of lading at the terminal for ultimate distribution. Rail carriers may not deny a shipper use of its services because shipper does not desire to avail itself of so-called through route arrangements between railroad and certain "favored" motor carriers.—Mutrie Motor Transportation, Inc., Ext.-Ex-Rail, 111 I.C.C. 251 (269-70)*

What Embraced in Transportation to be Furnished

25. In general.—[Vols. 1, 6, 14, 19, 21].—In this proceeding, Commission instituted an investigation into deficiencies of railroad freight service especially as regards the failure to meet schedules, terminal delays, erratic deliveries, bunching of deliveries, and placing of cars unfit for use which were considered in some detail in *Increased Freight Rates*, 1970 and 1971, 339 ICC 125.—Investigation of Railroad Freight Service, 341 I.C.C. 1 (3-8).

Exceptions to Duty to Furnish Transportation

51. Embargoes, Power to lay—[Vols. 1, 6].—The right of carrier to determine in the first place the need for a freight embargo and to place such embargo for the proper conduct of its business is well settled. Thus, when physical deterioration of tunnel on railroad's branch line made it impossible to provide service over that branch, which plainttiff mine operator used to ship his coal to market, defendant railroad has a right to place an embargo against all freight shipments and suspend all operations over the branch line. Accordingly, in action seeking, in addition to previously denied injunction, damages for violation of the carrier's duty under §1(4), considered embargo having been lawfully invoked there are no damages to be recovered.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (312, 313).

54. Jurisdiction of the Commission.—[Vol. 1].—The validity or reasonableness of embargoes is usually for the Commission's determination; however, since plaintiff elected not to file the complaint as to considered embargo with the Commission but instead sued in court to recover damages, it could not challenge the embargo before the Commission.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (313).

55. Notices.—[Vols. 1, 12, 13, 15].—Notice of an embargo does not have to be published in the same manner as tariffs are promulgated. As was done in instant case, the carrier need only notify shipper that it is physically unable to accept future shipments.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (312-3).

Through Routes

61. In general.—[Vols. 1, 6, 9, 12, 13, 15, 17, 18, 21].—Commission held that if application of the proposed reduced proportional rate herein is restricted against use with reshipping proportionals through Chicago, Ill., the result would be the commercial closing of the competitive route taking higher rates which would violate §1(4) of the Act.—Corn and Corn Products, Illinois to Official Territory, 332 I.C.C. 485 (489-90)*.

Complainant and defendant already maintain through routes inasmuch as they publish tariffs in which they hold themselves out as maintaining such routes. See *Denver*, 351 US 321, Therefore, Commission cannot prescribe through routes.—Missouri Pac. R. Co. v. Louisiana & A. Ry. Co., 332 I.C.C. 569 (582-3)

73. Necessity for agreement.—[Vols. 1, 9, 17].—Since the Commission found that the failure of the carriers to agree on the minimum capacity of the cars to which reduced joint rates from two points would be applicable precluded shippers at those origins from competing for traffic at a third point, and further found that, in the circumstances of this case and on the record before it, that the refusal of plaintiffs to enter into reduced joint rates conditioned on the use of cars having a minimum capacity of 70-tons was unjust and unreasonable, while the refusal of defendant to join in rates applicable to cars with a capacity of less than 70-tons was lawful, the Commission properly concluded that it was the conduct of plaintiffs which had closed the routes in a commercial sense in contravention of the obligation of carriers under section 1(4) to provide reasonable facilities for the operation of through routes.—Chesapeake & O. Ry. Co. *v.* United States, 298 F. Supp. 734 (741)*.

81. Circuity.—[Vols. 1, 9, 19].—See Interpretation of Piggyback Service Regulations, at §216(c), n. 12.

Divisions

123. Reasonableness; in general.—[Vols. 1, 6, 9, 14-19, 21].—Northern lines' 1956 revenues from joint official-southern territory rates were but 6 percent of their total freight revenues, whereas southern lines' percentage was 21.4; and northern lines' share of revenue from the issue traffic was 44.64 percent, while incurring 46.35318 percent of the costs. Adjustment of existing primary divisions is therefore required to compensate the respective groups according to their expenditures in the joint effort of handling this interterritorial traffic; no affirmative reasons appear for any adjustment of the divisional basis over and above relative costs of service, on grounds of greater revenue needs, economic trends, or otherwise. Divisional mileage scales prescribed, dividing revenue in proportion to fully distributed costs, and reflecting a 3.590 percent increase in revenue accruing to the northern lines and a 2.908-percent decrease in that accruing to the southern lines, will be just, reasonable, and equitable for the future.—Official-Southern Divisions, 325 I.C.C. 1 (49-50)*.

There is no convincing showing that changed conditions warrant reversal of conclusion in 289 ICC 4 that the divisions should be uniform for service south of any given gateway and that the primary dividing points should be actual points of interchange between northern and southern lines, except that territorial border points should be used instead of points north of Ohio River in Indiana or Illinois. Revised divisions prescribed should therefore continue to be made applicable only to and from existing primary dividing points; thus, railroads assigned in entirety to southern territory for statistical purposes will continue to be treated as southern lines for service south of the border dividing points and, in accordance with geographical fact, as northern lines to extent they operate north of the primary dividing points. Under the general basis prescribed, observance of present dividing points should not result in any unjust inflation of southern lines' revenues.—Id., pp. 28-31.

There is no basis for finding that western railroads interchanging traffic directly with southern lines at points in official territory, without northern lines' participation, should be accorded the same divisions as the northern lines, absent a showing of present divisions on that traffic and the relative services performed by each group. But the revised divisional scale prescribed for the northern lines should apply to traffic interchanged between western trunklines and southern lines in which there is participation by a northern line or lines; such traffic is now subject to the general prescribed basis and is embraced in southern lines' traffic study.—Id., pp. 31-2.

124. Arbitrary allowances before prorating.—[Vols. 1, 9].—In applying scales prescribed for dividing official-southern interterritorial rates, differentials or arbitraries which are included in the joint rates so as to cause them to exceed standard rates, whether for hauls by short or weak lines or otherwise, shall be deducted before prorating and added to the share of the carrier or carriers in the territory in which the differentials apply, provided that, in case of rates on citrus fruit from Florida to official territory which include an arbitrary, one percentage point shall be deducted from the northern division and added to the southern division in lieu of specific apportionment of the arbitrary.—Official-Southern Divisions, 325 I.C.C. 1 (52-3)*.

Northern railroads introduced no specific evidence in support of their request for exclusion of per-car rates on vegetables from the South to New York City from the general divisional basis prescribed and for application thereto of a special provision that the excess of $57 per car in the New York City rates over those to Jersey City continue to accrue to the delivering lines before prorating. Moreover, the per-car rates were found unlawful in 321 ICC 738, but the Commission's order requiring removal of the unlawfulness was restrained and the matter is now being litigated in the courts. In the circumstances the relief requested does not appear appropriate and is denied.—Id., p. 35.

126. Elements considered affecting reasonableness.—[Vols. 1, 6, 9, 11, 14-17, 19, 21].—Commission order prescribing new divisions of joint rail rates on traffic between official and southern territories, on finding that (based on relative costs of the service as between the groups of carriers) northern lines' higher costs warranted an increased share of the revenues, is not supported by substantial evidence and reasoned findings when, though divisions in issue pertain only to north-south traffic, costs of that traffic are not isolated in the findings. Having stated that its standard for resolving question of the divisions was the relevant costs of handling specific traffic to which they apply, the Commission relied on Rail Form A territorial costs as reflecting northern lines' higher costs on north-south traffic without any adjustment relevant to that traffic. District court judgment that use of the unadjusted territorial average costs could not be consistent with statutory requirements for precise and relevant findings without any evidence relating such average costs to the north-south traffic, and remanding cause for further proceedings, affirmed as modified.—Baltimore & O. R. Co. v. Aberdeen & R.R. Co., 393 U.S. 87 (89-92, 96)*.

No adjustment of present official-southern divisions of interterritorial rates is required as result of competition from other modes of transport. Factors concerning motor and water competition, including truck registration, highway construction, truck versus rail tonnage, revenues, and ton-mile revenue, waterborne diversions, and competitive rate reductions are not shown to have a measurably greater effect on one group of railroads as against the other on interterritorial traffic. However, inequities shown to result from differences in cost of service warrant prescription of a revised divisional basis for the future.—Official-Southern Divisions, 325 I.C.C. 1 (16, 28)*.

127. Public interest.—[Vols. 1, 6, 9, 11, 21].—The public interest must be considered in determining lawfulness of divisions of official-southern interterritorial rates, and importance to the public of the railroads' transportation services is not a sectional concept; the Commission is required under the Act to preserve an adequate national transportation system and must therefore consider the public interest of all concerned. However, such consideration does not require uniformity of divisions, and no affirmative virtue in uniform divisions of official-southern freight rates appears of record. Moreover, §15(6) was designed to help the weak by preventing needed revenue from passing to more prosperous connections, and adherence to uniformity as such, without a careful evaluation of the statutory criteria and the evidence of record, would hardly result in fixing just, reasonable, and equitable divisions. Although there are no differences in importance to the public as between northern and southern lines, inequities in present divisions due to relative costs of service are manifest, and divisions correcting them can result in no unlawful injury to the South.—Official-Southern Divisions, 325 I.C.C. 1 (27-8)*.

128. Efficiency and economy of carrier.—[Vols, 1, 6, 9, 11, 15, 16, 21].—Though southern lines argue that, because of greater traffic density in the North than in the South, unit costs shown in Rail Form A for northern lines for recent years should be lower than for the southern lines, and contend that cost savings are available to the northern lines through elimination of excess and duplicate facilities, many factors other than density affect operating expenses of a group of railroads, and northern roads, including the larger ones, are shown to be in process of eliminating unnecessary facilities and services. And though southern lines question wisdom of northern lines' use of available funds to reduce debt instead of making capital improvements in their transportation plant, evidence shows that the northern lines exercised their best managerial judgment, when faced with rising debt, in dealing with problems affecting cost of service at time they were encountered; giving effect to criticism of such action is not warranted.—Official-Southern Divisions, 325 I.C.C. 1 (17)*.

Nor is there a basis for criticizing southern lines' judgment in expanding and developing their operations. Record does not establish that northern lines' costs of service are overstated relative to those of southern lines as result of differences in timing of their modernization programs, or that their costs are affected by asserted waste or inefficiency. And while savings expected from mergers and consolidations proposed or going forward in both territories are not reflected in the cost studies, they are not ascertainable for future operations to the degree required for any specific adjustment of the costs shown of record, but will be reflected in unit costs if and when such transactions are ultimately approved and consummated. Both groups of carriers are being operated efficiently and neither should be considered more or less efficient than the other.—Id., pp. 17-8.

129. Originating, intermediate, or delivering carriers.—[1, 6, 9, 11, 12, 14, 15, 16, 21].—The Commission is required by §15(6) to consider whether any participating carrier is an originating, intermediate, or delivering line, and has frequently found that intermediate carriers having no service to perform in originating or delivering shipments are for that reason entitled to a lesser proportion of joint rates. Though northern lines urge that, because of circumstances peculiar in part to New England territory such as lower traffic density, higher level of costs, multiline hauls north of the gateways, and lower rates of return, Canadian-northern Maine traffic should not be excepted from the general basis prescribed for official-southern divisions, the facts establish that on most of such traffic moving to or from the South the northern lines perform purely intermediate service with no terminal service involved. In the circumstances the intermediate scale of divisions prescribed in ultimate finding 3, modified to exclude any allowance for terminal service, will be just, reasonable, and equitable for the future on Canadian-northern Maine traffic.—Official-Southern Divisions, 325 I.C.C. 1 (33-4)*.

Although Norfolk Southern has in the past been classed as a weak line, and the general divisional basis prescribed will result in some reduction of its revenues on traffic in which it participates as an intermediate carrier, such reductions do not appear excessive, and no circumstances are shown differentiating that traffic from traffic interchanged with other intermediate lines. Moreover, revenue accruing to Norfolk Southern on such traffic is a matter of subdivisions, which are not in issue and should not be made subject to a special basis.—Id., pp. 39-40.

Traffic originated and terminated by Norfolk Southern and moved to or from official territory on northern lines, except that moving via Norfolk, also presents a subdivisional question, but record demonstrates that it cannot afford the substantial loss of revenue (especially on Norfolk gateway traffic) which would result from application of general divisional basis prescribed. Norfolk Southern originates and terminates traffic of significant importance to itself, other carriers, and the shipping public; and prescribed divisional scale, based on southern lines' study which excluded that carrier, would have an unjust and unwarranted impact on it to a degree not permitted by holdings in 265 US 274 and 225 F. Supp. 584. Therefore, special scale of divisional factors is prescribed for Norfolk Southern's traffic interchanged at Norfolk which will give it about the same revenue therefrom as it now enjoys and maintain its relative position compared with other southern lines. All its other traffic will be subject to prescribed general basis of divisions.—Id., pp. 44-5; on reconsideration, and upon northern lines' consent, each prorating factor in the special scale of divisions is increased.—Id., 325 I.C.C. 449 (451-2)*.

131. Financial needs of carriers.—[Vols. 1, 6, 9, 11, 12, 15-19, 21].—In every divisions case evidence relating to revenue need is material because §15(6) requires due consideration to be given to the amount needed to pay the carriers' respective operating expenses, taxes, and a fair return on their railway property held for and used in transportation service. The Commission is thereby authorized to give due weight to revenues from all transportation service, the operating expenses and taxes chargeable thereto, and the amounts available as compensation for use of all carrier property, as well as the revenues, expenses, taxes, and returns attributable to the service covered by the divisions under consideration; and it is free to give such evidence the weight which the particular circumstances appear to justify. Prescription of primary divisions of official-southern interterritorial rates based on relative costs, including allowances for overhead and return, reflects a due proportion of the burden of maintaining the financial integrity and credit of both northern and southern lines, and no present justification appears for favoring one group over the other on ground of greater revenue need.—Official-Southern Divisions, 325 I.C.C. 1 (49)*.

However, application of the prescribed general divisional basis to traffic originated or terminated by Norfolk Southern, especially that interchanged with northern lines at Norfolk gateway, would result in such substantial loss of revenue as to create substantial operating deficits. Norfolk Southern is shown to be in pressing need of sufficient revenues to improve its physical plant and provide additional rolling equipment, and determination of its divisions on its Norfolk gateway traffic on the general basis prescribed would consign it to a deficit position so serious as to impair its rendition of adequate and continuous service to the public. This special situation justifies prescription of increased divisional factors for that traffic that will give it approximately the same total revenue therefrom as it now enjoys.—Id., pp. 42, 44; on reconsideration, each factor in the special scale of divisions is increased, upon consent of the northern lines.—Id., 325 I.C.C. 449 (451-2)*.

134. Cost of service.—[Vols. 1, 6, 9, 11, 12, 14-17, 19, 21].—Order prescribing new divisions of Official-Southern joint rail rates, on finding that northern lines' higher costs of handling the traffic justified a larger share of the revenues, was not based on reasoned findings or supported by substantial evidence when the Commission, having stated that sole standard for new divisions was relevant costs of handling the north-south traffic involved, relied on unadjusted Rail Form A average costs of the two groups of railroads on all traffic handled in their respective territories as reflecting the higher costs of northern lines. The Commission's judgment on subject of transport economics is entitled to great weight; appraisal of cost figures is a task for experts and, unlike a mathematical problem, it cannot be precisely right or wrong. However, the Rail Form A formula was designed to measure the cost of handling all traffic in two or more territories, and cannot appropriately be accepted without further evidence of mechanical application to particular segments of traffic in a divisions case.—Aberdeen & R. R. Co. v. United States, 270 F. Supp. 695 (707, 709-10)*.

Following establishment of the uniform scale of class rates, the Commission prescribed divisions of Official-Southern joint rates on an equal factor basis and, while it is not perpetually bound by that decision, it has a special responsibility in a case of the magnitude of instant proceeding when it departs from its prior findings. There can be no doubt as to the Commission's statutory powers to require development of adequate and comparable cost data; and it has a duty to use those powers to obtain the cost evidence deemed necessary to assure an adequate record. That duty was violated when the Commission failed to take affirmative action to require development of an adequate record as to actual costs of handling the specific north-south involved, and merely relied on unadjusted territorial averages to reflect the average cost of that traffic.—Id., pp. 710-12.

Overall territorial averages can and should be considered in determining equitable divisions of joint rates on specific traffic, but as to specific important cost items the Commission should not wholly and exclusively rely on such averages. The Commission's conclusions as to northern lines' higher costs of handling the north-south traffic, based on its use of territorial averages on such important items as suburban commuter passenger service deficits, box car empty return ratios, and switching costs, are not supported by reasoned findings and based on substantial evidence of record. Order set aside and the case remanded to the Commission for further study, explicit development of adequate and comparable evidence respecting costs on specific traffic in issue, and further proceedings consistent with the court's opinion.—Id., pp. 709-10, 712-13.

136. Mileage; mileage prorates.—[Vols. 1, 6, 9, 11, 14, 15, 16, 17, 19].—New evidence adduced on further hearing supports southern lines' contention that existing scale for dividing official-southern interterritorial rates is unfair to them, since they have the longer average hauls, and is defective in that (1) it contains an excessive allowance for short hauls; (2) its progression unlawfully depresses revenue of the long-haul carriers; (3) value of each 50-mile block reflects services not performed because of application of the scale to the upper limit of the block; and (4) value of the initial mileage block is excessive. Accordingly, and in light of finding that equitable divisions should be based on relative costs of service, the general divisional factors are revised to reflect warranted adjustments; resulting scales give adequate consideration to terminal, way train, through train, and interchange costs incurred for the respective lengths of haul, and the factor for each 50-mile block is computed at the midpoint of the block.—Official-Southern Divisions, 325 I.C.C. 1 (39)*.

Retention of the 15-percent minimum division applicable to the present scale is not warranted, since a proper divisional scale reflects full credit for the services performed, including terminal and interchange services. The prorating factors prescribed give full credit for terminal costs, thus protecting the very-short-haul carriers which perform principally originating or terminating service. Unlike the existing scale, which is weighted in favor of the very short haul, the scale prescribed, reflecting the cost and service involved, gives each type of haul its proper share and no special protection for short hauls is warranted.—Id., p. 38.

141. Contracts of carriers,—[1, 6, 15, 18, 19, 21].—Although the principal northern lines that originally participated in a pooling agreement with southern lines (including Norfolk Southern) providing for distribution of annual net loss or gain realized in furnishing protective service have withdrawn from the arrangement, and as a result Norfolk Southern estimates it is losing an average of $49 on each originated car of fruits and vegetables given protective service, its request that the prorating divisional factor prescribed for its originated and terminated traffic interchanged with northern lines at Norfolk be increased 4 percentage points as a temporary measure until the pooling situation is adjusted cannot be granted, since it would penalize the carriers for withdrawing from the agreement, despite the permissive character of the order approving it.—Official-Southern Divisions, 325 I.C.C. 1 (45-6)*

148. Contracts fixing divisions.—[1, 6, 9, 15].—Although divisional mileage scales prescribed for primary divisions of official-southern interterritorial rates will be just, reasonable, and equitable for the future, the parties are free to negotiate and agree upon any other modified scales, devised on same basis but with different mileage blocks and factors, or pursuant to any other method they may deem appropriate. However, should they fail to reach agreement before effective date of the Commission's order, the scales set forth in appendix C are prescribed to apply thereafter.—Official-Southern Divisions, 325 I.C.C. 1 (51)*.

Section 1. (5) Just and reasonable charges.—[Unchanged. See vol. 11, p. 8973, vol. 15, p. 11901].

Amendments, see footnotes, vol. 1, p. 307, vol. 6, p. 4596, vol. 11, p. 8973; historical note, vol. 1, p. 307; vol. 21, p. 16287.

Notes of Decisions

Volume 1—p. 313; Volume 6—p. 4596; Volume 9—p. 7008; Volume 11—p. 8973; Volume 12—p. 10122; Volume 13—p. 10872; Volume 14—p. 11354; Volume 15—p. 11901; Volume 16—p. 12528; Volume 17—p. 13156; Volume 18—p. 13936; Volume 19—p. 14959; Volume 21—p. 16287.

In General—Definitions

2. Carrier's right to initiate rates.—[Vols. 1, 6, 9, 11-19, 21].—Since the mandatory rate-break rule established by orders entered in 1934 and 1936 runs contrary to the freedom of the railroads to negotiate and establish rates to meet the needs of the shipping public, and the action taken in the instant proceeding does not alter a single existing freight rate, the orders were vacated and set aside to the extent that they require observance of rate-break combinations and of proportional rates therein prescribed as the exclusive basis of charges on shipments of grain and grain products at points from which proportional rates are applicable.—Rate Structure Investigation, Part 7, 329 I.C.C. 824 (845)*.

22. Flexible limits of judgement in determining reasonableness.—[Vols. 1, 6, 9, 11, 12, 14, 15, 21].—While rates which exceed out-of-pocket costs by only slight margins have been approved when required by special circumstances, the Commission has never taken the view that any particular margin must be set. Logic dictates that each rate must be judged in light of the facts and circumstances surrounding it. Furthermore, the level of a rate is essentially a matter for managerial discretion. There is no magic formula to insure the automatic approval or disapproval of any specific rate.—Sea-Land Service, Inc., v. New York Central R. Co., 329 I.C.C. 589 (596).

Test of Reasonableness

23. In general.—[Vols. 1, 6, 9, 11, 12, 15-19, 21].—Though the Commission found that rate structure on soybeans from southern Illinois to Chicago, for export, was just and reasonable and not otherwise unlawful, so long as rate to Chicago was no higher than that to New Orleans, the reports failed to set forth any criteria, findings or supporting rationale for its conclusions other than to find that Chicago was not competitively disadvantaged by such rates. At best, considered rates have little relation to services and distances involved; and, while the Commission urges that export rates should be fixed so as to encourage port competition, it is clear that competition between Chicago and New Orleans for the traffic is affected by many factors other than rail rates; but no evidence of record shows the basis for concluding that approved rate structure will encourage, or result in greater, competition between those ports. While there may be a sound economic basis therefor, The Commission failed to make adequate findings to justify its conclusion that rates evincing as much as a 2-percent differential between the two ports are reasonable in light of all relevant factors; case remanded for further proceedings consistent with the court's opinion.—City of Chicago v. United States, 291 F. Supp. 858 (860-63)*.

Proposed rates on phonograph records and jackets from Richmond, Ind. to indicated destinations found just and reasonable as such rates are shown to exceed out-of-pocket costs, allow proponent Railway Express to obtain a portion of such traffic, and will benefit the public generally.—Phonograph Records-REA-Richmond, Ind., to U.S. Points, 329 I.C.C. 391 (396).

Assailed combination through rates on clay or shale cinders from Erwinville, La., to southern territory destinations found unjust and unreasonable as the cost data submitted by defendant railroads was defective, as specified herein, and not determinative of this issue in the face of probative prima facie showing of unreasonableness and unlawfulness of such rates.—Big River Industries, Inc. v. Aberdeen & R. R. Co., 329 I.C.C. 539 (541-4)*.

Increased refrigeration charges on perishable freight authorized although they exceed the level of previously authorized increases on such freight. Commission found that no inference can be drawn from such a condition as to reasonableness of rates but must be based on the evidence of record in support of a particular proposal.—Charges for Protective Service to Perishable Freight, 332 I.C.C. 136 (151)*.

Commission found proposed rates per car to be unjust and unreasonable because they were based on impractical load projections made by respondents. Shippers and receivers would be forced to revamp their entire producing, packaging, and marketing practices in order to accommodate carriers' desire to use one type of car with a standard size load. The costly burden thus imposed on shippers and receivers, and consequently the general public, would be too great to warrant our approval of these schedules.—Vegetables & Melons Bet. W. & Southwest, Midwest & S., 341 I.C.C. 597 (613-16)

Proposed rates based on the size of car furnished to shipper not shown just and reasonable. Respondents failed to provide, in accordance with rule 66(a) of our Tariff Circular No. 20 that if a car larger than the one ordered were furnished, the charge for the car ordered would apply. It is manifestly not equitable or proper to require a shipper to pay additional transportation charges for the use of a car of different dimensions or capacity from that which would suit his shipments. Schedules ordered canceled.—Citrus Fruits, Ariz. and Calif. to Eastern States, 341 I.C.C. 622 (632)

24. Determination not matter of formulas or rules.—[Vols. 1, 6, 9, 11, 16, 17, 21].—Reasonableness of rates should not be determined by unalterable statistical computations.—Baltimore & O. R. Co. v. Chicago & E. I. R. Co., 322 I.C.C. 572 (574)*.

25. Method or basis of construction.—[Vols. 1, 6, 9, 11-19, 21].—Shipment consigned to a warehouse putatively located in Williamsburg, Va., was delivered to the appropriate warehouse which is actually located in Penniman, 2 miles farther than Williamsburg. The rate to Penniman was 19 cents more than to Williamsburg, and complainants were charged the Penniman rate. Although the Commission determined that the applicable rate was charged, the rate was held to be unjust and unreasonable, because: (1) no specific proof of record that competitive situation is different at Penniman than at other points in the same general area taking lower rates; (2) subsequent reduction of the Penniman rate to the lower level is a factor, among others, tending to show that the prior basis exceeded a maximum reasonable level; and (3) the defendants were not guilty of misrouting, because, in spite of ambiguous routing instructions, delivery was made to the warehouse of consignment.—Cardinal Meat Co. v. Colo. & Southern Ry. Co., 329 I.C.C. 622 (623-5)*.

Analysis of reasonableness of proposed revised fare structure on interstate passenger service on New Haven Division of respondent railroad must begin with the basic, single-trip, one-way fare and not with an estimated apportionment of prices of monthly tickets and must be compared with fares charged for substantially similar traffic. Protestants' theoretical, alternate structures for fares provide no basis for finding of unreasonableness herein.—Penn Central Fare Revision—1969, 335 I.C.C. 720 (730, 736)

28. Reasonableness relatively.—[Vols. 1, 6, 9, 11-19, 21].—Complaint alleging unreasonableness of rates on grain from central territory to interior group points in trunkline territory because they bear higher percentage relations to rates on grain to New York City key group than percentage relations of corresponding first-class rates does not assail the quantum of the rates per se and concerns relative reasonableness solely. However, the Commission has held in 264 ICC 593 and 321 ICC 519 that relative unreasonableness may not be considered under §1; and while relative reasonableness may be a consideration in retaining an existing rate relationship, it is not a basis for destroying relationship of longstanding groups, as would occur if complainant were to succeed. Complaint dismissed.—Cooperative Grange League Fed. Exc. v. Akron, C. & Y. R. Co., 323 I.C.C. 174 (178).

Complainant's allegation that the milling-in-transit charge assessed against it at Indianapolis and not assessed against shippers at points west of the Illinois-Indiana border is relatively unreasonable is without merit since relative unreasonableness cannot be considered under § 1.—National Starch & Chemical Corp., v. A., T. & S. F. Ry., 325 I.C.C. 658.

The Commission has generally declined to consider under §1(5) the concept of relative unreasonableness of rates in relation to their effect on market competition. Complainant's contention that the 67-cent rate to East St. Louis and St. Louis from points in Canada is too high in comparison with the 57.5-cent rate applying from the same origins to Chicago, resulting in undue prejudice to complainant and undue preference of its competitors in the Chicago area, is to be considered under §2 or §3, not §1 (321 ICC 519, 545).—Sulphur, Canadian Origins to East St. Louis, Ill., 326 I.C.C. 288 (289, 304-5).

Profit to the Carrier

51. Consideration given value of property.—[Vols. 1, 6, 9, 11, 13, 21].—Though out-of-pocket costs determined under Rail Form A formula include a return of 4 percent on all investment in freight equipment and one-half of investment in road properties assigned to freight service, reasonableness of rates should not be determined by unalterable statistical computations. Since investment in property and equipment will be incurred whether or not particular traffic moves, amount of such expenditures properly allocable to various costs should be determined on the circumstances surrounding movement of the considered traffic. When defendant earned no return on investment during the study year, and assailed proportional rate has been in effect some 10 years, the rate should not be condemned on mere showing that it barely fails to cover estimated out-of-pocket costs determined by rigid application of statistical cost formulas. Allowance for return on investment is therefore excluded from recomputation of defendant's costs on involved traffic.—Baltimore & O. R. Co. v. Chicago & E.I. R. Co., 322 I.C.C. 572 (574-5)*.

Cost of Service

72. Applied specifically.—[Vols. 1, 6, 9, 11, 12, 14-16, 18, 19, 21].—As stated in 259 ICC 475, 538, when the lawfulness of rates is under attack on the ground that they are lower than a minimum reasonable basis, whether the rates are reasonably compensatory is an important element to be considered. Rates in question not found to be a burden on other traffic where the actual divisions received by the United States carriers exceed their costs for performing the service.—Sulphur, Canadian Origins to East St. Louis, Ill., 326 I.C.C. 288 (298).

78. Costs related to particular rates or set of rates.—[Vols. 1, 6, 11, 12, 18, 19, 21].—Assailed rates on sugar from western producing points to central territory destinations are compensatory when, on complainants' own cost evidence, they exceed out-of-pocket costs in all instances and in a few exceed fully distributed costs, even including expense of transit where accorded sugar beets.—American Sugar Refining Co. v. Ahnapee & W. Ry. Co., 322 I.C.C. 717 (722).

80. Rates below cost of service.—[Vols. 1, 11, 19, 21].—While certain of proposed reduced incentive package wine rates would be below restated out-of-pocket costs, they were approved when most of considered incentive package and bulk rates on wine (proposed to enable western shippers to compete in eastern markets) were compensatory; all the proposed rates would alternate with corresponding present rates; and, since proposed below out-of-pocket cost rates would yield greater revenue than corresponding present rates, they would serve to reduce revenue burden on respondents' operations under the corresponding present rates.—Wine, Pacific Coast to East, 326 I.C.C. 119 (136-9, 156)*.

Proposed rates, to extent they apply on soybeans in boxcars subject to 100,000 pounds minimum weight, would fall below current variable cost levels and are thus not compensatory and not shown just and reasonable. However, rates applying on wheat, 120,000 pounds minimum weight, and soybeans and wheat, 180,000 pounds minimum weight, exceed variable costs by margin sufficient to indicate that they would be compensatory and they are approved.—Soybeans & Wheat, Ark. & La. to La. Ports, 341 I.C.C. 898 (902)

81. Wages, taxes, and interest.—[Vols. 9, 11, 19, 21].—Although petitioner-respondent railroads' evidence as to wages and wage-related items are so overstated as to bring all evidence into doubt, the Commission finds that cost increases in the constructive year 1967 will substantially approximate the aggregate rate increases authorized herein. Increased freight rates authorized on an interim basis found just and reasonable.—Increased Freight Rates, 1967, 332 I.C.C. 280 (287-88)*.

Taxes: See also Baltimore & O. R. Co. v. Chicago & E.I.R. Co., n. 85 below.

What Constitutes Cost of Service

85. Out-of-pocket cost.—[Vols. 1, 6, 9, 11-19, 21].—Although Rail Form A formula for determining out-of-pocket costs includes a return of 4 percent on all investment in freight equipment and one-half of investment in road property assigned to freight service, computed after allowance for Federal income taxes, defendant did not earn any return on investment in the study year, and assailed proportional rate has been in effect some 10 years; in the circumstances, the rate should not be condemned merely because it barely fails to cover out-of-pocket costs determined by rigid application of statistical cost formulas. Defendant's composite out-of-pocket costs on considered coal traffic, recomputed to exclude allowance for Federal income taxes and return on investment, are 22.33 cents per ton below the assailed rate, which is therefore reasonably compensatory. Such treatment of costs is in harmony with precedents established in 318 ICC 371 and cases cited therein.—Baltimore & O. R. Co. v. Chicago & E.I. R. Co., 322 I.C.C. 572 (574-5, 576-7)*. [But see dissent.]

Complainant shipper's contention that out-of-pocket rather than fully distributed costs are meaningful in determining maximum reasonable rates on iron ore from Pilot Knob, Mo., to Granite City, Ill., is fallacious as it wrongfully assumes that the defendant railroads are not entitled to compensation for their fixed costs as well as to a reasonable profit.—The Hanna Mining Co. v. Missouri Pac. R. Co., 332 I.C.C. 166 (170).

Ascertainment of Cost

90. Principles involved, generally.—[Vols. 1, 6, 9, 11-14, 17-19, 21].—Cost data presented to justify proposed new or increased per-car transit charges should cover various commodities moving varying distances in different territories with different size transit points. Since carloads contain mixtures of transited and nontransited goods, or mixtures of goods subject to various transit charges, or no charges at all respondent railroads should have submitted a sampling of through traffic to draw a cost-to-revenue comparison for traffic on which line-haul rates are presumed to cover transit.—Transit Charges, USA, 339 I.C.C. 45 (58).

94.—Localization of items to particular service costs.—[Vols. 1, 6, 9, 12-15, 16, 17, 19, 21].—In restatement of costs of transporting wheat and flour from midwestern and southwestern origins to gulf ports for export, respondents' determinations are generally accepted as the most reliable; protestants' higher cost figures are due primarily to use of relatively higher factors for switching at country origins and transit stations and for clerical costs and freight-train expense for car detention at country origins, which were obtained from studies submitted in another proceeding involving interterritorial domestic movements of all grain and products from entire western territory; application of such studies to considered traffic, without elimination of traffic of railroads not parties to instant proceeding, does not provide significant cost computations.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (603).

95.—Apportionment of joint costs; system average costs.—[Vols. 1, 6, 9, 11, 13, 15-19, 21].—Upon further investigation in this general revenue proceeding, Commission found that territorial average costs used by respondent railroads are not determinative of the precise costs of particular movements and are not sufficient, standing alone, to show additional increases just and reasonable.—

Increased Freight Rates, 1967, 332 I.C.C. 280 (296)*.

Distance as Measure of Cost

104. Distance, computation; circuity.—[Vol. 21].—Circuity factor of 43.5 percent used by protestants in computing cost of transporting wheat and flour from midwestern and southwestern origins to gulf ports for export is based on movements from Santa Fe origins only and therefore would not be representative even if accurately derived; that factor was obtained from data for traffic not subject to limited transit and restricted off-line movements authorized under the proposed rates. Respondents' method of increasing the docket 28300 distances by 13 percent is a more acceptable measurement of line-haul miles.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (603).

Cost of Particular Services

120. Special equipment required.—[Vols. 1, 6, 11, 13, 14, 19, 21].—If railroads, in meeting their statutory service obligations, are required to make substantial investments in building specially equipped cars, the shippers should not be permitted to use either carriers' cars or their own. Railroads are entitled to assurance of a chance to recoup money they are forced to invest and, when obliged to provide special equipment, that fact is weighed in fixing their charges; thus, ordinarily, the per diem car rental charge included in cost data (on which rates are based) is the same whether shipper uses carriers', or his own equipment. In Commission case under review, however, large investment in multilevel cars specially designed for transporting boats was made by protesting shippers; and plaintiffs (rail respondents) have made no investment which must be protected by increased charges (based on costs of moving boats on carrier-owned cars) on movements for shippers who use their own cars. Since plaintiffs were seeking to recoup costs which they never expended, and there is precedent for lower rates to reflect shipper supplied equipment, the Commission did not err in finding that railroads failed to prove that proposed rates would be just and reasonable.—Southern Pacific Co. v. United States, 298 F. Supp. 971 (973-4)*.

124.—Switching.—[Vols. 1, 6, 9, 11, 12, 14, 15, 18, 19, 21].—While there are weaknesses in cost evidence supporting proposed flat general increases in charges for intraterminal, interterminal, and intraplant switching, this is due at least partly to inherent difficulty of isolating actual costs in a proposal of nationwide scope. Even with increases sought, the charges generally are on the out-of-pocket level and do not appear to exceed a maximum reasonable leavel.—Increased Switching Charges, 322 I.C.C. 560 (563)*.

125.—Refrigeration.—[Vols. 1, 6, 9, 11, 12, 14, 17, 19].—Increased refrigeration charges on perishable freight found justified as petitioner Louisville & Nashville R. Co. has shown that total revenues from line-haul rates and the protective charges fail to cover total cost of handling such freight by more than $120,000. Proposed increased charges will reduce petitioner's overall loss thereby casting less burden on other traffic.—Charges for Protective Service to Perishable Freight, 332 I.C.C. 136 (146-51)*.

Grade and State or Condition of Commodity

192. Raw vs. finished or partially finished products.—[Vols. 1, 6, 9, 12, 13, 15-19, 21].—Though historically wheat and flour have taken the same rail rates, and in fixing maximum reasonable rates the Commission has prescribed the same basis for both, where railroads have reduced rates to meet competition of other modes lower rates have been approved on wheat than on flour for similar movements. Though the handicap of a 10-cent difference in rates that would result from approval only of proposed barge-and-truck-competitive export rates on wheat to gulf ports (like rates on flour being found to violate §3), when coupled with the 7-cent port handling charge on flour, could well operate to restrict exportation of commercial flour, the significant factor is that the present rates on flour are below the maximum basis fixed by the Commission and above a reasonable minimum level. Before the Commission may properly find rates on flour unreasonable to extent they exceed those for like movements of wheat, a clear showing that transportation factors affecting rail movement of both are identical or sufficiently similar to require application of the same rates is essential; no such showing has been made.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (605).

193.—Raw material not entitled to lower rate as of right.—[Vols. 1, 9, 11, 16, 17].—See Matthiessen & Hegeler Zinc Co. case, n. 250, below.

Comparison of Rates

210. In general.—[Vols. 1, 6, 9, 11, 13-19, 21].—Where complainant's shipment moved over nontariff routes because of clearance difficulties, shipper is still entitled to a reasonable rate over the route used. In such a case, the Commission is not called upon to establish a new route, but rather to determine what was a reasonable rate over the route used. In determining the reasonableness of the assailed rate, therefore, the routing restrictions do not affect the validity of the rate comparisons offered by complainant.—Westinghouse Electric Corp. v. Pennsylvania R. Co., 323 I.C.C. 503 (506)*.

As stated in 276 ICC 621, 626, what constitutes a minimum reasonable rate is a matter to be determined in the light of the facts of record in each proceeding. Mileages over tariff routes from the Alberta origins are greater in a number of instances than corresponding mileages from southwestern origins to the same destination. The applicable rate is 57.5 cents from both groups of origins. Some variations in distances are usual when rates are established on a group to group basis. Moreover, as stated in 310 ICC 408, 410: "Where market competition is a factor, carriers may provide rates from competing origins which ignore, to some extent, relative distances."—Sulphur, Canadian Origins to East St. Louis, Ill., 326 I.C.C. 288 (299-300). See also same case under n. 303, below.

Complainant shipper's contention that c.l. rates on silica sand, from Guion, Ark. to Southeastern points are unjust and also unreasonable found not proven. Complainant's rate comparisons do not sustain burden of proof as the assailed rates are already below compared opposite direction and Commission prescribed rates; comparison with intraterritorial rates ignores different operating conditions; and comparison with rates on quick lime ignores factor of competitive depression.—Silica Products Co., Inc. v. Gulf, M. & O. R. Co., 329 I.C.C. 181 (183-7)

Earnings Compared

211. Comparisons of earnings.—[Vols. 1, 6, 9, 12, 13, 15-19, 21].—Comparison of assailed rates on feed and industrial grade ureas, and earnings thereunder based on average loading of all shipments combined, with rates and earnings on fertilizer grade urea based on the minimum weight was improper when the assailed rates were subject to three different minimum weights. Minimum weights published in connection with rates are a part thereof, and both must be considered together in determining their reasonableness.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (110-11).

Since earnings on all commodities except animals and animal products exceed those on grain and grain products, present rates on grain cannot be said in general to exceed a reasonable maximum level.—Cooperative Grange League Fed. Exc. v. Akron, C. & Y. R. Co., 323 I.C.C. 174 (177).

213. Car-mile earnings compared.—[Vols. 1, 6, 9, 11, 12, 15-18, 21].—Establishment of assailed proportional rate on ex-river coal from Mount Vernon, Ind., to Chicago district was influenced by defendant's participation in the traffic then moving under joint all-rail rates from eastern Kentucky via Evansville, Ind. Considering the level of defendant's division for the haul from Evansville to destinations served by it, the proximity of Evansville to Mount Vernon as related to the distance from Mount Vernon to Chicago, and car-mile earnings realized under that division, the car-mile earnings of 46.60 cents a ton under the assailed proportional appear amply remunerative.—Baltimore & O. R. Co. v. Chicago & E.I. R. Co., 322 I.C.C. 572 (576)*.

Similarity of Services and Circumstances

221.—Rates over other routes.—[Vols. 1, 6, 9, 11, 12, 14-19, 21].—Multiple-carload rates on iron ore from Pilot Knob, Mo. to Granite City, Ill. found just, reasonable, and otherwise lawful. Defendant railroads' analysis of probable time factors, services, and costs is based on testimony of witnesses familiar with comparable movements over other routes of their lines. Complainant's analysis is unacceptable as it includes no significant allowances for contingencies and delays that inevitably occur in actual operation.—The Hanna Mining Co. v. Missouri Pac. R. Co., 332 I.C.C. 166 (170-1)

See also Westinghouse Electric Corp. v. Pennsylvania R. Co., n. 227, below.

223. Differences in rates warranted when transportation conditions dissimilar.—[Vols. 1, 6, 9, 11-19, 21].—Complainant's allegation of unreasonableness is based entirely on the premise of similarity in the transportation characteristics of freight trailers and farm trailers. A comparison of these characteristics, set forth herein, proves complainant's premise clearly erroneous. Assailed rates on freight trailers not shown unjust or unreasonable or otherwise unlawful.—United States v. Union Pac. R. Co., 341 I.C.C. 22 (26-27)

225. Comparisons not showing circumstances of compared rates, of little value.—[Vols. 1, 6, 9, 12-19, 21].—Comparison of applicable rates and earnings on feed and industrial ureas with those on chemicals and such products as crude rubber, woodpulp, sugar, and plastics have little value when neither volume of traffic moving under the compared rates nor conditions of their establishment are shown, there is no showing that the compared commodities have transportation characteristics like those of urea, and their value, to extent shown, is considerably higher than that of urea.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (112).

227.—Operating difficulties considered.—[Vols. 1, 6, 9, 12, 18, 21].—The fact that complainant's shipments required special care and handling does not remove them from the dictates of the Bucyrus-Erie line of cases. Had the traffic moved over normal tariff routes, the same type of special care and handling would have been provided by the defendants at the $3.85 joint commodity rate or the $4.14 joint class rate. Moreover, many of the services were provided while the shipments were moving over portions of the normal tariff routes.—Westinghouse Electric Corp. v. Pennsylvania R. Co., 323 I.C.C. 503 (506)*.

228. Depressed or subnormal rates.—[Vols. 1, 6, 9, 11-19, 21].—Applicable rates on shipments of poles and piling are not shown to be unreasonable by comparison with lower lumber rates when complainant has not effectively rebutted defendants' evidence that the lumber rates are depressed to meet competition—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (538).

229.—Compelled or competitive rates.—[Vols. 1, 6, 9, 11-19, 21].—Rates depressed to meet competition are not an acceptable standard for measuring maximum reasonableness of other rates; moreover, fact that carriers have accorded one article a basis of rates below normal is in itself no reason, absent unjust discrimination or undue prejudice, for requiring establishment of the same rates on analogous articles, especially where shipper is directly benefited by the lower rate basis already in effect. Rates applicable on complainant's shipments of feed and industrial grade ureas are not unreasonable because they are higher than rates on fertilizer grade urea which it also ships, when latter rates are on depressed basis due to competition from import traffic, market competition, and private- and common-carrier truck competition.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (110, 111).

231. Substantial similarity.—[Vols. 1, 6, 9, 14, 15-17].—A class rate normally provides the highest rates and charges for a commodity and application of a higher "exception" rate is an abnormality requiring special justification. Defendant has not shown that transportation characteristics of the excepted article (used passenger automobiles) here involved differ substantially from common characteristics of similar articles generally or that special circumstances peculiar to the particular area warrant the higher exceptions ratings. Assailed rates are shown not just and reasonable to extent they exceed charges based on class ratings and actual weights.—United States v. Western Gillette, Inc., 341 I.C.C. 889 (893).

Rates in Opposite Direction

250. Comparison not generally a controlling test.—[Vols. 1, 6, 9, 12-16, 17-19] Rates on commodities from and to certain points need not be the same as in the opposite direction, since varying circumstances may account for the difference, and a showing that assailed import rates on iron or steel articles from the ports of Philadelphia, Baltimore, and Norfolk to destinations in trunkline and southern territories are higher than export rates from latter territories to those and other north Atlantic ports does not establish that the higher import rates are unreasonable.—Southern States Cooperative, Inc. v. Baltimore & O. R. Co., 323 I.C.C. 400 (405).

While the Commission has generally held that rates in one direction higher than in the other on the same commodity require special justification, a different view has long prevailed with respect to zinc and zinc byproducts. In prescribing reasonable maximum rates on zinc byproducts in 204 ICC 319, the Commission held that there was no connection between movements of zinc and byproducts making it either necessary or desirable to create and maintain a rate relation between them. Assailed rates charged on the bulk of complainant's inbound shipments of zinc dross are well below maximum level prescribed in that case, and therefore are not unreasonable, notwithstanding that in some instances they are the same as, and in the majority of instances higher than, the rates in reverse direction on the finished product, zinc spelter.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O.R. Co., 323 I.C.C. 601 (606, 609).

Territories Compared

261. Rates in different territories.—[Vols. 1, 6, 9, 11-19, 21].—Though respondent railroads have shown a substantial and compelling need for immediate revenue relief, the general deficiency in evidentiary support with respect to higher levels of proposed selective increases in rates and charges warrants uniform maximum increase limitations within and between the major districts. Therefore, considering the relative revenue needs of carriers operating within those districts, increases not in excess of 4 percent within the South, 5 percent within the West 6 percent within the East, and 6 percent interterritorially, are authorized.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (332, 336, 528-9)*.

Interterritorial: [Vols. 11-15, 16].—The Commission determined that to the extent the defendants' rates for movements from Erwinville, La. (in southwestern territory) to destinations they control are higher, distance considered, than the prevailing level of rates from that origin to all other southern destinations and also higher than the rates defendants publish for comparable movements, distance considered, within the South, the assailed level of rates from Erwinville was unjust and unreasonable in violation of §(5) of the Act.—Big River Industries, Inc. v. Aberdeen R. R. Co., 329 I.C.C. 539 (547).

Kinds of Rates Compared

271. Through or proportional rates and local rates.—[Vols. 1, 6, 9, 13, 15, 16, 18, 19]/—Complainant's claim for reparation, based on excess of charges over joint commodity rate of $3.85 or, in the alternative, excess over joint class rate of $4.14, both of which were in effect on transformers from Sharon, Pa. to Beverly, Wash. at the time of the movements in question, is valid. Because of insufficient clearances, the shipments did not move over the routes authorized in connection with above rates, and no joint through rate was published over the routes of movement. A combination rate of $4.98 was charged, composed of a joint commodity rate of $3.85 from Sharon to Newport, Wash., and a class rate of $1.13 from Newport to Beverly. The principle of the Bucyrus-Erie line of cases is applicable here, and shipper is entitled to a reasonable rate over the route used.—Westinghouse Electric Corp. v. Pennsylvania R. Co., 323 I.C.C. 503 (503-4, 506)*.

On this record, there is no showing that the $3.85 rate sought by the complainant is a maximum reasonable rate. The alternative class rate sought, however, does appear to be a maximum reasonable basis for the purpose of reparation. It is a well-established principle that a class rate based on the rating of a commodity in the governing classification is ordinarily the highest rate that may be deemed reasonable for that commodity.—Id., pp. 506-7.

275. Interstate and intrastate rates.—[Vols 1, 6, 9, 11, 17, 18, 19].—See Silica Products Co., Inc., v. Gulf, M. & O. R. Co., §1(5), n. 210.

280. Direct vs. circuitous hauls.—[Vols. 1, 6, 9, 11, 13, 15, 16, 18].—The fact that the nontariff routes used because of clearance difficulties were slightly circuitous as compared with the distances over the tariff routes from Sharon, Pa. to Beverly, Wash., and involved an interchange at Newport, Wash., does not serve to distinguish the instant case from the Bucyrus-Erie line of cases. The distance over the route used is shorter than the routes authorized to other western destinations in connection with the $3.85 joint commodity rate. Moreover, the class rate exceeds the commodity rate by 29 cents. This excess should, as shown by the car-mile earnings comparisons, adequately compensate the defendents for the extra interchanges required, the circuitous routing as compared to tariff routes from Sharon to Beverly, the destination carrier's loss of its long haul, and any extraordinary services that might have been furnished.—Westinghouse Electric Corp. v. Pennsylvania R. Co., 323 I.C.C. 503 (507)*.

Competition

286. How far competition considered in determining reasonableness; by Commission.—[Vols. 1, 6, 9, 11-14, 16-19, 21].—Although proposed reduced rail-motor rates are justified as a means to prevent diversion of traffic considered herein by equalization of respondent's rates with protestant rail carrier's rates on such traffic, the proposed rates, with few exceptions, are not compensatory and thus are not shown to be just and reasonable.—Motor Vehicles, Kansas City, Mo., to Southwest, 335 I.C.C. 253 (286)*.

Commission ordered cancellation of assailed rates as they were based on a minimum annual-volume requirement found to be an unlawful destructive competitive practice in violation of the national transportation policy.—Great Lakes Ship Owners Assn. v. Chicago & N.W. Ry., 337 I.C.C. 287 (290-2)

289. Extent to which carriers may consider.—[Vols. 1, 6, 9, 11, 12, 16-19, 21].—Carriers are at liberty to reduce their rates to meet competition of other carriers so long as the reduced rates are reasonably compensatory and not otherwise unlawful. In recent years respondents have been steadily losing high-rated merchandise and l.c.l. traffic, while private carriage has grown and tonnage handled by regulated motor carriers in the southern region has steadily increased. Proposed reduced rates on all freight, minimum 10,000 pounds in straight or mixed shipments, are reasonably designed to attract this lost traffic; as they exceed respondents' fully distributed costs by substantial margins and offer greater flexibility to shippers, it is reasonable to expect that they will produce a substantial net increase in revenues; approved.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (737, 739).

Although Commission recognizes rights of rail carriers to voluntarily reduce rates to meet carrier and market competition, such rights are not absolute. Approval of proposed rates would be a sanction of a destructive competitive practice inasmuch as such rates often fail to meet carriers' out-of-pocket costs and will inevitably lead to counter reduction by intramodal competitor resulting in a useless waste of needed carrier revenues. Proposed rates not shown lawful; ordered canceled.—Motor Vehicles, Kansas City, Mo., to Southwest, 332 I.C.C. 615 (625-26).

See also Sulphur, Canadian Origins to East St. Louis, Ill., n. 303, below.

303. Market competition.—[Vols. 1, 9, 11, 12, 14, 15, 17-19, 21].—Assailed rates on sugar from western producing points to central territory destinations were established to enable western shippers to compete in the central territory market following reduction of rates from eastern producing points to meet motor competition. In such circumstances carriers have the right to meet the market competition thus created.—American Sugar Refining Co. v. Ahnapee & W. Ry.

Co., 322 I.C.C. 717 (721); assailed rates are not lower than necessary to meet such competition when, under prepay arrangement whereby shipper must absorb all of the rate from a given origin which exceeds the rate from Baltimore to same destination, the reduction in prepay resulting from reduction of the eastern rates equaled or exceeded the rate reduction to 4 of 5 representative points, and assailed rates from Greeley, Colo., reflect reductions less than those from eastern points to 4 of such representative points and less than the prepay to 3 of them.—Id., p. 722.

Competing carriers may meet a reduced level of rates, thus creating market competition (296 ICC 747, 752). Regarding minimum reasonable rates, it may be said that there is no distinction between the two types of competition since competition between rival producing centers is at the same time competition between the railroads or other carriers serving the different producing areas. A carrier's right to meet market competition is therefore no more restricted than its right to meet carrier competition.—Sulphur, Canadian Origins to East St. Louis Ill., 326 I.C.C. 288 (302-3). See also same case under n. 210, above.

Proposed rent-a-train plan herein was motivated by a desire to make it possible for corn from land-locked area of east central Illinois to compete in the export market with corn having access to water transportation. It would not constitute an unlawful exclusive patronage contract since no regulated carrier would be precluded from competing for said traffic.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 339 I.C.C. 579 (590-91)*.

See also Wine, Pacific Coast to East case, NTP, n. 5 *Destructive*.

305. Competition with carriers not subject to Act.—[Vols. 1, 6, 9, 11, 13, 16-19, 21].—Carriers not subject to Commission's regulation are not entitled to claim protection of the national transportation policy. However, complainants hold certificates under Part III of the Act and are entitled to protection from destructive competition.—Great Lakes Ship Owners Assn. v. Chicago & N.W. Ry., 337 I.C.C. 287 (293)

308. Water-motor competition.—[Vols. 11, 12, 16-19].—Because of loss of traffic since initiation of defendant railroads' plan II TOFC rate of 163 cents on activated carbon, minimum weight 60,000 pounds per shipment loaded in 2 trailers, from Marshall, Tex., to New York, N.Y., and related points, complainant Sea-Land insists that the coastwise water carriers must have a rate differential in order for them to share in the traffic. Railroads' TOFC fully distributed cost, excluding deficits, is 158.5 cents per 100 pounds, and including deficits is 165.3 cents per 100 pounds; its rate level is above complainant's out-of-pocket costs. Where complainant fails to prove that it is the low-cost mode of transportation either on an out-of-pocket or fully distributed basis of comparison, and that the assailed rate is below defendants' out-of-pocket cost for the movement involved, the principles of the *New Haven* case have no application. The rate assailed is therefore not shown to be unjust and unreasonable, or in contravention of the national transportation policy.—Sea-Land Service, Inc. v. Baltimore & O. R. Co., 326 I.C.C. 708 (709-11, 712).

Presumptions, Evidence, and Admissions as to Reasonableness

310. Rates prescribed by authority of law; the Commission or other Federal authority.—[Vols. 1, 6, 9, 11-19, 21].—Rates prescribed as reasonable maxima on zinc by-products in 1934 can hardly be considered reasonable maxima 30 years later in view of all the inflation and subsequent increases in carrier operating expenses that have since occurred. Assailed rates are in a majority of instances well below those originally prescribed, as adjusted by subsequent general increases, and it is well settled that such rates do not exceed reasonable maxima and afford no basis for reparation.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (610).

318. Presumption as to voluntarily established rates.—[Vols. 1, 6, 9, 12, 13, 17, 21].—Although fact that assailed rates on zinc dross to Meadowbrook, W. Va., do not exceed reasonable maxima when measured by rates on percentage basis prescribed as reasonable maximum in 204 ICC 319, as adjusted by subsequent general increases, would not preclude prescription of rates below the maximum basis for the future if there had been a general and uniform reduction by defendants from practically all origins in official territory to competing destinations other than Meadowbrook, such is not the case. While reductions have been numerous and cover much of official territory, the reduced rates to destinations where plants of complainant's competitors are located reflect no uniform relation to first class. Assailed rates therefore cannot be found unreasonable.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (610).

319. Evidentiary effect of subsequent reduction.—[Vols. 1, 6, 9, 11, 12, 14-19, 21].—Reduction of a rate after shipments have moved is sufficient to establish that the prior rate charged was unjust or unreasonable.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (538).

322. Admissions by carrier.—[Vols. 1, 6, 9, 13, 15-18].—Any party which claims an inherent cost advantage is required to develop costs in an intermodal competitive situation if it wishes to be successful in its claim. Here, complainant seeks to use, and indeed restate to its own purposes, cost data prepared, yet not introduced into evidence by defendants, to support its claim. This is tantamount to compelling defendants to make out a case against themselves.—Sea-Land Service, Inc. v. New York Central R. Co., 329 I.C.C. 589 (592).

The evidence in question is not an admission against interest on the part of the defendants. On its fact it is favorable to defendants, but owing to complainant's failure to make out a case, it was not necessary for defendants to introduce it. Viewed differently, admissions are the prior assertions of a party, which, being inconsistent with its present claim, may be used to discredit it because of a discrepancy. But here, the evidence is in no way inconsistent with any other evidence or statements of defendant. Additionally, it seems clear that complainant is in no position procedurally to "sponsor" such data in an attempt to correct defects in its own case. The evidence should not have been received by the examiner, and is not to be considered here.—Id., p. 592.

Rates by Commodities

350. Rates prescribed or approved.—[Vols. 9, 11-19, 21].—Part II, see §216(b), n. 125; Part III, §305(a), n. 125; Part IV, §404(a), n. 125.

Alcoholic beverages: [Vols. 11, 12, 15-18, 21].—Transcontinental incentive package rates ranging from 128 to 149 cents, minimum 85,000 pounds, on champagne, vermouth, and wine, including sparkling wine, in boxcars, and incentive bulk wine rates ranging from 149 to 170 cents, minimum actual weight per gallon, but not less than 150,000 pounds, in tank cars, to alternate with corresponding present rates, from origins in Arizona, California, Nevada, New Mexico, Oregon, and Utah to points in rate groups in official and southern territories, found to be no lower than necessary to meet competitive situation presented and to be just and reasonable and otherwise lawful; approved.—Wine, Pacific Coast to East, 326 I.C.C. 119 (121-4, 135-9, 151, 154-6)*.

Proposed increase in rates on wine and malt liquors, to the extent it exceeds 4 percent, maximum 4 cents per 100 pounds (the same basis authorized generally for processed foods), is not shown to be just and reasonable.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 28(448-50, 466-8, 529)*.

Automotive vehicles, parts, accessories: [Vols. 9, 11, 13-19, 21].—Proposed increases in rates on automobiles, automotive parts and tractors are approved, except to extent that they exceed the overall limitation of 5 percent within the West and 4 percent within the South, and except that no increase is authorized within the South on farm tractors.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (348-51)*.

Bagasse: [Vols. 9, 14].—Both bagasse and limerock are low grade commodities on which rates would likely exceed their value if increased by 10 percent as proposed; increase in rates on those commodities, not in excess of 4 percent, approved.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (455, 457-8, 459, 529)*.

Chemicals: [Vols. 11, 15-19].—Proposed percentage increases on certain chemicals and related products are found unwarranted to the extent that they exceed 3 percent on fluorocarbons, acyclic organic ethers and propylene oxide.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (416-18, 518-21, 529)*.

Coal: [Vols, 9, 11-19, 21].—It has been the Commission's general policy since the decision in 69 ICC 11 to determine the reasonableness and nonprejudicial character of rates on coal on the basis of the distance over short tariff routes. This policy is especially appropriate where the nontariff route would short-haul the originating carrier which would be the case in the instant proceeding.—Coal, Ky., Tenn. and Va. to North Carolina, 329 I.C.C. 572 (578)*.

Percentage increases sought on bituminous are generally warranted and, subject to the overall limitation of 5 percent within the West, rates on coal may be increased as proposed except for proposed interterritorial increases. There being no justification for the higher increases proposed, increases on coal are limited to 5 percent, maximum 30 cents per ton, from East or South to Transcontinental Freight Bureau territory, or from West to East; and as to unit-train movements within the East and to or within the South—no more than 15 cents per ton.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (372-86, 529)*.

Coke: [Vols. 9, 11, 12, 18, 19, 21].—Proposed increases in rates on petroleum and coal coke, lignite, and petroleum, coal or coke briquettes are not shown to be just and reasonable to the extent they exceed the increases proposed and authorized on bituminous coal.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (386-8, 529)*.

Containers, cores, etc.: [Vols. 9, 11, 12, 14, 15, 17].—Proposed percentage rate increases of 6 percent on glass containers, 10 percent on returned empty shipping containers, and 10 percent on metal cans and metal shipping containers, found just and reasonable except to extent that they exceed overall limitation of 6 percent within the East, 5 percent within the West, 4 percent within the South, and 6 percent interritorially. Though imposed for reasons other than environmental, that overall limitation will benefit shippers of returnable glass bottles.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (354-8)*.

Copper: Proposed rate increases on primary copper smelter products will be just and reasonable except to the extent that they exceed 4 percent on copper ores, concentrates and precipitates within the South and 3 percent on copper bars and billets, rough cast, within the East.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (371-2, 529)*.

Feed: [Vols. 15, 17].—Under the circumstances shown of record, general level of rate increases sought on animal and poultry feeds are too high; therefore, a uniform 3-percent increase on those commodities is approved.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (459-66, 529)*.

Fertilizer, materials: [Vols. 9, 11-19]. —Record does not justify proposed increases, ranging up to 10 percent, in rates on fertilizer and fertilizer materials; overall 3-percent increase on those commodities, except that no increase is authorized on phosphate fertilizer, approved.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (471-9, 529)*.

Fish: [Vols. 9, 11, 17].—Since proposed rate increases on southbound Alaskan fish products came almost immediately on the heels of the selective and substantial increases on the same products of February, 1971, and respondents did not meet their burden of showing that the revenue contribution of fish products traffic is so poor as to justify another increase, the Commission's order excluded the products from the effect of the proposed increases.—Increased Rates and Charges, the Alaska Railroad, 340 I.C.C. 129 (162-163).

Flour: Rates on flour, whether moving in bulk or in bags, may be increased not more than 11 percent over the base rates in effect prior to increases authorized in Ex Parte No. 262, and in place of said Ex Parte No. 262 increase. The tariffs publishing such increases to small progress in one-half cent steps as provided herein.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (221-28).

Fly ash: [Vols. 17, 18].—In Ex Parte No. 267, rates on fly ash and petroleum waste products may be increased not more than 8 percent.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (209).

Fruits, berries, melons: [Vols. 9, 11, 12, 14, 15, 17-19, 21].—In Ex Parte No. 265, rates on eastbound transcontinental TOFC fresh fruits and vegetables where the rate includes a factor for protective service may be increased not more than 5 percent.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (195); In Ex Parte No. 267, rates on eastbound transcontinental TOFC fresh fruits and vegetables where the rate includes a factor for protective service may be increased not more than 9 percent.—Id., 195; In Ex Parte No. 267, rates on fresh fruits and vegetables, edible nuts, processed foods and beverages, other than TOFC traffic, may be increased not more than 22 cents per hundredweight.—Id., p. 197.

Proposed 4-percent rate increase on processed fruits and vegetables, subject to a maximum of 4 cents per 100 pounds on both canned and frozen fruits and vegetables, approved. However, record fails to justify proposed 6-percent increase in rates on fresh fruits, vegetables, and edible nuts to the extent that it exceeds 4 percent, maximum 4 cents per 100 pounds, on fruits and vegetables (including citrus pomace, potatoes, and onions), and 3 percent, maximum 3 cents per 100 pounds, on shelled and unshelled walnuts.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (436-48, 529)*.

Grain, grain products: [Vols. 9, 11, 18, 19, 21].—Reduced export commodity rates on bulk wheat from origins in 8 western or midwestern States and East St. Louis, Ill., to gulf ports, ranging from 40 to 68 cents and reflecting a uniform 10-cent reduction in rates in effect prior to June 1962, found compensatory for average loading of 115,000 pounds and otherwise lawful; §4 relief granted. Like rates, made 7 cents higher to include port handling charge, on flour and bulgur, in packages, minimum 90,000 pounds, from origins in same territory on Chicago, B. & Q. R. to the gulf ports, also export rates from Burlington origins to Chicago, reflecting reductions in present rates of 6 cents on wheat and 10 cents on flour and bulgur (thereby restoring parity), approved as just, reasonable, and otherwise lawful.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581.

Reduced limited-transit grain rates from northern Idaho, Wash., and Oreg., to north Pacific coast ports, found just and reasonable and not destructively competitive as to low-cost all-barge movement; §4 relief granted in connection with such rates to Seattle and Tacoma, Wash.—Grain from Idaho, Oreg. & Wash. to Ports in Oreg. & Wash., 326 I.C.C. 358 (366, 369)*.

Rates on grain and grain products in the West may be increased not more than 11 percent over the base rates in effect prior to the increase authorized in Ex Parte No. 262, and in place of said Ex Parte No. 262 increase. The tariffs publishing such increases to small progress in one-half cent steps as provided herein.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (219-28).

In view of increasing competition of both trucks and barge lines, a general increase in rail rates on grains and grain products that is too high would be self-defeating. Therefore, a 3-percent rate increase on those commodities, subject to a maximum of 3 cents per 100 pounds on prepared flour mixes, is authorized. Tariffs publishing authorized grain rates must observe a 1/2-cent progression.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (459-66, 529)*.

Household goods: [Vol 9].—Proposed percentage increases in rates on household appliances, lamps, and lighting fixtures, except to extent that they exceed 5 percent within the West, found just and reasonable.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (351)*.

Iron and steel; articles: [Vols. 9, 11-19, 21].—Proposed 3-percent rate increase on primary iron and steel products, except on finished iron and steel articles within the East, and 6-percent rate increase on semifinished iron and steel (billets, blooms, ingots, etc.), authorized. No increase is proposed from, to, or within the South.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (343-8)*.

Lumber, timber, logs; products: [Vols. 9, 11-19, 21].—In Ex Parte No. 267, rates on lumber and forest product may be increased not more than 15 cents per hundredweight.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (228-32).

Proposed rate increases on lumber, plywood, and hardwood flooring are found just, reasonable, and otherwise lawful. However, rate increase on millwork is limited to 4 percent, maximum 4 cents per 100 pounds; no increase is authorized on woodpulp; and proposed increases on pulpwood and wood chips, subject to overall limitations in the major rate territories, but authorizing a nationwide interritorial increase not exceeding 5 percent, are approved.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (481-510, 529)*.

Machinery, machines, parts: [Vols. 9, 13, 17, 18].—Proposed percentage increases in rates on heavy electrical machinery and in detention charges on heavy duty flatcars required for movement thereof, except to the extent they exceed 5 percent on movements within the West and 4 percent within the South, approved.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (242-3)*.

Newsprint paper: [Vols. 17, 19, 21].—Proposed rate increases on newsprint, found not shown to be just and reasonable to the extent they exceed 5 percent to and within mountain Pacific territory, or include any increase within Southwestern Freight Bureau territory or from that territory to the South.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (515-6, 529)*.

Nuts: [Vols. 9, 11-14, 17, 18].—See *Fruits, berries, melons,* this note heading.

Processed foods: *See Fruits, berries, melons,* this note heading.

Sugar: [Vols. 9, 11, 12, 14-19, 21].—In Ex Parte No. 267, rates on sugar may be increased not more than 10 cents per hundredweight.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (253-56)

Increase of 4 percent in rates on beet and cane sugar, subject to holddown of 3 cents per 100 pounds, except that no increase would apply in CFA territory, authorized; and same basis of increased rates is approved for corn syrup and corn sugar. However, proposed increases in rates on sugar beets and sugar cane, to the extent that they exceed a flat 3 percent nationwide, are shown to be justified.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (450-9, 529)*.

Sulphur, compounds, products: [Vols. 9, 11, 12, 14-19, 21].—Proposed reduced rate of 57.5 cents on dry bulk sulphur in closed or open-top cars, minimum 100,000 pounds, and molten sulphur in tank cars, minimum 140,000 pounds from indicated Canadian origins to Streator, Ill. found compensatory and lawful.—Sulphur, Canadian Origins to Streator, Ill., 332 I.C.C. 130 (134)*.

Vegetables: [Vols. 9, 11-19].—See *Fruits, berries, melons,* this note heading.

Waste, scrap, junk: [Vols. 14, 15, 18].—In Ex Parte No. 267, rates on scrap iron and steel, nonferrous and alloy scrap, textile and paper scrap, pig iron and iron pellets having iron unit content (Fe) comparable to pig iron or iron and steel scrap may be increased not more than 11 percent.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (205-219).

Although, on the record, considered secondary materials should not be exempted from any increase in rates, the low value of such articles, the relatively high percentage of freight charges to sales price, and their generally favorable transportation characteristics warrant some limitation on proposed increases. Balancing those factors against carriers' need for additional revenue, an increase of not more than 3 percent is authorized on paper waste or scrap, textile waste, nonferrous metallic scrap, and glass, rubber or plastic scrap or waste. While secondary materials will continue to move despite proposed increases, the holddown imposed should encourage the movement and recycling of such commodities.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (358-69, 529)*.

Proposed 5-percent increase in rates on ferrous scrap, except 4 percent within the East and from the South to the East, and except 3 percent to or within the South, minimum 15 cents per ton, authorized. Unlike the situation found to exist with respect to secondary materials generally, level of prices for ferrous scrap has no discernable relation to freight rates and rate increases; and since authorized increases will not inhibit movement of that commodity, a limitation on the increases for purpose of encouraging movement would serve only to deprive the railroads of needed additional revenue.—Id., pp. 392-413.

Local, Through, Joint, and Proportional Rates

400. Through rates; relation to local rates.—[Vols. 1, 6, 9, 11-19, 21].—Charges on a carload of a freight automobile, old, used, from Lathrop, Calif., to Fort Benning Junction, Ga., found not shown unjust or unreasonable. Such movement is a portion of a through movement originating at Oakland, Calif., and the Commission in evaluating the reasonableness of a rate under §1 cannot relate its finding to only a portion of a through movement.—United States v. Central of Georgia R. Co., 332 I.C.C. 33 (36)

See also Corn and Corn Products, Illinois to Official Territory, at §15a(2), n. 1.

402. Proportional rates.—[Vols. 1, 6, 9, 11-19, 21].—Although the publication of joint intermodal TOFC rates for the movement of commodities the motor transportation of which is exempt from economic regulation is not possible, the transportation of such commodities in piggyback service may still be accomplished by a motor carrier through the use of open-tariff rates when they are made available by the railroads. It would also be possible for a rail carrier, even though it may not participate in a joint through rate, to establish a proportional rate on traffic moving in part by a nonregulated motor carrier—Substituted Service—Piggyback, 322 I.C.C. 301 (354)*.

Assailed proportional rate on coal in multiple-car lots from Mount Vernon, Ind., to Chicago district had its inception in longstanding competition; as originally approved in 1953, as one factor in total charges via the rail-river-rail route from inner and outer crescent mines, it was designed to enable defendant to participate in the traffic over a circuitous route whose primary function was to serve as alternative to the all-rail route when the rail-lake route is closed, and which was not expected to attract much over a million tons annually. Since inception of that rate an average of some 950,000 tons a year has moved via the Mount Vernon route, or an average of about 6.5 percent of the total competitive tonnage moving to Chicago over all routes. As before 1953 from 80 to 95 percent moved via the all-rail route, the alleged diversion subsequent to 1953 does not appear attributable to the assailed proportional. Since that rate covers estimated out-of-pocket costs and makes a contribution to the overhead burden, it is reasonably compensatory and is not shown to be otherwise unlawful.—Baltimore & O. R. Co. v. Chicago & E. I. R. Co., 322 I.C.C. 572 (575, 576)*.

Proposed rail multiple-car proportional rates on canned foodstuffs from the Pacific coast to points east of the Rocky Mountains found just and reasonable. Respondents have shown a competitive need for such rates, have proven such rates are not discriminatory as to single-car shipments, and have limited such rates to transited movements over through routes.—Canned Foodstuffs, Pacific Coast to the East, 335 I.C.C. 612 (617-22).

See also Corn and Corn Products, Illinois to Official Territory, at §15a(2), n. 1.

Group Rates

460. Disruption of groups.—[Vols. 1, 6, 9, 11, 12, 14, 15, 17-19, 21].—Group relations of long standing, especially in the sensitive grain-rate structure, should be disturbed only on a comprehensive record showing a distinct and compelling need therefor. To find that assailed rates on grain from central territory to interior group points in trunkline territory are unreasonable because they bear higher percentage relations to grain rates from same origins to New York City key group than percentage relations of corresponding first-class rates would disrupt group relations in effect for many years, would penalize some shippers of grain transited at interior points, and would create numerous fourth-section departures. Moreover, the rates to new York City are depressed by water competition, and no clear and convincing reason appears for extending that depressed level to the considered area. Assailed rates are not shown to be unjust and unreasonable.—Cooperative Grange League Fed. Exc. v. Akron, C. & Y. R. Co., 323 I.C.C. 174 (178-9).

Differential Rates and Routes

485. Water and rail.—[Vols. 1, 6, 9, 11, 12, 14-16, 18, 19, 21].—See Sea-Land Service, Inc. v. Baltimore & O. R. Co., n. 308, above.

All-Commodity Rates

495. In general.—[Vols. 9, 11, 12, 14-19, 21].—Proposed reduced commodity column rates on all freight, minimum 10,000 pounds, in straight or mixed shipments, within southern territory and between points in that territory or St. Louis and intermediate points in Indiana, Illinois, and Missouri, approved as just and reasonable. Proposed rates are reasonably designed to recapture some of high-rated merchandise and l.c.l. traffic lost to common, contract, and private motor carriers and will apply on a large number of commodities rated class 50 to 400; they will alternate with respondents' existing rates, and absence of a mixing rule offers more flexible rates to shippers, allowing them to accumulate and ship small-quantity lots; and evidence indicating that they exceed average fully distributed costs for the southern region by substantial amounts warrants conclusion that they are compensatory.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (731, 737).

Equalization of Ports or Markets

503. North Atlantic ports adjustment.—[Vols. 1, 6, 9, 11, 12, 15, 17-19, 21].—Proposed reduction on carload rates on paper and paper articles, for export, from origins in central freight association territory to Baltimore, Md., is lawful although representing a departure from formerly equalized rates from central territory to the North Atlantic ports. Evidence shows not only that the proposed rates are reasonably compensatory but that there is a need for the proposed rates; Baltimore carriers have a competitive disadvantage, and there is need for reasonable and lawful carrier competition. But, similar rates applying from same origins to other North Atlantic ports are not shown just and reasonable since cost evidence pertaining to rates proposed to ports other than Baltimore lack a relationship of unit cost to export traffic; costs based on territorial service units are not representative of the handling of export traffic.—Paper, Central Territory to North Atlantic Ports, 329 I.C.C. 281 (289-90).

Rates Based On Quantity of Traffic

514. In general.—[Vols. 19, 21].—Commission ordered assailed rates on coal canceled as they were based on a tariff provision requiring a minimum annual-volume tender of coal and said provision was found to be a destructive competitive practice.—Great Lakes Ship Owners Assn. v. Chicago & N.W. Ry., 337 I.C.C. 287 (290-93).

Reduced local rail rates and charges not shown to be just and reasonable to the extent such rates are subject to an annual-volume requirement but otherwise just and reasonable. The annual-volume requirement was found to produce unjust discrimination between shippers using substantially similar transportation service and is violative of §2. Ordered canceled without prejudice to filing of new schedules.—Wheat & Wheat Flour, Westbound, 337 I.C.C. 858 (877-81).

518. Trainload rates.—[Vols. 1, 6, 9, 11, 15-19, 21].—Rent-a-train rates are a form of annual volume discount rates approved or found not shown to be unlawful in *Coal,* 311 ICC 355, and *Natural Gas,* 323 ICC 75, cases. In latter case tariffs providing unit train rates were found not to create contract rates such as were condemned in the *Guaranteed Rates* case, 315 ICC 311, and a like finding is warranted herein.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (125).

Commission approved reduced all-rail multiple-car rate herein even though the proposed rate exceeds the variable costs excluding profit and income taxes. Recent rate increases on issue traffic in Ex Parte No. 267 will improve compensativeness and while only a single rate is proposed it will apply from a large origin area and is, in effect, a group or blanket rate. Proposed rate is adequately compensatory and will aid farmers, elevator operator and other interests located on respondent's tracks.—Corn & Soybeans, Midwest to Pacific Northwest, 339 I.C.C. 465 (472-3).

The rent-a-train concept, as embodied in tariff herein, is analagous to multiple-car and trainload volume rates. Commission found tariff herein not shown just and reasonable with respect to the minimum speed and refund provisions and when applying to carrier-owned cars. Tariffs ordered canceled with prejudice to filing of amended tariffs.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 339 I.C.C. 579 (592-3)*.

In view ot the provision for a guaranteed minimum number of trips, it is unnecessary to provide for alternation with other rates or for a specific minimum tonnage.—Id., p. 587-8*.

Respondents' rationale for proposed cancellation of multicar rates on kaolin clay, that there was no competitive necessity for retention of a discount rate and that there were no cost savings experienced by them in the movement of large volumes of clay at one time as opposed to single-car shipments, traditionally has provided a basis for disapproval of multicar rates *when initially filed*. However, under §15(7) of the Act, it is incumbent upon respondents, as proponents of a change in a rate or practice, affirmatively to meet the full burden of proof that the proposed change is just and reasonable. See also, §15(7), n. 35.—Clay, Points in Georgia to Savannah & Port Wentworth, 340 I.C.C. 377 (383)*.

Line-haul, Terminal, and Switching Services Included

521. Line-haul rates and terminal services.—[Vols. 1, 6, 9, 11-19, 21].—Present line haul rates which include the loading and unloading of the carrier's vehicle "when this service can be performed by one man" are vague and indefinite since no provision is made as to who is to decide when a shipment can be loaded or unloaded by one man; indefiniteness is even more pronounced in that respondents' rules also provide that shipments which cannot be handled by one man because of weight, dimensions or physical characteristics are not entitled to loading and unloading service. The lack of certainty is not cured by respondents' proposed alternate rule whereby an additional man would be provided only at the carrier's option, since the shipper or consignee would be unable to determine when and under what circumstances this service would be furnished. However, rules providing that the line-haul rate includes loading and unloading service unrestricted as to the number of laborers, or which provide for one man per vehicle or those which make provision for additional labor at an extra charge are clear and definite.—Detention of Vehicles & Loading and Unloading Provisions—Investigation, 329 I.C.C. 220 (227-30).

Respondent line-haul railroads were ordered to cease and desist generally from rendering switching service of giving allowances to shippers for intraplant switching on shipper's tracks in prior report, 209 ICC 787. An exception to the general rule is when the line-haul carrier can perform such a spotting and switching of cars at its operating convenience in continuous movement as defined in prior report. But here, because of complexity of intraplant track layout and extra switching demands of petitioner shipper, the exception does not apply and cancellation of cease and desist order is not justified.—Detroit Harbor Terminals, Inc., Terminal Allowance, 332 ICC 635 (638-39).

522. Switching and spotting.—[Vols. 1, 6, 9, 11, 13-19, 21].—Proposed general increases of $7.50 in intraterminal and interterminal switching charges and $3 in intraplant switching charges in western and southern districts and Pocahontas region approved as just, reasonable, and otherwise lawful. Though respondents' switching charges vary at the different terminals and within terminals, so that the flat increases result in varying levels of increase, resulting charges generally are on the out-of-pocket level and do not exceed a maximum reasonable level.—Increased Switching Charges, 322 I.C.C. 560 (562, 563)*.

Commission found proposed increased interterminal, intraterminal, and reciprocal switching charges not shown to be just and reasonable. Because there is no substantial reciprocity of switching herein, the cost of service is the most important factor in determining reasonableness of rates and respondents' costs were found so substantially overstated as to warrant a conclusion that proposed charges have not been justified.—Switching Charges and Absorption, 399 I.C.C. 65 (77-81).

Commission found rates charged for rail switching movements from East St. Louis to Sauget, Ill., applicable and not shown to be unlawful. Although such switching movements occurred within a single State, they followed exempt for-hire barge transportation in interstate commerce and are thus themselves in interstate commerce and the assailed interstate rates were applicable.—Monsanto Company v. Alton & So. Ry. Co., 339 I.C.C. 319 (321-3).

See also Indiana Harbor Belt v. General Amer. Transp. Co., at 28 USC §2325, n. 40.

526. Terminal services.—[Vols. 1, 6, 9, 11-13, 16, 18, 21].—See Increased Waterborne Charge, §15(7), n. 70.

Percentage Increases

540. In general.—[Vols. 15-19, 21].—Although no fixed percentage for all traffic is approved in this general revenue proceedings, increased freight rates and charges by respondent railroads tentatively approved in whole or in part by prior report are found just and reasonable with certain exceptions indicated herein as they offset increased costs and return a reasonable profit on investment.—Increased Freight Rates, 1967, 332 I.C.C. 280 (343-44)*.

General increases ranging from 3 to 10 percent on numerous commodities discussed herein found just and reasonable with certain cited exceptions. Such general increases had been previously found needed in 332 ICC 590.—Increased Freight Rates, 1968, 332 I.C.C. 714 (719-789)*.

Although the proposed 15-percent rate increase was found to be far out of line with new [1971] national economic policy, the evidence did establish that respondents do bear real and substantial risks in the Alaskan trade, that they have experienced rising costs, and that they did need additional revenues. On the state of the record regarding respondents' needs, and bearing in mind new national objectives for the economy, the Commission was persuaded that respondents should be allowed to implement an increase of 2 percent, rather than the 15-percent rise initially proposed.—Increased Rates and Charges, the Alaska Railroad, 340 I.C.C. 129 (162).

Commodity Rates

573. Considerations bearing on reasonableness, generally.—[Vols. 1, 9, 17, 19, 21].—Assailed rates applied during interim increase period on ammonium sulphate found unjust and unreasonable. Ammonium sulphate has historically had a rate parity relation to fertilizer and defendant's charges were based on higher interim increases on chemicals thus disturbing preexisting rate relation between fertilizer and ammonium sulphate. Refund due to extent that interim increases on chemicals exceeded those on fertilizer.—Allied Chemical Corp. v. Norfolk & Western Ry. Co., 341 I.C.C. 266 (269-70).

574. Relation to class-rate structure.—[Vols. 1, 6, 9, 12, 14, 15, 17-19, 21]. Assailed rates on technical and feed grades of urea are not shown to have been unreasonable when those on technical urea, during period covered by the complaint, ranged from 32.5 percent of docket 28300 first class rates down to present 15 percent, and those on urea feed compound from 25 percent of first class down to present 15 percent, with transcontinental rates on both grades substantially lower than the 32.5-percent basis; fifth-class rates (35 percent of first class) were found not unreasonable on industrial urea in 287 ICC 175 and 236, and low present levels of the assailed rates result from various voluntary reductions made by defendants to meet competition.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (113-4).

While class rates are made primarily with relation to distance, going rates on high volume traffic like grain are influenced by a variety of factors, including carrier and market competition, and in Docket No. 28300, wherein uniform class-rate scales were prescribed, neither exceptions nor commodity rates were in issue. If no other factors than distance were involved in a particular situation, first-class rates could serve as a standard for measuring rate relations, but such is not the case where destination groups that have been in effect for many years would be disrupted. Assailed rates on grain from central territory to interior group points in trunkline territory are not unreasonable merely because they bear higher percentage relations to grain rates from same origins to New York City key group than percentage relations of corresponding first-class rates.—Cooperative Grange League Fed. Exc. v. Akron, C. & Y. R. Co., 323 I.C.C. 174 (178).

Protective Services

594. Icing and re-icing; refrigeration.—[Vols. 1-16, 18, 19].—Increased refrigeration charges for perishable freight sought by petitioner Louisville & N. R. Co. found just, reasonable, and authorized even though the Commission has in the past generally dealt with such charges on a nationwide basis. Petitioners' evidence proves such increases are necessary to partially offset greatly increased costs and would not be inconsistent with national transportation policy. Similar petitions by Eastern railroads denied for absence of cost evidence.—Charges for Protective Service to Perishable Freight, 332 I.C.C. 136 (151-2)*.

Export and Import Rates

601. Propriety of maintenance on different basis than domestic rates.—[Vols. 1, 6, 9, 11-14, 16, 18].—There is no general principle that import rates must be less than, or even the same as, corresponding domestic rates. Complainant has not shown that assailed import rates on iron and steel articles are unreasonable because they exceed domestic rates reduced to meet truck competition when, though it showed that in 1 year nearly half of its import traffic moved by truck, it failed to indicate the volume which moved from the individual ports or to the respective destinations; and since compared ex-water domestic rates exist primarily to permit rail carriers to compete with domestic movements from the ports by other means, they necessarily reflect a level comparable to the other domestic rates. Likewise, comparisons based on waybill samples do not establish unreasonableness of the higher import rates since the method of sampling reflects the predominance of competitively depressed domestic rates.—Southern States Cooperative, Inc. v. Baltimore & O. R. Co., 323 I.C.C. 400 (406-7).

604. Relation to reasonable domestic rates.—[Vols. 1, 6, 9, 11-16, 18, 19, 21].—Upon complaint, rates charged on export shipments of automobile parts from Detroit, Mich., to Laredo, Tex. were not shown unlawful as such export shipments are more costly for defendant railroads to handle than domestic traffic, and thus the lower domestic rate level was not justified on exports.—Fabricas Auto-Mex., S.A. v. N.Y. Central R. Co., 332 I.C.C. 1 (9).

Evidence submitted by respondent railroads comparing domestic rates with shipside rates found inadequate to support proposed cancellations of wharfage absorption as shipside rates reflect separate rate structures in effect for many years and affected by factors peculiar to waterborne traffic which do not normally affect domestic rates.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (525).

Transit

610. Generally.—[Vols. 1, 7, 9, 11-18].—Assailed flat rates charged on carload shipments of feed from Vicksburg, Miss. to destinations in Louisiana not shown unjust and unreasonable. Such rates were applied as a result of cancellation on all transit privileges to complainant shipper of feed and such cancellation has not been shown to be unreasonable or otherwise unlawful.—The Merchants Co. v. Illinois Central R. Co., 329 I.C.C. 713 (716).

Proposed increased charges for stopping in transit for partial loading or unloading found just and reasonable. Proposed charges are compensatory over and above costs involved in such service and do not violate §§ 2 and 3.—Stopping-in-Transit Charges & Restrictions, 337 I.C.C. 605 (609-10).

Proposed new minimum and increased rail transit and track storage charges not shown to be just and reasonable due to deficiencies in respondents' cost evidence. Respondents failed to draw a cost-to-revenue comparison for traffic on which line-haul rates are presumed to cover transit and also failed to develop representative costs for sample movements of various commodities moving varying distances in different territories with different size transit points.—Transit Charges, USA, 339 I.C.C. 45 (58-60).

District court remanded this case in 301 F. Supp. 328 to the Commission because in considering the compensativeness of charges based on proposed provisions for milling-in-transit of flour in 332 ICC 432, the Commission had erroneously failed to consider the revenue realized from non-transit flour, which is required to accompany each flour shipment. Upon reconsideration including the revenues on non-transit flour, the proposals must be deemed compensatory, just, reasonable, and otherwise lawful.—Transit Provisions on Wheat at Twin Cities, Minn., 341 I.C.C. 235 (237-39)*.

612. Relation of charge to level of rates.—[Vols. 1, 6, 9].—Commission concluded that a proposed $22 per car additional rail transit charge mainly on cotton and grain products in the South was not shown to be just and reasonable, largely because the respondent railroads failed to show the relationship of out-of-pocket costs (including terminal costs for transit service) to the present line-haul rates which include transit, in order to determine if transit is being provided without adequate compensation therefor.—Transit Charges, Southern Territory, 332 I.C.C. 664 (681-87).

Reasonableness of the proposed new or increased per-car transit charges cannot be determined because cost data presented failed to show representative overall movements between origin and final destination of various commodities and the total rates and charges assessed.—Transit Charges, USA, 339 I.C.C. 45 (58).

615. Inspection.—[Vols. 1, 6, 9, 12].—Sampling and inspection of grain is necessary at sometime during the marketing process because the grade must be determined prior to most sales. However, it is not essential that the grade be determined while a grain shipment is in transit since, under the revised Grain Standards Act, the inspection can take place elsewhere. Also, railroads' basic responsibility does not require them to provide service for in-transit inspection; and fact that they have provided such service, and included cost thereof in the line-haul rates, does not preclude a modification of that practice if the circumstances justify some revision. Therefore, since in-transit inspection is now permissive under Federal statutes and may be omitted or performed at origin or destination, service made available by the railroads in connection with the in-transit inspection of grain is not shown on the record to be essential in the grain marketing process. Grain inspection is an accessorial service for which a charge separate from the line-haul charges may properly be assessed.—Inspection in Transit, Grain and Grain Products, 339 I.C.C. 364 (371-2, 386)*.

Demurrage

631. Generally.—[Vols. 1, 9, 12, 14, 19].—In raising demurrage rates for undue detention of cars by shippers, Commission was acting in its legislative capacity and did not have to consider evidence as to how the rates would be applied in every possible circumstance. Order approving involved increased demurrage charges affirmed by the district court.—General Mills, Inc. v. United States, 364 F. Supp. 1278 (1284-85)*.

While some protestants did not object to proposed increased demurrage charges to remedy cases of undue detention, Commission ordered proposed schedules canceled as there is no basis in this record that such charges would promote equipment efficiency which is the primary purpose of demurrage charges. Proposed charges would only increase carrier revenues, and Commission has consistently held that demurrage charges are not to be considered as a source of carrier revenue.—Demurrage Rules and Charges, Nationwide, 339 I.C.C. 655 (668).

Demurrage charges are penalties designed to speed release of cars and obtain better car utilization. Evidence herein, especially the steady increase in undue car detention by shippers and receivers in past 10 years, strongly supports respondents' position that prior demurrage charges, established in 1964, have lost their penalty element in today's economy. Commission concluded that substantially higher charges are now needed and approved increased charges and new regulations proposed herein.—Demurrage Rules and Charges, Nationwide, 340 I.C.C. 83 (88-89)*.

Although carriers' car service leaves a lot to be desired and contributes to loss of car days, this poor service has no direct bearing on car detention by shippers. Once shipper releases a car, no charges accrue even if the responsible carrier is negligent in providing switching service for the car.—Id., p. 89*.

Commission found assailed demurrage charges to be just and reasonable inasmuch as complainant shipper failed to exercise due diligence in its efforts to release the cars. Although defendant's solicitation of more traffic than it could handle was the proximate cause of detention, complainant could have avoided detention by moving cars at single-car rate when defendant could not meet the multiple-car minimum in time to permit tender of shipment. Shippers are hereby advised that they may move multiple-car shipments piecemeal in similar situations at multiple-car rates.—Ormet Corp. v. Illinois Central R. Co. 341 I.C.C. 647 (652-55).

See also General Mills, Inc. v. United States, at §17(9), n. 2.

Rates for Special Classes of Service

659. Wharfage and dockage.—[Vols. 1, 6, 9, 11-19, 21].—Proposed cancellation of wharfage absorption at indicated Gulf and South Atlantic ports by respondent railroads found just and reasonable to extent they reduce port terminal charges by the amounts of wharfage now included but not just and reasonable as they cancel absorption of wharfage charges in connection with shipside and other rates which now include additive charges designed to defray port terminal expenses.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (526).

Proposed reduced plan II TOFC per-flatcar rate on canned goods, 2 trailers per flatcar, maximum 40,000 pounds per trailer, from Florida origins to New York City and New York and New Jersey points taking New York City rates, found just and reasonable and not otherwise unlawful when it improves railroads' overall revenue position by attracting more traffic than had previously moved by rail and, based on respondents' cost studies adjusted after prior hearing to correct deficiencies and incorporate up-to-date data, charges under proposed rate are clearly compensative on an out-of-pocket basis. Also, proposed rate does not constitute a destructive competitive practice, as argued by protestant water carrier, when protestant failed to show that motor-water-motor in the low-cost transportation mode and, as such, is entitled to protection.—Canned or Preserved Foodstuffs from Fla. to N. Y. & N. J., 326 I.C.C. 776 (777, 780-1, 783)*.

Entire Commission found proposed schedules published to comply with rules promulgated in *Piggyback* case, 322 ICC 301, just and reasonable to extent that mixed-shipment rules impose a weight limitation of not more than 60 percent of any one article (as indexed in freight classification). However, proposed higher no-mix rates found unjust and unreasonable because substantially different rate levels were proposed for each rate territory although transportation conditions in each territory were similar.—TOFC Rates and Charges Official Territory, 337 I.C.C. 557 (562-67).

On the basis of the analysis of the cost factors (appendix K) involved in instant case, Division 2 concludes that for the most part the proposed increased and revised TOFC rates on fresh or salted meats and packinghouse products exceed the out-of-pocket costs and are just and reasonable. However, no probative cost evidence was submitted as related to plan V TOFC rates, and they will not be approved.—Meat & PHP, TOFC, SWL, WTL, Official Territories, 340 I.C.C. 214 (244-46).

See also, §20(1), n. 3.

Express

709. In general; competition, etc.—[Vols. 6, 9, 13-18, 21].—Express rates proposed herein are the total of "line-haul charges" based on the cubic foot measurement and "piece charges" based on the number of pieces in the shipment. These rates embody a new method of express rate publication devised to attract traffic to express service where the transportation characteristics and handling conditions are such that respondent desires to make its service available to shippers who want express service at rates competitive with other transportation modes. The proposed rates will operate to conserve transportation facilities and reduce carrier handling costs by inducing a shipper to package its product as compactly as possible and in as few easy-to-handle packages as possible. Such carrier conservation and reduced costs must redound to the public benefit in reduced rates and the Commission feels that this method of determining express rates should be encouraged.—Phonograph Records—REA—Richmond, Ind., to U.S. Points, 329 I.C.C. 391 (392-3, 398).

Passenger Fares

760. In general.—[Vols. 1, 6, 9, 11-19].—Proposed revisions in fares applicable to interstate passenger service on the New Haven Division of respondent railroad found just and reasonable in certain respects, as specified herein, to extent that revised fares compare favorably with fares charged for similar services under substantially same transportation conditions and such other criteria as are pertinent.—Penn Central Fare Revision-1969, 335 I.C.C. 720 (736-47).

Section 1. (5 1/2) Exchange of services.[Unchanged. See vol. 11. p. 9096, vol. 15, p. 11951.]

Historical Note. See vol. 21, p. 16375.

Notes of Decisions

§1(5). n. 850: Volume 1—p. 631; Volume 6—p. 4802.

Section 1. (6) Classification of property for transportation; regulations and practices.—[Unchanged. See vol. 9, p. 7218.]

Amendments, see footnotes, vol. 1, p. 633; historical notes, p. 633, vol. 9, p. 7218.; vol. 21, p. 16375

Notes of Decisions

Volume 1—p. 640; Volume 6—p. 4803; Volume 9—p. 7219; Volume 11—p. 9096; Volume 12—p. 10185; Volume 13—p. 10909; Volume 14—p. 11390; Volume 15—p. 11951; Volume 16—p. 12587; Volume 17—p. 13237; Volume 18—p. 14007.; Volume 19—p. 15035.; Volume 21—p. 16375.

Weight as a Factor in Measurement of Transportation Charges

24. Minimum weight as factor.—[Vols. 1, 6, 9, 11-19, 21].—Refusal of the defendants to participate in reduced rates conditioned on the use of 70-ton cars was found not justified on the record. Such a refusal to supply the facilities necessary to provide service to complainant restricts the free movement of coal and access to the market at reasonable rates on a related competitive basis and has in effect, closed the routes in a commercial sense in contravention of the provisions of 1(4) and the basic purpose of 15(3) of the Act. This refusal of defendants constitutes an unjust and unreasonable practice in violation of 1(6) and must be condemned in order to provide the complainant, their shippers, with free, open, and adequate transportation service.—Coal, Ky., Tenn. and Va. to North Carolina, 329 I.C.C. 572 (587)*.

See also W. R. Grace & Co. case, §1(5), n. 211.

Carload Minimum Weights or Transportation Units

41. Larger cars furnished than ordered.—[Vols. 1, 6, 9, 12, 15, 16, 17, 19, 21].—When tariffs provide differing minimum weights depending on size of car used, but do not contain a substitution rule conforming to rule 66(a) of Tariff Circular 20, charges based on the minimum weight applicable to a car larger than the one ordered, furnished for carrier's convenience, will be presumed unreasonable insofar as they exceed those which would apply if a car of size ordered were used. Publication of charges based on particular equipment constitutes an open offer by carrier to the public, and, having tendered the rate, it must protect the public in its use. Where a reasonable demand is made for a particular car, and carrier for its own convenience furnishes a larger car, shipper should not be subjected to higher rates based on the larger car.—United States v. Southern Pac. Co., 325 I.C.C. 200 (201, 206).

Rule 66(a) is directed primarily to carriers and not to shippers; it provides that capacity of the car ordered, date of such order, and the number, initials, and capacity of the car furnished "should be" stated on the bill of lading and carrier's waybill; however, language of the rule is not mandatory. Complainant filled in all the appropriate spaces provided on the bills of lading, and fact that they do not list the dates the smaller cars were ordered does not preclude recovery of any excess charges. Issuance of the bill of lading is carrier's responsibility, not shipper's, and to regard inclusion of specific information on that document as an indispensable condition to recovery by shipper is improper; it would render form superior to substance and amount to unwarranted disregard of the other relevant evidence of record. Unrebutted testimony establishes the dates the smaller cars were ordered, and complainant's qualification of those dates by use of the words "on or about" does not materially detract from that evidence.—Id., pp. 206, 209.

Furnishing of a 50-foot flatcar instead of 40-foot car ordered for shipment of a fire truck, and of a 53-foot-6-inch flatcar instead of 50-foot car ordered for shipment consisting of a truck, a tractor tank, a set of tractor treads, an electric generator in a box, some wire rope, and four boxes stored in the truck, was for defendants' convenience when no demands for immediate loading were made and complainant's requests for the smaller cars were patently reasonable. Mere fact that the larger cars were supplied shortly after the requests were made does not establish that defendants were not given a reasonable time to supply the smaller cars ordered; nor is it of controlling importance that at time of shipment one originating carrier had only 25 40-foot flatcars and the other had no 50-foot flatcars. If carriers are unable to supply a certain type car, although they publish charges on that type, a shipper making a reasonable request for such a car should not be made to suffer higher charges.—Id., pp. 204, 207.

The 24-foot fire truck could obviously have fitted on a 40-foot flatcar, and length of the 50-foot car ordered for the other shipment would have exceeded the combined length of the articles by 9 feet 6 inches; moreover, sizes of the tractor treads, the wire rope, and the box containing the generator indicate that they need not be loaded in tandem. Such evidence, together with unrebutted testimony of expert who supervised the loading, is convincing that latter shipment would have fitted in a 50-foot flatcar with sufficient space left for the brake wheel clearance required by carriers' loading rules and for any possible tolerance required between the various items. If defendants had published a rule in conformity with tariff circular rule 66(a), the applicable charges on those two shipments would have been determined on the minimum weights for the cars ordered; their failure to do so was prima facie unreasonable, and that presumption has not been rebutted as to those shipments; reparation awarded.—Id., pp. 208, 210.

But charges based on 50-foot car furnished in lieu of 40-foot flatcar ordered to be furnished next day for a shipment of two motor vehicles and four boxes from Aberdeen, Md., are not shown to have been unreasonable. Defendants had no 40-foot flatcars in yard which usually supplies cars for Aberdeen, and unrebutted testimony that when complainant was so informed it indicated that the smaller car was required for immediate loading is convincing that defendants had no opportunity to furnish such a car within the allotted time, and precludes finding that the larger car was furnished for their convenience. Moreover, it is not convincingly shown that shipment could have been loaded on a 40-foot car and comply

with carriers' loading rules; although combined length of the vehicles was 35 feet 4 inches, without a showing of dimensions of the individual boxes it cannot be assumed that they would have fitted in the remaining space or on the vehicles themselves, and mere fact that shipment was loaded within 40 feet of the larger car does not establish that a 40-foot car would have been adequate in view of the clearance requirements.—Id., pp. 202, 205, 206-8.

Respondent railroads' proposed reduced rates on canned goods between Pacific coast and eastern points found not just and reasonable to the extent schedules containing such rates fail to contain a provision protecting minimum weight applicable to the car ordered by shipper in violation of rule 66(a) of Tariff Circular No. 20.—Canned Goods, Between Pacific Coast and the East, 332 I.C.C. 55(64-5)

43.—Two cars furnished for one ordered.—[Vols. 1, 6, 9, 11-13, 15, 19].—Respondent railroads' proposed reduced rates on canned goods between Pacific coast and eastern points found not just and reasonable to the extent schedules containing such rates fail to contain a limited two-for-one rule to apply over northern routes from October 15 to April 15 in violation of rule 66(a) of Tariff Circular No. 20.—Canned Goods, Pacific Coast to the East, 335 I.C.C. 55(65-6).

Computation of Charges According to Weight

62.—Origin weights.[Vols. 1, 6, 9].—See Coal, Weighing and Computation of Freight Charges, n. 74, below.

64.—Destination weights.—[Vols. 1, 6, 9].—See Coal, Weighing and Computation of Freight Charges, n. 74, below.

65. Bills of Lading act—Shipper's weight, load, and count.[Vols. 1, 6, 9, 17, 19, 21].—

Action for nonreceipt of part of goods: [Vols. 1, 9, 16].—In consignee's suit against delivering carrier for damages resulting from alleged deficient interstate motor transportation of goods, introduction of bill of lading issued by initiating truck line and containing notation "S L & C" which means "shipper's load and count" did not meet the burden of proving that 305 fan coil units (which plaintiff ordered from consignor) were actually loaded in good condition at the start of shipment. As stated in 100 F. Supp. 595, a "shipper's load and count" in a bill of lading has the effect of placing the burden on shipper who loads the goods to prove that the amount specified was loaded and that a less amount was unloaded by consignee; whereas in the case of a receipt not so qualified the burden is on carrier to prove that amount shown on bill of lading was either not in fact loaded, or was delivered, or otherwise to settle for the full value thereof. Therefore, a "shipper's load and count" bill of lading places on shipper the burden of proof of proper and correct loading, and such bill of lading without additional evidence does not fulfill that burden; district court decision, denying plaintiff's claim for damages, affirmed.—Dublin Co. v. Ryder Truck Lines, Inc., 417 F. 2d 777 (778).

In general: [Vols. 1, 6, 9, 19, 21].—Under §8 of the Bills of Lading Act, carrier is not obligated to make delivery except upon production and surrender of the bill of lading; but it is not prohibited from doing so. And defendant railroads did not violate Uniform Bill of Lading provision which prohibits inspection without written consent of shipper by delivering plaintiff's shipments (moved on order bills of lading stating there was no right of inspection prior to surrender) to consignee without surrender of the bills of lading; that provision was adopted for the benefit of carriers and can be waived by them at any time. Similarly, while carrier's liability to the holder of an order bill of lading elevates the order bill to the status of a negotiable document, and that status is not undermined by the liability of carriers under §20(11), the provision in an order bill of lading requiring its surrender protects carrier from further liability on the negotiable instrument and carrier may waive that right so long as it protects negotiable-instrument character of the order bill.—Iowa Beef Packers, Inc. v. Chicago G. W. Ry. Co., 402 F. 2d 930 (934).

In addition, provisions of §3 of Uniform Freight Classification 6 (under which consignee of shipment of perishable goods can receive the goods without delay) were adopted to protect the carrier from loss resulting from delays in transportation because of the use of bills of lading and, also, to protect carrier in instant limited situation from possible subsequent holders of the bills of lading; however, by complying with those provisions, the railroad does not assume any other risks. Therefore, defendant railroads which delivered plaintiff's shipments to consignee without surrender of order bills of lading and which instead took consignee's blanket indemnity bond are not liable for the damages which consignee collected from shipper because the shipments did not conform to agreed specifications.—Id., pp. 934-5.

Weighing Practice

67. In general.—[Vols. 1, 6, 9, 13, 14, 16].—While rules governing weighing of carload freight provide that initial weighing must be at origin and that reweighing must be performed at convenient points, in actual practice all cars are not weighed and a train is billed on basis of initial weighing of representative cars or on basis of the cars' marked capacity. However, when requested, carloads are weighed individually by consignors, consignees, or participating railroads, and a 7-cent per ton charge is assessed for that service when performed on railroad scales. Respondents anticipate loss of weighing-service revenues on unit-train operations if forced to meet protestant railroad's charge of 2 cents a ton for weighing on its recently installed electronic scale (capable of weighing trains in motion), but lawfulness of protestant's tariff is not in issue. Proposed amended tariff rules, which respondents interpret as a clarification of an intent to limit weighing to origin carriers, are unjust and unreasonable because they limit weighing for billing purposes to specified scales.—Coal, Weighing and Computation of Freight Charges, 326 I.C.C. 382 (383-5).

Tariff rule requiring acceptance by consignor of consignee's weights for assessment of freight charges, under terms of weight agreements between consignee and defendant railroads, not shown unjust, unreasonable, or otherwise unlawful. It is neither unreasonable nor inequitable to require shipper too rely upon certified destination weights found by authorized weighmasters operating industry-owned tracks. Privately owned equipment is regularly inspected and tested to assure accuracy in same manner as railroad track scales.—Institute of Scrap Iron & Steel v. Aberdeen & R. R., 341 I.C.C. 771 (776)

74. Reweighing.—[Vols. 1, 6, 9, 12-14, 16].—Proposed changed tariff rules, providing that origin waybilling carrier's scales or the scales of consignor or consignee (certified by a railroad party to the respective tariff) must be used for determining actual weights of bituminous steam coal in cars for the purpose of assessing freight charges on trainload consignments, found not just and reasonable within meaning of §1(6). To insure that shipper pays freight charges assessed on correct weights, he should be permitted to show by reweighing that the weights initially ascertained were not accurate. Shipper may want to reweigh because of the possibility of loss or theft en route or inaccuracy of the origin scales. The instant proposal, allegedly for the purpose of preserving the custom of origin-carrier weighing, is unjust and unreasonable because it limits weighing for billing purposes to specified scales.—Coal, Weighing and Computation of Freight Charges, 326 I.C.C. 382 (382-3, 385-6).

Classification Structure

126. In general.—[Vols. 1, 11, 12, 14, 17, 19, 21].—Argument that all-commodity rates which are not subject to a mixing rule and thus apply on straight as well as mixed shipments are a drastic departure from existing l.c.l. rate structure and therefore violate §1(6), is untenable in view of holding in 379 US 343 that §1(6) does not apply to all-commodity rates.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (737).

See also Price-Watson Company v. I.C.C., §6(7), n. 260.

131. Descriptions of commodities.—[Vols. 1, 6, 9, 13-19, 21].—De-icers and decontaminators are each specifically designed articles which consist of a spray unit and a truck chassis, where the chassis has been so altered that considerable changes would be required to reconvert it to use in the carriage of freight, and are found to be separate entities and to fall within the classification description "sprayers, noibn." Applicable rating on past shipments of both articles, therefore, is the class 45 rating on sprayers, noibn, despite carrier's contention that higher class 85 rating provided in the classification on freight chassis or, in the alternative, class 85 rating on a combination article under rule 18 thereof was applicable thereon. That considered articles are commercially known and sold as de-icers or decontaminators are factors which weigh heavily in determination of the proper classification rating.—Classification Rating of De-Icer—Seaboard A. L. R., 326 I.C.C. 389 (392, 395-6)*.

171.—Use to which article is put.—[Vols. 1, 6, 9, 11-17, 19, 21].—Predominant use of a commodity, not its isolated or sporadic use, determines its character for transportation purposes.—Classification Rating of De-icer—Seaboard A. L. R., 326 I.C.C. 389 (396)*.

174.—Trade representations by manufacturer or shipper.—[Vols. 1, 6, 9, 12-14, 16, 18].—See Classification Rating of De-icer—Seaboard A.L.R., n. 131, above.

Specific Rules

215. Rule 14. Application of carload ratings or rates.—[Vols. 1, 6, 9, 14-19].—Rules 14, 27, and 30 of the Uniform Freight Classification, and exceptions thereto as published in various tariffs of the Nation's railroads, placing upon consignees the duty to fully unload carloads of freight, impose upon such consignees the duty to remove all dunnage, debris, and other foreign matter connected with inbound carload shipments, but does not include the removal of paper and wooden grain doors, and other grain door debris, in the unloading of boxcars used for the transportation of bulk grain or grain products.—Consignees' Obligation to Unload, 340 I.C.C. 405 (411).

The term "freight" as used in rules 14, 27, and 30, in essence, refers to shipments which move under contracts of carriage as evidenced by bills of lading, the terms and conditions of which are governed by the ratings, rules, and regulations of the Uniform Freight Classification.—Id., p. 410.

See also Notification of Unloaded Car, By Consignee to R., at §1(6), n. 261.

219a. Rule 18. Combination articles.—[Vols. 6, 9, 12-15, 16, 19].—Since the application of classification rule 18 is limited to a combination of articles (not specifically classified) that are suitable or readily adaptable to separate uses, that rule is not applicable on past shipments of de-icers and decontaminators which moved as a complete unit on Government bills of lading describing each commodity as "Sprayers, NOIBN," or "Spray Outfit." Both commodities, each consisting of a truck chassis and a spray unit, are specifically designed and constructed to operate as a unit; each is a single article and not a combination of separately usable articles; and, though not specifically classified by name, each is embraced in the classification as sprayers, noibn.—Classification, Rating of De-icer—Seaboard A.L.R., 326 I.C.C. 389 (391-2, 396)*.

225. Rule 24. Follow lots—minimum weight for single carload shipments when more than one car required.—[Vols. 1, 6, 9, 11, 12, 14, 15, 17, 18, 21].—Classification Rule 24, §§ 1 and 2 of which are before the court for interpretation in railroad's action against shipper to recover freight charges on multi-car shipments, contemplates shipments where more than one car is used and the last, or "trailer," car is not loaded to capacity. The parties agree on the meaning of §1 of the rule which pertains to proper charge on "lead" car or cars, but each urges a different interpretation of a part of §2 thereof; thus, the issue concerns proper charge for the trailer car which, under §2(a), must be at the "CL rate or rating on entire shipment," and on a 10,000-pound minimum. No cases are cited which interpret disputed portion of the rule; however, applying well-established rules of construction generally adhered to by the courts, lower court properly held that the rational and logical meaning of the quoted clause is that the entire shipment should receive the c.l. rate of the lead car even though the trailer car is not full and that, in absence of that clause, the trailer car could be charged a higher rate.—Penn Central Co. v. General Mills, Inc., 439 F. 2d 1338 (1339, 1341-2).

See also Freight in Excess of Full Carload, at §6(3), n. 1.

228. Rule 27. Owners to load and unload carload freight and heavy or bulk less-than-carload shipments.—[Vols. 1, 6, 9, 11, 12, 14-17, 19, 21].—Rules 14, 27, and 30 of the Uniform Freight Classification, and exceptions thereto as published in various tariffs of the Nation's railroads, placing upon consignees the duty to fully unload carloads of freight, impose upon such consignees the duty to remove all dunnage, debris, and other foreign matter connected with inbound carload shipments, but does not include the removal of paper and wooden grain doors, and other grain door debris, in the unloading of boxcars used for the transportation of bulk grain or grain products.—Consignees' Obligation to Unload, 340 I.C.C. 405 (411).

The term "freight" as used in rules 14, 27, and 30, in essence, refers to shipments which move under contracts of carriage as evidenced by bills of lading, the terms and conditions of which are governed by the ratings, rules, and regulations of the Uniform Freight Classification.—Id., p. 410.

See also Notification of Unloaded Car, By Consignee to R., at §1(6), n. 261.

231. Rule 30. Dunnage allowances.—[Vols. 1, 6, 9, 12, 13, 16, 17].—As defined in rule 30 of the Uniform Freight Classification, the term "dunnage" does not include excelsior, hay, sawdust, shavings, shredded paper, straw, packing cushions or pads or similar packing material. Except for an allowance at actual weight, but not in excess of 2,000 pounds, transportation charges for dunnage shall be at the rate applicable on freight which it accompanies,—Consignees' Obligation to Unload, 340 I.C.C. 405 (406, note).

See also, §1(6), n. 228.

Demurrage

258.—Partly compensatory, partly penal.—[Vols. 1, 6, 9, 11, 13-19, 21].—Carriers are entitled to receive demurrage charges for undue detention of their equipment. Court, quoting *Turner*, 271 US 259, reiterated that the purpose for imposing demurrage charges is to "secure compensation for use of the car" and "to promote car efficiency by providing a deterrent against undue detention".—General Mills, Inc. v. United States, 364 F, Supp. 1278 (1282)*.

Protestants' claim that proposed increased demurrage charges may prove onerous to those who do not release cars in the allotted free time is correct but that is as it should be. Purpose of demurrage is to provide a penalty for such undue detention beyond free time, thus encouraging speedy release of cars and consequent improved car utilization. There is no point in providing a penalty unless it is effective.—Demurrage Rules and Charges, Nationwide, 340 I.C.C. 83 (88-89)*.

261. Reasonableness of rules in general.—[Vols. 1, 6, 9, 15, 17, 18].—Proposed changes in car demurrage rules and charges seeking to reduce free time period allowed for loading and unloading from 48 to 24 hours are not shown to be just and reasonable where it is clear from the evidence that many of the receivers of freight on respondent's rail line would be unable to unload within the free time proposed and the proposed reduction is to increase respondent's net revenue by a reduction in its per diem expenses and additional demurrage received; while the Commission recognizes the pressing need to explore every avenue to cut expenses and to increase revenues, this does not comport with the purpose of demurrage; additionally, demurrage rules in effect throughout the country provide a minimum of 48 hours free time and the Commission has long recognized that uniformity in demurrage rules is desirable.—Reduced Free Time At Points on Long Island R., 325 I.C.C. 714 (720).

Proposed rules governing detention of freight cars not shown just and reasonable inasmuch as respondents failed to establish that proposed rule changes will actually result in better car utilization which is the primary goal of such rules. On contrary, protestants provided numerous examples of inefficient, erratic, and unreliable service by carriers which prevented the shipper from releasing cars during free-time periods. Schedules ordered canceled.—Demurrage

Rules and Charges, Nationwide, 339 I.C.C. 655 (667-8).

Proposed new rule providing that telephonic or written notice that a car has been unloaded be made by consignee to carrier upon receipt of which notice the car would be released from accrual of demurrage charges not shown just and reasonable. There are no safeguards to prevent a consignee from terminating demurrage charges by furnishing false information thus depriving the carrier of lawful demurrage charges and violating rules 14 and 27 of the Uniform Freight Classification governing release from demurrage.—Notification of Unloaded Car, By Consignee to R., 341 I.C.C. 811 (816-19).

Cars Held for Consignor or Consignee

280. Holding short of destination.—[Vols. 1, 6, 9, 14-16, 21].—See Ft. Worth & D. Ry. Co. v. Goodpasture, Inc., §6(7), n. 263.

Cars Held Other Than for Consignor or Consignee

291. Strikes.—[Vols. 1, 9, 11, 13-19].—The Commission consistently has prescribed that a strike reimbursement should be based on the applicable per diem charge plus an additive to cover incidental expenses resulting from a car being held because of strike interference. The just and reasonable additive, as established in Chrysler Corp. v. New York Central R. Co., 234 ICC 755 (762), is 20 percent. Since the current charge of $3.29 per car-day, increased by 20 percent, provides for a total charge of $3.95, and the present strike rate is $4.00 per day, proposed increased demurrage assessed against cars detained due to strikes was found not shown to be just and reasonable.—Strike Demurrage Charge, Nationwide, 340 ICC 179 (188).

Free Time

298. Prescription by Commission.—[Vols. 1, 18].—The Commission found that rules providing 5 days free time, excluding Saturdays, Sundays, and holidays, at all ports in continental U.S., on all commodities to be moved in coastwise, intercoastal, and export service, except coal, coke, phosphate rock, several forms of potash, grain, and commodities having lesser free time in connection with specific rates, are just and reasonable. It was further found that on grain for coastwise, intercoastal and export movement, rules providing less than 7 days free time, excluding Saturdays, Sundays, and holidays, are not shown to be just and reasonable, or are unjust and unreasonable, at all ports in continental United States other than Pacific coast ports at which 5 days free time is now provided and except where special rates are provided in connection with reduced free time.—Free Time In-Car Storage at U.S. Ports, 329 I.C.C. 763 (771).

300. Line-haul rate contemplates free time.—[Vols. 1, 6, 9, 12].—See Southern Ry. Co. v. Champion Papers, Inc., §6(7), n. 217.

Computation of Time

312. In general.—[Vols. 1, 6, 9, 14-17].—In railroad's action against shipper to recover demurrage charges allegedly due for detention of refrigerated "piggyback" trailers, where demurrage tariff allowed 10 hours free time from time of actual or constructive placement and defined actual placement as the placing of a vehicle at the place designated by consignor or consignee for loading or unloading, free loading time of 10 hours began to run at the time that defendant shipper took affirmative action to appropriate any given trailer to its own use, i.e., whenever it began loading operations. Since railroad's practice of placing trailers in loading slots at shipper's dock whenever an opening occurred was not at shipper's order or request, but its own convenience and benefit, applicable tariff cannot reasonably be construed to mean that the free time began to run at the time an unordered trailer was positioned in a loading slot.—Chicago & N.W. Ry. Co. v. Union Packing Co., 326 F. Supp. 1304 (1307-8).

313. Exclusion of Sundays and Holidays.—[Vols. 1, 6, 14, 16].—Proposed changed provisions provide that Saturdays, Sundays, and holidays are chargeable days immediately following the day on which the last day of free time begins to run, rather than after the first 2 chargeable days. The record shows that many industries do not operate on weekends and holidays. Consequently, many companies are offered little or no rail service on Saturdays, Sundays, and holidays. Respondents have not shown that these changed demurrage provisions will result in increased utilization of freight cars and have not met their burden of showing that the changed provisions are just and reasonable.—Demurrage Rules and Charges, Nationwide, 340 I.C.C. 83 (93)*.

Causes Relieving from Demurrage Charges

374. Act of God.—[Vol 1].—In railroad's suit against shipper to collect demurrage charges resulting from latter's failure to unload and return rail cars within 2-days "free time" after placement for unloading at its Chicago lumber yard, as required by governing demurrage tariff, a snowstorm of sudden and unprecedented severity (which hit during time the cars accumulated) was an act of God which excuses defendant from liability for demurrage charges which accrued as a consequence of the storm. A demurrage tariff confers rights and imposes duties as a matter of law; and there being no freedom of contract between carrier and shipper to vary or modify the tariff as they might desire, shipper may not stipulate circumstances that would relieve him from liability and those he would assume. The duty to pay demurrage being imposed by law, an intervening act of God excuses the duty; and the "great Chicago blizzard" was an act of God which excuses defendant, who acted reasonably in the circumstances, from liability for demurrage which accrued as a consequence of the blizzard. Summary judgment for defendant.—Chicago, B. & Q. R. Co. v. Edward Hines Lumber Co., 320 F. Supp. 194 (195-6).

381. Bunching.—[Vols. 1, 6, 17, 18, 19].—Under the straight demurrage plan relief from bunching of cars is available under rule 8 and upon failure to obtain satisfaction from the carriers the Commission can be appealed to. Average agreements are designed to take care of bunching and no changes are being made. If a shipper who normally receives two cars at one time is confronted with four cars at the same time, the credits earned on the one or two cars unloaded diligently can be used to offset the debits incurred by detaining the extra cars. If the shipper finds that the average plan is inequitable because of poor rail service, he can always switch to the straight demurrage plan and use rule 8.—Demurrage Rules and Charges, Nationwide, 340 I.C.C. 83 (89)*.

Reconsignment and Diversion

Nature and Function

441. General definitions.—[Vols. 1, 6, 9].—Diversion, when used in the context of transportation, means "the act or process of changing the route or destination of a shipment while in transit." Therefore, when considered shipment had reached the billed Texas destination and consignee exercised such substantial control over the cars as amounted to a delivery which terminated the bill of lading contract, subsequent movement therefrom to California (pursuant to consignee's direction) was not a diversion or reconsignment as contemplated by statutes pertaining to payment of freight charges.—Southern Pac. Co. v. Brown, Alcantar & Brown, Inc., 404 F. 2d 187 (190).

Transit

Legality of Practice

510.—Restriction of practice.—[Vols. 1, 6, 9, 11-13, 21].—Commission found that cancellation of transit privileges is not per se unlawful. Such cancellation may or may not be unreasonable, depending on circumstances. Complainant shipper has not shown sufficient relevant facts to make a prima facie case of unreasonableness of such cancellation on movements of feed from Vicksburg, Miss. to destinations in Louisiana.—The Merchants Co. v. Illinois Central R. Co., 329 I.C.C. 713 (716).

Jurisdiction of Commission

520. Strict construction of rules.—[Vols. 1, 9, 13, 15].—See Atchison, T. & S. F. Ry. Co. v. John Sexton & Co., n. 538, below.

Manner of Assessing Charges

538. Rates and regulations applicable.—[Vols. 1, 6, 9, 11-19, 21].—The refusal of the L & N, C & O, and Clinchfield railroads to participate in reduced joint rates conditioned on the use of cars having a minimum capacity of 140,000 pounds and to furnish such cars from their existing car fleets, was an unjust and unreasonable practice in violation of §1(6), and the Commission's order directing plaintiffs and Southern to enter into joint rates restricted to movements in such cars, is not inconsistent with or in contravention of the decision of the Supreme Court in U.S. v. Pennsylvania R. R. Co., 242 US 208, 37 S. Ct. 95, 61 L. Ed. 251 and are in accord with the interpretation of that opinion enunciated by the Commission in Trogan Scrap Iron Corp. *v.* Boston & M. R., 270 ICC 727. See also, §1(4), n. 74.—Chesapeake and Ohio Railway Company *v.* United States, 298 F. Supp. 734 (740)*.

Under railroad's tariff permitting lumber (boards and sheets) to be stopped in transit for "facing or finishing with decorative or protective covering" and, later, "manufacturing," the only privileges granted defendant shipper were to "vinyl laminate" and then "manufacture" boards and sheets; thus, shipper exceeded transit privilege of "manufacturing" by including metallic resting glides, plastic edgings, and printed assembly instructions in individually packaged cartons containing all the component parts of various articles of furniture, since those items were not part of its manufacturing process. Therefore, though shipper described the shipments in bills of lading as "boards and sheets," commodities shipped in each instance were "furniture, knocked down flat" and the tariff rate on furniture, rather than lower "Boards and sheets" rate, applied. Railroad is entitled to recover from shipper freight charges on considered shipments at the higher furniture rate applicable.—Norfolk & W. Ry. Co. v. Permaneer, Inc., 320 F. Supp. 749 (753-4)*.

In railroad's suit seeking determination of the proper rate to apply on defendant's shipments from Kansas City, Kans., to various points, where the shipments moved from various origins to shipper's storage facilities at Kansas City from which, after periods of storage, they were reshipped to final destinations and, at time of reshipment, carrier's agent did not require, and shipper did not furnish, the shipper's certificate and other documents required by the transit tariff (but such documents were furnished to carrier a few days later) shipper violated the tariff as a matter of law and does not qualify for the storage-in-transit privilege. Accordingly, the lower "through" or "in-transit" was not applicable and, thus, shipper must pay the higher "flat" rate on its reshipments from Kansas City.—Atchison, T. & S. F. Ry. Co. v. John Sexton & Co., 339 F. Supp. 1202 (1203-5).

Stipulated facts show that shipper could not supply the required records at time of reshipment because of its computer record keeping and that a practice had developed, in which carrier acquiesced, wherein shipper would provide carrier with a "memorandum billing" containing enough information for delivery at desired destination, and would provide the "transit billing" on later date when the computer had produced it; however, contrary to defendant's argument, that does not make the tariff provision that transit billing be presented at time of reshipment unjust or unreasonable such as to be unlawful. Also, fact that tariff has since been changed to give a transit shipper a period after reshipment within which to surrender the transit billing documents does not make the previous tariff unreasonable.—Id., pp. 1205-6.

Furthermore, fact that plaintiff had knowledge of defendant's "memorandum billing" and acquiesced is of no consequence; a carrier cannot waive a tariff provision and estoppel cannot be applied against it. While the equities of the dispute are undoubtedly with defendant, the tariff involves the public interest which is paramount; and public interest demands that tariffs be strictly construed. Therefore, plaintiff's motion for summary judgment is sustained; defendant's motion for summary judgment is overruled.—Id., p. 1206.

Transit rates claimed under substitution provisions of tariff, not applicable where no transit services were in fact performed on rail shipments; lack of any services as provided by the transit tariff precludes its application on considered shipments. Also, since transit tariff concerned only carload shipments, rates could not be applied to shipments moving by truck to transit point.—Substitution Provisions From Four Holes, S.C., 326 ICC 736 (740).

Particular Transit Services

563. Milling.—[Vols. 1, 6, 9, 12, 14, 17].—See Transit Provisions on Wheat, at §1(5), n. 610.

566. Stopping to partially load or unload.—[Vols. 1, 6, 9, 11, 12, 14-17, 19, 21].—Commission found that when a carrier elects to provide a service for stopping in transit for partial loading or unloading, its charges for such service must in themselves be not less than its cost if §§ 2 and 3 of the Act are not be violated. The carrier is entitled to some compensation in addition to its costs and cost evidence herein establishes that proposed increased charges met those criteria and that the charges do not exceed a maximum reasonable level. Approved.—Stopping-in-Transit Charges & Restrictions, 337 I.C.C. 605 (609-10).

Additionally, Commission approved tariff provision limiting the number of stops for partial loading and unloading. Stopping in transit for such loading and unloading is a service additional to line-haul transportation. As such, management in its discretion may grant or withhold such service and, barring showing of unlawfulness, limiting the number of stops is also within managerial discretion.—Id., p. 609.

567. Storage.—[Vols. 1, 6, 9, 11, 12, 14, 15, 17, 19].—The temporary holding of boxcars on private siding of shipper, without more, is not storage-in-transit, so as to enable shipper to take advantage of claimed transit rates. Shipper's unnecessary holding of lumber cars results in undue detention to provide free warehousing, which Commission condemns.—Substitution Provisions From Four Holes, S.C., 326 ICC 736 (740-1).

Carrier's Duty as to Routing

573. Responsibility as between carrier and shipper.—[Vols. 1, 6, 9, 12].—Complainant's contention that defendant railroad's failure to call attention to conflict between the rate and route on the bill of lading is evidence of misrouting is without merit as the rates based on the applicable combination constitute the lowest possible charges.—Lincoln Grain, Inc. v. Missouri Pacific R. Co., 335 I.C.C. 779 (782).

574. Forwarding by cheapest reasonable available route.—[Vols. 1, 6, 9, 12, 14, 17-19].—Carrier is not in violation of §1 of the Act if, all things considered, it would be unreasonable to ship by the cheaper route. Since shipper requested expeditious service and accepted bills of lading without protest, resort to the more expensive short route was justified. It is the duty of the carrier to deal justly with the shipper and ordinarily this requires that shipments be routed over the cheapest route. But when, as in this case, the reasonable interpretation of the shipper's instructions indicates desire for expedition, the use of the higher-rated route may be justified.—Peter Kiewit Sons' Co. v. Chicago, B. & Q. R. Co. 329 I.C.C. 239 (242).

576. Reasonable and unreasonable routes.—[Vols. 1, 9, 12, 14].—Defendants could reasonably interpret that routing over the shorter, more expensive route was desired in view of the general instructions of complainant for expeditious service. The route of movement was substantially less circuitous than the lower rated route claimed by the complainant. Furthermore, only triweekly local service is available over the claimed route, and the additional miles and handling would entail at least 4 more days in transit and additional switching charges. All defendant's agents have standing instructions to send any unrouted traffic over the route which would give defendant its longest haul. In this instance, it would have been the claimed route; therefore, in routing the shipments the defendant, in effect, short-hauled itself. The applicable rate was charged.—Peter Kiewit Sons' Co. v. Chicago, B. & Q. R. Co., 329 I.C.C. 239 (242-3).

Terminal Services and Facilities

663. Express, pickup and delivery.—[Vols. 1, 14, 16, 17, 19].—Since under §1(6) carriers subject to part I are charged with the duty, among others, of establishing reasonable regulations and practices concerning receipt and delivery of property, and every unreasonable regulation or practice is declared unlawful, the Commission has implied authority to determine reasonableness of a terminal area established by Railway Exp. Agency for pickup and delivery service wholly incidental to its rail operations; and the reasonableness of such terminal area must be determined by substantially the same criteria as are used in establishing terminal areas of motor and water carriers, so as to regulate fairly and impartially the different modes of surface transportation. Population density and industrial development of the area, as well as geographical location of boundaries, distance involved, and quality of service rendered, are all factors to be considered.—Barton Truck Line, Inc. v. Railway Exp. Agency, Inc., 95 M.C.C. 625 (629).

Although REA's extension by tariff publication of its terminal area at Salt Lake City to include Tooele Ordnance Depot, some 36 miles distant, has enabled it to render a better service, such extension is unreasonable when a wide expanse of undeveloped wasteland separates the ordnance depot from Salt Lake City and there is insufficient homogeneity between the two communities in terms of geography, population density, or commercial development to justify its action.—Id., p. 630.

680. Terminal railroads; Absorptions.—[1, 6, 9, 11, 12, 14, 16, 21].—Defendants' practice of absorbing a greater portion of switching charges for shippers and consignees of freight on certain lines than is absorbed for those located on complainant Belt Railroad is unjust and unreasonable. Failure to absorb switching charges for some carriers has been found unreasonable because of prevailing practice to absorb similar charges for other carriers and the consequent discrimination for some shippers.—Public Belt R. Comm. v. Aberdeen & R. R. Co., 335 I.C.C. 162 (168-72).

Complainant shippers have clearly established that refusal of defendant line-haul carriers to absorb fully the interline switching charges is an unreasonable practice in violation of §1(6) inasmuch as it is defendant's prevailing practice to absorb similar charges for other connecting carriers and failure to do so in this instance results in unjust discrimination against complainants. See *Public Belt*, 335 ICC 162, 168. Defendant line-haul carriers must absorb fully the involved switching charges.—Armour & Co. v. Sioux City Term. Ry. Co., 341 I.C.C. 118 (126-27).

In absence of violations of §§2 and 3(1), Commission cannot require line-haul carrier to absorb a connection carrier's switching charge. Here, however, failure to absorb such charges was found unduly prejudicial and discriminatory. Complaints against defendant connecting terminal railroad have been abandoned and its switching charges remain fully effective and unassailed. Defendant line-haul carriers are obliged to pay defendant terminal carrier all unpaid switching charges to date.—Id., p. 126-27.

Loss and Damage Claims

731. In general.—[Vols. 1, 6, 9, 11-13, 16, 17].—Commission prescribed certain regulations (49 CFR 1005.1 and 1005.2 in appendix E hereto) as to the processing of loss and damage claims including a prescription of minimum filing requirements; specification of operations and carriers to which said regulations are applicable; the manner and form in which claims may be properly filed by claimants and accepted by carriers; the acknowledgement, investigation, and disposition of claims; and the processing of salvage.—Loss and Damage Claims, 340 I.C.C. 515 (554-577).

Observance of a proposed claims rule providing a 24 hour "grace period" for delivery above and beyond the time usually required for the involved transportation would be an unreasonable practice contrary to section 1(6), since the rule is inconsistent with carriers' liability under established law.—Provisions on Vegetables & Melons, Transcontinental, 340 I.C.C. 807 (815).

Regulations of the Commission

39 FR 12753, April 8, 1974, Part 1037: Handling of Bulk Grain and Grain Products in Interstate Commerce. Regulations promulgated as to Practices and Policies in Settlement of Loss and Damage Claims on Grain and Grain Products, effective May 23, 1974.

Section 1. (7)—Free transportation for passengers prohibited; exceptions; penalty.—[Unchanged. See footnotes, vol. 1, p. 850, vol. 11, pp. 9116-9118, vol. 15, p. 11974.]

Historical notes, see vol. 1, p. 851, vol. 9, p. 7277.

Notes of Decisions

Volume 2—p. 951; Volume 6—p. 4928; Volume 9—p. 7290; Volume 11—p. 9121; Volume 12—p. 10206; Volume 13—p. 10927; Volume 14—p. 11408; Volume 15—p. 11978; Volume 16—p. 12614; Volume 17—p. 13265; Volume 18—p. 14022; Volume 19—p. 15061; Volume 21—p. 16400.

1. **Establishment of reasonable car-service rules, regulations, and practices.**—[Vols. 2, 6, 9, 11, 13, 14, 17, 18, 21].—In judicial review of Commission actions, particularly actions taken under authority of the Esch Car Service Act, the court does not weigh evidence adduced before the Commission, does not inquire into the wisdom of regulations promulgated, and inquiries into soundness of the Commission's reasoning only to ascertain that is conclusions have rational support. And in reviewing car service rules prescribed after notice of proposed rulemaking and hearing, the court must observe the differing standard governing review of the Commission's exercise of its rulemaking authority, on one hand, and its adjudicatory function, on the other. As stated in 274 US 564, the Commission's authority to legislate is limited to establishment of reasonable rules; but in establishing a rule of general application, it is not essential that evidence of its appropriateness be adduced with respect to every railroad to which it will apply since, like other legislators, the Commission may reason from the particular to the general.—United States v. Allegheny-Ludlum Steel Corp., 406 U.S. 742 (748-9)*.

Commission findings as to nationwide freight car shortage were based primarily on data submitted by the railroads which, together with a prior finding of inadequate freight car ownership by railroads as a group, depict a gradually worsening ratio of carrying capacity to revenue tons originated. And since evidence and data of record showed that car shortages occurred chronically and that an amazingly low percentage of cars was actually on owning road's lines at any given time, the Commission promulgated as its own the two AAR car service rules in question, to require that freight cars after unloading be dispatched in direction of owning road's lines, with sanctions attached for noncompliance. Thus, based on the fact that railroads often were unable to supply shippers with cars and the statistics before it, the Commission concluded that an important underlying cause of car shortages was that the railroads did not jointly own sufficient freight cars to adequately serve hippers on their lines, and it reasoned that long-term result of prescribed rules would bring that fact home to those roads who had an inadequate car supply to serve on-line shippers and, without doubt, furnish them incentive to augment their supply of freight cars.—Id., pp. 749-52.

Moreover, while immediate effect of enforcing compliance with the rules would be to disrupt some established car handling and routing practices, and on occasion cause serious inconvenience to both shippers and railroads, the Commission's finding as to recurring long periods when there is an inadequate freight car supply to service shippers is supported by substantial evidence. Also, neither the language nor legislative history of the Esch Act indicates that Congress intended that the only criterion which the Commission might consider in establishing "reasonable" car service rules was the optimum use of an existing fleet of freight cars, however numerically inadequate that fleet might be. Thus, while the present flexible system of routing cars may have short-term advantages for some shippers and roads, the Commission could quite reasonably conclude that it has long-term drawbacks as well and, undoubtedly, it felt that rules designed only for most efficient use of existing car fleet would have little or no effect on the nationwide freight car shortage.—Id., pp. 752-4.

Record before the Commission justified its decision that the railroads and shippers were afflicted with an economic illness that might have to get worse before it got better; and that present car service practices tended to destroy any incentive of railroads to acquire new cars, and resulting failure to acquire new equipment contributed to the overall nationwide freight car shortage which prevented the rail industry from adequately serving shippers. And under those circumstances, car service rules which would tend to restore incentive to roads to augment their car supply, even at the temporary expense of optimum use of existing car fleet, conform to the statutory requirement of reasonableness. The Commission's conclusions, and the facts of record on which it relied, substantively support its action under authority of the Esch Act in prescribing the car service rules; and the proceedings being an exercise of legislative rulemaking power rather than adjudicatory hearings, the procedure fully compiled with Administrative Procedure Act. District court's judgement that Commission order prescribing the rules does not meet statutory requirements of reasonableness, and is invalid, reversed.—Id., pp. 744, 754-8.

In railroads' suit to enjoin, annul and set aside Commission orders requiring mandatory compliance with AAR car service rules already voluntarily in effect, the court takes note of three-judge Pennsylvania court's decion in the *Allegheny Ludlom* case, 325 F. Supp. 352; however, with deference to that court, the reviewing court disagrees with, and declines to follow, its holding that the order prescribing considered mandatory car service rules did not meet the reasonableness requirements of the statute. The Commission found the freight car shortage was *all persuasive* throughout the United States and, considering the expertise committed to it in governing interstate carriers, it acted lawfully in instituting an equitable policy which during a shortage would operate to reward owning railroads by giving them maximum use of freight cars in which they had invested. The question is not (as the Pennsylvania court posed it) whether the car shortage is more acute on owner lines, but rather who should get first call on the use of cars during a shortage; the court views that question as properly answered in the Commission's policy decision to institute rules providing the greater usage to the owner lines.—Florida East Coast Ry. Co. v. United States, 327 F. Supp. 1076 (1083-5)*.

The court also disagrees with Pennsylvania court finding that Commission acknowledgement that exceptions would be necessary to insure proper flexibility in the use of cars, coupled with possible criminal penalty for noncompliance, rendered mandatory nature of the car service rules unreasonable. It is a rare rule which has no exceptions in practical application; and the Commission's recognition that efficient use of freight cars in specific situations might require exceptions to prescribed rules does not mean that it cannot *reasonably* proceed from a mandatory rule where, as in instant case, it has established proper machinery for allowing those exceptions; also, any "rough edges" on procedures for handling requests for exception should not be allowed to upset an otherwise reasonable Commission plan to attack one phase of freight car shortages. Finding the reasoning of the Pennsylvania court unpersuasive, therefore, the reviewing court's independent examination of the issue leads it to conclude that the mandatory car service rules constitute a reasonable exercise of the Commission's power, based on sufficient substantial evidence in the record before it. Railroads' action dismissed; and allowing a 20-day period for appeal, temporary restraining orders vacated.—Id., pp. 1085-6.

Commission has jurisdiction to prescribe specific mileage charges railroads must pay to shippers for shipper-furnished tank cars. Respondents' argument from legislative history that §1(14)(a), as amended in 1940, does not apply to compensation for shipper-furnished cars is not valid as such amendment extends Commission's jurisdiction over the relationships between carriers and car lessors but did not limit the statute in respect to shipper-owned cars. A lack of specific reference to such cars is no basis for a different conclusion.—Mileage Allowances, Tank Cars, 337 I.C.C. 23 (24-6).

2. Compensation for equipment not owned by using carrier.—[Vols. 2, 6, 9, 11, 13-15, 18, 21].—The setting of rates for future application, including compensation to be paid by railroads for the use of cars not owned by them, is within meaning of "rule" and "rulemaking" as defined in the Administrative Act; thus, the Commission had to proceed in accordance with that statute in its investigation under §1(14)(a), as amended, which was instituted by a rulemaking notice and proposed the adoption of rules and regulations establishing additional "incentive" per diem charges on freight cars. Also, since Congress attached the new authority to include an incentive element to §1(14)(a), which requires a "hearing," provisions of APA for an adjudicatory trial-type hearing—in other words a hearing "on the record"—applied. However, the APA further provides that in rulemaking, when a party will not be prejudiced thereby, and agency may adopt procedures for submission of the evidence in written form; thus, even when rulemaking must be effected by a hearing "on the record," the record does not always have to be made in the traditional form.—Long Island R. Co. v. United States, 318 F. Supp. 490 (495-8)*.

In its action to enjoin enforcement of considered Commission order adopting rules and regulations prescribing incentive per diem charges for unequipped boxcars, Long Island R. claims the order was procedurally defective because no oral hearing was held prior to the Commission's decision. While it would have been better if the agency had served a summary of the results of its freight car study on all the carriers, plaintiff had access to all the evidence on which the Commission relied and, furthermore, its request for oral hearing was silent as to any specific need to cross-examine witnesses or present live rebuttal testimony; thus, no prejudice to plaintiff is established. Under all the circumstances, the court finds no sufficient reasons for ruling that the Commission's denial of plaintiff's petition for an oral hearing significantly prevented it from fairly presenting its case; complaint dismissed.—Id., pp. 494-5, 498-500.

But facts in action by the Seaboard and the Florida East Coast to set aside the same order, because of failure to grant oral hearing, fall within exception expressed by the New York court in its *Long Island R.* opinion, and show that plaintiffs were prejudiced by the Commission's summary procedures. Seaboard stated that, due to the exclusion of all cars except unequipped boxcars, the Commission's hasty action would punish it and would cost it $1.8 million annually; FEC stated strong policy reasons for its exemption from the per diem charges and it sought to show deficiencies in the order by presenting evidence and cross-examining certain Commission employees; and, without detailing other grounds urged, those assertions demonstrate the prejudice to them arising from the Commission's failure to provide hearings. The court finds that the Commission acted illegally in denying plaintiffs a hearing before imposing the incentive per diem charges; therefore, enforcement of the Commission's order as to those railroads is enjoined, annulled and set aside, without prejudice to further Commision proceedings and findings not inconsistent with the court's opinion.—Florida East Coast Ry. Co. v. United States, 322 F. Supp. 725 (728-9, 732-3)*.

Commission herein prescribed a structure of interim allowances to be paid by railroads to shippers for use of shipper-furnished tank cars. Only the car costs of transportation use are to be reimbursed to avoid the possibility of discrimination against any shipper. Such structure does not apply to cars transported for purchase, sale, or scrap and these movements shall be charged the tariff rate for commercial movement. Respondents' proposal for either an equalization rule or a substitute equalization rule is not supported by the statistical evidence.—Mileage Allowances, Tank Cars, 337 I.C.C. 23 (29-34).

Regulations of the Commission

35 FR 7121, May 6, 1970, Part 1036: Incentive Per Diem Charges on Boxcars, new regulations, §1036.1 - §1036.6, inclusive, prescribed and new Part 1036 added, effective June 1, 1970.

36 FR 13997, July 29, 1971, Part 1036: Incentive Per Diem Charges on Boxcars, §1036.1, §1036.3, and §1036.4 amended in part, effective on date of order.

38 FR 8657, Apr. 5, 1973, Part 1036: Incentive Per Diem Charges on Boxcars, §1036.5 amended so as to make incentive per diem charges applicable until further order of the Commission, in lieu of present 6-month application period, effective May 1, 1973.

38 FR 8517, Apr. 3, 1973, Part 1036: Incentive Per Diem Charges on Boxcars, §1036.3 and §1036.4 modified, effective on date of order.

Section 1. (14)(b) Contracts for agreements for protective service.—[Unchanged. See Vol. 11, p. 9121.]

Amendment, see footnotes, vol. 11. p. 9121.

Notes of Decisions

5. Service orders.—[Vols. 2, 12-19, 21].—When there is a conflict between the Commission's car service orders and carrier's tariffs, the service orders control. Therefore, in railroads' suits to collect storage and demurrage charges on grain shipments to elevator at Houston, Tex., the district court correctly ruled that service orders—which were also in effect—overruled contrary provisions of applicable tariff rule and allowed plaintiffs to constructively place cars short of Houston when they could not be received on defendant's interchange track.—Fort Worth & D. Ry. Co. v. Goodpasture, Inc., 442 F. 2d 1294 (1297, 1298).

Commission refused to vacate a service order granted applicant for movement of necessary mine construction equipment to supporting shipper's mine site. Even though involved trackage was constructed without Commission's approval, protestant has failed to show such order was not properly issued and was not a valid exercise of Commission's emergency powers.—Illinois Central R. Co. Operation in Jef. County, Ill., 328 I.C.C. 586 (593).

Regulations of the Commission

33 FR 9780, July 6, 1968, Part 1033: Car Service, §1033.997 Service Order No. 997, Louisville & N. R. Co. authorized to operate over trackage of Seaboard Coast Line R., Amdt. 1 extends expiration date of S.O. 997 to Dec. 31, 1968.

33 FR 10401, July 20, 1968, Part 1033: Car Service, §1033.1000 Distribution of refrigerator cars [S. O. 1000], new section added, effective until July 31, 1968.

33 FR 10727, July 27, 1968, Part 1033: Car Service, §1033.992 Service Order No. 992, Union Pac. R. Co. authorized to operate over trackage of Great Northern Ry., Amdt. 3, extends expiration date of S.O. 992 to Oct. 31, 1968.

33 FR 10800, July 30, 1968, Part 1033: Car Service, §1033.999 Service Order No. 999, Missouri-K.-T. R. Co. authorized to operate over trackage of Fort Worth & D. Ry., Amdt. 1, extends expiration date of S.O. 999 to Aug. 31, 1968.

33 FR 10864, July 31, 1968, Part 1033: Car Service, §1033. 1001 Service Order No. 1001 (St. Louis-S.F. Ry. Co. authorized to operate over trackage of Missouri Pac. R. Co.), added, effective July 29, 1968.

33 FR 11453, Aug. 13, 1968, Part 1033: Car Service, §1033.1002 Service Order No. 1002, Car Distribution Directions—Appointment of Agents, added, effective Aug. 9, 1968.

33 FR 11713, Aug. 17, 1968, Part 1033: Car Service, §1033.1000 Service Order No. 1000 (Distribution of Refrigerator Cars), Amdt. 1, sets expiration date of S.O. 1000 as Aug. 15, 1968, effective day after date of order.

33 FR 12372, Sept. 4, 1968, Part 1033: Car Service, §1033.1003 Service Order No. 1003, Illinois Central R. Co. authorized to operate over certain trackage abandoned by the Tennessee Central Ry. Co., expiration date, Dec. 31, 1968.

33 FR 12660, Sept. 6, 1968, Part 1033: Car Service, §1033.1004 Service Order No. 1004, Harriman & N. R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., added, expiration date Dec. 31, 1968.

33 FR 12660, Sept. 6, 1968, Part 1033: Car Service, §1033.1005 Service Order No. 1005, Louisville & N. R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., added, expiration date Dec. 31, 1968.

33 FR 12741, Sept. 7, 1968, Part 1033: Car Service, §1033.1003 Corrected Service Order No. 1003 Illinois Central R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., expiration date Dec. 31, 1968.

33 FR 12964, Sept. 13, 1968, Part 1033: Car Service, §1033.1006 Distribution of refrigerator cars (Service Order No. 1006), added, effective day after date of order.

33 FR 14706, Oct. 2, 1968, Part 1033: Car Service, §1033.1007 Service Order No. 1007, Soo Line R. Co. authorized to operate over certain trackage of Chicago & N.W. Ry. Co. and Northern Pac. Ry. Co., added effective Sept. 30, 1968.

33 FR 14959, Oct. 5, 1968, Part 1033: Car Service, §1033.1008 Service Order No. 1008, Illinois Term. R. Co. authorized to operate over tracks of Illinois Central R. Co., added, effective Oct. 3, 1968.

33 FR 15120, Oct. 10, 1968, Part 1033: Car Service, §1033.1009 Service Order No. 1009, Railroad operating regulations for freight car movement, added, effective Oct. 7, 1968.

33 FR 15122, Oct. 10, 1968, Part 1033: Car Service, §1033.1010 Service Order No. 1010, Distribution of boxcars, added, effective Oct. 7, 1968.

33 FR 15341, Oct. 16, 1968, Part 1033: Car Service, §1033.1010 Service Order No. 1010-A, vacates and sets aside S.O. 1010 (Distribution of boxcars), effective Oct. 14, 1968.

33 FR 15341, Oct. 16, 1968, Part 1033: Car Service, §1033.1011 Service Order No. 1011, Distribution of boxcars, added, effective Oct. 14, 1968.

33 FR 15659, Oct. 23, 1968, Part 1033: Car Service, §1033.1012 Service Order No. 1012, Detroit, T. & I. R. Co. authorized to operate over trackage of Penn Central Co., effective Oct. 18, 1968, expires March 31, 1969.

33 FR 16568, Nov. 14, 1968, Part 1033: Car Service, §1033.1013 Service Order No. 1013, Illinois Central R. Co. and Louisville & N. R. Co. not to furnish boxcars for loading by Buckeye Cellulose Corp. at Memphis, Tenn., effective day after date of order.

33 FR 17144, Nov. 19, 1968, Part 1033: Car Service, §1033.1013, Service Order No. 1013-A, vacates and sets aside S.O. No. 1013, effective on date of order.

33 FR 17144, Nov. 19, 1968, Part 1033: Car Service, §1033.1011 Service Order No. 1011 (Distribution of boxcars), Amdt. 1, extends expiration date of S.O. No. 1011, effective Nov. 16, 1968.

33 FR 17178, Nov. 20, 1968, Part 1033: Car Service, §1033.1009 Service Order No. 1009 (railroad operating regulations for freight car movement), Amdt. 1, extends expiration date of S.O. No. 1009, effective Nov. 16, 1968.

33 FR 17350, Nov. 23, 1968, Part 1033: Car Service, § 1033.1014 Service Order No. 1014, St. Louis Southwestern Ry. Co. authorized to operate over trackage of Missouri-K.T. R. Co., effective Nov. 21, 1968.

33 FR 17919, Dec. 3, 1968, Part 1033: Car Service, §1033.1002 Service Order No. 1002 Car Distribution Directions; Appointment of Agents, Amdt. 1 changes expiration date of S.O. 1002 to Dec. 31, 1968, effective No. 30, 1968.

33 FR 18649, Dec. 18, 1968, Part 1033: Car Service, §1033.1009 Service Order No. 1009 (railroad operating regulations for freight car movement), Amdt. 2, extends expiration date of S.O. 1009, effective Dec. 31, 1968.

33 FR 19017, Dec. 20, 1968, Part 1033: Car Service, §1033.995 Service Order 995 (appointment of embargo agents), Amdt. 2, extends expiration date of S.O. 995, effective Dec. 31, 1968.

33 FR 19018, Dec. 20, 1968, Part 1033: Car Service, §1033.1007 Service Order 1007 (Soo Line R. Co. authorized to operate over trackage of Chicago & N.W. Ry. Co. and Northern Pac. Ry. Co.), Amdt. 1, extends expiration date of S.O. 1007, effective Dec. 31, 1968.

33 FR 19018, Dec. 20, 1968, Part 1034: Routing of Traffic, §1034.994 Service Order No. 994 (Rerouting of traffic—appointment of agents), Amdt. 2, extends expiration date of S.O. 994, effective Dec. 31, 1968.

34 FR 11, Jan. 1, 1969, Part 1033: Car Service, §1033.1004 Service Order No. 1004 Harriman & N. R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., Amdt. 1, extends expiration date of S.O. 1004, effective Dec. 31, 1968.

34 FR 12, Jan. 1, 1969, Part 1033: Car Service, §1033.1003 Service Order No. 1003 Illinois Central R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., Amdt. 1, extends expiration date of S.O. 1003, effective Dec. 31, 1968.

34 FR 12, Jan. 1, 1969, Part 1033: Car Service, §1033.1005 Service Order No. 1005 Louisville & N. R. Co. authorized to operate over certain trackage abandoned by Tennessee Central Ry. Co., Amdt. 1, extends expiration date of S.O. 1005, effective Dec. 31, 1968.

34 FR 206, Jan. 7, 1969, Part 1033: Car Service, §1033.1002 Service Order No. 1002 Car distribution directions—appointment of agents, Amdt. 2 extends expiration date of S.O. No. 1002, effective day after date of order.

34 FR 1729, Feb. 5, 1969, Part 1033: Car Service, §1033.1015 Service Order No. 1015, Union Pac. R. Co. to unload certain cars held at Longview, Wash., effective Feb. 4, 1969.

34 FR 1729, Feb. 5, 1969, Part 1033: Car Service, §1033.1016 Service Order No. 1016, Chicago & N.W. Ry. Co. to unload certain cars held at Kansas City, Mo., Oelwein, Iowa, and Peoria, Ill., effective Feb. 4, 1969.

34 FR 1730, Feb. 5, 1969, Part 1033: Car Service, §1033.1017 Service Order No. 1017, Minneapolis, N. & S. Ry. to unload certain cars held at Minneapolis, Minn., effective Feb. 4, 1969.

34 FR 1730, Feb. 5, 1969, Part 1033: Car Service, §1033.1018 Service Order No. 1018, Soo Line R. Co. to unload certain cars held at Glenwood, Minn., effective Feb. 4, 1969.

34 FR 1731, Feb. 5, 1969, Part 1033: Car Service, §1033.1019 Service Order No. 1019, Chicago, M. St.P. & P. R. to unload certain cars held at Kansas City, Mo., effective Feb. 4, 1969.

34 FR 2050, Feb. 12, 1969, Part 1033: Car Service, §1033.1020 Service Order No. 1020, distribution of boxcars 40 feet or longer with side-door openings of 8 feet or wider, effective Feb. 10, 1969.

34 FR 2355, Feb. 19, 1969, Part 1033: Car Service, §1033.1016 S.O. 1016 (Distribution of boxcars), Amdt. 1, sets expiration date of Service Order 1016 as Feb. 18, 1969.

34 FR 3746, March 4, 1969, Part 1033: Car Service, §1033.1021 Service Order No. 1021, Missouri-K.-T. R. Co. authorized to operate over tracks of Fort Worth & D. Ry. Co., expiration date, Sept. 30, 1969, effective March 1, 1969.

34 FR 5297, March 15, 1969, Part 1033: Car Service, §1033.1020 Service Order No. 1020, distribution of boxcars, revised service order, effective March 15, 1969.

34 FR 5298, March 15, 1969, Part 1033: Car Service, §1033.1022 Service Order No. 1022, distribution of boxcars, effective March 16, 1969.

34 FR 5380, March 19, 1969, Part 1033: Car Service, §1033.1020 Service Order No. 1020, distribution of boxcars, Corrected Rev. S.O. 1020, effective March 15, 1969.

34 FR 5604, March 25, 1969, Part 1033: Car Service, §1033.1022 Service Order No. 1022, distribution of boxcars, Rev. S.O. 1022, effective March 21, 1969.

34 FR 5997, Apr. 2, 1969, Part 1033: Car Service, §1033.1008 Service Order No. 1008, (Illinois Term. R. Co. authorized to operate over tracks of Illinois Central R. Co.) Amdt. 1, extends expiration date, effective Mar. 31, 1969.

34 FR 6281, Apr. 9, 1969, Part 1033: Car Service, §1033.1023 Service Order No. 1023, Demurrage on Freight Cars, effective Apr. 15, 1969.

34 FR 6395, Apr. 11, 1969, Part 1033: Car Service, §1033.1024 Service Order No. 1024, Union Pac. R. Co. authorized to operate over tracks of Southern Pac. Co., effective Apr. 10, 1969.

34 FR 6529, Apr. 16, 1969, Part 1033: Car Service, §1033.1003 Service Order No. 1033 (Illinois Central R. Co. authorized to operate over trackage abandoned by Tennessee Central R. Co.), vacated and set aside by Corrected S. O. 1003-A, effective Apr. 12, 1969.

34 FR 6529, Apr. 16, 1969, Part 1033: Car Service, §1033.1004 Service Order No. 1004 (Harriman & N. R. Co. authorized to operate over trackage abandoned by Tennessee Central R.), vacated and set aside by S. O. 1004-A, effective Apr. 12, 1969.

34 FR 6530, Apr. 16, 1969, Part 1033: Car Service, §1033.1020 Distribution of boxcars, 2nd Rev. S. O. 1020, effective Apr. 12, 1969.

34 FR 6587, Apr. 17, 1969, Part 1033: Car Service, §1033.1005 Service Order No. 1005 (Louisville & N. R. Co. authorized to operate over trackage abandoned by Tennessee Central R.), vacated and set aside by S. O. 1005-A, effective Apr. 12, 1969.

34 FR 6588, Apr. 17, 1969, Part 1033: Car Service, §1033.1023 Service Order No. 1023 (Demurrage on freight cars), Amdt. 1, extends expiration date of S.O. 1023, effective May 1, 1969.

34 FR 6733, Apr. 22, 1969, Part 1033: Car Service, §1033.1023 (Rev. S.O. 1023) Demurrage and detention charges on freight cars, effective May 1, 1969.

34 FR 7451, May 8, 1969, Part 1033: Car Service, §1033.1025 Regulations for return of covered hopper cars [S.O. 1025], added, effective May 6, 1969.

34 FR 7577, May 10, 1969, Part 1033: Car Service, §1033.1026 Service Order No. 1026 (St. Louis S. Ry. Co. authorized to operate over trackage of Illinois Central R. Co.) effective on day after date of order.

34 FR 8167, May 24, 1969, Part 1033: Car Service, §1033.1009 Service Order No. 1009 (Railroad operating regulations for freight car movement), Amdt. 3, extends expiration date of S.O. 1009, effective May 31, 1969.

34 FR 8204, May 27, 1969, Part 1033: Car Service, §1033.1023 Service Order No. 1023 [2d Rev. S.O. 1023] Demurrage and detention charges on freight cars, effective May 26, 1969.

34 FR 8920, June 4, 1969, Part 1033: Car Service, §1033.1020 Distribution of boxcars, 2nd Rev. S.O. 1020; Amdt. 1, extends expiration date of order, effective May 31, 1969.

34 FR 8920, June 4, 1969, Part 1033: Car Service, §1033.1023 Demurrage and detention charges on freight cars, Corrected 2nd Rev. S.O. 1023 supersedes Rev. S.O. No. 1023, effective May 26, 1969.

34 FR 8921, June 4, 1969, Part 1033: Car Service, §1033.1026 Service Order No. 1026 (St. Louis S. Ry. Co. authorized to operate over trackage of Illinois Central R. Co.) S.O. 1026-A vacates and sets aside S.O. 1026, effective on date of order.

34 FR 8921, June 4, 1969, Part 1033: Car Service, §1033.1027 Service Order No. 1027, Louisville & N. R. Co. authorized to operate over trackage of Belt Ry. Co. of Chicago and of Chicago & W. I. R. Co., effective June 2, 1969.

34 FR 9033, June 6, 1969, Part 1033: Car Service, §1033.1014 Service Order 1014 (St. Louis S. Ry. Co. authorized to operate over trackage of Missouri-K.-T. R. Co.), Amdt. 1, extends expiration date of S. O. 1014, effective May 31, 1969.

34 FR 9033, June 6, 1969, Part 1033: Car Service, §1033.1028 Service Order No. 1028, Atchison, T. & S.F. Ry. Co. authorized to operate over tracks of Fort Worth & D. Ry. Co., effective June 4, 1969.

34 FR 9870, June 26, 1969, Part 1033: Car Service, §1033.1025 Regulations for return of covered hopper cars, S. O. No. 1025, Amdt. 1, extends expiration date of S.O. 1025, effective June 30, 1969.

34 FR 9994, June 28, 1969, Part 1033: Car Service, §1033.1029 Service Order No. 1029, Delaware & H. Ry. Co. authorized to operate over tracks of Penn Central Co., effective June 29, 1969.

34 FR 11145, July 2, 1969, Part 1033: Car Service, §1033.1008 Service Order No. 1008 (Illinois Term. R. authorized to operate over tracks of Illinois Central R.), Amdt. 2, extends expiration date of S.O. 1008, effective June 30, 1969.

34 FR 11146, June 2, 1969, Part 1033: Car Service, §1033.1023 Corrected 2d Rev. Service Order No. 1023 (Demurrage and detention charges on freight cars), Amdt. 1, extends expiration date of Corr. 2d Rev. S.O. 1023, effective July 1, 1969.

34 FR 11211, July 3, 1969, Part 1033: Car Service, §1033.1029 Service Order No. 1029 (Delaware & H. Ry. authorized to operate over tracks of Penn Central Co.) revised, effective June 29, 1969.

34 FR 11211, July 3, 1969, Part 1033: Car Service, §1033.1030 Service Order No. 1030, Chicago, R.I. & P. R. authorized to operate over tracks of Atchison, T. & S.F. Ry. Co., effective June 28, 1969.

34 FR 11362, July 9, 1969, Part 1033: Car Service, §1033.1031 Service Order No. 1031 (Distribution of refrigerator cars) added, effective July 7, 1969.

34 FR 12179, July 23, 1969, Part 1033: Car Service, §1033.1029 Service Order No. 1029 (Delaware & H. Ry. authorized to operate over tracks of Penn Central Co.) vacated and set aside by Rev. S.O. 1029-A, effective on date of order.

34 FR 12180, July 23, 1969, Part 1033: Car Service, §1033.1032 Service Order No. 1032 (Great Northern Ry. authorized to operate over tracks of Chicago, R.I. & P.R. Co.) added, effective day after date of order.

34 FR 12392, July 29, 1969, Part 1033: Car Service, §1033.1009 Service Order No. 1009 (Railroad operating regulations for freight car movement) revised [Rev. S.O. 1009], effective July 25, 1969.

34 FR 13278, Aug. 15, 1969, Part 1033: Car Service, §1033.1033 Service Order No. 1033, Seaboard Coast Line R. Co. authorized to operate over tracks of Georgia R. R. & B. Co., effective Aug. 15, 1969.

34 FR 14172, Sept. 9, 1969, Part 1033: Car Service, §§1033.0, 1033.1, 1033.2, 1033.7, 1033.15, 1033.16, 1033.17, and 1033.18, railroads required to observe Rules 1, 2, 7, 15, 16, 17 and 18 of the Code of Car Service Rules—Freight promulgated by the AAR by the order in Ex Parte 241, Investigation of Adequacy of Railroad Car Ownership, Car Utilization, Distribution, Rules and Practices.

34 FR 15250, Sept. 30, 1969, Part 1033: Car Service, effective date of amendments to Part 1033 (34 FR 14172) is postponed to Nov. 10, 1969.

34 FR 15250, Sept. 30, 1969, Part 1033: Car Service, §1033.1030 Service Order 1030, Amdt. 1, postpones effective date of S. O. No. 1030 (Chicago, R.I. & P. R. authorized to operate over tracks of Atchison, T. & S.F. Ry.), effective Sept. 30, 1969.

34 FR 17334, Oct. 25, 1969, Part 1033: Car Service, §1033.1034 Missouri Pac. R. Co. authorized to operate over trackage of the Kansas City Public Service Freight Operation [S.O. No. 1034], effective Oct. 24, 1969.

34 FR 17729, Nov. 1, 1969, Part 1033: Car Service, §1033.1020 Distribution of boxcars, vacated and set aside by S. O. No. 1020-A, effective Oct. 31, 1969.

34 FR 17805, Nov. 5, 1969, Part 1033: Car Service, §1033.1032 Service Order No. 1032 (Great Northern Ry. authorized to operate over tracks of Chicago, R.I. & P. R.), Amdt. 2 extends expiration date of S.O. 1032, effective Oct. 31, 1969.

34 FR 18122, Nov. 11, 1969, Part 1033: Car Service, effective date of amendments to Part 1033 (34 FR 14172) is postponed until further order.

34 FR 19077, Dec. 2, 1969, Part 1033: Car Service, §1033.1028 Service Order No. 1028 (Atchison, T. & S.F. Ry. to operate over tracks of Fort Worth & D. Ry.), Amdt. 1 extends expiration date of S.O. 1028 until May 31, 1970, effective Nov. 30, 1969.

34 FR 19906, Dec. 19, 1969, Part 1033: Car Service, §1033.1035 Service Order 1035, Union Pac. R. Co. to unload certain cars of lumber held at Council Bluffs, Iowa, and Seattle, Wash., effective day after date of order.

34 FR 20193, Dec. 24, 1969, Part 1033: Car Service, §1033.1036 Service Order 1036, Atchison, T. & S.F. Ry. Co. authorized to operate over tracks of Missouri-K.T. R. Co., effective Jan. 3, 1970.

39 FR 24510, July 3, 1974, Part 1033: Car Service. Amdt. 1 extends expiration date of S.O. 1166 (Chicago and North Western Transp. Co.) to Dec. 31, 1974, effective June 30, 1974.

39 FR 24510, July 3, 1974, Part 1033: Car Service. Corrected S.O. 1189 authorizes Great Plains Ry. Co. to operate over tracks of Chicago and North Western Transp. Co., effective June 27, 1974.

39 FR 25663, July 12, 1974, Part 1033: Car Service. S.O. 1187-A vacates and sets aside S.O. 1187 (Return of Trailers), effective July 2, 1974.

39 FR 26030, July 16, 1974, Part 1033: Car Service. S.O. 1190 authorizes Union Pacific R. Co. to operate over tracks of Southern Pacific Transp. Co., effective July 10, 1974.

39 FR 26288, July 18, 1974, Part 1033: Car Service. S.O. 1191 promulgates regulations on storage charges on assigned cars, effective July 16, 1974.

39 FR 26911, July 24, 1974, Part 1033: Car Service. S.O. 1186 promulgates regulations for Distribution of Privately Owned Coal Cars, effective July 29, 1974.

39 FR 27329, July 26, 1974, Part 1033: Car Service. S.O. 1192 authorizes Erie Lackawanna Ry. Co. to operate over tracks of Lehigh Valley R. Co., effective July 24, 1974.

39 FR 27574, July 30, 1974, Part 1033: Car Service. Corrected 3rd Rev. S.O. 1119 promulgated rules as to Demurrage on freight cars, effective July 1, 1974.

39 FR 27575, July 30, 1974, Part 1033: Car Service. Corrected Rev. S.O. 1186 promulgates rules for Distribution of Privately Owned Coal Cars, effective July 29, 1974.

39 FR 27671, July 31, 1974, Part 1033: Car Service. Amdt. 6 extends expiration date of S.O. 1106 (Balt. & Ohio authorized to operate over tracks of Penn Central) to Jan. 31, 1975, effective July 31, 1974.

39 FR 27671, July 31, 1974, Part 1033: Car Service. Amdt. 5 extends expiration date of S.O. 1084 (Chicago, R.I. & Pac. authorized to operate over tracks of Chicago & N W) to Jan. 31, 1975, effective July 31, 1974.

39 FR 27672, July 31, 1974, Part 1033: Car Service. Amdt. 1 extends expiration date of S.O. 1173 (Distribution of Refrigerator Cars) to Dec. 15, 1974, effective July 31, 1974.

39 FR 27672, July 31, 1974, Part 1033: Car Service. Amdt. 3 extends expiration date of S.O. 1149 (Forth Worth & Denver operating over tracks of Quanah, Acme, & Pac. and tracks of Atchison, T., & S. F.) to Jan. 31, 1975, effective July 31, 1974.

39 FR 27672, July 31, 1974, Part 1033: Car Service. Amdt. 2 extends expiration date of S.O. 1151 (Peoria Term. Co. operating over tracks of Peoria & Pekin Union) to Jan. 15, 1975, effective July 31, 1974.

39 FR 27804, Aug. 1, 1974, Part 1033: Car Service. S.O. 1193 promulgates regulations as to Distribution of Boxcars, effective Aug. 1, 1974.

Section 1. (16) Rerouting of traffic on failure of initial carrier to serve public.—[Unchanged except paragraph (b) was added and the first paragraph became (a) by act of July 2, 1974, "Regional Rail Reorganization Act of 1973," Pub. Law 93-236, 87 Stat. 1021].

(b) Whenever any carrier by railroad is unable to transport the traffic offered it because—

(1) its cash position makes its continuing operation impossible;

(2) it has been ordered to discontinue any service by a court; or

(3) it has abandoned service without obtaining a certificate from the Commission pursuant to this section;

the Commission may, upon the same procedure as provided in paragraph (15) of this section, make such just and reasonable directions with respect to the handling, routing, and movement of the traffic available to such carrier and its distribution over such carrier's lines, as in the opinion of the Commission will best promote the service in the interest of the public and the commerce of the people subject to the following conditions:

(a) Such direction shall be effective for no longer than 60 days unless extended by the Commission for cause shown for an additional designated period not to exceed 180 days.

(b) No such directions shall be issued that would cause a carrier to operate in violation of the Federal Railroad Safety Act of 1970 (45 U.S.C. 421) or that would substantially impair the ability of the carrier so directed to serve adequately its own patrons or to meet its outstanding common carrier obligations.

(c) The directed carrier shall not, by reason of such Commission direction, be deemed to have assumed or to become responsible for the debts of the other carrier.

(d) The directed carrier shall hire employees of the other carrier to the extent such employees had previously performed the directed service for the other carrier and, as to such employees as shall be so hired, the directed carrier shall be deemed to have assumed all existing employment obligations and practices of the other carrier relating thereto, including, but not limited to, agreements governing rate of pay, rules and working conditions, and all employee protective conditions commencing with and for the duration of the direction.

(e) Any order of the Commission entered pursuant to this paragraph shall provide that if, for the period of its effectiveness, the cost, as hereinafter defined, of handling, routing, and moving the traffic of another carrier over the other carrier's lines of road shall exceed the direct revenues therefor, then upon request, payment shall be made to the directed carrier, in the manner hereinafter provided and within 90 days after expiration of such order, of a sum equal to the amount by which such cost has exceeded said revenues. The term "cost" shall mean those expenditures made or incurred in or attributable to the operations as directed, including the rental or lease of necessary equipment, plus an appropriate allocation of common expenses, overheads, and a reasonable profit. Such cost shall be then currently recorded by the carrier or carriers in such manner and on such forms as by general order may be prescribed by the Commission and shall be submitted to and subject to audit by the Commission. The Commission shall certify promptly to the Secretary of the Treasury the amount of payment to be made to said carrier or carriers under the provisions of this paragraph. Payments required to be made to a carrier under the provisions of this paragraph shall be made by the Secretary of the Treasury from funds hereby authorized to be appropriated in such amounts as may be necessary for the purpose of carrying out the provisions hereof.

Amendments, see footnotes, vol. 2. p. 962; vol. 9, p. 7294.

Historical Note

The Commission recommends that §1(16) be amended so as to empower the Commission to direct one railroad to operate over the tracks of another when the latter is unable to transport essential tendered traffic.—Annual Report, 1973, p. 85. See also vol. 2, p. 887.

Notes of Decisions

5. Construction of paragraph in general.—[Vols. 2, 6, 9, 11, 14, 15, 17, 18, 19, 21].—In action challenging order of the Commission authorizing intervening defendant railroad to abandon its entire line, located entirely within Virginia, the Commission's decision that public convenience and necessity permit abandonment is warranted in law and supported by substantial evidence on the record viewed as a whole. Congress entrusted to the Commission—not the courts—the duty to find the facts and exercise a reasonable judgment to determine the requirements of the public convenience and necessity; and its judgment that, in view of other service available in the area, the inconvenience to communities and shippers is outweighted by the burden placed on interstate commerce by subsidizing the railroad's unprofitable operation finds substantial support in the record. Accordingly, relief sought by plaintiffs is denied; action dismissed.—Washington and Old Dominion Users Ass'n v. United States, 287 F. Supp. 528 (530-2, 535)*.

The principal evil which §1(18) was designed to eradicate is the waste of carrier funds through building or extension of unnecessary lines which, without adequate promise of profitable operation, would become a burden on the public. It was also designed to prevent interstate carriers from weakening themselves by constructing or operating superfluous lines, and to protect them from being weakened by another carrier's operating in interstate commerce a line not required in the public interest.—Monon R. Construction and Operation, 324 I.C.C. 208 (233, 235).

Although order of bankruptcy court authorizes trustee of carrier in reorganization, effective upon the Commission's ratification, to acquire by conveyance or condemnation a right-of-way and certain trackage owned by complainant, a public corporation of the State of New Jersey, the Commission has no power to compel a carrier to acquire trackage rights or a line of railroad. Whether the transaction be subject to §5 or §1(18), the Commission's authorization to a carrier to engage in a transaction is permissive, not mandatory, and the Commission may not sanction a transaction unless an appropriate application has been submitted to it.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (273-4).

Of points raised by protestants in proceeding on railroad's application for authority to (1) abandon portion of its line over its Calumet River bridge, (2) construct and operate track extensions on either side of the river connecting its line with main line of another railroad, and (3) to acquire trackage rights over tracks of the other railroad approaching and crossing the river, only the matter of whether or not those transactions are permitted and required by public convenience and necessity and consisent with the public interest comes within the Commission's jurisdiction; and, as used in the Act, those terms are not as broad as they might seem in the abstract, but have direct relation to adequacy of transportation service, to its economy and efficiency, and to appropriate provisions and best use of transportation facilities.—Calumet Western Ry. Abandonment, 324 I.C.C. 523 (524, 532).

Operation by applicant railroad over the tracks of another constitutes a bona fide operation of a line of railroad under a trackage rights agreement and not a joint traffic arrangement; thus the abandonment of such operation is within the purview of §1(18) and subject to the Commission's jurisdiction, and fact that passenger service only is involved does not detract from its jurisdiction. Furthermore, acquisition of such trackage rights was found to be a transaction under §5(2) in 261 ICC 615, and a finding that considered operation is merely a joint traffic arrangement would be inconsistent with that decision and with the trackage agreement, and would be contrary to obvious intention of the parties when they executed that agreement.—Baltimore & O. R. Co. Abandonment, 328 I.C.C. 449 (452-3).

Order denying applicant's motion to dismiss its application under section 1(18) on the basis that effectuation of the trackage rights would constitute extension of the lines of both applicants modified, since this alone would not warrant denial of applicant's motion and dismissal of its application. An extension of lines of the acquiring carrier is implicit in any section 5(2)(a) transaction. There is no provision in the Act requiring approval of such extension under section 1(18) distinct from Commission approval of the section 5(2)(a) transaction and even a transaction exempted from Commission jurisdiction by the last sentence of the 1(18) exemption is directed to transactions so minor in nature as to have little or no effect on the service or financial structure of the lessor or on the employment status of its operating personnel. In this case, applicant will supersede the entire operations of Seaboard. The Act does not intend that the Commission have no jurisdiction over a transaction having as comprehensive effect as this upon the operations of a carrier party.—Seaboard Air Line R. Co.—Trackage Rights, 331 I.C.C. 361 (364-65)*.

The statute, §1(18-20), has been construed as (1) conferring jurisdiction upon the Commission subject to certain exclusions over abandonment proposals of all railroads engaged in interstate commerce notwithstanding that the line being abandoned may lie wholly within a single state and (2) requiring that due consideration be given to State and local interests in view of the fact that services in interstate and intrastate commerce are inextricably intertwined. Inasmuch as State commission's order of abandonment of the line (located wholly within the State) was restricted to intrastate operations, there is no conflict with Commission's jurisdiction over the abandonment nor is a decision on the jurisdictional issue of the State commission warranted.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (591)*.

As pointed out in 315 US 381, the Commission has authority to determine the economic advisability of the continued operation of a railroad "in a situation where someone other than the carrier provides the money". Record shows that neither the expenditures for rehabilitating the line nor the increasing costs of operation can be justified on the basis of present and probable future traffic or predictable revenues to be derived therefrom, regardless of whether operation of the line is continued by applicant or another operator; furthermore, if the line were continued, the State authority could not escape the costly rail-highway crossing projects.—Id., pp. 592-4.

Even if proposed schedules cancelling indicated switching arrangements may force protestant rail carrier to an abandonment contrary to §1(18) protestant's sole remedy is a civil injunctive proceeding under §1(20) which remedy is inconsistent with a proceeding under §1(18) seeking a Commission order to the same end. Commission thus has no jurisdiction over the matter of abandonment, may not consider related issues, and finds such schedules just and reasonable. —Switching & Routing, W. Bank Port Facilities, 332 I.C.C. 398 (401).

Commission, citing *Texas*, 270 US 266, held that spending of large sums of money by a carrier for construction purposes, and the construction of tracks for long distances makes the transaction subject to jurisdictional requirements of §1(18), irrespective of other considerations.—Central of Georgia Ry. Co.—Operation in Ala., 336 I.C.C. 623 (634).

See also North Western Employees—Pur.—Chicago & N.W. Ry. Co. at §5(2), note 5.

12. Effect of Commission's orders on contracts or agreements of carriers.—[Vols. 2, 6, 9, 13, 14, 16, 17, 19].—Substituting a common law business trust as owner-lessor of nonoperating rail carrier's leased railroad lines neither affects operations or service to the public by operating lessee nor reduces the owner-lessor's ability to perform its duties or obligations under the lease or under a reversion of the properties in the event the lease is terminated; however, the authority granted to acquire the rail line, property and franchises of nonoperating rail carrier and to substitute the trust as lessor is conditioned upon prior Commission approval of the termination of the trust.—Pittsburgh & W. Va.

R.—Pur.—Pittsburgh & W. Va. Ry. Co., 330 I.C.C. 593 (596-7).

Carriers Affected

15. In general.—[Vols. 2, 6, 9, 17, 19, 21].—See Pittsburgh & W. Va. Ry. Co. case, §1(3)(a), n. 2

17. —Wholly within a State.—[Vols. 2, 6, 9, 11, 13-17].—The Commission has jurisdiction over abandonment proposals of all railroads engaged in interstate commerce notwithstanding that the line being abandoned may lie whooly within a single state; however, due consideration should be given to State and local interests in view of the fact that services in interstate and intrastate commerce are inextricably interwined.—Washington & Old Dominion R. Abandonment—Vrginia, 331 I.C.C. 587 (591)*.

See also Brooklyn Eastern District Terminal v. United States, §1(22), n. 1.

Acts For Which Certificate is Prerequisite

26. Construction in general.—[Vols. 2, 6, 9, 11, 15, 19, 21].—See Tampa Phosphate R. Co. v. Seaboard Coast Line R. Co., §1(20), n. 16.

28. —Relocation of line.—[Vols, 2, 16, 17, 19].—Since mid-portion of railroad's branch line would be inundated and abandoned upon completion of Oahe Dam, leaving remaining portion of the branch unconnected with applicant's main line, proposed construction of 35-mile substitute line to reestablish that connection is found to be required by present and future public convenience and necessity. On further hearing to consider effect of the abandonment on shippers on remaining portion of the branch, record shows that (1) grain production in the area is substantial and increasing, (2) producers depend on the branch, (3) large quantities of government grain stored in the area will probably move by rail, and (4) that the line will initially generate enough revenues to produce net profits with good prospects of increased earnings; in addition, proposed construction will not weaken carrier's ability to provide on overall adequate and efficient service. Under the circumstances, the branch line should continue in operation and construction of the connecting substitute line is warranted; authorized.—Northern Pac. Ry. Co. Abandonment and Construction, 324 I.C.C. 750 (752, 760-2)*.

29. —Extensions.—[Vols. 2, 6, 9, 12, 14, 16-19, 21].—In action to set aside Commission order granting Norfolk Southern's application, and denying plaintiff's, for authority to construct an extension of rail line to reach newly developed phosphate fields, the Commission's findings, reasoning and conclusions are well within its province and are supported in the evidence; therefore, the reviewing court will not disturb the order. Principal shipper's expressed preference for Norfolk (thought it entered into the conclusions) was not a whim or personal taste, but a preference supported by sound, economic advantages it believes obtainable from that railroad's operation and not observable in plaintiff's; and other findings, supported by the record, amply sustain the Commission's conclusions that need for only one line was shown and issuance of certificate to Norfolk Southern was warranted. Furthermore, record shows adequate Commission consideration of plaintiff's suggested alternatives to an exclusive certificate; condition attached to certificate issued is significant in that regard. Complaint dismissed.—Atlantic Coast Line R. Co. v. United States, 243 F. Supp. 945 (946-7)*.

30. Abandonment.—[Vols. 2, 6, 9, 12, 14, 16-19, 21].—After examining the whole record in suit to set aside Commission certificate and order, which authorized Erie-Lackawanna Ry. to abandon certain branch lines, the court finds no basis for holding that (1) the Commission abused its discretion by not considering whether losses incurred in maintenance of those lines remained a burden on interstate commerce after inclusion of applicant in the more prosperous Norfolk & W. system; (2) the findings as to branch-line losses are not supported by substantial evidence and not adequate to sustain the order in issue; and (3) the Commission erred in altering, without proper explanation, its regulations concerning computation of operating expenses of the lines in question, as plaintiffs claim. Accordingly, in view of the very limited scope of judicial review, the Commission's order must be sustained; previously issued restraining order dissolved and the complaint dismissed.—Cobb v. United States, 297 F. Supp. 169(170)*.

Courts are not free to annul decision of Commission to allow abandonment of railroad because of declining traffic, substantial losses and need of substantial but unwarranted expenditures to continue operation because greater wisdom might have preserved a valuable transportation enterprise. Unprofitable operation cannot be expected to continue indefinitely to benefit shippers who did not furnish sufficient traffic to support line.—City of New York v. United States, 337 F. Supp. 150 (150)*.

Doctrine that authorization of abandonment of line by lessee railroad will not relieve lessor of independent obligation to operate leased properties applies only when lessor is a carrier by railroad within meaning of statute when lease was made.—Id., p. 150.

Where city filed separate action seeking to compel lessor to resume operations abandoned by railroad which was subsidiary and such case had been remanded to Commission to determine lessor's obligation, court reviewing order permitting abandonment of line would not consider claim that order of abandonment should have been conditioned on resumption of operations by lessor.—City of New York v. United States, 344 F. Supp. 929 (941)*.

On reconsideration, authority is granted short-line railroad to abandon its entire rail line; however, in view of approval of separate application of another railroad to acquire and operate line to be abandoned, and so as to avoid possible interruption of service, abandonment authority is made effective from and after commencement of service pursuant to the acquisition and operation authority.—Manistee & R.R. Co. Abandonment, 324 I.C.C. 489 (490, 492-3)*.

No §1(18) application seeking authority to abandon operations by applicant over tracks of another railroad is required inasmuch as applicant reserves the right to operate over the portion of track now used exclusively by the subject trains herein, and which was formerly used occasionally by freight cars.—Erie Lackawanna Ry. Co. Discontinuance of Trains, 336 I.C.C. 206 (233-4).

In authorizing abandonment of applicant's 225-mile subdivision and its subsidiary entire line, Commission noted that applicant was almost bankrupt, that the lines were in need of rehabilitation and that the cost, estimated at between $6 and $12 million, was not justified by present and potential revenues and traffic, citing Purcell, 315 US 381. Guidelines were established for determining whether a railroad intentionally downgraded a line or merely neglected it through a need to economize.—Missouri-Kansas-Texas R. Co. Abandonment, Okla., 338 I.C.C. 728 (743-47).

Mere fact that a line of railroad is losing money does not justify granting abandonment. Applicant must establish by clear, convincing evidence that abandonment will serve the public convenience and necessity. As shippers seem both capable and willing to offer more tonnage, applicant fails to carry its burden of proof. Application denied.—Lehigh Valley Railroad Company Abandonment, 338 I.C.C. 793 (803-4).

Commission prescribed traffic protective conditions herein to protect railroads affected by the abandonment of certain lines by bankrupt Central R. Co. of New Jersey and subsequent operation of such lines by Lehigh Valley R. Co. Additionally, conditions were prescribed establishing a trust fund to receive all of Central's revenues on interlined traffic.—Central R. Co. of New Jersey, 342 I.C.C. 227 (267-71).

See also Baltimore & O. R. Co. Abandonment case, n. 5 above: Brooklyn E. District Terminal Abandonment case, §1(20), n. 8; Manufacturers Hanover Trust Co. v. United States, §5(2), n. 52; Washington & Old Dominion R. Abandonment—Virginia case, n. 59, below.

32. Acquisition and operation.—[Vols. 2, 6, 9, 11, 15, 16, 18, 19].—Railroad's acquisition and operation (as a spur or industrial track) of entire line of short-line railroad to be abandoned is within the Commission's jurisdiction, and requires prior approval, under §1(18), such acquisition and operation not being exempt under §1(22); however, approval of instant application is not to be construed as a finding that considered line is a spur or industrial track, since decision would be the same whether spur or main-line trackage were involved.—Manistee & R. R. Co. Abandonment, 324 I.C.C. 489 (491-2)*.

Railroads' proposal to acquire and operate (as a spur or industrial track) portions of the trackage, in connection with proposed abandonment of entire line of railroad, is within the Commission's jurisdiction under §1(18-20), such acquisition and operation not being exempt under §1(22); thus, although filed under §5(2), the applications are properly entertainable under §1(18).—East Carolina Ry. Abandonment, 324 I.C.C. 506 (517-8).

34. **—Trackage Rights.**—[Vols. 2, 6, 9, 11, 13, 15, 17, 18, 21].—See Oregon-Washington R. & Nav. Co. v. United States, §5(2), n. 56.

Public Convenience and Necessity

44. **In general.**—[Vols. 6, 9, 11-15, 18, 19, 21].—In determining that public convenience and necessity permitted applicant railroad's abandonment of its entire line, located wholly within Virginia, the Commission properly considered the substantial savings to the State Highway Department (through use of abandoned right-of-way as part of new interstate highway system) even though amounts thereof would not accrue to the railroad itself. In addition, since the important issue in suit challenging the order authorizing abandonment is the effect of the railroad's prospects on public convenience and necessity, the court finds no error in the Commission's consideration of, and findings regarding, the railroad's feeder value, revenues (including divisions), and operating costs and, also, the large sums that would have to be spent for its rehabilitation. Congress entrusted the Commission with the duty to find the facts and exercise a reasonable judgment to determine requirements of "public convenience and necessity" and, since the record amply supports its findings and conclusions, plaintiffs are not entitled to relief sought. Action dismissed.—Washington and Old Dominion Users Ass'n v. United States, 287 F. Supp. 528 (531-4, 535)*.

In challenging the Commission's order granting defendant carriers authority to construct and operate a 13-mile rail line, to connect with industry trackage in newly developing industrial area, plaintiffs (protestants in Commission proceeding) argue that a certificate of convenience and necessity may not be granted unless an "urgent necessity" for proposed service is shown to exist; however, a literal interpretation of word "necessity" would frustrate the statutory scheme envisioned by Congress. In instant case, "necessity" must be construed to mean a substantial need for present or future service which is not or cannot be adequately supplied by existing carriers or facilities. The Commission, with its expertise and special knowledge, is allowed broad discretion in making such a determination and the scope of judicial review is extremely narrow. Therefore, since the Commission's action does not constitute an abuse of discretion and is supported by substantial evidence on the record as a whole, plaintiff's claim for relief is denied; order sustained.—Denver & W. R. Co. v. United States, 312 F. Supp. 329 (333)*.

In order to determine whether public convenience and necessity permit abandonment of subsidiary railroad's entire intrastate line, it is necessary to weigh marginal profits from combined operations of subsidiary and parent against the needs and burdens of rehabilitation and needs of public for continued operation. Revenues from the subsidiary line are on downward trend, not justifying $350,000 for rehabilitation of line or $31,000 annual expenditure for maintenance; acquisition and operation of portions of the trackage by parent and another railroad would permit rail service to many of shippers while most of remaining shippers had motor carrier and pipeline service available; approved.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (514-20).

Applicant constructed trackage for which approval is sought prior to filing of application in belief that involved track was an exempt industrial spur. Such track is only existing track over which deliveries can be made to supporting shipper's mine site and denial of application would seriously injure shipper. Application approved as public necessity for the operation of involved trackage outweight extra legal circumstances of its construction.—Illinois Central R. Co. Operation in Jef. County, Ill., 328 I.C.C. 586 (592-3).

See also Calumet Western Ry. Abandonment case, n. 5, above.; New York, N.H. & H.R. Co. Abandonment case, n. 60 below; Oregon Short Line R. Co. & Union Pac. R.

Co. Construction, n. 96, below; Permian Basin R. Co.—Construction case, n. 101, below; Southern Pac. Co. Discontinuance case, §13a, n. 20.

45. Definitions.—[Vols. 2, 14, 21].—The terms public convenience and necessity and consistent with the public interest, as used in the Act, are not as broad as they might seem in the abstract, but have direct relation to adequacy of transportation service, to its essential conditions of economy and efficiency, and to appropriate provisions and best use of transportation facilities.—Calumet Western Ry. Abandonment, 324 I.C.C. 523 (532).

50. Taxes.—[Vols. 11, 12, 15-18, 21].—The Commission has consistently refused to consider the effect an abandonment will have upon the income tax liability of a carrier or system, inasmuch as matters of this nature have no reasonable relation to issues of public convenience and necessity. Further, the final tax liability of a carrier is dependent upon too many imponderables not directly related to operations to be used as factor in computing effect abandonment will have upon it.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (511-2).

Abandonment

55. Abandonment defined.—[Vols 2, 6, 9, 11, 15, 17, 18, 21].—See Commonwealth of Pennsylvania v. Penn Central Transp. Co., §1(20), n. 16.

59. Grounds for abandonment in general.—[Vols. 2, 6, 9, 11, 15-19, 21].—"Normalization" of traffic figures used in computing railroad's projected annual loss so as to reflect average traffic of years prior to application for abandonment is not justified unless it is shown that denial of the application will bring the traffic back.—City of New York v. United States, 344 F. Supp. 929 (935)*.

Proposed abandonment of branch line approved, where record of deficit operations of the branch indicates irreversible deficits; also, neither possible future financial assistance from the State, nor unestablished service area growth potential, is entitled to weight because both are speculative. Moreover, principal users of the line use other means of transportation and could, at some inconvenience, retain present locations and rely solely on motor transportation or relocate on other portion of line; therefore, continued operation of considered low-density freight branch is not warranted, even though it could be continued in operation for a short time with small losses.—New York, N.H. & H.R. Co. Abandonment, 324 I.C.C. 345 (347, 352-4).

Continued operation of entire line of railroad located wholly within a single state is not justified in view of the proposed use of its right-of-way for other public transportation purposes, the minimal public need for rail line's freight service, expenses incurred in operating the service, heavy expenditures required for rehabilitating the line, financial losses sustained by carrier, continuing downward traffic trend, and bleak prospects for the future.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (598)*.

Moreover, while the Commission has discretionary power to impose a condition for the sale of the line at salvage value, it is not exercised unless required by public convenience and necessity. Since applicant railroad has a firm commitment to sell the line to state authority and public utility at a price substantially higher than salvage value, requiring it to accept less than the purchase contract would be unfair; further, to so condition the abandonment authority would be inconsistent with the evidence that there is insufficient need for service to warrant maintenance of the railroad intact. In addition, imposition of the condition would hamper the plans of federal and state authorities for use of the right-of-way for highway purposes.—Id., pp. 599-601.

Abandonment by applicant of its entire line of railroad authorized. Applicant has been previously adjudged bankrupt and its operations have been abandoned. Abandonment proposed herein would allow acquisition of applicant's line by three carriers who would restore much needed rail service to communities on applicant's line.—Tennessee Central Ry. Co. Abandonment, 334 I.C.C. 235 (237-8).

Upon reconsideration, proposed abandonment herein denied as testimony of shippers, receivers of freight, and public witnesses establishes the potential for economic growth of the area served and the fact that this potential is directly based upon the availability of rail service.—Wellsville, A. & G. R. Corp. Abandonment, 338 I.C.C. 604 (608-9)*.

Although question of possible damage to environment has been raised, denial of application for abandonment herein would almost certainly result in financial collapse of applicant thus substituting economic waste for the envisioned environmental damage. Under balancing test stated in *Calvert Cliffs* economic harm outweighs environmental damage. Application approved.—Bush Terminal R. Co. Entire Line Abandonment, 342 I.C.C. 34 (35).

Fact that alternate motor transportation may prove to be more expensive for shippers is not determinative of whether a low traffic density line as that herein should be abandoned.—Chicago, M., St. P. & P. R. Co. Abandonment, 342 I.C.C. 146 (152)*.

After consideration of environmental effects only, Commission found the abandonment proposed should be approved provided that any interested party be afforded a 90-day period to acquire involved right-of-way for use as public parkland. Abandonment is a condition precedent to such use of this property and it must be concluded that this action will beneficially affect the environment.—Burlington Northern, Inc., Abandonment, 342 I.C.C. 446 (454-5)*.

Although applicant's method leaves something to be desired, record shows clearly that line involved is lightly used and unprofitable. Applicant is bankrupt and trimming of unprofitable branches in as economical way as possible is one acceptable method of eliminating deficits. Approved.—Penndel Co. Abandonment Bet. Wil. Jct. and New Wil., 342 I.C.C. 570 (577).

See also Brooklyn Eastern District Terminal v. United States, 28 USC §2325, n. 61; Tennessee Central Ry. Co. Abandonment case, n. 60 below.

60. —Losses from operation.—[Vols. 2, 6, 9, 11-19, 21].—Fact that due to other income of parent, ultimate impact of wholly owned subsidiary railroad's losses might be less than if the railroad stood alone, would not justify requiring railroad operations to be continued at a loss, and only railroad business was to be considered in determining whether operation was unprofitable and should be abandoned.—City of New York v. United States, 337 F. Supp. 150 (150)*.

Claim that the railroad's loss figures constituted only bookkeeping losses which must be disregarded because they reflected intercompany charges arising out of leasing arrangement between parent and railroad which was its wholly owned subsidiary rejected as it did not appear that the intercompany charges were either improper or unreasonable.—Id., p. 150.

Interest on net salvage value is not a savable out-of-pocket operating expense in abandonment proceedings, as both the net salvage value and interest thereon are capital account items. Thus, the interest is not considered in determining whether public convenience and necessity permit abandonment of line; however, consideration is given to the extent it is a benefit accruable to applicant upon abandonment.—New York, N.H. & H.R. Co. Abandonment, 324 I.C.C. 345 (349-50).

And in determining whether convenience and necessity permit abandonment of a branch line, the estimated minimum expenditures necessary to maintain the line for conducting safe operations for a subsequent 5-year period, rather than actual expenditures for maintenance during the record period or costs for normal maintenance as out-of-pocket expenses are acceptable to determine whether past operations have been profitable. While normalized maintenance is an objective to be strived for, the future minimum expenditures necessary for safe operations are more important in considering whether the line can continue to operate profitably and safety in the immediate future.—Id., pp. 351-2.

While a few shippers may suffer inconvenience and financial loss from proposed abandonment, record shows other transportation is available in the immediate area and on approval of related trackage rights agreement, overhead traffic will continue to move between major termini; moreover, evidence is not convincing that there will be an increased use of the line in the foreseeable future; therefore, any economic or service disadvantage resulting from abandonment will be small compared with deficits now experienced by applicant in continuing to maintain considered segment of line. Abandonment of 65-mile segment, authorized; and applicant's acquisition of trackage rights over 18 miles of line of another carrier, in accordance with proposed §5 trackage rights agreement in embraced proceeding, approved.—Louisville & Nashville R. Co. Abandonment, 331 I.C.C. 93 (94, 118-9)*.

Where rail-subsidiary applicant in an abandonment proceeding interchanges traffic with its parent railroad and is part of the parent railroad system, evidence with respect to feeder revenues derived by the system should have been presented; but the omission is not fatal because, since record shows that half the traffic is interstate, very little is outbound and inbound traffic is received from 5 railroads, feeder value of the subsidiary to its parent is *de minimis*.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (595-6)*.

While the Commission may give consideration to the propriety of divisions in an abandonment proceeding, where the divisions arrangements between subsidiary applicant and its parent railroad are on the same basis as with other rail carriers, were arrived at before parent acquired control of applicant, and are not shown to be unreasonable or unfair, no need for adjustment of divisions arrangements is shown; therefore, protestant's request for investigation is denied.—Id., pp. 598-9.

A carrier is not required to continue in the carriage business when its overall operations are conducted at a systemwide deficit for a substantial period of time and where there is no reasonable prospect of conducting those operations at a profit for the foreseeable future. Evidence indicates that bankrupt rail applicant's growing operating expenses resulted in its deficit from operations increasing from $28,300 for 1963 to $1,774,877 for 1967; while its balance sheet at the end of latter year showed a net deficit of $1.6 million in working capital. Therefore, though industries and jobs along applicant's line are reliant on continuance of rail service thereover, public convenience and necessity permit the proposed abandonment. Denial of the application would neither preserve service for shippers or jobs for employees nor promote the economy of the territory; however, authorizing abandonment, conditioned on applicant's sale of the line (or portion thereof) to any responsible person for continued operation, could provide alternate means for preservation of service and jobs; authorized accordingly.—Tennessee Central Ry. Co. Abandonment, 333 I.C.C. 443 (447-8, 452-3).

In light of 49 CFR 1121.9, item 14(1)(d), an applicant must provide operating expenses of the line proposed to be abandoned, stated by appropriate primary accounts, actual so far as possible and otherwise approximated, with full statement of the accounting method used. Applicant's cost allocations based upon "educated guesses" are not acceptable.—Wellsville, A. & G. R. Corp. Abandonment, 338 I.C.C. 604 (606-7)*.

No allocation or assignment of bridge traffic revenues to line sought to be abandoned is required where evidence establishes such revenues will be retained by abandoning carrier over an alternate route but applicant has not shown just what part of bridge traffic would be retained.—Id., p. 607.

Applicant railroad, a debtor in reorganization under Bankruptcy Act, was directed by the reorganization court to discontinue its operations in Pennsylvania pending our decision herein. Although applicant's evidence contained weaknesses, its deficits have been sizeable each year and Commission therefore approved abandonment of Pennsylvania lines upon assurance that applicant's essential services would be continued by other carriers.—Central R. Co. of New Jersey—Abandonment, 342 I.C.C. 227 (288-91).

However, Commission found that much of applicant's proposal to abandon operations and lines in New Jersey should be denied. Record was devoid of supporting evidence by applicant or connecting railroads. In addition, there was no proposed alternative service for applicant's New Jersey lines sought to be abandoned.—Id. p. 294-97.

System earnings: In determining system financial results from operation of branch line sought to be abandoned, the 50-percent ratio has consistently been accepted as fair and reasonable where no computations and itemized expenses are submitted in evidence to show otherwise. As explained in 282 ICC 525, the Commission's purpose is to determine the effect of abandonment of branch on entire system, even though it may be impossible to find with accuracy what the expenses of handling branch traffic on system lines will be when mingled with other traffic on regularly scheduled trains moving over many lines in many directions. While there may be no tangible effect on expenses on other parts of the system, it is reasonable to assume that the cumulative effect might result in added expenses.—New York, N.H. and H. R. Co. Abandonment, 324 I.C.C. 345 (350).

Elimination of low-density freight branch that does not contribute to system (net tons of freight per mile of road per day being less than 1 percent of carrier's system average density) is essential for sake of carrier's survival and preservation of essential rail service.—Id., pp. 353-4.

Subsidiary railroad's use of a 65-percent formula (based on Rail Form A) to develop cost of handling feeder traffic of parent railroad, in determining effect of proposed abandonment of subsidiary's entire line on the parent rail system, rejected; since neither the Form used in applicant's computations nor the itemized expenses making up total out-of-pocket expenses of Rail Form A were made part of the record, it is impossible to determine if all out-of-pocket expenses in the computations would be truly savable. While there may be some merit to system operating results predicated on a 65-percent formula, record does not justify substitution thereof for the 50-percent formula which has consistently been found fair and reasonable. Based on applicant's past revenues and expenses, as set forth in its income statements, with elimination of the income tax liability and application of the 50-percent formula, conclusion is warranted that combined operating profits from applicant's traffic are marginal and are not sufficient to compensate the parent railroad for its investment in the subsidiary.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (510-14).

64. —Traffic insufficient to justify existence of line.—[Vols. 2, 6, 9, 11-13, 19, 21].—Line of track involved herein is shown to require extensive and costly rehabilitation and maintenance due to its substantial age. The very light volume of traffic handled is insufficient to justify such heavy maintenance expenditures. Abandonment approved.—Chicago, M., St. P. & P. R. Co. Abandonment, 342 I.C.C. 146 (151-2)*.

See also New York, N.H. & H. R. Co. Abandonment case, no. 60 *Systems*, above.

65. —Road unsafe for operation.—[Vols. 2, 6, 9, 11, 13, 19, 21].—Abandonment sought herein authorized as the need for large expenditures for rehabilitation of the segment and for its continued maintenance has created a situation where the burden on the carrier would overbalance the public need for the line. See *Katy*, 338 ICC 728. A finding that involved line is presently being operated "safely" does not necessarily negate the need for rehabilitation expenditures.—Baltimore and Ohio R. Co. Abandonment Fairmont, 342 I.C.C. 751 (754-8).

66. —Relocation of line.—[Vols. 2, 6, 9, 11, 14, 16, 17, 19, 21].—In connection with authorized abandonment of portion of rail line over applicant's damaged bridge crossing the Calumet River, and with other proposed transactions, public convenience and necessity permit construction of extension of applicant's track south of the river from its main line within boundary of newly developed residential area to nearby bridge of Chicago & W.I.R. Co. across the river. Applicant's bridge, in its damaged condition, is a menace to navigation and must be removed; Western Indiana's bridge will be rebuilt to remove navigational obstructions, and joint use thereof by both railroads would be practicable and economical; and, from a transportation viewpoint, location of that bridge and the route to and from, agreed upon, is the most feasible; approved.—Calumet Western Ry. Abandonment, 324 I.C.C. 523 (524, 530-3).

68. Interest of communities and patrons.—[Vols. 2, 6, 9, 11-19, 21].—See Louisville & N. R. Co. Abandonment case, n. 60, above.

Acquisition and Operation

75. In general.—[Vols. 2, 6, 9, 15-17, 19, 21].—See Central R. Co. of New Jersey at §1(18), n. 30 above.

78. Continuance of needed service.—[Vols. 2, 6, 9, 11, 17, 19, 21].—Commission approved application by Lehigh Valley R. Co. to extend its lines over trackage in Pennsylvania to be abandoned by applicant. This would allow applicant, a railroad in reorganization under the Bankruptcy Act, to abandon these unprofitable lines but would continue needed service over the affected lines.—Central R. Co. of New Jersey—Abandonment, 342 I.C.C. 227 (291-3).

89. Acquisition or operation of abandoned line or to avoid acquisition or abandonment.—[Vols. 2, 6, 9, 21].—Acquisition by three carriers of portions of substantially all of the railroad line to be abandoned by Tennessee Central Ry. Co. approved as such acquisition will result in restoration of much needed rail service to communities on such line.—Tennessee Central Ry. Co. Abandonment, 334 I.C.C. 235 (244).

Employees

91. In general.—[Vols. 9, 11-19, 21].—As was done in the Savannah Union Station abandonment case, 312 ICC 797, conditions contained in 257 ICC 700 are imposed for protection of employees of subsidiary railroad seeking to abandon its entire line where, as a result of such abandonment, the parent rail carrier would not only benefit from being relieved of the burden of applicant's deficit operations but also benefit from assuming all or portion of prior operation of the subsidiary. There is nothing in the Rutland Ry. Corp. decision, 317 ICC 393, cited by applicant that could be construed as holding that Commission does not have statutory power to impose protective conditions for protection of railway employees in total abandonment proceedings if it considers their imposition reasonable and in the public interest.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (520-22).

Imposition of employee-protective conditions is justified when evidence shows some adverse effect has or will be suffered by one or more railroad employees; and it is of no significance that the number of employees affected or to be affected is indeterminable. In connection with abandonment of B & O's operations over the tracks of New York Central, employees of Central to the extent they operated B & O's trains and otherwise serviced and maintained the necessary equipment and tracks in support of B & O's operations were joint or common employees of New York Central and B & O; thus, an employee-employer relationship existed between the New York Central employees and the B & O so as to justify the imposition of the Burlington conditions for the benefit of those employees who have or will be adversely affected as the result of the abandonment with the cost thereof to be borne by the B & O.—Baltimore & O. R. Co. Abandonment, 328 I.C.C. 449 (455-7).

Furthermore, where the B & O voluntarily abandoned operations over considered tracks without having first secured a certificate of abandonment, the action constituted an actual or de facto abandonment which justifies imposition of protective conditions, effective from the time the individual employee was adversely affected, or from the effective date of the certificate, whichever is first.—Id., p. 458.

Although the Commission does not generally impose employee-protective conditions involving abandonment of an entire line, the matter is to be decided in light of the evidence in each case. Record shows considered abandonment would be of substantial benefit (in the form of savings and disposition of properties) to applicant and, in turn, to its parent railroad and sole stockholder; therefore, Burlington conditions are imposed for protection of adversely affected employees of applicant and the cost thereof is to be borne by the parent railroad.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (601-3)*.

In approving rail abandonment application, employee protective conditions are not imposed where proposed abandonment involves termination of all railroad operations of bankrupt independent line which is not able to meet its long-term or immediate financial obligations and, in addition, is not affiliated with a large, financially strong corporation benefiting from the abandonment and capable of sharing some of the costs incident thereto.—Tennessee Central Ry. Co. Abandonment, 333 I.C.C. 443 (453-4).

Commission refuses to impose employee protective conditions on Tennessee Central which is abandoning its entire line of railroad or on those carriers seeking control of portions of the abandoned line. Any adverse effect on involved employees was caused by previous cessation of all operations by TC and its financially bankrupt condition renders it unable to assume responsibility for such imposed conditions. Acquisition applications under §1(18) for extension of line over property previously abandoned are not similar to applications under §5(2) for consolidation of facilities. Commission cannot impose employee protective conditions herein as petitioner has not shown how proposed extension may adversely affect former employees. There is no discernible benefit to three railroads seeking acquisition of the line abandoned herein and thus no justification for imposition of employee protective conditions exists, especially as such imposition would block acquisition of involved line and deny much needed rail service to shippers.—Tennessee Central Ry. Co. Abandonment, 334 I.C.C. 235 (244, 245-246).

Contrary to applicant's arguments, Commission required employee protective conditions for employees affected by abandonment of entire line of applicant's subsidiary, pointing out that law makes no distinction between partial and entire line abandonments (see ICC v Railway, 315 US 373).—Missouri-Kansas-Texas R. Co. Abandonment, Okla., 338 I.C.C. 728 (752-3).

Construction of New Lines Or Reconstruction of Old

95. In general.—[Vols. 2, 6, 9, 11].—The purpose of §1(18)-(22) is to prevent interstate carriers from weakening themselves by constructing or operating superfluous lines, and to prevent them from being weakened by another carrier's construction and operation of a competing line not required in the public interest. As the wording of §1(18) does not permit formulation of an equation which can be applied with mathematical perfection to determine whether public convenience and necessity require proposed construction, it is the Commission's duty to find the facts and determine that question in exercise of reasonable judgment; and in determining whether construction of a new line of railroad is required, any inherent advantages in the proposed service over existing service must, when demonstrated of record, be given weight; lacking such a showing, there is no basis for assuming the return of reasonably predictable revenues to justify the expenditure of labor and materials.—Monon R. Construction and Operation, 324 I.C.C. 208 (232-3).

While denial of authority sought by instant applications will effectually prevent construction of proposed coal transfer facilities at Louisville, Ky., and at Michigan City, Ind., planned to be accomplished with funds obtained pursuant to a loan guaranty granted under Part V, applicant did not file application under §1(18-20) prior to or concurrently with its applications under Part V and §20a, and existence of the loan guaranty and authority granted under §20a to issue securities does not relieve the Commission of its duties and responsibilities under §1(18-20).—Id., p. 235.

Application for authority to construct and operate a line of railroad about 80 miles long from Odessa to Seagraves, Tex., presents an unusual case; in an age of declining rail mileage, it stands out as a proceeding to construct a new railroad. Residents of the three-county area have great faith in its future growth and, within reasonable limits, should be permitted to assume the risks involved in constructing a railroad. If those most directly concerned are willing to risk their capital with full knowledge of all relevant circumstances, the Commission should be reluctant to deny them opportunity to improve economy of their area; particularly when the area, now largely dependent on prosperity of one industry, may with adequate rail service develop a more diversified economic base. Applicant should not be denied opportunity to tap the substantial reservoir of traffic available in the area unless the Commission is reasonably certain that its knowledge of local economic conditions exceeds knowledge of those in the area who are prepared to invest in its future.—Permian Basin R. Co.—Construction, 330 I.C.C. 256 (264-5)*.

96. Necessity.—[Vols. 2, 6, 9, 16, 17, 19, 21].—No cost or other advantage of new through route resulting from proposed construction of new coal transfer facilities at Louisville and rail-marine transloading facilities at Michigan City, Ind., has been demonstrated, and it is clear that unless rates established by applicant Monon would be attractive to supporting shippers, making their costs over its route competitive with those over existing routes, none of the coal involved would move over the proposed route. Therefore, shippers who supported the applications did not show a genuine need for the proposed service, and their desire to have an alternate route available, which they would use only if the rate provided was attractive to them, would not justify a finding that public convenience and necessity requires the proposed extensions of line or that they are needed to assure existing and prospective shippers of adequate service. Proposed construction would waste carrier funds through building of unnecessary lines which, without adequate promise of profitable operation, would become a burden on the public. Denied.—Monon R. Construction and Operation, 324 I.C.C. 208 (234-5).

Determination of whether public convenience and necessity requires construction of 35-mile connecting line of railroad, to replace mid-portion of branch line which will be inundated and abandoned upon completion of Oahe Dam, depends on balancing the cost of constructing and operating the line against the adverse effect resulting from loss of the entire branch line. Requirements of public convenience and necessity for proposed construction (as developed at further hearing) outweigh result of comparing construction costs to net revenue carrier would realize in immediate future. Also, it is of primary importance that proposed construction and operation will not weaken carrier's ability to provide an overall adequate and efficient service and will preserve inherent advantages of rail service for grain producers and shippers in the area; authorized.—Northern Pac. Ry. Co. Abandonment and Construction, 324 I.C.C. 750 (760-2)*.

Public convenience and necessity require proposed construction and operation of a new 13.27-mile rail line from Hot Springs, Utah, to connect with industry trackage in Little Mountain area where large mineral resources are to be developed, when it would enable Union Pacific to provide developing industry with direct single-line service therefrom to the Pacific Northwest, southern California, and Midwestern points. Both UP and Southern Pacific serve general territory involved and, while SP's line is closer to parts of the developing area, that fact does not justify precluding UP from direct access thereto. Neither carrier has handled traffic from the area; both have invested in development of the industrial site, and both have a right to compete for the new traffic; thus, no issue of territorial invasion is involved. Also, there is no basis for finding that SP would be materially harmed by approval of the application; its present traffic would not be affected and its failure to get all the new traffic could not materially affect its system operation or strength.—Oregon Short Line R. Co. & Union Pac. R. Co. Construction, 334 I.C.C. 267 (268-70)*.

As the examiner found, applicant's proposal involves some duplication with existing SP facilities (which does not imply duplication of service) and, under §1(18), the Commission is to prevent improvident expenditures for unnecessary facilities and thereby protect carriers from unnecessarily weakening themselves. However, on unrefuted facts of record, there is no reason to say that UP needs to be protected from an improvident expenditure; nor is there basis for a finding of economic waste in the amounts by which costs of two originating lines exceed costs of one when, relatively speaking, amounts involved are *de minimus*. Both carriers are multibillion dollar companies with annual operating revenues that dwarf into insignificance the $1 million of extra investment cost noted by the examiner; adequate justification for that cost lies in the superior service and public benefit it will produce.—Id., p. 270.

Within the overall statutory scheme, however, carrier well-being is not the primary consideration; it is but a means to the end of providing for the public's transportation requirements. All the area's developers expressed support for applicants' proposal; and, while SP argues that joint-line route, SP-Ogden-UP, could be equally efficient and economical, the evidence indicates that UP's single-line service (avoiding interchange at Ogden) would be inherently faster, more efficient, and potentially more economical; also, such single-line service would be more likely to meet other transportation demands in development of the area. Moreover, the presence of the two lines and competitive routes in which they participate will, through rate and service competition, provide greater assurance of dependable service at economical rates.—Id., pp. 270-2.

97. Adequacy or inadequacy of existing service.—[Vols. 2, 6, 9, 18, 19, 21].—Sound economic conditions in the transportation industry require that carriers already serving a particular territory or locality be accorded the right to transport all traffic therein that they can handle adequately, efficiently, and economically, before a new operation is authorized. Therefore, extensions permitting a through service between proposed coal transfer facilities at Louisville and at Michigan City, Ind., should not be authorized solely on findings that their construction would benefit applicants and improve their financial and competitive positons; instead, the broader test of whether public convenience and necessity requires or will require the construction, and whether the resulting services are needed to ensure adequate service to the public, must be applied. Construction of superfluous lines and facilities not needed to ensure adequate service should not be authorized, and existing carriers should not be required to face unnecessary competition, particularly if they are adequately and efficiently handling the traffic involved.—Monon R. Construction and Operation, 324 I.C.C. 208 (233-4).

Whether the proposed construction be viewed in the broadest context as a proposal for institution of a rail-water route to compete with existing rail-water routes, or merely as one for construction of a line of railroad to compete with existing lines, applicants have failed to demonstrate that the proposed service will have any inherent advantage of cost or otherwise over existing service. Indiana mines on the Monon, which are adequately served by its existing lines, would not by themselves support the proposed operations, and coal contemplated for movement over the proposed facilities at Louisville, primarily from Kentucky and West Virginia mines, now moves via facilities of protestant railroads. Allegations of new or increased movements in the area are purely speculative, and there is no showing that existing carriers' services are inadequate or inefficient, that additional capacity to move involved coal traffic is needed, or that any other commodities would move over the proposed transfer facilities. Applications denied.—Id., pp. 232, 234. [But see dissent.]

98. Duplication of facilities.—[Vols. 2, 6, 14, 15, 17, 19].—Applicant Monon and each of protesting railroads has suffered a decline in coal traffic; coal contemplated for movement over proposed facilities at Louisville is now moving via protestants' facilities, and allegations of new or increased movements in the area are purely speculative. Construction of additional lines of railroad devoted primarily to transportation of coal would only rearrange the proportion of existing traffic which each carrier now enjoys, further expanding the overcapacity already existing in the area to be served. Such action would tend to weaken other carriers operating in interstate commerce, and would not afford existing carriers the right to transport all traffic which they can handle adequately, efficiently, and economically. Authority for proposed construction denied.—Monon R. Construction and Operation, 324 I.C.C. 208 (234, 235). [But see dissent.]

See also Oregon Short Line R. Co. & Union Pac. R. Co. Construction, n. 96, above.

99. Development of territory or traffic.—[Vols. 2, 6, 9, 11, 17-19, 21].—Evidence is convincing that, even considering applicant's imprecise traffic study, construction of proposed new 80-mile line of railroad from Odessa to Seagraves, Tex., to provide direct rail freight service in large oil and gas fields and in highly developed agricultural area, would attract some new industry and, also, would alter existing production and marketing patterns for such commodities as sugar beets, oil field equipment and supplies, grain, cotton, and new automobiles. Many industries will not locate a plant in an area not served directly by railroad; shippers in considered area will derive great advantage from proposed line; and, in addition, protesting rail carriers will not be materially affected by a grant of authority. Record shows a need for direct rail service in the Odessa-Seagraves corridor and that such service would foster further development in the tributary area; granted.—Permian Basin R. Co.—Construction, 330 I.C.C. 256 (265, 267)*.

Present and future public convenience and necessity require proposed construction and operation of a new rail line that would extend 13.27 miles southwesterly from Hot Springs, Utah, to connect with industry trackage in the Little Mountain area where large mineral resources are to be developed, and that would enable Union Pacific to provide developing industry with single-line service to Pacific Northwest, southern California, and to midwestern points. Proposed line would not constitute an invasion of Southern Pacific's territory; considered area is not SP territory and, thus, no invasion is involved, since SP is not considered a carrier already in the area. Little Mountain is as yet undeveloped, generating no traffic and, in that respect, is like new territory not served by any carrier. Neither UP nor SP has handled traffic from the area; both have invested in promotion and development of the industrial site; and both are entitled to compete for the new traffic. In addition, two line-haul railroads in newly developing area can make it more attractive to industries and serve to generate more traffic than otherwise would be expected. Authority granted.—Oregon Short Line R. Co. & Union Pac. R. Co. Construction, 334 I.C.C. 267 (268-9, 271-2)*.

101. Probable returns.—[Vols. 2, 6].—Neither applicant's, nor protestants', projection of income to be realized from first year of operation of proposed new line of railroad can be accepted without substantial modification; but applicant's traffic study, made by local residents with intimate knowledge of the area, supports a much larger revenue projection that that accepted by the examiner. Most reasonable estimate warranted by evidence of record is that net income for the first year would be about $50,000; such net income would fall far short of the $300,000 debt service expense contemplated by applicant. However, as held in the *Wenatchee Southern* case, 90 ICC 237, earning ability is not the sole test of public convenience and necessity, although always a factor to be considered; and, while main argument for denial of instant application is the anticipated debt service expense, as concluded in that case, feasibility and fairness of plans to finance proposed railroad should not be considered prior to the filing of a §20a application. Need is shown for construction and operation of proposed rail line; granted.—Permian Basin R. Co.—Construction, 330 I.C.C. 256 (264-7)*.

102. Excessive costs.—[Vol. 2].—Grant of a certificate for construction of lines of railroad requires immediate, high, and largely sunk costs for construction of tracks and other facilities, and if operations are not successful, only scrap is left. Proposed construction of coal transfer facilities at Louisville and at Michigan City, Ind., and institution of a new through service which is in reality only a modification of existing service, would not be prudent in an area of demonstrated overcapacity wherein existing carriers are contemplating shrinkage of facilities through coordination. Lacking any demonstration of a cost or other advantage of proposed service over that now available, there is no basis for assuming return of reasonably predictable revenues to justify the expenditures for material and labor. Denied.—Monon R. Construction and Operation, 324 I.C.C. 208 (232, 234).

Construction of Accessorial Lines or Facilities

114. Relocation of line.—[Vols. 2, 6, 16, 21].—Since mid-portion of railroad's branch line would be inundated and abandoned upon completion of Oahe Dam, leaving remaining portion of the branch unconnected with applicant's main line, proposed construction of 35-mile substitute line to reestablish that connection is found to be required by present and future public convenience and necessity. On further hearing to consider effect of the abandonment on shippers on remaining portion of the branch, record shows that (1) grain production in the area is substantial and increasing, (2) producers depend on the branch, (3) large quantities of government grain stored in the area will probably move by rail, and (4) that the line will initially generate enough revenues to produce net profits with good prospects of increased earnings; in addition, proposed construction will not weaken carrier's ability to provide an overall adequate and efficient service. Under the circumstances, the branch line should continue in operation and construction of the connecting substitute line is warranted; authorized.—Northern Pac. Ry. Co. Abandonment and Construction, 324 I.C.C. 750 (752, 760-2)*.

See also Calumet Western Ry. Abandonment case, n. 66, above.

Extensions

129. Extension defined.—[Vols. 6, 9, 11, 12, 14-16, 18, 19, 21].—Commission found subject track to be an extension of applicant's line of railroad in view of the large expenditure for construction and the substantial length of the track inasmuch as such expenditures may affect the carrier and the national transportation service. Also, a track of length herein could affect competitive position among shippers, thus providing an opportunity for discriminatory practices.—Central of Georgia Ry. Co.—Operation—in Ala., 336 I.C.C. 623 (634-5).

130. Necessity; in general.—[Vols. 2, 6, 11, 13, 14, 16-19, 21].—Where the need for construction of a rail line centers around new rail transportation requirements in an area of economic development, certificate may be issued if applicant proves that proposed construction either presently or in the reasonably near future will meet a public need. Interests of shippers are of substantial importance in resolving issue of public convenience and necessity; further, shipper's and its customer's interests represent the public interest whose transportation needs are sought to be satisfied. Both applicants for a certificate to construct a rail line into new territory to serve developing agricultural "Wahluke Slope" area concede that potential traffic will support only one railroad's construction; and record shows that Northern Pac.'s proposed line, which has strong support from potential producers and processors, would traverse entire slope area, whereas Chicago, M., St. P. & P. R. Co.'s proposal, with little shipper support, would serve only western portion thereof. Approval of Northern Pac.'s application will fulfill a demonstrated need without undue erosion of competitive position of any of the parties; certificate granted Northern Pac., and Milwaukee's application denied.—Northern Pac. Ry. Co. Construction Mesa-Mattawa, Wash., 331 I.C.C. 71 (74-6).

Fact that involved shippers are actively using applicant's facilities, and they express a desire for continuation of service, evidences a strong and urgent need for the proposed service. Evidence also indicates that grant of certificate to applicant will not adversely affect the competitive situation. Application approved.—Central of Georgia Ry. Co.—Operation—in Ala., 336 I.C.C. 623 (636).

134. To reach territory or resources in general.—[Vols. 2, 6, 9, 11, 15, 21].—In action to set aside Commission order granting Norfolk Southern's application, and denying plaintiff's, for authority to construct an extension of rail line to reach newly developed phosphate fields, the Commission's findings, reasoning and conclusions are well within its province and are supported in the evidence; therefore, the reviewing court will not disturb the order. Principal shipper's expressed preference for Norfolk (though it entered into the conclusions) was not a whim or personal taste, but a preference supported by sound, economic advantages it believed obtainable from that railroad's operation and not observable in plaintiff's; and other findings, supported by the record, amply sustain the Commission's conclusions that need for only one line was shown and issuance of certificate to Norfolk Southern was warranted. Furthermore, record shows adequate Commission consideration of plaintiff's suggested alternatives to an exclusive certificate; condition attached to certificate issued is significant in that regard. Complaint dismissed.—Atlantic Coast Line R. Co. v. United States, 243 F. Supp. 945 (946-7)*.

Due to extensive irrigation through the Columbia River Basin project, the Wahluke Slope, now a desert wasteland and not served by any railroad, is developing into an agricultural area. Although without irrigation it could not support a railroad, future convenience and necessity require rail service to meet the needs of potential producers and processors of agricultural commodities; however, need shown does not warrant construction of both of proposed extensions. Application of Northern Pacific approved, since it is responsive to public support for rail transportation in the entire area under development.—Northern Pac. Ry. Co. Construction Mesa-Mattawa, Wash., 331 I.C.C. 71 (72-6).

140. Traffic diverted from existing lines.—[Vols. 2, 14, 18, 19, 21].—Contrary to applicant Milwaukee's contention, approval of Northern Pacific's application for authority to extend its line into newly developed territory to provide direct rail service to a developing agricultural area, would not result in invasion of Milwaukee's tributary territory; considered new territory has not been set aside as the exclusive preserve of any particular railroad. A carrier does not have a right to exclusive occupancy of a territory; moreover, that portion covered by the Northern Pac. proposal is, as a commercial and economic community, more tributary to the Northern Pac. than to the Milwaukee. Furthermore, the area is presently a desert wasteland and without irrigation it could not support a railroad; it is not now served by any rail line and could not be served economically from present rail facilities; and fact that Milwaukee examined feasibility of operating a line into it (three times in 50 years) but took no steps toward an extension, neither accords it any advantage or prerogative nor constitutes Northern Pac.'s proposal an invasion.—Northern Pac. Ry. Co. Construction Mesa-Mattawa, Wash., 331 I.C.C. 71 (73-4).

Regulations of the Commission

38 FR 24902, Sept. 11, 1973, Part 1121: Abandonment of Railroad Lines, corrections of regulations previously published at 37 FR 1046.

38 FR 33086, Nov. 30, 1973, Part 1121: Abandonment of Railroad Lines, Corrections of §§1121.30 through 1121.35 reissued in full.

Section 1. (19) Application for certificate of Commission; notice and hearing.—[Unchanged. See vol. 9, p. 7328.]

Historical note, vol. 2, p. 964.

Notes of Decisions

Volume 2—p. 1040; Volume 6—p. 4994; Volume 9—p. 7328; Volume 11—p. 9143; Volume 12—p. 10217; Volume 13—p. 10935; Volume 14—p. 11420; Volume 15—p. 11990; Volume 16—p. 12624; Volume 17—p. 13279; Volume 18—p. 14034; Volume 19—p. 15090; Volume 21—p. 16458.

1. Application in general.—[Vols. 2, 6, 14, 15, 17-19, 21].—Separate applications filed under §1(18), by one railroad for permission to abandon its entire line and by another railroad for authority to acquire trackage which would otherwise be dismantled or merely lay deserted should be considered individually on their merits under that statute as filed, even though consolidated for decision.—Manistee & R.R. Co. Abandonment, 324 I.C.C. 489 (491)*.

Applications to purchase parts of rail line, filed as part of transaction where entire line of railroad is to be abandoned, are properly entertainable under §1(18). Although the particular applications were filed under §5(2), the Commission can consider the requests as seeking necessary authority under §1(18) if procedural requirements thereof are met. Therefore, when, except for publication, all requirements of §1(18) are met and all necessary information submitted, the acquisition may be approved conditioned on compliance with the publication requirements.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (517).

While bankrupt railroad applicant's amendment at the hearing of its application so as to seek authority for unrestricted abandonment, in lieu of a "temporary total suspension" as initially filed, broadens scope of the application, considered amendment will not adversely affect interests of public or protestants; the formal application itself, as well as published notice thereof, made it abundantly clear that by a "temporary total suspension" applicant was requesting a certificate of convenience and necessity permitting final cessation of railroad operations performed on its own behalf. Moreover, the Bankruptcy court has authorized the amendment and the initial proposal of debtor's trustees for indefinite suspension together with the well-known fact of applicant's status as a bankrupt amounts to a proposal to abandon. Amendment accepted.—Tennessee Central Ry. Co. Abandonment, 333 I.C.C. 443 (444-5).

9. Proceedings on application in general.—[Vols. 2, 13, 14, 16, 19, 21].—In passing on railroad's application for authority to abandon its line, undoubtedly the Commission can examine divisions of joint rates in order to determine whether revenue received by the line seeking abandonment accurately reflects its operations. However, when the divisions are *prima facie* correct and large sums (which are not justified on basis of present or prospective traffic) would have to be spent for rehabilitation of the road, the Commission properly may decline to order an investigation of the divisions; in a situation of the type under review, such judgment is for the Commission.—Washington and Old Dominion Users Ass'n v. United States, 287 F. Supp. 528 (531-2, 534)*.

While decision in C & O — B & O control proceeding [317 I.C.C. 261] recognized that certain savings would result from various proposed coordinations, it did not authorize any future abandonment by either carrier under §1(18); nor did the control application request authority to abandon any line of road or operations thereover. And, while the Commission found therein that protection should not be provided to employees of carriers other than those involved in the transaction, that ruling is limited to the control transaction and is not applicable to considered abandonment proceeding. Although the control transaction made possible the proposed abandonment, the adverse effect upon applicant's employees is the direct result of abandonment and only the indirect consequence of the control transaction. Therefore, since no ruling was made in the control case with respect to proposed abandonment, the doctrine of *res judicata* has no application to imposition of protective conditions for the benefit of railroad employees adversely affected thereby. Record shows some adverse effect on railroad employees entitled to protection and, since it was not necessary to establish the exact number of employees affected or their identity by class or craft, exclusion of applicant's testimony regarding potential claimants and restriction of cross-examination thereon was proper.—Baltimore & O. R. Co. Abandonment, 328 I.C.C. 449 (453-5).

13. Necessity for formal hearing.—[Vols. 2, 6, 11, 16].—The language of §1(18)-(20) does not direct a hearing on all protests to applications filed thereunder. The right to a formal hearing is conferred only upon applicant railroad and the governor or other appropriate authority of a state. Request by protestant herein is denied as the speculative prospect of injury to protestant is outweighed by the nearly certain prospect of injury to applicant from a disruption of its schedule resulting from such hearing.—Illinois Central R. Co. Operation in Jef. County, Ill., 328 I.C.C. 586 (589-90).

18. Issues before Commission.—[Vols. 2, 6, 13, 16, 18, 19, 21].—Although protestants criticize intercorporate transactions wherein rail subsidiary paid a $900,000 dividend to its parent railroad and purchased coal land served by the parent, and urge that they be set aside, those transactions have no bearing on the issue of whether public convenience and necessity permit abandonment of applicant subsidiary's entire line of railroad; moreover, the record is not convincing that the use of the $900,000 for rehabilitating the considered line would have increased business thereon.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (598)*.

See also Tennessee Central Ry. Co. Abandonment case, n. 1 above.

20. Showing required and burden of proof.—[Vols. 2, 6, 14-19, 21].—In view of the poor condition of the line sought to be abandoned and the limited prospects for improving the financial condition in the future, the expenditures which would be required to accommodate the grade crossings on considered line are matters to be considered under the doctrine enunciated in 315 US 381, holding that the Commission has authority to determine the economic advisability of the continued operation of a railroad "in a situation where someone other than the carrier provides the money". Record establishes that the public outlays required for continued operation of the line, whether by applicant or another operator, would be uneconomic and wasteful. While some shippers and communities would be inconvenienced, in view of alternate service available, degree of that inconvenience does not outweigh the heavy burden which a requirement to continue would impose; public convenience and necessity does not justify requiring continued operation of the line; approved.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C. 587 (592-4, 598, 603)*. See also same case under §1(18), n. 60.

A carrier, particularly one in financial straits of applicant cannot be expected to incur expense of installing a modern computer system for greater economy and efficiency and then go to added expense of duplicate record keeping by reverting to old procedures for accumulation of records merely to obtain data on a small, lightly used branch line.—Penndel Co., Abandonment Bet. Wil., Jct. and New Wil., 342 I.C.C. 570 (575).

Regulations of the Commission

36 FR 7741, Apr. 24, 1971, Part 1121: Abandonment of Railroad Lines, §§1121.1 through 1121.5, complete revision of regulations governing railroad abandonment applications, effective on date of order.

37 FR 1046, Jan. 22, 1972, Part 1121: Abandonment of Railroad Lines, §§1121.1 through 1121.5 designated as Subpart A, and new Subparts B (§§1121.20 through 1121.24) and C (§§ 1121.30 through 1121.35) providing special procedures for proposed railroad abandonment where no public objection is sustained or where the requirements of public convenience and necessity are minimal or nonexistent, added, effective upon publication in Federal Register.

37 FR 2841, Feb. 8, 1972, Part 1121: Abandonment of Railroad Lines, although new procedures in Subparts B and C (37 FR 1046) took effect on Jan. 22, 1972, the commission will entertain petitions for reconsideration or for a hearing.

37 FR 18919, Sept. 16, 1972, Part 1211: Abandonment of Railroad Lines, subparts B and C (37 FR 1046), providing special procedures for certain railroads, §1121.24 and §§1121.30-1121.35, amended to read as set forth, effective upon publication in Federal Register.

38 FR 26726, Sept. 25, 1973, Part 1121: Abandonment of Railroad Lines, §1121.32 promulgates special procedures as to notice, publication, posting, and service for proposed abandonments.

Section 1. (20) Issuance of certificate by Commission; unlawful extension or abandonment of lines.—[Unchanged. See vol. 9, p. 7328.]

Historical note, vol. 2, p. 964.

Notes of Decisions

Volume 2—p. 1045; Volume 6—p. 4996; Volume 9—p. 7329; Volume 11—p. 9143; Volume 12—p. 10217; Volume 13—p. 10936; Volume 14—p. 11421; Volume 15—p. 11991; Volume 16—p. 12626; Volume 17—p. 13279; Volume 18—p. 14035; Volume 19—p. 15094; Volume 21—p. 16464.

The Certificate

1. In general.—[Vols. 2, 6, 9, 21].—Though the Commission has authority to impose a condition (giving interested persons an opportunity to buy and continue operations on the line) in a certificate authorizing railroad to abandon its line, and frequently has done so, the inclusion of a salvage clause is discretionary. In refusing to include such a salvage clause in abandonment certificate being challenged, the Commission did not abuse its discretion when (1) record clearly shows that the railroad cannot be profitably operated, costs of its rehabilitation would be considerable, and need for rail service does not warrant its continued operation; and (2) due consideration was given to value of the right-of-way to the State Highway Department and its interest in buying the property for use as part of a new interstate highway system. The Commission's issuance of challenged certificate permitting abandonment is warranted in law and supported by substantial evidence on the record as a whole; plaintiff's action dismissed.—Washington and Old Dominion Users Ass'n v. United States, 287 F. Supp. 528 (535)*.

The Commission has no jurisdiction to consider employee union's complaint alleging that railroad's lease agreement for lessee's operation of its piers constituted an effective abandonment by lessor of a line of railroad in violation of §1(18). As held in 217 F. Supp. 252, it is for the courts to decide whether the action of the railroad is an abandonment subject to the Act. Since, under §1(20) a competent court is the only forum having jurisdiction to grant relief for alleged violation of §1(18), the complaint is dismissed.—Brotherhood of Ry. S. S. Clerks v. Reading Co., 328 I.C.C. 11 (11-12).

While it is apparent that defendant did not seek a certificate of abandonment from the Commission, it is well settled, as stated in *Powell*, 300 US 276, that under §1(20) remedies for violation of §1(18) must be sought by court action. Thus, Commission has no jurisdiction to grant the relief sought by complainant for the alleged unlawful abandonment.—Duralite Co., Inc. v. Erie Lackawanna Ry. Co., 339 I.C.C. 312 (314).

3. Terms and conditions.—[Vols. 2, 6, 9, 11, 13, 14, 19, 21].—Under §1(20), the Commission has authority to attach to an abandonment certificate such terms and conditions as in its judgment may be required by the public convenience and necessity; and it determines "public convenience and necessity" not merely to protect the railroad, but to protect interstate commerce from onerous burdens that may affect the carrier's efficiency and ability to perform its duty to the public. Moreover, in the exercise of its authority, the Commission has attached conditions to a certificate of abandonment which are unrelated to its usual areas of jurisdiction and, seemingly, it may impose any *reasonable* condition which is in the public *interest* to the issuance of such a certificate.—Reed v. Meserve, 353 F. Supp. 141 (145).

Record in abandonment proceeding contains evidence that freight traffic, alone, would not support a short line operation over northern segment of debtor railroad's line sought to be abandoned, whereas operation of proposed scenic excursion railroad for passenger carriage would promote the public interest by benefiting local business and increasing employment in the region. And in view of such evidence, when the Commission authorized abandonment of that line segment, conditioned on sale of the properties involved "to any responsible person for the purpose of continued operation," it could not have intended that freight service, in addition to passenger service, was necessary for "continued operation." Therefore, plaintiff who desires to acquire part of the abandoned line, for operation of proposed excursion railroad, comes within the scope of the condition imposed.—Id., pp. 145-8.

Where common law business trust is granted authority to acquire nonoperating rail carrier's rail line, property and franchises and to be substituted as owner-lessor under an outstanding lease agreement with operating carrier, approval is conditioned on receipt of the requisite stockholder approval of the transaction, recording of the trust instrument, and prior Commission approval in the event the trust is terminated.—Pittsburgh & W. Va. R.—Pur.—Pittsburgh & W. Va. Ry. Co., 330 I.C.C. 593 (596-7).

Evidence of record, particularly that concerning applicant's well-known status as a bankrupt railroad, warrants grant of certificate permitting proposed abandonment; however, in view of the need shown for continuance of rail service over the line involved, the abandonment authority is conditioned on sale of the line or any portion thereof to any responsible party offering, within 60 days from date of certificate and order, to purchase it for continued operation at not less than net salvage value of the property involved.—Tennessee Central Ry. Co. Abandonment, 333 I.C.C. 443 (454-5).

Commission approved a proposed abandonment provided that any interested party be afforded a 90-day period in which to acquire involved right-of-way for use as public parkland in compliance with all applicable environmental policies.—Burlington Northern, Inc., Abandonment, 342 I.C.C. 446 (456)*.

See also East Carolina Ry. Abandonment case, §1(19), n. 1.; Washington & Old Dominion R. Abandonment—Virginia, case, §1(18), n. 59.

8. Partial grant or denial.—[Vols. 2, 6, 16, 21].—On reconsideration, decision and order of Review Board denying application for certificate to permit abandonment of portion of considered line of railroad reversed in part. While abandonment of segment of the line currently being used could not be found to be in the public interest, there was no opposition to applicant's abandoning the unused segment; therefore, public convenience and necessity permit abandonment of that portion of line which applicant had not used for over three years.—Brooklyn E. District Terminal Abandonment, 331 I.C.C. 413 (413-4)*.

Injunction

16. In general.—[Vols. 2, 6, 9, 11, 14-16, 18, 19, 21].—In railroad's action seeking injunctive relief in connection with use, operation, and maintenance of certain facilities located within Baton Rouge, La., port area, question of whether rail trackage used entirely for switching, which was constructed, owned, and maintained by the Port Commission (and over which railroads operated pursuant to contract), falls within the "line of railroad" category or the excepted "spur, industrial, team, switching, or side track" category of §1(18), is for the court, rather than the Commission, to decide. Record clearly shows considered trackage to be solely and entirely spur and/or switching trackage not subject to the Commission's jurisdiction, and thus a proper subject for contract between the non-carrier port commission and the various railroads concerning use and maintenance thereof; accordingly, plaintiff is not entitled to injunctive relief sought. Suit dismissed.—Louisiana & A. Ry. Co. v. Missouri Pac. R. Co., 288 F. Supp. 230 (233-4).

Coal mine operator's action for an injunction to restrain defendant's abandonment of its branch line without first obtaining the Commission's approval (the abandonment application being subsequently approved) also includes, by amendment to the complaint, a claim for damages; however, under the Supreme Court's decision in the *Powell* case, 300 US 276, the sole remedy available for a violation of §1(18) is a suit under §1(20) for injunctive relief. Thus, while the court's statutory power to grant an injunction is permissive, injunction (not damages) is the only relief available to plaintiff mine operator for railroad's alleged unauthorized abandonment of the branch line which he used to ship coal to market. Accordingly, since plaintiff presently seeks only recovery for damages, the injunctive relief sought having been denied in 264 F. Supp. 437, defendant railroad's motion for summary judgment on the claim for damages is granted.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (311-12, 313).

Defendant railroad's indefinite suspension of operations over two of its branch lines, that were severely damaged by a tropical storm, and its application for authority to abandon those lines constitute an abandonment of operation within meaning of §1(18). Thus, the Commission not having authorized the abandonment, railroad's action is in violation of §1(18), and the court is empowered by §1(20) to enjoin that violation; however, the power to enjoin such violation should not be lightly or automatically exercised. Test which the court must apply, in suit seeking mandatory injunction to require defendant to restore the two branches, is whether it is equitable to permit the railroad to continue suspension of service until the Commission decides whether permanent abandonment is appropriate.—Commonwealth of Pennsylvania v. Penn Central Transp. Co., 348 F. Supp. 28 (29-30).

Among many factors considered in deciding whether injunction should issue in instant case, those having greatest weight are (1) the extent of storm damage to the branch lines, (2) the economic importance of each branch, and (3) the pendency of the application for leave to abandon those lines. In addition, it would cost approximately $650,000 to entirely restore both branch lines. Therefore, assessing all factors noted, the court concludes that it would not be equitable to require the railroad, currently undergoing reorganization, to expend substantial funds to restore service, temporarily on the two branches when all the elements, both short and long term, affecting such restoration will be given extensive consideration by the Commission. The Commission has the expertise and broad perspective necessary to determine the feasibility of abandonment of rail lines which the court lacks; also, it indicated that it will expedite consideration of defendant's application to abandon the branches in question. Injunction relief sought, denied.—Id., pp. 30-1.

On appeal from the district court's denial of motion to vacate its preliminary injunction, prohibiting continuance of appellant company's condemnation proceedings in Florida state courts (based on state eminent domain statutes) against railroad's property and, also, construction of any rail facilities thereon until a certificate of convenience and necessity is obtained from the Commission, neither the antiinjunction statute, 28 USC §2283, nor the principles of comity, present any bar to issuance of the federal court's injunction. And no more definite examination of the merits is required, in such appeal, when the record shows that the railroad's suit for injunction under §1(20) against the company's actions, allegedly in violation of §1(18), has raised questions going to the merits so serious, substantial, difficult and doubtful as to make them fair grounds for litigation and thus for more deliberate investigation.—Tampa Phosphate R. Co. v. Seaboard Coast Line R. Co., 418 F. 2d 387 (391-2).

While the antiinjunction statute bars federal injunction to stay State court proceedings, except as specified, it permits issuance of such an injunction when "expressly authorized by Act of Congress." It is well settled that an injunctive statute need not expressly refer to 28 USC §2283, or to the subject matter of federal stays of State court proceedings, to come within that exception and, also, that a case does not fall within the exception merely because it involves a law that permits injunctive relief in general terms; but beyond those guidelines, the rules are less clear. Courts must then consider the nature of the interests to be protected by the statute authorizing injunction which, in instant case, is §1(20), and the parties authorized to bring suit. Thus, in view of the authority in §1(20) for injunctive relief at the suit of a public or private party, the preliminary injunction could issue under the "expressly authorized" exception to 28 USC §2283, and the district court was within its authority in refusing to dissolve it.—Id., pp. 392-3.

Though there seems to be no serious question that an attempt to condemn lands for the purpose of constructing new trackage thereon without first obtaining Commission authority constitutes "construction" which may be enjoined under §1(20), any uncertainty should be resolved in favor of coverage in view of the national interests to be protected. Therefore, since authority for suit by both private and public parties strongly indicates that §1(20) contemplates supplementing government regulation with private action, and considering the public interest concept of private suits in effective regulation of railroads, the court concludes that appellee railroad in bringing its suit was engaged in protecting and enforcing public as well as private rights, and that the Commission itself could have brought the same suit. In such circumstances, the rule of comity embodied in 28 USC §2283 must yield to the paramount federal interests; judgment granting preliminary injunction, and denial of appellant's motion to vacate, affirmed.—Id., pp. 393-4, 402.

A competent court is the only forum having jurisdiction to grant relief for a violation of §1(18).—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (274).

See also Brooklyn Eastern District Terminal v. United States, 28 USC §2325, n. 61.

19. —Venue.—[Vols. 2, 6, 19].—Suit for mandatory injunction to require railroad, currently undergoing reorganization in another district court, to restore two storm-damaged branch lines should more properly have been brought by plaintiffs in the reorganization court for two reasons: (1) that court is better able to evaluate the railroad's needs and its ability to expend the funds required for restoration, and (2) that court's Order #1 in the reorganization matter prohibits instant suit. However, since the reorganization court has at times specifically enjoined particular suits, but has not enjoined plaintiffs' suit, the court feels that Order #1 was not an absolute bar to its consideration of plaintiffs' claims; otherwise, the court would have required that plaintiffs apply to the reorganization court *nunc pro tunc* for leave to bring their suit.—Commonwealth of Pennsylvania v. Penn Central Transp. Co., 348 F. Supp. 28 (31).

24. —Parties.—[Vols. 2, 6, 9, 11, 12, 14, 15, 17-19, 21].—See Tampa Phosphate R. Co. v. Seaboard Coast Line R. Co., n. 16 above.

Section 1. (21) Power of Commission to require adequate facilities or extension of line; penalty.—[Unchanged. See vol. 9, p. 7332.]

Historical notes, vol. 2, p. 1053.

Notes of Decisions

See §13a, infra, Discontinuance or change of certain operations or services, State statutes and authorizations involved.

Notes of Decisions

Volume 2—p. 1057; Volume 6—p. 5004; Volume 9—p. 7333; Volume 11—p. 9144; Volume 12—p. 10218; Volume 13—p. 10937; Volume 14—p. 11423; Volume 15—p. 11992; Volume 17—p. 13281; Volume 18—p. 14036; Volume 19—p. 15098; Volume 21—p. 16471.

1. Construction, in general.—[Vols. 2, 6, 9, 11-15, 17, 18, 21].—Terminal railroad contends for the first time, in its suit to enjoin and annul Commission orders partially denying its abandonment application, that track sought to be abandoned was a spur, industrial, or side track within §1(22) and, thus, the Commission had no jurisdiction over the matter. Abandonment of a separate side track might not be subject to Commission jurisdiction; but, as pointed out in 262 F. 2d 676, when a railroad is primarily made up of spur, industrial, switching and team tracks located within a State, §1(22) cannot be read to exclude from Commission jurisdiction all such tracks without reference to their functions as part of the whole railroad, for to so read the law would authorize a terminal line to abandon its entire rail system without Commission sanction. Plaintiff's tracks might have functions beyond those usually ascribed to similar tracks in another rail system and, since they constitute its whole terminal facility and all the rail portion of its total service, the Commission properly could conclude it had jurisdiction over considered abandonment.—Brooklyn Eastern District Terminal v. United States, 320 F. Supp. 1095 (1099, 1106-7)*.

However, ultimate question of the Commission's jurisdiction under the statute is one to be decided by a federal court; and when the court reviews a Commission decision that considers its own jurisdiction under §1(18) and (22), the normal rule restricting scope of judicial review does not apply.

Nevertheless, the cases appear to require that the Commission have an opportunity to make findings on, and pass on, the jurisdictional question before the issue is dealt with in the courts. Present record contains no express findings on the issue and, since plaintiff invoked and no one denied Commission jurisdiction, there was no reason to rule explicitly thereon; the result is that the record is insufficient for the court to determine the jurisdictional issue as a court of first instance. On the record, therefore, no finding that the matter was not within the Commission's jurisdiction can or should be made. Action dismissed on the merits.—Id., p. 1107.

Although §1(22) specifically excludes from jurisdiction of the Commission the construction or abandonment of spur tracks located wholly within one State, it does not exclude the acquisition and operation by a railroad of such a spur. Thus, under §1(18) an acquisition and/or operation by applicants of trackage (either spur or industrial) of railroad to be abandoned comes within the Commission's jurisdiction.—East Carolina Ry. Abandonment, 324 I.C.C. 506 (518); Manistee & R.R. Co. Abandonment, 324 I.C.C. 489 (491-2)*.

Whether trackage is a "team track" within meaning of §1(22) is a mixed question of law and fact for a court to decide. However, Commission must make an appropriate finding as to its jurisdiction in the first instance. Record shows that line herein us used for general freight service to several shippers and receivers and therefore is not a "team track" and proceeding herein is within Commission's jurisdiction.—Penndel Co. Abandonment Bet. Wil. Jct. and New Wil., 342 I.C.C. 570 (571-72).

Certificate Not Required

10. Switching or side tracks.—[Vols. 2, 6, 9, 19].—Railroad trackage owned and maintained by non-carrier State Port Commission, which was located entirely within the port facility, constructed of light weight rails, and had never been used for any purpose other than switching service performed under contract between the railroads and the Port Commission, does not constitute a "line of railroad" within §1(18) but is solely and entirely spur and/or switching trackage specifically exempt from jurisdiction of the Commission under §1(18)-(22) of the Act. Thus, such trackage is a proper subject of contract between the various railroads and the Port Commission insofar as maintenance and use of the facilities is concerned; and when, following termination of previous operating agreement by the Port Commission in strict accordance with provisions thereof, a new contract had been entered into between that commission and one of defendant railroads, neither plaintiff nor the other defendant have any legal ground for complaint. Accordingly, relief sought by plaintiff is denied and the case dismissed.—Louisiana & A. Ry. Co. v. Missouri Pac. R. Co., 288 F Supp. 320 (322-4).

District court did not err in finding that a "line of railroad" was not involved in appellant's action to enjoin or void new operating agreement (providing for Texas & P.R.'s exclusive control and responsibility for switching and maintenance of Baton Rouge Port Commission's trackage and terminal facilities) because appellees failed to obtain prior Commission approval of the agreement, appellant's contention being that the new contract constituted an abandonment by the port authority which required such prior approval. Question of whether trackage involved falls within category of "line of railroad" in §1(18) or in the excepted category of "spur, industrial, team, switching or side tracks" in §1(22) is for the court rather than for the Commission; and, based on its specific findings of fact, the court concluded that the tracks in issue could not be considered as a "line of railroad." Trackage involved was properly classified as spur and switching tracks and, as such, is not subject to Commission jurisdiction; thus, there being no contention as to validity of the agreement, lower court's denial of injunctive relief is affirmed.—Louisiana & A. Ry. Co. v. Missouri Pac. R. Co., 415 F. 2d 751 (752)*.

11. Spurs, industry, or team tracks.—[Vols. 2, 6, 9, 11-15, 17, 18, 19, 21].—See East Carolina Ry. Abandonment case, §1(18), n. 32; Manistee & R.R. Co. Abandonment case, §1(18), n. 32.

Section 2. Special rates and rebates prohibited.—[Unchanged. See vol. 9, p. 7335.]

Amendments, see footnotes, vol. 2, 1061, vol. 6, p. 5008; historical note, p. 1061.

Notes of Decisions

Volume 2—p. 1063; Volume 6—p. 5008; Volume 9—p. 7335; Volume 11—p. 9145; Volume 12—p. 10219; Volume 13—p. 10938; Volume 14—p. 11423; Volume 15—p. 11993; Volume 16—p. 12627; Volume 17—p. 13281; Volume 18—p. 14036; Volume 19—p. 15099; Volume 21—p. 16474.

In General

7. Relation of section to other requirements of Act.—[Vol. 2].—Interstate Commerce Act provision prohibiting common carriers from charging one person more than another for like and contemporaneous service is complementary to provision prohibiting common carriers from giving unreasonable preference to any particular person or any particular description of traffic, and the two provisions are to be read in pari materia.—Atchison, T. & S. F. Ry. Co. V. United States, 244 F. Supp. 955*.

Interpretation and Application

17. Degree of uniformity or equality required.—[Vols. 2, 11, 21].—There is no merit to contention that proposed reduced rates on all freight, minimum 10,000 pounds, in straight or mixed carloads, violate §2 because they apply on, and favor shippers of, "luxury" commodities normally rated higher than class 70, while shippers of lower-rated commodities must pay the same or higher charges, depending on weight of shipment, for the same service. There can be no unjust discrimination where all shippers are charged the same rate for like shipments moving from same origin to same destination, and the proposed rates, on a mileage basis, apply via all participating carriers to all points within the involved territory. Moreover, many l.c.l. rates for commodities rated class 70 or below are lower than those proposed.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (738).

18. Unjust discriminations only prohibited.—[Vols. 2, 6, 19.]—Schedules of reduced local rail rates and charges found to result in unjust discrimination to extent they would provide an annual-volume requirement. Schedules permit single-car, as well as multiple-car, shipments and there is no limitation as to the number of destinations or consignees to which the specified annual volume may be delivered. No evidence is shown as to any cost savings which may accrue in connection with this requirement, as compared with single-car shipments moving under existing higher rates without requirement. Thus, nothing shows traffic using reduced rates move under such substantially different circumstances as to warrant proposed rates. See *New York Harbor*, 311 ICC 355. However, elimination of requirement would result in just and reasonable rates.—Wheat & Wheat Flour, Westbound, 337 I.C.C. 858 (881).

Protestants' contention that a proposed tariff provision restricting joint carload rates on shipments of fresh potatoes southbound from central Oregon only when such shipments are loaded in special refrigerator cars and moved over a specified route would result in discrimination between shippers found not proven. Respondent railroads have proven that an adequate supply of such cars exists and that compliance with the restriction is not an undue burden on shippers.—Routing Restrictions on Fresh Vegetables, 335 I.C.C. 665 (670-1).

Unjust Discrimination

26. Differences in charges and collection among shippers.—[Vols. 2, 6, 9, 11, 14, 15, 17, 19, 21].—Failure to provide rule 66(a) of our Tariff Circular No. 20 for shippers of light loading vegetables is unlawful and unjustly discriminatory in that different rates and charges would be assessed on like shipments moving in different size cars depending upon car furnished by carrier and not the car required and requested to transport the shipment. See *All Freight*, 245 ICC 207, Schedules of per-car rates ordered canceled.—Vegetables & Melons Bet. W. & Southwest, Midwest & S., 341 I.C.C. 597 (616).

See also Allowance for Trucking Baled Cotton—Ark., Okla., Tex., n. 79, below.

28. Reasonableness of rates as affecting discrimination.—[Vols. 2, 6, 9].—The Commission may remove discrimination effected by rates, even when they are within the zone of reasonableness, if the discrimination is forbidden by §3(1).—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (610).

Special Rate, Rebate, Drawback, or Other Device

50. Prohibited devices and concessions, generally.—[Vols. 2, 6, 9, 11-13, 19, 21].—With respect to the 25 mile-per-hour "guaranteed minimum speed" and the provision for liquidated damages for failure to meet that schedule on any trip, Commission concluded that the charges are for normal rather than expedited service. Any refund would come from charges collected for the transportation and thus be unlawful. However, a guaranteed minimum number of trips should be included to protect the shipper.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 339 I.C.C. 579 (585-7)*.

See also Grain by Rent-A-Train, IFA Territory to Gulf Ports, at §3(1), n. 37 and 140.

Freight

71. Switching charges.—[Vols. 2, 6, 9, 12, 14, 15, 18, 19, 21].—The district court concluded that Commission's findings in 341 ICC 57 holding respondent belt railroad responsible for movement of shipper-owned cars to and from repair facilities was in violation of §2. It was stated in *Private Passenger Train Cars*, 155 ICC 775, that repair moves of cars of one carrier over tracks of another benefits carrier-owner and are subject to freight charges and it seems clear that same must hold true of privately owned cars using lines of a carrier having no interest in and obtaining no revenues from said cars. Commission's order in 341 ICC 57 was set aside by the court.—Indiana Harbor Belt R. Co. v. General Amer. Transp. Co., 368 F. Supp. 904 (908-9)*.

72. —Absorption.—[Vols. 2, 6, 11, 12, 14, 16, 17, 19].—Defendant railroads' tariff provisions limiting absorption of switching charge of complainant Belt Railroad to an amount less than amounts absorbed for switching performed by other carriers at New Orleans, La., are in violation of §2 inasmuch as shippers and consignees served by complainant are thus assessed a greater charge than those served by other switching lines at New Orleans for contemporaneous services in transportation of like kind of traffic under similar circumstances and conditions.—Public Belt R. Comm. v. Aberdeen & R. R. Co., 335 I.C.C. 162 (172-5).

Protestant railroads' proposal to limit their absorption of switching charges at Shreveport, La., in response to respondent's proposed increased switching charges violates §2 in that it would be unjustly discriminatory against shippers located on respondent's lines at Shreveport who would not be accorded full absorption of switching charges whereas other shippers at Shreveport would be given full absorption by other connecting lines.—Switching Charges and Absorption, 339 I.C.C. 65 (82).

See also Armour & Co. v. Sioux City Term. Ky. Co., at §3(1), n.136.

79. Allowances; for services or facilities furnished by shipper.—[Vols. 2, 6, 9, 11, 13, 19, 21].—Railroads' varying allowances to shippers who perform or furnish motor carriage of their cotton from gins to the transit point, found not to result in unlawful discrimination with respect to the compress-to-destination movements. Under a system of rate groupings, wherein all points in specified origin territory are afforded the same rate level so as to permit cotton to reach common markets at equalized transportation costs, local and joint rates from rail gin origins to destination are in many instances at the same, or about the same, level as rates from the compress, or transit point, to destination; and fact that shippers are paid different allowances depending generally on distances from rail gin origins to the compress point is entirely compatible with such group rate system because the allowances generally reflect shipper's cost of trucking the cotton to the compress, in lieu of rail service from the rail origin, and shipper's total transportation costs therefore are approximately the same. Under such circumstances, there is no §2 violation.—Allowance for Trucking Baled Cotton—Ark., Okla., Tex., 329 I.C.C. 786 (795-6)*.

81. —Spotting services.—[Vols. 2, 6, 12, 13].—Petitioner's need for more than one switch per day on its intra-plant tracks, and its performance of such additional switching, constitutes an industrial service which is not respondent's duty to perform. To hold otherwise would be to require respondent to provide petitioner with a preferential service not accorded to shippers generally; it would ignore also our stated definition of ordinary operating convenience as normally encompassing but one switch movement. Petition denied.—Detroit Harbor Terminals, Inc., Terminal Allowance, 332 I.C.C. 635 (640).

Like and Contemporaneous Services

95. In general.—[Vols. 2, 12-19, 21].—Complainant's contention that rates on export carload shipments of automobile parts from Detroit, Mich., to Laredo, Tex., are unduly discriminatory found not proven as no showing has been made that other shippers operating under like circumstances were treated differently.—Fabricas Auto-Mex., S.A. v. N.Y. Central R. Co., 332 I.C.C. 1 (10).

Like Kind of Traffic

98. In general.—[Vols. 2, 6, 13, 14, 16, 17-19].—Rules requiring railroads to make their TOFC service on open-tariff basis available on the same terms to motor carriers as to others were beyond power of Interstate Commerce Commission under Interstate Commerce Act provision prohibiting common carriers from charging one person more than another for like and contemporaneous service and second provision prohibiting common carriers from giving undue preference to any person except that the provision should not apply to discrimination against traffic of any other carriers.—Atchison, T. & S. F. Ry. Co. v. United States, 244 F. Supp. 955*.

Section 2 of the Act prohibiting common carriers from charging one person more than another for like and contemporaneous service does not extend to discriminatory refusal to provide service at all but deals only with discrimination in rates. Nor does it authorize Commission to issue rules requiring railroads to make their TOFC service available on same terms to motor carriers as to others. Rules 2 and 3 (open-tariff rules) promulgated in Ex Parte No. 230 set aside. The circuity rule (no. 5) sustained to the extent of its applicability remaining after elimination of Rules 2 and 3 and rule 7 (publication in tariff form of leasing arrangements of trailers by railroads or their affiliates) upheld.—Id., p. 955.

Substantially Similar Circumstances and Conditions

105. In general.—[Vols. 2, 6, 9, 11-19].—Whether two or more transportation services were performed "under substantially similar circumstances and conditions" would be a matter of fact to be determined in each individual case but there is no reason why the fact that the user of a service was another carrier rather than a private shipper would compel the conclusion that dissimilar circumstances and conditions were present. The Supreme Court, in 282 US 740 (753), upheld a finding of the Commission that transportation by railroads of private passenger cars owned by other railroads at other than published tariff rates was unlawful, and refused to recognize any distinction between the transportation of cars owned by railroads and private shippers. The Court noted that all such cars are hauled between the same points, on the same line, in the same or like trains, and in the same manner. This is equally true of the transportation of loaded highway trailers in TOFC service.—Substituted Service—Piggyback, 322 I.C.C. 301 (335)*.

Proponent railroads' multiple-car rates on canned foodstuffs moved from points on the Pacific coast to points east of the Rocky Mountains found not unjustly discriminatory as such services do not occur under substantially similar circumstances and conditions as single-car shipments due to restrictions of accessorial services and high minimum tender requirements on multiple-car shipments.—

Canned Foodstuffs, Pacific Coast to the East, 335 I.C.C. 612 (623).

To sustain a violation of §2, it must appear that respondents are charging a different compensation for a particular service than is charged another shipper for a like and contemporaneous service. Here, protestants are comparing charges published under two different tariff items, each of which is available to all shippers on a nondiscriminatory basis. Each item covers a different level of service, one including protective service and the other not including such service. Thus, there is no violation of §2.—Increased Freight Rates, 1969, 337 I.C.C. 436 (448-9).

109. —Differences in delivery by carrier.—[Vols. 2, 6, 18].—The principle stated in *East Tennessee*, 181 US 1, to the effect that unjust discrimination or undue preference does not relate to acts the result of conditions beyond the control of involved carriers, while developed in review of section 3, applies also to section 2, since it is the predicate of legal liability generally. Therefore, since respondent carriers in the instant proceeding were unable to remove the disadvantage experienced by food wholesalers as compared to food chain retailers due to market decline factors between scheduled arrival times of their shipments and actual arrival times, the proposed claims policy providing for payment of damages in an amount "not to exceed the actual proven monetary loss"—which would protect the wholesalers but not the retailers—was held not to be in violation of sections 2 and 3.—Provisions on Vegetables & Melons, Transcontinental, 340 I.C.C. 807 (809-811).

Proceedings

133. Determination of fact as to unjust character of discrimination.—[Vols. 2, 15].—Complainants submitted little or no evidence relating to the comparative values of the subject commodities, except for the mill list prices as of July 1970 for 11 prefinished hardwood plywoods and one unfinished softwood plywood manufactured by one of the shippers. There was little or no effort made by complainants to show that the costs, the transportation characteristics, the average loading, the average value, the competitive circumstances, or any other relevant factor affecting the higher-rated commodities were the same or similar to the commodities moving under the lower "incentive" rates. Assailed rates found applicable, and not shown to have been or to be unjust or unreasonable.—Plywood, Hardboard & Particleboard v. Aberdeen, 340 I.C.C. 836 (844-845).

Section 3. Preferences; interchange of traffic; terminal facilities (1) Undue preferences or prejudices prohibited.—[Unchanged. See vol. 11, p. 9147.]

Amendments, see footnotes vol. 2., p. 1104, vol. 9. p. 7345, vol. 11, p. 9148; historical notes, vol. 2, p. 1104, vol. 9, p. 7345.

Notes of Decisions

Volume 2—p. 1106; Volume 6—p. 5022; Volume 9—p. 7345; Volume 11—p. 9148; Volume 12—p. 10221; Volume 13—p. 10939; Volume 14—p.10425; Volume 15—p. 11995; Volume 16—p. 12629; Volume 17—p. 13284; Volume 18—p. 14040; Volume 19—p. 15106; Volume 21—p. 16481.

Constitutionality and Purpose

2. Purpose.—[Vols. 2, 6, 14].—The 1935 amendment of §3 to include "ports" was intended to afford competing ports a forum in which to complain of rate adjustments that tend to concentrate movement of the traffic through one or a limited number of ports and to deprive other ports of opportunity to handle a part of such traffic; also, to encourage and promote the freedom of movement of export, import, and coastwise traffic through the ports of the country.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (188-9)*.

Section 3(1) is intended to protect shippers, not competing carriers or modes of transportation.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (738).

Interpretation

11. Equality of treatment basis of section.—[Vols. 2, 6, 9, 12, 13, 16, 17, 19, 21].—The existence of facts justifying inequality of treatment is a matter of defense.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (189)*.

Relation to Other Sections

16. —Section 1(5).—[Vols. 2, 6, 9, 16, 18, 19, 21].—The Commission may remove discrimination effected by rates, even when they are within the zone of reasonableness, if the discrimination is forbidden by §3(1).—Matthiessen & Hegeler Zinc Co. v. Baltimore & O.R. Co., 323 I.C.C. 601 (610).

19. —Section 2.—[Vols. 2, 6].—Interstate Commerce Act provision prohibiting common carriers from charging one person more than another for like and contemporaneous service is complementary to provision prohibiting common carriers from giving unreasonable preference to any particular person or any particular description of traffic, and the two provisions are to be read in pari materia.—Atchison, T. & S. F. Ry. Co. v. United States, 244 F. Supp. 955*.

Rules requiring railroads to make their TOFC service on open-tariff basis available on the same terms to motor carriers as to others were beyond power of Interstate Commerce Commission under Interstate Commerce Act provision prohibiting common carriers from charging one person more than another for like and contemporaneous service and second provision prohibiting common carriers from giving undue preference to any person except that the provision should not apply to discrimination against traffic of any other carrier.—Id. p. 955.

Undue Preference and Prejudice Defined

29. Undue preference a question of fact.—[Vols. 2, 6, 9, 11, 19].—Determining whether a rate results in undue preference or prejudice is a complex fact question confided by Congress to the Commission for its determination on the record as a whole, however, such determination must be based on an understandable and identifiable rationale. Though the Commission decided that considered export rates on soybeans from southern Illinois points to Chicago, which bear little relation to distance or services involved, were reasonable and did not result in any undue prejudice or disadvantage, it failed to explain any formula, philosophy or findings on which its conclusions could rationally be based other than finding Chicago was not competitively disadvantaged thereby; also, there is no evidence as to the basis for its conclusion that approved highly disparate rates will encourage competition between Chicago and Gulf ports. Commission conclusion, in second report, that approved rate structure is not unduly preferential or prejudicial, so long as rate to Chicago is not higher than that to New Orleans (regardless of any other relevant factors), is not supported by adequate findings; remanded for further proceedings consistent with the court's opinion.—City of Chicago v. United States, 291 F. Supp. 858 (861-2, 863)*.

30. "Preference" construed.—[Vols. 2, 6].—The principle stated in *East Tennessee*, 181 US 1, to the effect that unjust discrimination or undue preference does not relate to acts the result of conditions beyond the control of involved carriers, while developed in review of section 3, applies also to section 2, since it is the predicate of legal liability generally. Therefore, since respondent carriers in the instant proceeding were unable to remove the disadvantage experienced by food wholesalers as compared to food chain retailers due to market decline factors between scheduled arrival times of their shipments and actual arrival times, the proposed claims policy providing for payment of damages in an amount "not to exceed the actual proven monetary loss"—which would protect the wholesalers but not the retailers—was held not to be in violation of sections 2 and 3.—Provisions on Vegetables & Melons, Transcontinental, 340 I.C.C. 807 (809-811).

31. "Undue or unreasonable preference or advantage."—[Vols. 2, 6, 19, 21].—Protestants' contention that a proposed tariff provision restricting joint carload rates on shipments of fresh potatoes southbound from central Oregon to such shipments loaded in special refrigerator cars and moved over specified routes would unduly prefer shippers from competing areas found not proven. Respondent railroads' evidence as to costs and availability of such cars proves compliance with the restriction is not an undue burden on shippers and would not materially change the competitive situation between shippers from different areas.—Routing Restrictions on Fresh Vegetables, 335 I.C.C. 665 (671).

37. Competitive relationship between preferred and prejudiced.—[Vols. 2, 6, 9, 11-19, 21].—Train-rental rates, assailed herein as preferential of very large shipper, are to enable east-central Illinois area to compete in corn export market. Small shipper in this area does not have volume of corn to use train-rental service; but neither is it competing in the export market. If large shipper's corn is exported, small shippers have more of the domestic market available. The traffic is not being handled by any carrier. Protestants have not shown they would be injured by this service and a finding of undue preference and prejudice is not justified.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (120).

Protestant meat packers maintain that the proposed adjustment herein is unduly preferential and prejudicial because it would disturb "historical" rate relationships especially in the western trunkline territory. The "history" is a history of only 5 to 7 years and packers themselves have changed preexisting origin relationships by their massive relocation and decentralization of packing plants in the last 10 years. While there is a rate difference between allegedly preferred and prejudiced origins, there is no showing of a rate disparity resulting in undue prejudice; nor have Chicago packers shown that existing rate structure results in advantage to "preferred" origins or detriment to "prejudiced" origins; nor has it been shown that shipments have been made or prevented because of existing rate structure. Moreover, several shipper witnesses could not name their competitors. Evidence does not sustain a finding of violation of §3.—Meat & PHP, TOFC, SWL, WTL, Official Territories, 340 I.C.C. 214 (242-44).

Competing localities: Participation in through routes and joint rates by respondent on lake cargo tonnage to Toledo while contemporaneously refusing to continue to participate in like tonnage to Ashtabula Harbor unduly prefers Toledo and subjects Ashtabula Harbor to unlawful prejudice in violation of section 3(1); proposed cancellation of through routes and joint rates found not shown to be just and reasonable.—Lake Cargo Coal, Ky., Va. and W. Va. to Ashtabula Harbor, 326 I.C.C. 63 (72)*.

Had the proposed rates to Baltimore been applied to New York, they would have been noncompensatory for the Baltimore carriers. The differences in transportation conditions clearly warrant differing rate levels for these points. And, even if it be assumed that preference and prejudice be established, there is on this record, considering the dominant position of New York, no showing that such preference and prejudice would be undue, which is what the Act condemns. It is well settled that a mere difference in rates does not constitute undue preference and prejudice and that inferences or assumptions are of no value.—Paper, Central Territory to North Atlantic Ports, 329 I.C.C. 281 (291).

40. Small shippers.—[Vols. 2, 9, 16, 19, 21].—Train-rental rates, assailed herein as preferential of very large shipper, are to enable east-central Illinois area to compete in corn export market. Small shipper in this area does not have volume of corn to use train-rental service; but neither is it competing in the export market. If large shipper's corn is exported, small shippers have more of the domestic market available. The traffic is not being handled by any carrier. Protestants have not shown they would be injured by this service and a finding of undue preference and prejudice is not justified.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (120).

46. —Right to benefit of advantage of location.—[Vols. 2, 6, 9, 11, 12, 16, 18, 21].—See Increased Freight Rates, 1969, at §3(1), n. 66; Transit Provisions on Wheat case at §3(1), n. 147.

Determination of Undue Prejudice

65. In general.—[Vols. 2, 6, 19, 21].—Record establishes the existence of elements necessary to constitute a prima facie showing of undue preference and prejudice, i.e., a disparity in rates, competition between Chicago and Kankakee and other Illinois transit points accorded lower rate, a control by respondents of rail rates via Kankakee and Chicago to eastern destinations, substantially similar transportation conditions, and injury to Chicago. Facts justifying such inequality have not been shown. It does not matter that respondents' proposal stems from a legitimate competitive motivation. Self-interest of the carrier may not override the requirements of §3(1). See 263 US 515, 524.—Corn and Corn Products, Illinois to Official Territory, 332 I.C.C. 485 (490-91)*.

66. What considered, generally, in determination.—[Vols. 2, 6, 9, 12, 14, 16, 17, 19, 21].—Undue prejudice cannot be predicated upon the mere existence of a difference in rates and some evidence of competition. The record must show that the rate disparity has operated to the complainants' disadvantage in the marketing of their products. No such finding is warranted here. Nor may such a fact be presumed in instances where, as here, the evidence regarding competition is very general in nature and the record indicates that the assailed rates are not the determining factor in the marketing of the considered commodity.—Arketex Ceramic Corp. v. Aberdeen & R.R. Co., 325 I.C.C. 784 (792-93).

The 6 percent increase in rates on grain and grain products in the west found unduly prejudicial to protestants and others similarly situated and unduly preferential of their competitors. Historically, these rates progressed in one-half cent steps but the general increase table herein progressed in one-cent steps so that rates from nearby country points to common markets, and from country origins to competing elevators increase unevenly, causing numerous disruptions of rate relationships and also eroding geographical advantages of nearer shippers.—Increased Freight Rates, 1969, 337 I.C.C. 436 (439-41).

The 6 percent increase in transcontinental rates on fresh fruits and vegetables that include unspecified factor for mechanical protective service is unduly prejudical to protestants and preferential of their competitors. Southern shippers of these commodities to same destinations have separately stated charges for protective service which are not subject to the 6 percent increase. Removal of preference and prejudice ordered.—Id., p. 446-50.

Absent showing of preference and prejudice, Commission would find no unlawfulness in manner in which increase was published as the practice of including protective service within a line-haul rate was approved in *Refrigeration*, 319 ICC 113.—Id., p. 450.

67. Differences in and comparisons of rates. —[Vols. 2, 6, 9, 11-19, 21].—While flat increases proposed in intraterminal, interterminal, and intraplant switching charges in western and southern districts and Pocahontas region may fall to a heavier degree on some particular switching points than others because carriers' charges vary at and within the different terminals, resulting in varying levels of increase, evidence as to such disparities is not shown to result in §3(1) violations any more than did that noted by the court in considering like increases in eastern district in 216 F. Supp. 199. However, protestants are free to seek relief in a subsequent proceeding directed to proving undue inequities in specific situations.—Increased Switching Charges, 322 I.C.C. 560 (563)*.

Complainant at Meadowbrook, W. Va., suffers gross disparities in inbound rates on zinc dross, skimmings, and residue from specified official territory origins compared with reduced rates available to its nearest competitor at Josephtown, Pa. Complainant must bid for those commodities against competitors in a common market, in order to keep its plant running, and the disparities in favor of the Josephtown competitor are not shown to be justified by any dissimilarity of transportation conditions warranting the lower level of rates to Josephtown. However, disparities between Josephtown and Meadowbrook in percentages of first class of rates from other official territory points are not shown to be so gross as to warrant a finding of undue prejudice to Meadowbrook in rates from all origins in that territory; consequently, the finding of undue prejudice and order requiring removal thereof are limited to origins named in appendix B and others taking the same rates.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (614-5).

The substantial disparity in rate levels between Erwinville, La., and points in the South as compared to movements of similar distance originating in the southern territory, which disparity was due to the location of Erwinville in the southwestern territory, was found to be unduly prejudicial to the Erwinville shipper and unduly preferential of its southern competitors, and therefore in violation of §3(1).—Big River Industries, Inc. v. Aberdeen & R.R. Co., 329 I.C.C. 539 (547).

Although the Commission has held in numerous proceedings that a mere showing of a difference or disparity of rates is not enough to prove the higher rates unduly preferential and prejudicial, complainant has shown more than a mere difference of rates. It has shown that of all the carriers who participate in movements from Edwinville, La. (southwestern territory) to southern destinations only two defendants have failed to accord to movements from Erwinville rates similar o those accorded from origin points in the southern territory for movements of comparable distances. Moreover, to all destinations in the South except those controlled by the two defendants the Erwinville rates are reasonably related to the rates for movements of same distances from southern origins.—Id., p. 542.

70. Distance.—[Vols. 2, 6, 9, 11, 13-19, 21].—Port equalization within reasonable limits is generally required where distances between respective ports and interior points are approximately the same. Rail distances from involved Arkansas origins to Mobile are generally comparable to those to New Orleans, Lake Charles, and Texas gulf ports, to which defendants maintain a lower rate on export rice than to Mobile. Defendants maintain the same level of rates from Arkansas to Mobile as to the west side ports on similar commodities, and evidence of relative costs does not establish that equalization on rice would be an unreasonable burden on them, or that there are substantial differences in transportation conditions. Assailed rates to Mobile found unduly prejudical to extent they exceed the rate to New Orleans and the west side ports.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (188, 189)*.

That many origins of zinc dross and related commodities are much nearer to Josephtown, Pa., the site of complainant's principal competitor, than to complainant's plant at Meadowbrook, W. Va., does not justify disparities in inbound rates as great as those assailed, and certainly not the difference shown in favor of Josephtown in relations of the rates to first class. Where longer hauls are involved and distances to the two competing points are approximately equal, the measure of the rates reflects a disparity, Meadowbrook over Josephtown, so gross as to be unjustified on any theory, especially that of carrier connection, in absence of a clear showing that such competition exists to an extent warranting the difference. Assailed rates from certain origins found unduly prejudicial and nonprejudicial basis prescribed.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (610-11).

Distance considered, and since different carriers participate in the compared movements, Commission found that the general increase of 6 percent in rates on grain, feed, and feed ingredients to points in Virginia and Northeast does not violate §§2 or 3.—Increased Freight Rates, 1969, 337 I.C.C. 436 (441-5)

Commission concluded that examiner correctly found that the differences in distances for movements herein are not such as to preclude a finding of undue preference and prejudice. However, comparable distances do not, alone, establish undue preference and prejudice.—Transit Provisions on Wheat at Twin Cities, Minn., 341 I.C.C. 235 (242-43)*.

71. Cost of Service.—[Vols. 2, 18, 19, 21].—Shipper's allegation of undue preference and prejudice not justified where cost of rendering service to points in question differs. A disparity in rates between two points is not undue preference and prejudice unless it is not justified by cost of respective services or other transportation conditions (263 US 515, 524). See also discussion of cost considerations as a basis for differences in rates in *Stanislaus County v. United States*, 236 F. Supp. 46. Shipper seeks rates on sulphur from western Canada to St. Louis and East St. Louis which are not more than 2 cents higher than the rates from the same origins to Chicago. It contends the 67-cent rates under investigation are unduly prejudicial to it and unduly preferential of its competitors in the Chicago area in violation of section 3 of the Act. The cost data of record, based on actual movements from Alberta, indicate that the present rates to Chicago and St. Louis-East St. Louis yield similar returns above the respective out-of-pocket costs. Use of Western District costs for movements of average distances from Canadian Pacific origin points to East St. Louis resulted in out-of-pocket costs ranging from 61.9 to 65.5 cents over various tariff routes at the published minimum weights; over the shortest authorized tariff route from Calgary, Alberta, Canada, to East St. Louis, shipper developed an out-of-pocket cost of 59.95 cents for minimum tank car shipments. Its study was based on the application of Rail Form A to western district territorial cost scales. Thus, the lower 59.5-cent rate sought by shipper would not exceed defendants' out-of-pocket costs. These comparisons of costs are significant as an indication that the present relationship is not unfair.—Sulphur, Canadian Origins to East St. Louis, Ill., 326 I.C.C. 288 (290, 305).

See also same case under §1(5), n. 72.

72. Long maintenance of adjustment.—[Vols. 2, 6, 11].—See Increased Freight Rates, 1969, at §3(1), n. 66.

76. Similarity of circumstances and conditions.—[Vols. 2, 6, 9, 11-13, 16-19, 21].—Prerequisite to a finding of a §3(1) violation is a subsidiary finding that the transportation services at the preferred and prejudiced points are performed under substantially similar circumstances and conditions, and existence of carrier competition at the one point and its absence at the other has been held to create a dissimilarity of conditions which generally renders the prohibition of §3(1) against undue prejudice inapplicable. However, existence of facts, such as differing circumstances and conditions, justifying an inequality of treatment is a matter of defense to be proven by satisfactory evidence; general assertions of competition requiring reduced rates to the preferred point are insufficient as a defense where a complainant's competitor at such point enjoys lower inbound rates on the same commodity.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (602-3).

The Commission's tariff rules do not require that rates reduced to meet competition be symbolized to indicate the type of competition that is being met, or in fact for what reason, if any, they are reduced. Therefore, merely referencing reduced rates to the preferred point by the letter H (said to indicate that they were established to meet highway competition) does not warrant a finding of dissimilarity of conditions justifying lower rates to one competing point than to another.—Id., p. 611.

Disparity in rates constitutes undue prejudice only where transportation conditions are substantially similar. Disparity in rates maintained between Pacific northwest and San Francisco Bay counties and those maintained between Pacific northwest and Stanislaus County, Calif. does not violate §3(1) as operating conditions are not substantially similar due to differences in geographic location, community of interest, and carrier competition.—Stanislaus County v. Atchison, T. & S. F. Ry. Co., 329 I.C.C. 40 (54)*.

77. —What constitutes similarity or dissimilarity.—[Vols. 2, 6, 9, 12, 21].—To establish a violation of §3(1) it is essential that the transportation characteristics and circumstances surrounding the movement from or to both the alleged preferred and prejudiced points be substantially similar. There is no unlawfulness in maintenance of import rates on iron and steel articles higher than domestic rates from United States producing points, since the rail rates from the alleged prejudiced points apply on traffic of a different nature than that from the alleged preferred points; moreover, there is no showing of a competitive relationship between the points allegedly prejudiced and preferred.—Southern States Cooperative, Inc. v. Baltimore & O. R. Co., 323 I.C.C. 400 (408).

Substantial dissimilarity exists in operating conditions on movements between Pacific northwest and Stanislaus County, Calif. and between Pacific northwest and San Francisco area counties inasmuch as Stanislaus County is an inland, agricultural area containing two motor carrier terminals whereas the latter specified counties are highly metropolitan, contain deep water harbors, are economically interdependent, and contain 32 motor carrier terminals.—Stanislaus County v. Atchison, T. & S. F. Ry. Co., 329 I.C.C. 40 (46-52)*.

80. Preference within carrier's control.—[Vols. 2, 6, 9, 11-19, 21].—A finding of unlawful preference and prejudice in proposed reduction of export rates on flour from western origins to Gulf ports but not to Lake ports is necessarily limited to rates subject to respondents' control. Protestant railroads serving Lake ports other than Chicago were unwilling to join with respondent Burlington in reduced rates to Chicago, and do not indicate willingness to concur in such reductions even if published by all respondents. Respondents do not serve the Minnesota and Wisconsin ports, and an order requiring them to alter the rates on flour to such ports would be ineffectual without protestants' concurrence.

However, respondents serving the origin area exercise control over rates to both the Gulf ports and Chicago; in the circumstances, the finding of Unlawfulness of the proposed rates from origins other than on the Burlington must be limited to undue prejudice to Chicago.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (610).

That several large railroads have declined to participate in proposed reduced rates on all freight in straight or mixed carloads, minimum 10,000 pounds, within southern territory and between that territory and St. Louis, on one hand, and points intermediate thereto in Illinois, Indiana, and Missouri, on the other, does not extablish any violation of §3(1) because localities served by those roads do not receive benefit of such reductions. There can be no undue preference or prejudice unless both the preferential and prejudicial rates are within control of the same carrier or group of carriers.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (738).

The movements from Guion to "interior" southeast destinations are joint-line operations conducted by MoPac and defendant southern railroads. Although originating carriers are different, the delivering carriers, except to border points, are the same and movements from both preferred and prejudiced origin points to southeastern destinations, except border points, are under the common control of defendants collectively who effectively participate in and control the factors of undue preference and prejudice.—Silica Products Co., Inc. v. Gulf, M. & O. R. Co., 332 I.C.C. 449 (453-54)*.

Since defendents had no control over the lower level of gathering rates from South Dakota, and the mere fact that they participate in proportional rates from Minneapolis and Duluth does not make them participants in the assailed lower through rates to ultimate destinations, it follows that they cannot be found to have practiced undue prejudice and preference.—Public Serv. Com. of N. Dak. v. Great Northern Ry. Co., 340 I.C.C. 739 (749).

89. Competition with other rail carriers.—[Vols. 2, 6, 12, 19, 21].—See Increased Freight Rates, 1969, at §3(1), n. 70.

90. Competition with water and/or truck carriers.—[Vols. 2, 6, 9, 11-19, 21].—To constitute a valid defense to an allegation of undue prejudice, carrier competition, where found, must be sufficient to sustain a finding that there is a dissimilarity of transportation conditions to the preferred and prejudiced destinations. Defendants' general assertions that the preferential reduced rates accorded complainant's competitors were compelled by motor competition is not supported by any showing as to any particular motor carrier rate or motor carrier whose competition forced such reductions, and they virtually concede that, at least from six origins, they could not show that the reduced rates were the result of motor competition. Disparities so gross as those shown in inbound rates from certain origins to complainant's plant and to that of its nearest competitor cannot be justified on theory of motor competition in absence of a clear showing that such competition exists to an extent warranting the disparity. —Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (602-3, 611, 613).

Upon remand from district court, Commission held that higher all-rail rates on crude sodium sulphate from a point in Canada are not unduly prejudiced by lower all-rail rates mainly from origins in California to the same destinations in Oregon and Washington, because water competition exists from the California origins and not from Canada. Water route offers lower rail-water rates than the corresponding all-rail rates from California to Oregon and Washington, compelling reductions in all-rail rates. This competitive situation is not present from the complaining Canadian origin.—Saskatchewan Minerals v. Chicago, M., St. P. & P. R. Co., 335 I.C.C. 8 (17-18)*.

Competition from water carriers has been recognized as a differentiating circumstance and condition justifying rate difference. See *Export Soybeans,* 309 ICC 445. Record herein shows the existence of new, different, and exceptionally severe water carrier competition which, furthermore, is largely unregulated and offers extremely low rates. Additionally, respondent's rail service to certain points is joint-line whereas barge competition is single line. No violation of §3 has been shown.—Soybeans & Wheat, Ark. & La. to La. Ports, 341 I.C.C. 898 (903-904).

Protestant's allegations that it will be "shut out of the Arkansas market" by proposed rates are so general as to be insufficient to show the injury precedent to a finding of undue prejudice.—Id., p. 903.

91. Market competition.—[Vols. 2, 9, 12-19, 21].—Though the rates on barley from Montana, Wyoming, Colorado and Idaho to Minneapolis and Duluth are on a lower level, there has been a competitive justification of one kind or another which did not exist at North Dakota origins. Different competitive conditions create different transportation conditions, and justify different rates. [Barringer & Co. v. U.S., 319 US 1, 7].—Public Serv. Com. of N. Dakota v. Great Northern Ry, Co., 340 I.C.C. 739 (750).

To establish undue prejudice, assailed rate disparity must be shown to have operated to complainants' undue disadvantage in marketing of their products. Basic assailed rates on sugar from western producing points to central territory destinations, established to restore former relation to cane sugar rates from eastern producing points that had been disrupted by motor-competitive reduction of the latter, are still on a higher level, distance considered. This lessened disparity, still favorable to complainants, cannot be said to unduly prejudice them; rather, higher level of assailed rates impels conclusion that any disadvantage encountered by complainants in the common market is not due to transportation circumstances and conditions. Willingness of western producers, in exercise of their managerial discretion, to sell in the central territory market at lower prices than their eastern competitors is no basis for compelling them to absorb higher rates; such factors as marketing practices and increased beet sugar supply were found in 319 ICC 686 not to be controlling in establishment of a §3(1) violation.—American Sugar Refining Co. v. Ahnapee & W. Ry. Co., 322 I.C.C. 717 (718, 721).

See also Sulphur, Canadian Origins to East St. Louis, Ill., §1(5), n. 28.

95. Nature and extent of competition.—[Vols. 2, 21].—Complainant shipper of silica sand from Guion, Ark. to Southeastern destinations has proven that assailed rates create a disadvantage in marketing such product by evidence of a marked decline in business and consumer witness testimony. Coupled with proven disparity in rates between complainant and competing shippers, this evidence constitutes a prima facie showing that assailed rates are unduly prejudicial, preferential, and unlawful.—Silica Products Co., Inc. v. Gulf, M. & O. R. Co., 329 I.C.C. 181 (188-9).

Persons, Localities, and Particular Descriptions of Traffic

106. Localities; regions; territories.—[Vols. 2, 6, 9, 11-19, 21].—A locality may show that it has been prejudiced within meaning of §3(1) other than by evidence of shippers or receivers of freight.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (189)*.

See also National Starch & Chemical Corp. v. A., T. & S. F. Ry., §3(1), n. 147 below; Transit Provisions on Wheat at Twin Cities, Minn., §3(1), n. 147 below.

106a. Ports.—[Vols. 9, 11, 12, 14-19, 21].—Proposed reduced export rates on wheat from origins in 8 western States to gulf ports do not unduly prefer those ports while subjecting Chicago and other Lake ports to unjust prejudice. Severity of both truck and truck-barge competition for movement of export wheat to the gulf ports and absence of such competition via the Lake ports precludes a finding of substantial similarity of material transportation circumstances and conditions in connection with the compared movements.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (606).

But competitive factors impelling reduction of the rates on wheat to gulf ports do not obtain in connection with similar movements of flour; no truck shipments, and only three bargeloads, are shown to have moved to any of those ports. Neither volume and regularity of movement of flour to the gulf ports and comparatively light movement to Lake ports, nor revenue reductions resulting from the proposals, operate to establish dissimilarity of transportation circumstances and conditions; the Lake ports are entitled to nonprejudicial rates on flour for export even though volume of movement is substantially less than that through the gulf ports. Proposed line-haul rates on flour to the gulf ports, including port handling charge, are on lower basis than present export rates to the Lake ports, though mileages to the latter are substantially less. Other transportation circumstances respecting the compared flour movements are not shown to differ in any material degree.—Id., pp. 606-7.

Some 40 percent of total flour exports consists of relief flour purchased by the Federal Government for its own account or for account of various relief agencies for overseas distribution, and approximately one-third thereof has been moving via Lake ports. While transit time and availability of service are considerations in exportation of relief flour, the record is persuasive that the difference in rates resulting from the proposed reductions to the gulf ports would adversely affect movement through the Lake ports, as neither the Government nor the relief agencies would continue to accept offers for movement via the latter at greater cost than via the former. Failure of witnesses for the Government, the relief agencies, or the millers to support extension of the reduced rates to the Lake ports is not significant; those interests are more concerned with costs than with routes via particular ports. The ports not favored with the reduced rates are the parties susceptible to injury, and the Lake ports and allied interests have presented extensive evidence.—Id., pp. 607-9.

Availability of flour traffic, which is an important segment of total exports, has been significant in development of regularly scheduled steamship service from the Lake ports, and loss of the relief flour would result in less service. Regular steamship service must be maintained to preserve seaport status, and continued flow of flour through those ports is essential to that end and thus to economic development of the ports. Since 1959 the Government, the City of Chicago, and private interests have spent over $50 million to establish Chicago as a seaport, and significant amounts have been expended at other ports. The considered rates, to extent that their application is more extensive to Gulf than to Lake ports, will divert tonnage from the latter, with resulting injury.—Id., pp. 608, 609.

Argument that respondent Burlington (which has reduced export rates on both wheat and flour from origins on its lines to Chicago) can supply enough tonnage to satisfy demands of the Lake ports cannot be accepted. The equality of treatment extended by the Burlington affords no excuse to the other respondents to ignore the restraints imposed by §3; they are not saved from an adverse finding merely by showing that another railroad has established nonprejudicial rates. Though respondents do not control rates to the other Lake ports, and a finding of unlawful preference of the gulf ports and concomitant unlawful prejudice to the Lake ports must therefore be limited to Chicago, that port is entitled to nonprejudicial rates from origins in considered area on the Santa Fe and the Rock Island; accordingly, the proposed rates on flour to the gulf ports from origins other than on the Burlington are found unduly prejudicial.—Id., pp. 609-10.

Mobile is shown to be at a competitive disadvantage in relation to west side gulf ports insofar as it attempts to participate in the export rice traffic at higher-level rates. While the sought rate was established to New Orleans and Lake Charles to meet barge-truck competition, it was extended from all Arkansas origins, including those on defendants' routes, to Texas ports without similar competitive necessity. No substantial differences in transportation conditions are shown, distances are comparable, and defendants maintain the same rates to Mobile as to the west side ports on other commodities. Assailed rate disparity is large enough to influence shippers to use the west side ports; Mobile is entitled to compete on equal basis for considered traffic, and to do so must have the sought rate available from the same origins over all routes in same manner as the competing ports. Defendants effectively participate in and control the factors of the resultant preference and prejudice, and have not shown any special facts justifying the inequality of treatment. Assailed rates found unduly prejudicial to extent they exceed those to the west side ports named.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (189-90)*.

In 231 F. Supp. 422, the court concluded that when Congress amended §3 of the act (49 Stat. 607, 1935) to include "ports", the amendment was intended to "afford competing ports a forum in which to complain if rate adjustments which tend to concentrate the movement of traffic through one or a limited number of ports and to deprive other ports of an opportunity to handle a part of such traffic" and "encourage and promote the freedom of movement of export, import, and coastwise commerce through the ports of the country." We concur with Commission's decision that the lack of commodity movement through complainant port is substantially the result of rate inequality imposed by the railroads and is the type of injury that Congress wished to preclude. Undue prejudice ordered removed. —Lake Charles Harbor & Term. Dist. v. Atchison, T. & S. F. Ry., 329 I.C.C. 669 (676).

In the light of the relative competitive positions of the respective ports in the instant proceeding, carrier Santa Fe's refusal to join with other carriers in extending equal rates from Oklahoma origins on its line to Lake Charles, La. diminished that port's opportunity to compete for Oklahoma export flour on an equal basis with Texas ports. Furthermore, the motor-carrier competition which defendants rely on to justify lower rates to the Texas ports is no defense since such competition is relative only to bulk wheat and should have no influence on flour rates. To conclude otherwise is to lend validity to the defendants' argument that a port should not have equal flour rates unless it has equal rates on bulk grain. This argument rests on the fiction of a through rate with transit privileges.—Id., p. 677.

The effect of the higher rate charged by the defendants to Lake Charles, La. is to hold the traffic involved for movement to Texas ports. This disadvantage amounts to undue prejudice where transportation conditions are substantially similar.—Id., p. 678.

Commission found no violation of §3(1) would result from approval of proposed reduced rate herein. The protestant Gulf ports have garnered an overwhelming portion of the export traffic in corn and soybeans. Moreover, 85 percent of issue traffic arrives at Gulf ports not by rail but by exempt barge and truck and respondents should have an opportunity to compete. Additionally, this proposal will encourage movement of new traffic through as many ports as possible and Congress and Commission have consistently held that freedom of movement through the ports is to be encouraged.—Corn and Soybeans, Midwest to Pacific Northwest, 339 I.C.C. 465 (473-4).

See also City of Chicago v. United States, n. 29, above.

112. Commodities; particular traffic. —[Vols. 2, 6, 9, 11-17, 19, 21].—Since the transportation of livestock requires special equipment which can be used only for that purpose, as well as (requiring) additional loading, feeding and holding facilities, cancellation of carload rates on livestock was held not to be unduly prejudicial.—Cancellation of CRI & P & Soo Line Rates—Livestock, 340 I.C.C. 463 (467)*.

117. —Relation to distance.—[Vols. 2, 6].—Protestant millers would be unduly prejudiced by the application of out-of-line charges in addition to the proposed rates. Although applicants justify the out-of-line charges on the ground that the distances from the intermediate points at which the charges would apply are greater than the short-line ratemaking distances from the origins to the same destinations, they disregarded the fact that the intermediate points are on the direct routes which must be used under the tariffs and that the points are less distant from the destinations than are the origins. Denied.—Grain, To, From and Within Southern Territory, 340 I.C.C. 846 (853-854).

118. Port differentials or equalization.—[Vols. 2, 6, 9, 17, 18].—See Paper, Central Territory to North Atlantic Ports, §1(5), n. 503.

Regulations, Practices, Services, and Facilities

132. Preferential or prejudical regulations and practices.—[Vols. 2, 6, 9, 11].—Defendant railroads' ratemaking practices found prejudicial to complainant shipper and preferential of shippers and origins in Southern territory as defendants' maintenance of higher combination rates from Erwinville, La. and participation in southern rate levels places them in control of both preferred and prejudicial rates to destinations they serve, which is unlawful under §3(1).—Big River Industries, Inc. v. Aberdeen & R.R. Co., 329 I.C.C. 539 (542)*.

The Commission found that defendants' establishment of uniform mileage scales of rates from Guion and southeastern origins to southeast destinations did not fully remedy the unlawfulness under §3(1), and that subsequent publication by defendant southern railroads of lower point-to-point rates within southeast created additional undue preference and prejudice in violation of the outstanding order herein; ordered removed. Also, the Commission further found the assailed point-to-point rates and distance scales of rates (except to the crossing points) presently maintained by the defendants to be unduly preferential and prejudicial.—Silica Products Co., Inc. v. Gulf, M. & O. R. Co., 332 I.C.C. 449 (453-54)*.

136. Absorption of charges.—[Vols, 2, 6, 9, 11, 12, 14, 16, 17, 19, 21].—Defendants' tariff provision limiting absorption of switching charges to less than that absorbed by other switching carriers at New Orleans is violative of §3(1) inasmuch complainant railroad's consignors and consignees thus pay more for substantially similar services. Also, port of New Orleans is disadvantaged to export-import traffic when line-haul carriers absord all switching charges at other Gulf ports. See Lake Charles, 329 ICC 669.—Public Belt R. Comm. v. Aberdeen & R.R. Co., 335 I.C.C. 162 (175-80).

Commission found that proposed cancellation of wharfage absorption at indicated Gulf and South Atlantic ports by respondent railroads would not result in undue preference or prejudice as respondents have no control over the situation. Where absorption is practiced, the carriers directly serving the ports bear the expense and participation in joint rates by other carriers does not render them participants in wharfage arrangements.—Cancellation of Wharfage Absorption, 335 I.C.C., 477 (527-8).

Protestant railroads' proposal to limit their absorption of switching charges at Shreveport, La., in response to respondent's proposed increased switching charges violates §3(1) in that it would unduly prejudice shippers at Shreveport who are accorded less than full absorption and unduly prefer shippers at other cities where protestants fully absorb switching charges.—Switching Charges and Absorption, 339 I.C.C. 65 (82).

Commission, citing *Sioux City*, 241 ICC 53, found that failure of defendant line-haul carriers to fully absorb interline switching charges at Sioux City, Iowa, while fully absorbing them at Omaha, Nebr., for same class of switching subjects shippers at Sioux City to undue prejudice and disadvantage. Although defendants have shown changes at Sioux City in nature of issue traffic but they have not shown a change sufficient to affect the ultimate findings in the Sioux City case.—Armour & Co., Et Al. v. Sioux City Term. Ry. Co., Et Al., 341 I.C.C. 118 (127).

140. Car service.—[Vols. 2, 6, 9, 11, 12, 17, 19, 21].—Following its decision in 322 ICC 541, Commission held that a shipper who guarantees to use cars all year is in a different position from one who uses cars only during harvest season. It is not unlawful for a carrier to provide dedicated service at special rates to shippers who desire the service and will pay for it. Since the rent-a-train service offered herein is available to all, the assailed provisions are not unlawful per se. Furthermore, rent-a-train shipper may only use a limited number of cars and his corn shipments must be spread over the entire year, permitting more cars to be available during the harvest season to other shippers.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (118-19).

Rent-a-train plan is unduly preferential and prejudicial when carrier-furnished cars are used but the dedication as proposed here would not be unjust and unreasonable so long as cars to be used are furnished by shippers for whom rent-a-train service is to be performed and are not taken from the pool of cars available to all shippers. Possible dedication of carrier-furnished cars on a yearly basis as proposed would remove a minimum of 86 cars from the pool of cars available to other shippers and is clearly unlawful.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 339 I.C.C. 579 (583-5)*.

Commission, citing *All Freight*, 245 ICC 207, held that proposed per-car rates which do not give shippers the right to specify the size car desired creates a presumptive situation of unjust discrimination and undue preference inasmuch as a difference in rates between shippers with same size loads would result from furnishing one shipper a larger car at a higher rate than the other shipper.—Citrus Fruits, Ariz. and Calif. to Eastern States, 341 I.C.C. 622 (635).

147. Transit.—[Vols. 2, 6, 9, 11-19, 21].—Defendants' practice of assessing a separate charge for grain, including corn, stopped in transit for milling at Indianapolis and other points east of the Illinois-Indiana border, while making no charge for such transit on grain stopped for milling at points in the western district and Illinois Freight Association territory, is not shown to be unduly prejudicial or preferential in violation of section 3(1) of the Act since the transit charge is the normal charge for that service throughout the territory in which Indianapolis is located. At the allegedly preferred points west of the Illinois-Indiana border, the transit arrangements are precisely the same as are uniformly maintained throughout the western district. Any disparity existing between the transit arrangements available to the complainant and its western district competitors is occasioned by differing territorial transit practices which defendants must adopt to compete successfully for traffic rather than by the failure of the defendants to accord all transit operators in a given territory the same transit arrangements—National Starch & Chemical Corp. v. A., T. & S. F. Ry., 325 I.C.C. 658 (664-8).

Protestants' allegations of preference and prejudice arising from provisions for milling-in-transit were found unwarranted because protestants have shown no evidence that competitive injury will result. General declarations as to such injury unsupported by facts, and mere showing of a disparity of rates are insufficient for a finding of undue preference and prejudice. In addition, various mills having transit privileges more liberal than those proposed herein allege that proposals unlawfully prejudice them because Twin Cities mills have certain advantages as in disposing of millfeed and selling flour to local bakeries. These are advantages of location not attributable to the proposals and are not unlawfully prejudicial.—Transit Provisions on Wheat at Twin Cities, Minn., 341 I.C.C. 235 (243-44)*.

Removal of Prejudice

160. Removal of undue prejudice.—[Vols. 2, 6, 9, 11-19, 21].—Even though it may be that establishment of inbound rates on zinc dross, skimmings, and residue to Meadowbrook, W. Va., bearing same relation to first class as the preferential rates to Josephtown, Pa., the site of complainant's nearest and principal competitor, would be of little benefit to complainant, because the shorter distances from many origins to Josephtown would still afford that point rate advantages, this does not justify a different and lower basis of rates in relation to first class from specified official territory origins to Josephtown than to Meadowbrook. Undue prejudice found to exist in assailed rates to Meadowbrook from specified origins should be removed by establishment of rates that reflect no greater percentage of the docket 28300 class 100 rates than rates on those commodities from the same origins to Josephtown, subject to same minimum weights.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (614, 615).

When the mandatory rate-break rule was initially prescribed it was considered essential to preclude discrimination between carriers, markets, and shippers. The railroads were the only significant carriers of grain and grain products and an adjustment which did not provide equality of transportation charges, and afford some protection of the revenues of the carriers, would cause unjust discrimination and preference. As a consequence the rates permitted movement over circuitous routes and numerous free transit stops and the rate level prescribed was sufficiently high to cover the cost of such services.—Rate Structure Investigation, Part 7, 329 I.C.C. 824 (844)*.

However, the rate-break system places emphasis on factors other than underlying transportation service,thus discouraging rates based primarily on cost or competitive need, and the mandatory rule runs contrary to the freedom of railroads to negotiate and establish rates to meet shipping public's need. Restriction of this freedom should be limited to those areas where necessary to foreclose publication of unlawful rates and should be of limited duration. Since equality via the different routes originally affected by the mandatory rate-break rule has been lost through establishment of limited transit single-and multiple-car rates by particular railroads over their own lines, the orders entered in 1934 and 1936, to extent requiring observance of rate-break combinations and proportional rates prescribed as exclusive basis of charges on grain at points from which proportional rates are applicable were vacated and set aside.—Id., pp. 842-45.*

To remove preference and prejudice found to exist, respondents will be required to revise their tariffs to provide an increase of 5 percent in lieu of 6 percent in those transcontinental TOFC rates on fresh fruits and vegetables that include a factor for mechanical protective service.—Increased Freight Rates, 1969, 337 I.C.C. 436 (449-50).

Section 3. (1a) Export rates on farm commodities; Commission's power to carry out policy.—[Unchanged, See vol. 11, p. 9158; for statute and Cross Reference, §5(b).]

Notes of Decisions

Volume 15—p. 12002; Volume 16—p. 12638.

Section 3. (2) Payment of freight as prerequisite to delivery. —[Unchanged. See vol. 9, p. 7386, vol. 11, p. 9158, vol. 15, p. 12003.]

Amendments see footnotes, vol. 2, p. 1220, vol. 15, p. 12003; historical notes, vol. 2, p. 1221, vol. 12, p. 10229, vol. 14, p. 11432.

Historical Note

By provision of §108 of the Truth in Lending Act, Public Law 90-321, 82 Stat. 146, responsibility for administrative enforcement of that act is assigned to the Commission with respect to any common carrier which it regulates and, for the purpose of enforcing compliance therewith, the Commission may exercise any other authority conferred on it by law. Also, while the Board of Governors of the Federal Reserve System is directed to prescribe regulations to carry out purposes of the Truth in Lending Act (12 CFR Part 226, 34 FR 2002, Feb. 11, 1969), the statute specifically provides that such Board authority does not impair the authority of any other agency responsible for administrative enforcement to make rules respecting its own enforcement and compliance procedures.

Notes of Decisions

Liability for Freight Charges of Parties to Shipment

21. Consignor's liability.—[Vols. 2, 6, 9, 12, 15, 17, 18].—Clauses of the uniform bill of lading govern rights of the parties in railroad's suit against consignor for freight charges on 11 tank cars of oil shipped from Cushing, Okla., to West Frankfort, Ill.; and, being prescribed by Congress and the Commission, they have the force of Federal law. Thus, when carrier failed to notify consignor that West Frankfort was designated in a station list as a prepay station and, instead, accepted the shipments without prepayment, entered in a nonrecourse agreement with consignor, and delivered shipments to consignee without collecting freight charges from it, carrier could not thereafter collect the charges from consignor. As tariff laws are not aimed at who must pay the rate but rather at what rate shall be paid, the parties are free to stipulate who shall pay the prescribed rate; therefore, when bills of lading containing a no-recourse clause was executed and no provision was made for prepayment, delivery of consignment to consignee and his acceptance thereof relieved consignor of liability for the freight charges. Carrier's suit dismissed.—Atchison, T. & S. F. Ry. Co. v. Midland Cooperatives, Inc., 306 F. Supp. 723 (724-6).

In railroad's suit against shipper to recover freight charges on shipment which moved under bills of lading containing a "non-recourse" clause, consignor is not relieved of its primary responsibility for freight charges on basis of that provision when it did not sign the no-recourse statement therein. Nor does alleged agreement of ultimate consignee to pay the freight charges relieve consignor of its liability to carrier, since the railroad merely transported cargo from one to the other without any notice of or participation in dispute between them on that matter. Furthermore, plaintiff was permitted to join the consignee as a direct defendant in instant suit; and while obviously railroad cannot recover twice, it would seem that, under §3(3), it may recover jointly and severally from both shipper and consignee to whom transshipped where no contrary intention is shown by the bills of lading or the undisputed facts of record. Summary judgment for plaintiff entered.—Chicago & N.W. Ry. Co. v. T. Frederick Jackson, Inc., 336 F. Supp. 1141 (1141-2).

In railroad's action to recover freight charges on shipment from El Paso, Tex., to California points, pursuant to defendant's direction, although plaintiff is not entitled to collect charges from defendant (consignee named in bills of lading covering prepaid movement to El Paso) by claiming a "diversion" of shipment by consignee within §§3(2) and (3), defendant's status as an agent or principal is another matter. Original shipment terminated at El Paso where consignee exercised such substantial control over the cars as to amount to a "delivery"; and a further agreement was necessary for forwarding shipment to California. A new contract, for which no bills of lading were issued, was made for moving the cars to California and, viewing the record in a light most favorable to the railroad against whom the lower court directed a verdict, a jury verdict might have been found against defendant as original consignor under the new contract. Therefore, as to that issue, lower court's judgment must be reversed and cause remanded for a new trial.—Southern Pac. Co. v. Brown, Alcantor & Brown, Inc., 404 F. 2d 187 (190-91).

22. Consignee's liability.—[Vols, 2, 6, 9, 12, 15, 17-19, 21].—Provisions of uniform bill of lading govern rights of the parties to an interstate shipment and, as they are prescribed by Congress and the Commission, have the force of Federal law. Since tariff laws are not aimed at who shall pay the freight rate but rather what rate shall be paid, the parties are free to stipulate who shall pay the rate prescribed thereby. Therefore, when uniform bills of lading covering shipment of 11 tank cars of oil to West Frankfort, Ill., (listed as a prepay station) contained a signed no-recourse clause and carrier, without making provision for prepayment of the charges, accepted the shipments and delivered them to consignee, the acceptance of delivery established liability of consignee to pay all freight charges.—Atchison, T. & S.F. Ry. Co. v. Midland Cooperatives, Inc., 306 F. Supp. 723 (724-5, 726).

Railroad may not recover in its suits against consignees of goods for freight charges allegedly due where the carrier issued bills of lading and marked them "Prepaid" or "To be prepaid" and, relying on that representation, the consignees accepted delivery and paid the purchase price and full freight charges to consignor who never remitted to carrier. As stated in 276 F. Supp. 367, aff'd 409 F. 2d 882, where there is no binding precedent which prohibits examination of the equities of the case, and no overpowering public policy requiring strict application of statute that forbids granting any rate preference, the established principle fixing consignee's liability for lawful freight charges does not require double payment by consignee. Plaintiff carrier made full and proper freight charges and extended credit to, and looked for payment from, consignor (shipper) by stamping the bills of lading as prepaid and, since defendant consignees accepted delivery and made full payment to shipper prior to shipper's bankruptcy, they are not responsible for shipper's nonpayment. Judgment for defendants.—Missouri Pac. R. Co. v. Lake Charles Grain & Groc. Co., 320 F. Supp. 1064 (1065-6).

On appeal from lower court's directed verdict for defendants, railroad cannot recover additional freight charges from defendant (consignee) for transporting shipment from El Paso, Tex., (destination named in bills of lading) to California points, on theory that there was a diversion of shipment by consignee within provisions of §§3(2) and (3). Considered shipment reached El Paso (charges prepaid) as indicated on the bills of lading, and when consignee exercised substantial control over the cars it amounted to a delivery which terminated the bills-of-lading contract and which necessitated a further agreement for transporting it therefrom; thus, since the cars were not in transit when consignee directed that they be moved to California, there was no diversion or reconsignment as contemplated by the statute. Therefore, as the shipment terminated at El Paso and a new contract was made for its movement to California, plaintiff is not entitled to recover claimed charges, by invoking §§3(2) and (3), from defendants.—

Southern Pac. Co. v. Brown, Alcantar & Brown, Inc., 404 F. 2d 187 (189-90).

In railroad's action against consignee of the goods to recover freight charges allegedly due on shipment which moved under bill of lading that carrier had prepared and marked "freight prepaid," when the railroad affirmatively marked "prepaid" on the bill of lading, in effect, it directed consignee to reimburse shipper-consignor for charges shipper had prepaid; and, when consignee in paying its bill to consignor included the freight charges and could not obtain reimbursement thereof from consignor, which was apparently insolvent, consignee was not liable to railroad for the charges which in fact had not been paid. Lower court's holding that the principle fixing a consignee's liability for payment of lawful freight charges, as established in cases cited, does not mandate double payment by consignee as a matter of absolute liability to guarantee carrier's collection of payment, and that defendant consignee could properly raise the defense of estoppel on grounds of payment in full to consignor on a prepaid bill of lading, affirmed.—Missouri Pac. R. Co. v. National Milling Co., 409 F. 2d 882 (883-4, 886)*.

While a consignee or reconsignee who takes delivery of shipment is liable for charges then billed even if not collected, consignee who reconsigned the shipment is not liable for such charges; but if there are charges beyond those billed, the beneficial owner at time of delivery is liable for them if (prior to delivery) carrier has been notified of beneficial owner's name and address, and if proper notice has not been given, consignee who reconsigned is liable for additional charges neither billed nor collected. Therefore, when there were no additional charges on considered carload of lumber, and defendant consignee had given delivering railroad written notice to release the car to a third party and to show consignee as shipper on the freight bill with all charges to follow the car, carrier which released car to specified third party (now bankrupt) without collecting billed freight charges is not entitled to collect such charges from consignee who reconsigned the car.—Union Pac. R. Co. v. Hall Lumber Sales, Inc., 419 F. 2d 1009 (1010, 1012-13)*.

See also Chicago & N.W. Ry. Co. v. T. Frederick Jackson, Inc., n. 21 above; Southern Pac. Transp. Co. v. Campbell Soup Co., §6(7), n. 222.

23. —Consignee as agent.—[Vols. 2, 9].—On rehearing, in railroad's suit to recover unpaid freight charges for transportation of shipment from El Paso, Tex., (to which bill-of-lading charges were prepaid) to California points, as defendant (bill of lading consignee) directed, provisions of recently presented tariff defining "diversion or reconsignment" and authorizing a reconsignment after a shipment reaches a destination and application thereof to the undisputed facts, including fact that plaintiff applied a through tariff rate from point of initial shipment to that of final delivery, impels the court to conclude that the contract of carriage was not terminated in El Paso. It follows that when defendant (consignee) exercised substantial control over the shipment, directing railroad to transport the cars to California points without written notice to delivering carrier that it was acting only as agent and giving it name and address of beneficial owner of the property, under provisions of §3(2), defendant became liable for accrued unpaid freight charges as a diverting consignee.—Southern Pac. Co. v. Brown, Alcantar & Brown, Inc., 409 F. 2d 1331 (1332)*.

25. Third person's liability.—[Vols. 2, 9].—Changes in the Act and the provisions of uniform bill of lading since the decision in 108 F. 2d 994 are not inconsistent with holding therein that, by its conduct in giving effect to consignee's written direction to deliver shipment to another and collect the freight charges from the other party, the railroad agreed to accept liability of new consignee for the charges (if it accepted delivery) in place of original consignee's liability had it accepted delivery. When defendant consignee of carload of lumber gave delivering railroad written direction to release the car on arrival to a third party, and to show consignee as shipper on the freight bill with all charges to follow the car, that was a clear expression of original consignee's desire that the third party be held liable for the charges due. Therefore, having been notified that freight charges were to follow shipment delivered to the third party (now bankrupt), carrier which released the car to third party named without collecting the billed charges is not entitled to collect such charges from defendant reconsignee.—Union Pa. R. Co. v. Hall Lumber Sales, Inc., 419 F. 2d 1009 (1010-12, 1013-14)*.

30. Determination as to which party is liable.—[Vols. 2, 9, 13, 16].—In absence of some contractual basis, the statute imposes liability on beneficial owner of goods shipped for the freight and demurrage charges only if there is a reconsignment or diversion of the shipment accompanied by written notification to the delivering carrier of the name and address of the beneficial owner. And general allegation by plaintiff railroad, suing to recover demurrage charges on 53 carloads of pig iron, that defendant (which had agreed to purchase 36 of the carloads) was consignee's principal is insufficient evidence of a principal-agent relationship between consignee and defendant that would relieve consignee of his independent legal obligation to pay freight charges on goods delivered to him.—Southern Ry. System v. Leyden Shipping Corp., 290 F. Supp. 742 (745-6). [Not arising hereunder.]

Regulations of the Commission

37 FR 5304, March 14, 1972, Part 1325: Extension of Credit to Candidates for Federal Office or Their Representatives, in implementation of the Federal Election Campaign Act of 1971 (Public Law 92-225), new Part 1325, as set forth, added effective May 5, 1972 unless modified or amended by further order of the commission.

37 FR 10446, May 23, 1972, part 1325: Extension of Credit to Candidates for Federal Office or Their Representatives. Credit regulations set forth in notice of proposed rule making and order (37 FR 5304) prescribed to become effective May 5, 1972.

Section 3. (3) Liability of shipper-consignee for freight where delivery is made to another party upon instruction.—[Unchanged. See vol. 11, p. 9159.]

Notes of Decisions

Volume 17—p. 13295; Volume 21—p. 16514.

2. Construction and interpretation.—[Vols. 17, 21].—Plaintiff railroad having been permitted to join ultimate consignee of considered shipment as a direct defendant in its suit against shipper-consignor to recover freight charges, also seeks summary judgment against consignee as the party to whom delivery was made, under provisions of §3(3), even though it was not a named party on the bills of lading. Obviously plaintiff cannot recover twice but it would seem that it may recover jointly and severally from both shipper and consignee to whom transshipped where no contrary intention is made to appear. Although neither counsel cites any direct authority either way, §3(3) is statutory authority to affix joint liability on the consignee as well as the consignor. Summary judgment for plaintiff entered.—Chicago & N. W. Ry. Co. v. T. Frederick Jackson, Inc., 336 F. Supp. 1141 (1142).

See also Southern Pac. Co. v. Brown, Alcantor & Brown, Inc., §3(2), n. 22.

Section 3. (4) Interchange of traffic.—[Unchanged. See vol. 11, p. 9160.]

- Amendment, see footnotes, vol. 2, p. 1234, vol. 11, pp. 9160, 9161; historical note p. 1234.

Notes of Decisions

Volume 2—p. 1235; Volume 6—p. 5077; Volume 9—p. 7390; Volume 11—p. 9161; Volume 12—p. 10231; Volume 13—p. 10947; Volume 14—p. 11433; Volume 15—p. 12004; Volume 16—p. 12640; Volume 17—p. 13295; Volume 18—p. 14051; Volume 19—p. 15124; Volume 21—p. 16514.

Interpretation

3. In general.—[Vols. 2, 6, 9, 14, 16, 18, 21].—The statute, as interpreted by the Supreme Court in 330 US 567, has as its purpose the preservation of the inherent advantages of barge transportation. Ex-barge traffic may not be discriminated against; thus, when railroads voluntarily enter into joint rail-motor rates under §216(c) which result in discrimination against water carriers, they are necessarily in violation of §3(4), since fact that authority to establish such joint rates is found in part II of the Act does not exempt the railroads from provisions of part I which would otherwise apply. Accordingly, railroads may not enter into joint rates with motor carriers unless requirements of §3(4) are observed. Unlawful discrimination against ex-barge traffic ordered removed.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., 332 I.C.C. 540 (542-3)*.

Applicability

10. In general.—[Vols. 2, 6, 9, 11, 14, 16, 18, 21].—In action to enjoin Commission decision and order requiring railroads to remove discrimination against connecting barge lines, which resulted from reduced joint rail-motor rates established pursuant to §216(c), there is no merit in plaintiffs' argument that because such rates are authorized in part II of the Act, sections in part I dealing with discriminatory rates are inapplicable to joint rail-motor rates. As the Supreme Court held in 323 US 612 and 387 US 397, because of the National Transportation Policy the various parts of the Act may be, indeed, must be construed as a whole; and, while latter cited case dealt with questions of transportation rather than rates, the same logic found therein must be used when a question of analogy arises under the Act which also involves transportation, carriers and rates. To take the whole in one instance implies that the whole is taken in a like situation.—Atchison, T. & S. F. Ry. Co. v. United States, 300 F. Supp. 1351 (1353-7)*.

For the court to hold that the Commission has no power to regulate discrimination in joint rail-truck rates simply because participating carriers entered into such rates under a provision of part II of the Act or because trucks are not specifically designated as connecting carriers under part I thereof would fly in the face of the NTP; such a holding could not be ascribed as the intent of Congress. Therefore, under the language of the NTP and the IC Act, joint rail-motor rates are to be regulated pursuant to §3(4) of part I of the Act. Accordingly, since careful examination of the record shows substantial and ample evidence to support the Commission's decision, the cause is dismissed with prejudice and with costs.—Id., p. 1357.

Interchange

37. Installation of connections. —[Vols. 2, 6, 9, 19].—Primary consideration in this proceeding is whether the switch connection or interchange facility is required by public convenience and necessity. Without a reasonable showing by defendant of how much traffic would move, it is impossible to assess the inconvenience to defendant's yard and terminal facilities. Barring such traffic showing expense which would be incurred by defendant, proposed interchange facility cannot be justified. Commission concluded that interchange by physical connection or intermediate carrier is not required by public convenience and necessity.—Missouri Pac. R. Co. v. Louisiana & A. Ry. Co., 332 I.C.C. 569 (579-81).

39. Failure or refusal to afford facilities.—[Vols. 2, 6, 9, 14, 15, 16, 18, 19].—Penn Central's restriction of access to its Flexi-Flo rail-motor terminals to certain "favored" motor carriers found not justified as common carrier responsibilities bars exclusion of carriers of competing transport modes from access to publicly offered services and facilities despite absence of specific language authorizing Commission to require carriers to furnish such services to competitors (see 387 US 397).—Mutrie Motor Transportation, Inc., Ext.—Ex-Rail, 111 M.C.C. 251 (267-8)*.

Discrimination Between Connecting Carriers

41. In general.—[Vols. 2, 6, 9, 12-15, 17-19, 21].—Section 3(4) prohibits rail carriers from unduly prejudicing any connecting line in the distribution of traffic not specifically routed by shipper; and, though condition (e) in 1923 order approving Southern Pac.'s control of Central Pac. Ry. does not apply to preferential routing, provisions in railroads' 1924 agreement (purporting to embody all the *Control* case conditions in a contract) for mandatory routing of all unrouted traffic violate the plain meaning of §3(4) since such preferential treatment is not justified by differences in operating conditions. Furthermore, such provisions for mandatory and exclusive routing of unrouted traffic are contrary to the national transportation policy as are, also, the agreement provisions for preferential solicitation; and the Pacific Railroad Acts afford no justification for mandatory preferential solicitation much less undue prejudice against connecting lines in the distribution of unrouted traffic and the attendant economic disadvantage contrary to §3(4).—Central Pac. Ry. Co. Control, 328 I.C.C. 345 (357-8)*.

Protection afforded barge lines as connecting carriers by §3(4) cannot be negated by voluntary establishment of joint rail-motor rates pursuant to §216(c) since, regardless of obligations assumed by motor-carrier participants, rail participants in such rates must continue to comply with provisions of part I of the Act which would otherwise apply. As found in the prior report, divisions received by rail participants in considered joint rail-motor rates are a proper measure of discrimination against complaining water carriers; and, based on such divisions, assailed local rates on ex-barge pipe from St. Louis and Kansas City, Mo., to Tulsa and Oklahoma City, Okla., result in discrimination against the barge lines as connecting carriers when, even taking into account the additional rail costs for handling ex-barge traffic, they exceed divisions received by rail participants in reduced joint rail-motor rates between those points. Railroads ordered to remove the unlawful discrimination found to exist.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex. 332 I.C.C. 540 (541-3)*.

Complainant herein found not to be subject to undue discrimination in switching arrangements inasmuch as complainant has no team tracks with which to reciprocate such switching. Complainant need not show that it is the victim of discrimination but only that it is not afforded equal and reasonable interchange facilities. Nor is an application under §§1(18) and 1(20) necessary as Commission may impose the sought extension of line on an unwilling carrier. See 213 ICC 351.—Missouri Pac. R. Co. v. Louisiana & A. Ry. Co., 332 I.C.C. 569 (581, 579).

43. Difference in rates—[Vols. 2, 6, 9, 13-19, 21].—Commission, citing *Consolidated Mining*, 299 ICC 231, held that defendant's failure to absorb same amount of switching charges for complainant as it absorbs for complainant's competitors is unlawful discrimination against complainant in violation of §3(4).—Public Belt R. Comm. v. Aberdeen & R.R. Co., 335 I.C.C. 162 (180-81).

Commission found that proposed increase in lake cargo rates on coal without a similar increase in the all-rail, unit-train rates would result in discrimination against the connecting water carriers.—Coal, Ill., Ind., and Western Ky. to Chicago, 339 I.C.C. 493 (499-500).

That no barge movement of flour has occurred from Kansas City to Memphis was held to be immaterial, since barge rates exist, there are statements of record that facilities exist to handle potential movements and reductions in rates would provide the incentive for such movements. Without adjustment of rates applicable on ex-barge flour from Memphis to the same destinations, proposed reductions would be in violation of findings in American Barge Line (316 ICC 759), and would violate sections 2 and 3(4).—Grain To, From and Within Southern Territory, 340 I.C.C. 847 (853).

44.—In divisions.—[Vol. 2].—See Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., n. 41, above.

Section 3. (5) Terminal facilities; use of and compensation for.—[Unchanged. See vol. 11, p. 9162.]

Amendments, see footnotes, p. 9162; historical notes, vol. 2, p. 1234, vol. 9, p. 7396, vol. 14, p. 11435.

Notes of Decisions

Volume 2—p. 1254; Volume 6—p. 5081; Volume 9—p. 7396; Volume 11—p. 9162; Volume 12—p. 10232; Volume 13—p. 10948; Volume 14—p. 11435; Volume 15—p.12006; Volume 16—p. 12641; Volume 21—p. 16523.

1. Interpretation, generally.—[Vols. 2, 6, 9, 13, 14, 16].—Although opposing carrier, East Coast, does not own facilities at the Dodge Island port (near Miami) or is not entitled as a matter of right to enjoyment of these facilities, Port Authority plans contemplate East Coast's use of the port terminal. And, although East Coast's opposition to considered application is that, as sole rail carrier having physical connections with the new port, it can adequately handle all rail traffic to and from port including switching of Seaboard cars, nevertheless, its tracks, being used entirely for serving shippers in City of Miami and area of port, can themselves be considered terminal facilities. However, whether they be considered terminal facilities of East Coast or main-line track leading to port's terminal facilities, they are within scope of §3(5); it is not required that terminal facilities and tracks for reasonable distance outside of such terminal be owned by same carrier. Thus, Seaboard's proposed use of East Coast's tracks is within Commission's jurisdiction under §3(5).—Seaboard Air Line R. Co.—Use of Terminal Facilities, 327 I.C.C. 1(3).

4. Terminal facilities, construed.—[Vols. 2, 6, 14, 15, 16].—The facilities on Dodge Island (near Miami) of the Dade County Seaport Department are to be used primarily for serving users of the new port, and in this respect, operation at the facility will be little different from that conducted at the old port. And, inasmuch as the use of the facilities, in terminal operations, rather than their classification by the parties is determinable, the department's trackage constitutes terminal facilities as contemplated by §3(5).—Seaboard Air Line R. Co.—Use of Terminal Facilities, 327 I.C.C. 1 (2-3).

5. Trackage of which common use may be required.—[Vols. 2, 6, 9, 14, 21].—See Seaboard Air Line R. Co.—Use of Terminal Facilities case, n. 1 above.

7. Just compensation. —[Vols. 2, 6, 9, 14, 15, 16].—Section 3(5) contemplates that after the right of petitioner to use terminal facilities of another carrier has been determined, the interested carriers shall have an opportunity to agree upon terms and compensation for such use. However, if the Commission is called upon to fix the compensation, prescribed terms and compensation must, under §3(5), be ascertained on the principles controlling compensation in condemnation proceedings. (discussed in 198 ICC 4).—Seaboard Air Line R. Co.—Use of Terminal Facilities, 327 I.C.C.1 (8-9).

Section 4. Long and short haul charges; competition with water routes. (1) Charges for long and short hauls and on through route.—[Unchanged].

Amendments, see footnotes, vol. 2, pp. 1261, 1262, vol. 11, p. 9163, vol. 18, p. 14056, vol. 21, p. 16524; historical notes, vol. 2, p. 1262, vol. 9, p. 7398, vol. 11, p. 9164.

Notes of Decisions

Volume 2—p. 1265; Volume 6—p. 5088; Volume 9—p. 7399; Volume 11—p. 9164; Volume 21—p. 10233; Volume 13—p. 10949; Volume 14—p. 11436; Volume 15—p. 12007; Volume 16—p. 12642; Volume 17—p. 13298; Volume 18—p. 14057; Volume 19—p. 15129; Volume 21—p. 16524.

Constitutionality and Construction

2. Construction; rules in general.—[Vols. 2, 6, 9, 11-16, 18, 19, 21].—In suit to enjoin Commission decision that the mere fact that railroads voluntarily entered into joint rates with motor carriers under §216(c) does not relieve them of their duty to comply with §4, and that joint rail-motor rates which result in higher charges for a shorter haul than for a longer one over the same route is precisely what is prohibited by §4(1), there is no merit in plaintiffs' argument that, since such joint rates are permitted under part II of the Act, sections in part I dealing with discriminatory rates are inapplicable. The Supreme Court held in 323 US 612 and 387 US 397 that, because of the National Transportation Policy, the various parts of the Act may, and indeed must, be construed as a whole; therefore, the reviewing court must hold that, under the language of the NTP and the IC Act, the long-and-short-haul provisions of §4 are applicable to considered joint rail-truck rates. The Commission can, within its statutory grant, exercise jurisdiction over the rates under §4(1) and, since its findings are amply supported by the record, the complaint is dismissed with prejudice and with costs.—Atchison, T. & S.F. Ry. Co. v. United States, 300 F. Supp. 1351 (1353, 1356-7)*.

Transportation Affected

34. Joint rail-motor rates.—[Vols. 16, 21].—Mere fact that authority to establish joint rail-motor rates is found in part II of the Act, rather than part I, does not exempt railroad participants in such rates from provisions of part I which would otherwise apply; obvious reason for including the authority in part II is that only upon its enactment were motor carriers subjected to Commission regulation and joint rail-motor rates permitted. Therefore, railroads that voluntarily enter into joint rates with motor carriers under §216(c) are not thereby relieved from their duty to comply with §4; and when considered joint rail-motor rates result, in some instances, in higher charges for a shorter than a longer movement over the same route, in same direction, and the shorter movement is included in the longer, that is exactly what is prohibited under §4(1). Thus, though the departures occur on motor-carrier part of the service, railroad participants in joint rail-motor rates are in violation of §4 unless they make out a special case for relief therefrom; §4 relief authorized in prior report, affirmed.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., 332 I.C.C. 540 (541-2, 543-4)*.

Enforcement of Long-and-Short-Haul Clause

38. —Necessity for showing charging and receiving greater and lesser compensation.—[Vols. 2, 6, 9, 11-14].—Complainant shippers have failed to prove that defendants' failure to fully absorb interline switching charges violated §4 because they have not shown the charging of greater compensation for transportation of a like kind of property for a shorter than for a longer distance over the same line or route in the same direction, the shorter being included in the longer distance.—Armour & Co., Et Al, v. Sioux City Term. Ry. Co. Et Al., 341 I.C.C. 118 (128).

62. —Minimum weights considered in connection with rates.—[Vols. 2, 9, 13, 15].—Under the proposed tariff rule which provided for the nonapplication of domestic rates on import and export traffic where there are in effect commodity rates or rates derived from exceptions ratings published to apply specifically on import or export traffic, the aggregate charges of such traffic with minimum weight of 75,000 pounds would require higher charges from the intermediate point than from the more distant point resulting in unauthorized fourth-section departure; proposed schedule ordered cancelled.—Application of Domestic Versus Import or Export Rates, 339 I.C.C. 9 (14).

Aggregate-Of-Intermediates Clause

138. When rates unlawful within meaning of clause.—[Vols. 2, 6, 9, 11, 12, 15-17, 19, 21].—Commission found no violation of §4(1) as the assailed rates on carload shipments of automobile parts over respective routes from Detroit, Mich. to either Orvil, Tex. or Rincon, N. Mex. were domestic rates restricted so as not to apply on export traffic and were not intermediate rates within the meaning of §4(1) and may not be used as part of a combination on export shipments.—Fabricas Auto-Mex., S.A. v. N. Y. Central R. Co., et al, 332 I.C.C. 1 (9).

161. Publication of rates subject to rule 56.—[Vols. 9, 11-14].—Although aggregates of intermediate rates lower than applicable single-factor transit rates, published on commodity descriptions which would include complainant's shipments, were in effect when some of shipments moved, hold-out rule conforming to rule 56 of Tariff Circular 20, in tariff naming the single-factor rates, did not make the lower combinations on the transit point applicable, being in substance merely a promise to publish such rates where lower. However, under that holding out and provisions of §4(1), complainant is entitled to reparation to basis of the lower aggregates, regardless of their level.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (538-9).

Relief from Long-and-Short-Haul Provisions

165. Authority of Commission to grant relief, generally.—[Vols. 2, 6, 11, 15, 17, 21].—Petitioner's contention that the Commission cannot, upon protest, lawfully grant long-and-short-haul fourth-section relief without considering whether the rates violate other sections of the Act or the national transportation policy (with reliance on *Mechling*, 376 US 375), is not applicable in the instant proceeding, which does not consider the lawfulness of specific rates under any section of the Act. The instant proceeding is in contrast to proceedings in which issues concerning given rates are considered under section 4 and other sections of the Act.—Commodity Rates East of the Rocky Mountains, 329 I.C.C. 212 (214-15)*.

176. "Special cases" construed.—[Vols. 2, 6, 9, 11-19, 21].—Relief for technical departures from §4 in reduced export rates on wheat from origins in 8 western States to gulf ports is essential for maintenance of a rate adjustment consistent with railroad geography and to preclude publication of rates lower than necessary to meet severe truck and truck-barge competiton for the traffic. Charges for competitive truck movements from the higher-rated intermediate railroad points are actually greater than from the more distant railroad origins, since highway distances are greater, and applicant railroads are attempting to meet the truck and truck-barge competition at both origin and intermediate points. Applicants have established a special case; relief granted.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (587-8, 589-91, 611).

A fourth-section order granting relief from the long-and-short-haul provision supplemented by an order granting outside-territory relief is not an unlimited order; its purpose is to cover long and short haul departures which, of necessity, arise when the methods favored by the Commission, such as mileage-scale groupings, are followed in establishing a rate structure. Clearly this situation, while of a continuing nature, is limited in scope and comes within the special-case requirement of §4(1) of the Act.—Commodity Rates East of the Rocky Mountains—Fourth Section Application, 329 I.C.C. 212 (215)*.

The Commission found that circumstances warrant modification of supplemented fourth section order 18982 so as to provide that this proceeding be automatically reopened whenever rates established under said order are contested by protest, or in an investigation or complaint proceeding for reconsideration pertaining thereto. The burden of proof under §4 of the act upon such reopening will be on the proponent of the involved rates. Findings in the prior report were modified in accordance herewith, and an order issued modifying the outstanding supplemented order as required—Id., p. 216.

Although a special case was found to exist for the establishment of proposed compensatory rates, the purpose of which was to afford origin millers an improved opportunity to compete with destination millers in the sale of flour, the application was denied since the proposal would have resulted in violations of §§2, 3(4), and 3(1).—Grain, To, From and Within Southern Territory, 340 I.C.C., 847 (854).

Compelling Character of Competition Warranting Relief

215. Investigation by the Commission; character.—[Vols. 2, 9, 18, 21].—In action to set aside Commission order granting railroads relief from long-and-short-haul clause of §4(1), defendants rely on opinion in the *Seatrain* case, 168 F. Supp. 819, to support their argument that, since the statute requires no hearing, a §4 order is rule-making procedure within the Administrative Procedure Act and the pertinent scope of judicial review of the order is not whether the findings and conclusions are supported by substantial evidence, but whether they are arbitrary, capricious, an abuse of discretion, or otherwise not in accord with the law. However, even under the *Seatrain* decision, the order must contain sufficient findings so that a court can determine if the Commission gave consideration to proper criteria required by statute to be taken into account in determining the §4 question; thus, order under review is fatally defective because (ultimate facts or conclusions therein being no more than the legal conclusions found insufficient in Seatrain) it is not supported by findings which show on their face a sufficient basis for issuance of the order.—Seaboard Allied Milling Corp. v. United States, 306 F. Supp. 879 (882-3)*.

And decision in the *Mechling Barge Lines* case, 376 US 375 (after *Seatrain*), directly holds that (1) the Commission's power to issue a §4 order depends on due consideration of §§2 and 3 discrimination and preference provisions, (2) if §2 and §3 issues are raised and contested in a §4 proceeding, merits thereof must be decided before §4 order can be issued, and (3) except for situation where consolidation of §§2 and 3 issues with the §4 procedure would excessively delay the proceedings, protestants cannot be required "to begin anew" by §13 and §15 proceedings to adjudicate those issues. Thus, though an evidentiary hearing was held in *Mechling*, whereas none was held nor requested in instant case, the court finds nothing to support defendants' position that §4 order in question was a "preliminary determination" that protestants (plaintiffs) did not prove their allegations as to discrimination and preference of proposed rates and that, as order stated, their contentions that it violates other sections of the Act could be fully adjudicated in complaint and investigation proceedings. Commission order vacated and case remanded for further proceedings consistent with the court's opinion.—Id., pp. 883-4.

Authorization of Relief

234. —Denial of relief.—[Vols. 2, 6].—In view of our findings that the proposed proportional rate would be unjust, unreasonable, and unduly prejudicial to Chicago, Ill., in violation of §§1(4) and 3(1), the application for §4 relief may not receive our approval even though all other factors meet the statutory standard of proving a special case justifying such relief.—Corn and Corn Products, Illinois to Official Territory, 332 I.C.C. 485 (488-9)*.

236.—Construction of general order of authorization.—[Vols. 2, 6, 9, 12, 19, 21].—The order granting general relief from the long-and-short-haul provision of §4(1) supplemented to include outside-territory relief, as used by the applicants, has been interpreted to cover rates established for competitive reasons. It may be that such coverage was not contemplated by the division in the prior report, but the scope of the supplemented order is that extensive. Were competitive rates to be excluded, there would be little use for the order, and for coverage to be determined by the reason for establishment of the rates would be too indefinite and difficult to prove. Since the requests for relief were unopposed, the supplemented order as to past rates established thereunder is affirmed, but it is modified as to its future effect by automatically reopening this proceeding when any rate purportedly established under the supplemented order is contested and the proponent of the rate will be required to prove that fourth-section departures will not occur or establish a justification for fourth section relief.—Commodity Rates East of the Rocky Mountains—Fourth Section Application, 329 I.C.C. 212 (215-16)*.

Qualification on Authority of Commission

243. More distant rate reasonably compensatory.—[Vols. 2, 6, 9, 11, 12, 14, 16-19, 21].—In suit by southern-territory flour mills to set aside Commission order granting defendant railroads relief from long-and-short-haul clause of §4 in connection with proposed rates (filed concurrently with application) on wheat flour from southwestern and w.t.l. territories to destinations in southern territory, considered order is fatally defective because it is not supported by findings which show on their face "sufficient basis for the issuance of the order," even under doctrine of the *Seatrain* case, 168 F. Supp. 819, which narrowly limits the scope of judicial review of §4 orders. The order sets out various contentions of the parties in some detail and, also, states that proposed rates are not approved but are subject to complaint, investigation, and correction if in conflict with the Act; but the Fourth Section Board's ultimate conclusions that (1) allegations of protestant (plaintiffs) as to discrimination and undue preference and prejudice "are not supported by facts of evidence" and (2) "proposed rates appear to be reasonably compensatory and not otherwise unlawful" are clearly no more than the legal conclusions found insufficient in cited case.—Seaboard Allied Milling Corp. v. United States, 306 F. Supp. 879 (882-3)*.

Moreover, after the *Seatrain* decision, the Supreme Court held in the *Mechling Barge Lines* case, 376 US 375, that the Commission's power to grant §4 relief depends on the facts established and agency judgment in exercising "a sound legal discretion as to whether the request should be granted compatibly with a due consideration of the private and public interests concerned *and in view of the preference and discrimination clauses of the second and third sections*." The court also rejected the argument that unlawfulness of the rates could be later adjusted in §13 and §15 procedures, holding that to require filing of complaint and investigation procedures *after* the §4 order would be "splintering" the proceedings and would "needlessly subject appellants' claims to the rigors of circumlocution so deadly to effective administrative and judicial processes." Nothing in the *Mechling* decision supports defendants' attempt to distinguish it on the fact that an evidentiary hearing was held in that case, whereas none was held or requested in instant case. Therefore, considered Fourth Section Order is vacated; case remanded for further proceedings consistent with the court's opinion.—Id., pp. 883-4.

Section 4. (2) Competition of railroads with water routes; change of rates.—[Unchanged. See vol. 9, p. 7433.]

Amendments, see footnotes, vol. 2, p. 1345; historical note, vol. 2, p. 1345.

Notes of Decisions

Volume 2—p. 1345; Volume 9—p. 7433; Volume 12—p. 10242; Volume 14—p. 11440; Volume 15—p. 12016; Volume 16—p. 12651; Volume 19—p. 15143.

Section 5. (1) Pooling; division of traffic, service, or earnings.—[Unchanged. See vol. 11, p. 9176.]

Amendments, see footnotes, vol. 2, p. 1347; vol. 11, pp. 9176, 9177; historical notes, vol. 2, p. 1347, vol. 16, p. 12651; vol. 21, p. 16535.

Historical Note

The Commission recommends that §5(1) be amended to establish an expedited procedure for approval of smaller traffic pooling arrangements that do not appear unduly to restrain competition, in the interest of fuel conservation.—Annual Report, 1975, p. 77.

Notes of Decisions

Volume 2—p. 1348; Volume 6—p. 5131; Volume 9—p. 7434; Volume 11—p. 9177; Volume 12—p. 10242; Volume 13—p. 10953; Volume 14—p. 11441; Volume 15—p. 12016; Volume 16—p. 12651; Volume 17—p. 13305; Volume 18—p. 14063; Volume 19—p. 15143; Volume 21—p. 16535.

6.—Express revenue distribution.—[Vols. 2, 9, 14-17, 19].—Decision in 150 ICC 423 approving the issuance of bonds, distribution of stock, and the pooling of earnings by REA, formed by railroads pursuant to a joint venture agreement to conduct railway express business, did not constitute approval of REA's non-negotiable debt to the railroads as necessary to the joint venture; the opinion emphasized that only the pooling of earnings plan in the contract was approved under §5(1), and fact that the Commission described other contract provisions does not mean it approved them. Also, decision in

230 ICC 487 which approved, as necessary for performance of carrier's services, REA's issuance of notes as evidence of its non-negotiable debt cannot be read as retroactive approval of the debt when, apart from describing it, the Commission nowhere indicated its views as to debt's legality; the same is true of Commission order approving REA's 1959 notes. Therefore, as there was no specific §5 approval of the non-negotiable debt as necessary to the joint venture, challenged transactions involving the debt—unlike those involving the notes—are not exempt from the antitrust laws by §5(11).—REA Express Agency, Inc. v. Alabama G. S. R. Co., 343 F. Supp. 851 (857-8, 859-60).

16. Assent; carriers involved.—[Vols. 9, 12, 17, 19, 21].—See Official-Southern Divisions, §1(4), n. 141.

Section 5. (2) Unifications, mergers and acquisitions of control.—[Unchanged. See vol. 11, p. 9179, vol. 15, p. 12018.]

Amendments, see footnotes, vol. 6, p. 5138, vol. 11, pp. 9179-9181; historical notes, vol. 6, p. 5138, vol. 9, p. 7440, vol. 11, p. 9181, vol. 12, p. 10244, vol. 13, p. 10955, vol. 14, p. 11443; vol. 17, p. 13307. Section 213, vol. 10, p. 8081, vol. 21, pp. 16537, 16538.

Historical Note

The Commission proposes legislation requiring prior approval of all acquisitions of control of class I railroads, motor carriers, and class A water carriers and freight forwarders, in order to empower the Commission to examine intercorporate transactions for possible impairment of a carrier's operations, in which case divestiture could be ordered.—Annual Report, 1975, p. 9.

Notes of Decisions

Volume 11—p. 9182; Volume 12—p. 10244; Volume 13—p. 10955; Volume 14—p. 11443; Volume 15—p. 12018; Volume 16—p. 12652; Volume 17—p. 13307; Volume 18—p. 14066; Volume 19—p. 15146; Volume 21—p. 16538.

2. Construction and interpretation.—[Vols. 11-19, 21].—Terms of §5(2)(d) are sufficiently broad to permit consideration of rail petitioner who interchanges traffic and competes with control applicant as a "railroad in the territory involved", since §5(2)(d) does not attempt to describe conditions under which petitioner may be included in transaction, define the transactions in which inclusion may be sought, nor limit inclusion to transactions of same type or instances where inclusion will not prejudice the case of another participant. No transaction within §5(2) is excluded from the scope of paragraph (d) thereof. Therefore, Commission has authority to entertain petition for inclusion without regard to nature of inclusion or other specific relief sought therein.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (295-6)*.

***Application and purpose:* [Vols. 14, 19].—The lawful reduction of taxes is a proper objective of a §5(2) proceeding; and, to the extent that heavy tax burdens are reflected in transportation costs, the Commission deems relief from such burdens to be in the public interest.—Norfolk & W. Ry. Co.—Control—Lake Erie & F. W. R. Co., 328 I.C.C. 219 (222-3).**

Fringe benefits are now generally recognized in American industry as being an integral part of employee compensation, and this has long been so in the railroad industry; thus, rights with respect to insurance and hospitalization are within the reach of §5(2)(f).—Southern Ry. Co.—Control—Central of Georgia Ry. Co., 331 I.C.C. 151 (175-6)*.

***Authority permissive:* [Vols. 12-19, 21].—Although order of bankruptcy court authorizes trustee of carrier in reorganization, effective upon the Commission's ratification, to acquire by conveyance or condemnation a right-of-way and certain track-**

age owned by complainant, a public corporation of the State of New Jersey, the Commission has no power to compel a carrier to acquire trackage rights or a line of railroad. Whether the transaction be under §5 or §1(18), the Commission's authorization to a carrier to engage in a transaction is permissive, not mandatory, and the Commission may not sanction a transaction unless an appropriate application is submitted to it.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (273-4).

Orders granting authority under section 5 are purely permissive in nature, and any conditions attaching thereto are not sanctions since the parties may elect, or not, as they see fit, to exercise the authority so granted. In view of the permissive nature of the authority granted, such conditions do not constitute a revocation of operating rights contrary to the provisions of section 212(a). Therefore, notice and other procedures prescribed in proceedings under section 212(a) are not applicable to proceedings under section 5 and the Commission may limit or restrict a carrier's certificate without prior notice of such possible action under its power to approve applications subject to such just and reasonable terms and conditions as the public interest and the national transportation policy may require.—Thurston Motor Lines, Inc.,—Control and Merger, 104 M.C.C. 1 (11-12).

Certificate: [Vols. 11, 13, 15].—See Daily Express, Inc.—Control and Purchase, n. 45 below.

Contracts: [Vols. 12, 15, 17-19, 21].—It is not the entering into a conditional, executory contract that is prohibited by §5, but rather the unauthorized effectuation thereof. When carriers contemplate joint action under §5(2)(a)—whether it be a purchase, lease, contract to operate or other bilateral transaction, the customary practice is to formulate the transaction in terms of an agreement which is an executory contract made contingent upon Commission approval. Without that kind of threshold agreement, most transactions specified in §5(2)(a) could not, as a practical matter, be initiated. That is the context in which to construe the language of §5(2)(a)(i) making it lawful, with our approval, for any carrier or two or more carriers jointly to contract to operate the properties of another.—Seaboard Air Line R. Co.—Trackage Rights, 331 I.C.C. 361*.

Control by a noncarrier: [Vols. 11, 14, 19, 21].—In view of the chain of circumstances which began six months earlier (when options to purchase stock of two-carrier "complex" were acquired), noncarrier applicant's previous acquisition of one household goods carrier was part of a single transaction subject to §5(2) from which it cannot be separated. Actions of parties in control of applicant in acquiring the purchase options and causing applicant to be formed for purpose of acquiring control of the two carriers, and applicant's purchase of first carrier's stock and filing instant application for authority to acquire control of another household goods carrier, were all part of original plan of acquisition, by a noncarrier, of control of two motor carriers. And applicant's argument that the options were not exercised, and there was no agreement to purchase stock of second carrier when control of the first was acquired, is not convincing when the evidence is considered as showing a single transaction within §5(2), as it should be, rather than as two separate unrelated transactions.—General Movers Corp.—Control—Martin Van Lines, Inc., 101 M.C.C. 748 (750, 760-61)*.

Dual operation: [Vols. 11, 13, 14, 18].—Although the control and merger provisions of §5(2)(b) limit railroads in acquiring control of motor carrier operations, these limitations were not intended to be applied rigidly in interpreting the ability of the Commission to confer new grants of motor carrier authority as a result of applications filed pursuant to the provisions of §207. Rather, the Commission has accepted the policy of §5(2)(b) as a guiding light, and has occasionally issued certificates to railroad subsidiaries without restriction where "special circumstances" prevail, i.e., where unrestricted operations by the rail-owned carrier are found on specific facts and circumstances to be in the public interest [355 US 141, 149, 150, 152]. However, the Commission has exercised in conservative fashion its discretion in determining on the specific facts and circumstances that the public requires a grant of unrestricted operating authority to a rail-owned carrier. See also,

§207(a), n. 35—Southern Pac. Transp. Ext.—Elimination of Restrictions, 117 M.C.C. 224 (326-7).

Exempt and nonexempt operations: [Vols. 18, 19, 21].—See Miller Van Lines, Inc., Certificate of Registration Case, §206(a) (6), (7), n. 75.

Findings required under §5(2): [Vols. 17-19, 21].—The Commission is not required to select between control applicants and award the control of a railroad to one applicant or the other; such approach is not in conformity with its mandate under the act. All cases considered under §5(2) must be determined in light of accepted principles for testing whether any of the proposals are consistent with the public interest.—Southern Pac. Co.—Control—Western Pac. R. Co., 327 I.C.C. 387 (397).

1940 act: [Vols. 13, 18, 19, 21].—Since all transactions enumerated in §5(2)(a) involve two or more carriers, the essence of a violation of §5(4) is participation in a pertinent transaction involving two or more carriers without first having obtained the Commission's approval. There is nothing in complaint by a public corporation of the State of New Jersey, which owns trackage over which defendant is alleged to be unlawfully operating, that identifies complainant as a carrier by railroad, and it is a reasonable inference from contents of the complaint that it is not. As there is no indication that the subject matter of the complaint concerns any carrier other than defendant, there can be no violation of §5(4), and there is therefore no basis for ordering defendant to halt operations over the involved trackage.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (274).

By enacting the Transportation Act of 1940, which embodied §5 in its present form and relieved the Commission of its duty under the 1920 act to work out and adopt a national plan for consolidation of railway properties, Congress intended not only to transfer the function of initiating consolidations from the Commission to the carriers, but also to eliminate certain practical obstacles that previously had precluded desirable consolidations. Its purpose was to facilitate mergers and consolidations when, subject to such terms, conditions and modifications as the Commission might prescribe, they would meet certain tests of public interest, justice and reasonableness. Thus, under the provisions of §5(2), the public interest scale is at balance, weighted neither for nor against merger in a particular case; and that balance can be tipped solely by evidence bearing upon public interest.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (245-6)*.

Revenues, carriers' gross operating: A non-carrier corporation affiliated with a regulated motor carrier whose gross operating revenues exceed $300,000 violates §§5(2) and 5(4) when it acquires control of another regulated motor carrier without Commission approval; the carrier affiliate's revenues must be considered in determining whether the provisions set out in §5(10) apply exempting transactions where the aggregate gross operating revenues of "such carriers" has not exceeded $300,000 for the statutory period preceding the transaction despite the omission of specific language to that effect in the amended §5(10).—Red Arrow Securities Corp.—Investigation of Control, 104 M.C.C. 265 (272).

Speculation; trafficking in certificates: [Vols. 12, 15-18, 21].—Sale of liquidating carrier's stock by controlling stockholder who had held the stock for one year is insufficient to show that he is trafficking in operating rights, since he has valid personal and medical reasons for the sale of such ownership interest.—St. Johnsbury Trucking Co., Inc.—Control and Merger, 104 M.C.C. 137 (140).

Vendees cannot be considered to have engaged in trafficking in operating rights since the proposed sale of their intrastate rights, which are similar to those interstate rights held by vendor, are unregistered, i.e., do not underlie or support certificates of registration issued to vendees under the amended provisions of §206(a). Nor does the record show that the latter two carriers were lawfully engaged in operations in interstate commerce under the former second proviso of §206(a) as of Oct. 15, 1962, insofar as such intrastate rights are concerned, since it is not apparent that they have filed any of the necessary instruments required by §206(a)(7) entitling them, without additional proof, to "grandfather" certificates of registration. Under these circumstances a finding of unfitness because of alleged trafficking in operating rights would be inappropriate here.—Lyons Transp. Lines, Inc.—Control and Purchase, 104 M.C.C. 599 (602-03).

State certificate: [Vols. 11, 14, 19, 21].—In accordance with the plain meaning of liquidating carrier's state certificate, transportation may be performed in both directions over the described regular and connecting routes. While the intrastate regular routes are described in terms of transportation in only one direction, and authorization for return movements follows the last of those routes, the use of the plural word "routes" in such authorization requires the conclusion that all of the regular routes are generally referred to rather than only the last one; further, the connecting routes listed immediately after the express authorization for return movements applies to joinder movements over other regular routes rather than just the last one specified. In addition, intermediate and off-route point service on certain routes is phrased in the conjunctive, that is to say that such operations are from and to all such points as opposed to service merely to the designated points.—St. Johnsbury Trucking Co., Inc.—Control and Merger, 104 M.C.C. 137 (140-41-42).

Vehicles operated: [Vols. 15-19, 21].—See Sawyer Transport, Inc.—Purchase—R. C. Wilson, n. 45 below.

3. Public interest.—[Vols. 11-19, 21].—In action to set aside Commission order authorizing Missouri Pac.'s control of Chicago & E.I., and denying plaintiff authority to acquire control of the same railroad, the Commission did not act arbitrarily on basis of an error of law in holding that, in light of great public benefit flowing from the control, MoPac's §5(4) violation (acquiring a measure of control without prior approval) did not necessarily require denial of its application. Public interest may require denial of a §5(2) application where a statutory violation is flagrant, in open defiance of Commission authority; however, where the evidence shows that applicant acted in good faith, public interest in strict enforcement of §5(4) may be comparatively small. The Commission weighs a §5(4) violation when it determines whether proposed §5(2) transaction will be in the public interest; it applies a balancing test and the preference for denying applications of §5(4) violators will yield to a clear showing of public interest in approval thereof.—Illinois Central R. Co. v. United States, 263 F. Supp. 421 (424-6, 429-30)*.

Record supports the Commission's findings that, considering the mitigating factors shown, MoPac's §5(4) violation was not flagrant, that such violation was comparatively minor in light of public benefits derived from proposed control, and that public interest considerations overwhelmingly favored approval of its control application. Also, substantial evidence fully supports its conclusion that an "end-to-end" affiliation with MoPac would result in modernization and improvement of C&EI's physical plant and its ability to serve shippers and connecting railroads whereas, in contrast, a "side-by-side" affiliation with plaintiff (a competitor) would lead to C&EI's subjugation and disintegration or its continued operation as a self-restricted, financially weak system. Therefore, the court cannot find that the Commission improperly struck a balance between requirements of §5(2) and 5(4); the Commission's result is not arbitrary or in violation of the law; order sustained.—Id., pp. 423, 430.

A motor carrier may purchase operating rights and property of another if the Commission finds the proposal consistent with the public interest and, in granting approval, the Commission may impose just and reasonable terms and conditions. The adequacy, economy, and efficiency of transportation service in the area are factors which the Commission must consider in determining consistency with the public interest; and it has consistently disapproved purchase of rights that would result in new, unneeded, competitive service. On the record, the Commission could properly find that vendor's operations in both North and South Carolina were not substantial and its authority was dormant, and that service proposed by plaintiff (vendee) thereunder would constitute a new, unnecessary service inconsistent with public interest in an area adequately served by other carriers. Substantial evidence supports the Commission's finding that public interest would not be promoted by authorizing purchase of those dormant rights, and conditioning its approval on cancellation thereof; no error of law is shown; complaint dismissed.—Houff Transfer, Inc. v. United States, 291 F. Supp. 831 (834-5, 837)*.

In determining the matter of public interest in proposed control transaction, of paramount importance is the preservation of acquired railroad as a prosperous competitive rail carrier under control of end-to-end railroad rather than its eventual subjugation and disintegration under control of parallel railroad or its continued operation as a self-restricted financially weak system as at present. Statutory violation of §5(4) does not automatically defeat control application if overriding public interest considerations are plainly evident. Therefore, although for 8 months applicant had the power to control railroad to be acquired, it did not exercise that power; and control application cannot summarily be denied merely for the sake of returning wrongdoers to status quo ante. Approved.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (322-4)*.

In consolidated proceedings involving control applications of two railroads seeking to acquire another, the Commission is not required to select between them, but must apply the accepted principles for testing whether any one of the proposals before it is consistent with the public interest. In applying the standards set out in 287 US 12, neither application will result in more adequate, economical or efficient transportation service than presently provided, promote better use of transportation facilities, or preserve reasonable competition in transportation. Moreover, fact that involved carriers are not in financial difficulties is not controlling, since consolidations of prosperous carriers can be approved upon showing that the public intrest would be benefited thereby; however, weighing the benefits to be received from coordination savings against losses in traffic and revenue by intervening carriers, loss of employment by affected employees, downgrading of acquired carrier largely engaged in overhead traffic movements and elimination of an active competitor for rail traffic, the adverse effects resulting from approval of either application exceed any benefits accruing to the public therefrom; applications denied.—Southern Pac. Co.—Control—Western Pac. R. Co., 327 I.C.C. 387 (397, 404-5).

In considering proposed merger, Commission's concern with financial condition of carriers is primarily in connection with administration of the law in accordance with objectives of the national transportation policy. Without financing well being, a national system cannot long exist as a privately owned enterprise. However, §5(2) does not require a showing of penury of imminent bankruptcy for approval of a transaction but rather that such transaction be consistent with public interest, where public interest is defined by reference to purposed of transportation legislation. See *Texas*, 308 US 255.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (493-4).

To the extent that heavy tax burdens are reflected in transportation costs, the Commission deems relief from such burdens to be in the public interest; thus, the lawful reduction of taxes is a proper objective of a §5(2) proceeding.—Norfolk & W. Ry. Co.—Control—Lake Erie & F. W. R. Co., 328 I.C.C. 219 (222-3).

While there may have been practical justification for imposition (in the public interest) of condition in 1923 order in control proceeding, 76 ICC 508, requiring Southern Pacific to prefer the Union Pacific route via Ogden, Utah, the Denver & R.G.W.'s competitive position has materially changed and improved due to shortening of its lines, improvement of schedules, and modernization of facilities and equipment, and it is now able to compete on an equal basis with Union Pacific for interchange of Southern Pacific freight through Ogden. Therefore, present effect of discriminatory practices of Southern Pac. and Union Pac. against the Rio Grande in the preferential solicitation and routing of traffic results in a stifling of competition between Union Pac. and Rio Grande on transcontinental traffic and relegates latter railroad to a secondary status as a transcontinental carrier. So that it will be just and reasonable and consistent with the public interest under present conditions, the condition should now be modified by striking therefrom name of the Union Pac. as the only connection of Southern Pac. on transcontinental traffic moving via Ogden.—Central Pac. Ry. Co. Control, 328 I.C.C. 345 (347, 349, 356-7)*.

In determining whether proposed acquisition of control of short line railroad is in the public interest, consideration must be given to its effect upon adequacy of transportation service to the public. Moreover, as a prerequisite to approval, authority under §5(2)(d) requires the inclusion of another railroad in the involved territory upon petition by such railroad and upon a finding that such inclusion is consistent with the public interest. Under joint control of two competing rail carriers, neutrality of acquired railroad's operation and service and equal opportunity to all connections to solicit business would be insured; moreover, the degree of financial backing, operating experience, equipment and services available under joint control would further buttress rail operations in northeastern Ohio to benefit the public; hence, inclusion of New York Central in the transaction under terms found to be equitable is in the public interest.—Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase, 330 I.C.C. 672 (681).

As judicially construed, "consistent with the public interest" means compatible with, or not contradictory or hostile to, the public interest. It is not a concept without ascertainable criteria but has a direct relation to adequacy of the national transportation system, to its essential economy and efficiency, and to appropriate provision and best use of transportation facilities. In determining whether proposed rail merger is consistent with the public interest, the Commission is required by §5(2)(c) to weigh, among other considerations, (1) effect of the transaction upon adequate transportation service to the public, (2) effect on the public of inclusion, or failure to include, other railroads in the transaction, (3) the total fixed charges involved, and (4) the interest of carrier employees involved. Terms of the merger must be just and reasonable as well to the railroads' stockholders. Also, implicit in the statutory standards or criteria for the Commission's decision on a merger application is its responsibility to preserve an adequate balance of transportation service.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (247)*.

While the Commission's primary concern is the development of an efficient and economical transportation system, its consideration necessarily extends to other matters affecting the well-being of the several States and communities involved. Economic effect or impact of proposed merger on various communities (basis of much of the opposition by the States and towns) would be primarily in the nature of temporary dislocations and, in many instances, would be offset by positive benefits. Moreover, record does not show that well-being of the area and communities involved would best be served by denying the applications; to the contrary, the evidence indicates no long-term serious adverse effect upon them. Proposed mergers, properly conditioned, augur an era of increased railroad strength resulting in a benefit to, not a burden on, communities in the northern tier of States.—Id., pp. 283-4, 288-9.

In its broadest sense, the public interest as applied to approval of a proposed purchase transaction under §5(2)(b) must be predicated upon conditions which would best promote interstate transportation in the interest of the public and commerce of the people.—St. Louis SW Ry.—Pur.—Alton & S. R., 331 I.C.C. 515 (532).

On reconsideration transfer of a portion of vendor's contract carrier rights previously found to be dormant, approved as consistent with the public interest because vendee's specialized, tailored service thereunder would meet the individual need of the two supporting shippers, whose operations were expanding, for a complete service under vendor's operating rights.—H. Prang Trucking Co., Inc.—Purchase—Hyer Trucking 97 M.C.C. 611 (614)*.

Management arrangement presented in §5 application for control through management is not in conformity with the established policy of the Commission against the creation, preservation, or extension of duplicate operations by separate motor carriers under common control, which operations, except for the fact of common control, would be competitive with each other; therefore, since applicants' proposed management arrangement is found to be inconsistent with the public interest, the application must be denied.—Weiss—Control—Hart & Clark Transfer Co., Inc., 97 M.C.C. 682 (685).

The public interest warrants approval of proposed control and merger, despite prior §5 violations by applicants (whose operations have been commonly controlled through family relationship, stock ownership, or management, at various times in past several years), only insofar as it would permit continuation by acquiring carrier of an overhead regular-route service between points on acquired carriers' regular routes and points beyond. Though, under such restriction, rights of acquired carriers could not be used for purely local service, evidence does not show that they conducted local operations under a combination of their regular routes prior to the unlawful common control; and evidence of shipments they transported thereafter cannot be given the same weight as would be accorded to it in connection with other §5 transactions. There is no overriding public interest which would warrant continuance of the local operations, particularly in view of evidence that existing carriers provide the area with abundant service.—Buckingham Transp., Inc.—Control and Merger, 97 M.C.C. 700 (714-17).

The Commission cannot approve any §5 transaction as being consistent with the public interest unless all the necessary facts have been found. And when control application seeks approval of only a portion of a single transaction (proposed control cannot be approved without concomitant approval of continued control of another carrier previously acquired by applicant without approval), the whole of which is subject to §5, a finding that proposed transaction is consistent with the public interest is impossible. Denied, without prejudice to applicant's submitting the entire transaction for the Commission's consideration.—General Movers Corp.—Control—Martin Van Lines, Inc., 101 M.C.C. 748 (750, 761)*.

The appropriate issue in the proposed purchase transaction is whether approval — not divestiture—is consistent with the public interest. Divestiture is one means of ending a violation found to exist under §5(4) and/or precluding the resumption thereof. Power to require divestiture upon such a finding is prescribed under §5(7). Here, the record does not reflect any unlawful actions effected by applicants or Greyhound which would raise the issue of their fitness to consummate the proposed transaction. Greyhound will only possess the power to exercise control over the affairs of the new company to be formed following Commission approval. Under these circumstances, §§5(4) and 5(7) which were not invoked by any parties of record or by the Commission, are not in issue.—Jefferson Lines—Purchase—Jefferson Transportation, 104 M.C.C. 497 (512).

See also Associated Truck Lines, Inc.—Purchase—Marion Trucking, §5(2), n. 48 below; Cooper Motor Lines, Inc. v. United States, n. 126, below; Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, note 7 Passenger service, below; McLean Trucking Co.—Control—Chicago Exp., Inc., note 45 below; Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger case, n. 7 below; Overnite Transp. Co.—Purchase—Rutherford Freight Lines, n. 48 below.

5. Jurisdiction of the Commission.—[Vols. 11-19, 21].—In plaintiffs' (protestants before the Commission) court action asserting that Commission approval of purchase of certain motor carrier rights by intervening defendant lacks substantial supporting evidence and that it does not accord with the law, the Commission's finding that vendor's operations under the purchase rights constituted substantial service is supported by evidence of record. The function of weighing evidence on the factual question of what constitutes substantial service in a case is one for the Commission; and not for the court. The Commission's findings that, considering all the evidence, the purchase rights were not dormant and the transfer would not create a new competitive service, and that proposed purchase transaction would be consistent with the public interest, are not without factual foundation and are not unsound in law; therefore, plaintiffs' action is dismissed.—Blue Ridge Transfer Co., Inc. v. United States, 283 F. Supp. 858 (859, 860-61)*.

In suit to set aside Commission order denying plaintiffs' application to purchase motor carrier authority, the Commission has broad discretion in a §5 proceeding which prohibits the court from substituting its judgment for that of the agency; also, a Commission order cannot be set aside in absence of a finding that its actions are arbitrary, capricious or an abuse of discretion or unsupported by substantial evidence. Judicial review is complete when the court finds a rational basis for the Commission's conclusions. However, those guiding principles do not convey complete autonomy; rationality of agency's decision must encompass its fact findings, interpretation of pertinent law, and its application of the law to the facts. Commission denial of plaintiffs' application was based on its finding that the rights were dormant and need for reinstitution of such services was not proved; however, in interpreting and applying the legal concept of "dormancy," the Commission improperly applied an improper standard of law; therefore, its conclusions must be set aside. Case remanded to the Commission for hearing de novo in keeping with the court's opinion.—Arrow Transportation Co., Inc. v. United States, 300 F. Supp. 813 (817-8)*.

Plaintiff's suit alleging that, through purchase of majority of its voting stock without prior Commission approval, defendant (owning and controlling a railroad) would unlawfully acquire control of plaintiff and, through it, its wholly-owned motor carrier, is based on §5(2) and (4); however, key word in those sections is "control" and the statutory scheme makes it abundantly clear that Congress, by leaving it to the Commission to determine whether control exists in a particular case, intended to create exclusive primary jurisdiction in the Commission in "control" matters. Defendant's offer to buy plaintiff's stock does not fall within §5(2) simply because each owns the stock of a carrier; unless defendant controls the railroad and acquires control of motor carrier through purchase of plaintiff's stock, Commission approval is not required. Question of whether unlawful control would result from the stock purchase is for the Commission's determination; thus, since merits of the case are not pending before the Commission, and the court lacks subject matter jurisdiction, plaintiff's action is dismissed.—B. F. Goodrich Co. v. Northwest Industries, Inc., 303 F. Supp. 53 (55-7, 60)*.

The Commission's jurisdiction under §5 is plenary and covers all phases of a transaction. The complete transaction proposed, including sale of vendor's equipment and real estate, not merely tne transfer of its water-carrier permit, requires prior approval.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (266, 268).

When the Metropolitan Commuter Authority, a newly organized governmental corporation of New York State, acquired all the capital stock of Long Island R. Co., it was not a carrier and did not then control any carrier subject to regulation by Commission; therefore, its acquisition of control of Long Island through purchase of stock from Pennsylvania R. Co. did not require our approval. However, recently authorized purchase of two of Long Island's branch lines by wholly owned subsidiary of Pennsylvania as part of a transaction occurring after instant proceeding, was subject to Commission's jurisdiction since both vendor and vendee were carriers within meaning of §5.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (488-9).

Normally, the Commission will not entertain an application under §5(2) where one of the parties is a noncarrier; nor will it assert jurisdiction over the transaction if it is assumed that a parent-subsidiary relationship exists between noncarrier lessee and railroad in which the noncarrier is controlled by the railroad; thus, since pleadings and record are not sufficient to show specific terms of the lease agreement, character and description of pier operations to be performed by lessee, or description of lessee to determine whether or not it is a carrier as defined in §1(3) or is controlled by or controls a carrier, the Commission has no jurisdiction under §5(2) as to operating agreement or as to allegation that such arrangement amounted to abandonment violation of §1(18-20); motion to dismiss, granted.—Brotherhood of Ry. S. S. Clerks v. Reading Co., 328 I.C.C. 11 (12-13).

Congress gave the Commission jurisdiction over railroad mergers in 1920; and under §5, as enacted in 1940, it is authorized to approve carrier-initiated, voluntary plans of merger or consolidation, subject to appropriate conditions, where such plans are consistent with the public interest. However, the Commission is not restricted to the specific proposal presented for approval; it may determine what modifications or conditions are necessary to meet the public interest test and, in imposition thereof, it is not limited to those proposed, favored, or agreed to by applicants or by other parties. Among other things, the Commission must consider the effect of proposed merger on competitors and on the general competitive situation in the industry in light of objectives of the national transportation policy; however, the public interest scale is balanced, weighted neither for nor against a particular merger, and the balance can be tipped solely by evidence bearing upon public interest. Moreover, although proposed merger might otherwise violate the antitrust laws, §5 gives the Commission authority to approve it as a proper means of effectuating the national policy.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (245-8)*.

Commission found that Northwest Industries, a noncarrier did not need Commission authorization to acquire control of one rail carrier, but since it is now a noncarrier person having control of a carrier, its acquisition of control over a second carrier, by merger proposed herein, is subject to Commission's jurisdiction.—Chicago & N. W. Ry. Co.—Merger, 331 I.C.C. 236 (240).

Commission has jurisdiction over the proposed merger of a common carrier by rail into a noncarrier inasmuch as such noncarrier will acquire railroad's common carrier status and will, in that capacity, lease and acquire trackage rights over the lines of other railroads. However, proposed control of the noncarrier seeking to acquire control of the railroad corporation and its subsidiaries by another noncarrier, a holding company, is not within this Commission's jurisdiction. Application for authority under §5(2) dismissed.—Southern Pacific Transportation Co.—Merger, 334 I.C.C. 866 (868, 871).

Commission has jurisdiction under §5(2) over involved transactions since applicant, a corporation formed by railroad employees to purchase the railroad, would acquire vendor's leases of, and trackage or joint use rights over, the line of other railroads. However, approval under §1(18) is also necessary since §5(2) does not deal with licensing of a noncarrier applicant that has never performed common carrier service.—North Western Employees—Pur.—Chicago & N. W. Ry. Co., 342 I.C.C. 58 (64-5).

Although §1 (18) and §5(2) are complementary in these circumstances, they are not mutually exclusive. Therefore, authorization herein is withheld until applicant complies with §1(18) publication requirements prescribed in 49 CFR 1120.4—Id., p. 65-6.

The towing company sought to be purchased herein is not a water carrier within the meaning of §5(13) and Commission's jurisdiction cannot be invoked so long as its operations remain within the exemption of §302(e). (See IML 343 F. Supp. 32).—Katy Industries—Control—Cenac Towing, 342 I.C.C. 666 (667).

Congressional resolution consenting to Washington Metropolitan Area Transit Regulation Compact between the States of Maryland and Virginia and the District of Columbia, which transferred to Washington Metropolitan Area Transit Commission the jurisdiction of Interstate Commerce Commission over all persons and carriers subject to provisions of the compact to the extent provided therein, when read in conjunction with those provisions, is controlling of the jurisdictional issue respecting transactions within scope of §5(2), subject to the phrase "except as otherwise specified in the compact" and its counterpart "except to the extent in this Act specified" in §20(a) of the compact. There is no exception reserving jurisdiction under §5 to ICC or permitting it to exercise concurrent jurisdiction with WMATC, and the legislative history indicates intent to vest exclusive jurisdiction over such transactions in WMATC. Congress, when it consented to creation of WMATC, suspended application of §5, and ICC has no jurisdiction over control transaction involving only carriers subject to WMATC.—D.C. Transit System, Inc.—Control—W. V. & M., 93 M.C.C. 621 (624-5).

Section 5 applications are appropriate proceedings in which to determine the bona fides of liquidating carrier's practice of routing single-State traffic between points in that state through a point in another state. —Thurston Motor Lines, Inc.—Control and Merger, 104 M.C.C. 1(11).

The Commission's authority to impose employee protective conditions under §5 is found only in its power to impose just and reasonable conditions in approving transactions under the statute. Therefore, in view of denial of proposed purchase transaction, it is unnecessary to further consider employee union's argument that adversely affected employees are entitled to severance pay even if the application is denied, which argument is premised on the grant of temporary authority under §210a(b) that it asserts was in anticipation of possible approval of the purchase.—National Freight, Inc.—Purchase—Pittsburgh Wheeling Exp., 97 M.C.C. 642 (655).

Remand from the U. S. District Court to the Commission for further hearing on the question of competitive service does not limit such further hearing solely to the issue of competition and traffic diversion. The reviewing court has no power to restrict the Commission on the matters which it may consider on reconsideration so long as the Commission corrects any legal error found by the court. Thus the Commission may properly consider the issues with respect to the conversion of certain of vendor's irregular-route rights and the duplication of operations created by vendor's sale of certain intrastate operating rights.—Interstate Motor Freight System—Purchase—Eaton Truck, 104 M.C.C. 248 (256)*.

The Commission has jurisdiction over subject matter of bus line's petition for reopening of, and issuance of a general §5(9) supplemental order requiring respondent Greyhound to live up to its representations in, eight earlier §5(2) proceedings in which respondent acquired operating rights encircling petitioner's routes; order requested would, in effect, require that Greyhound cease described practices begun after the acquisitions which are alleged to be unreasonable and inconsistent with representations (assuring public benefit, improved service, and no adverse effect on existing carriers or service) made to, and relied upon by, the Commission in the acquisition proceedings. Respondent's argument that the Commission has no power to issue supplemental order sought, since §212(a) precludes such action, is not relevant; order which accepted the petition and assigned the matter for hearing invoked whatever sections of the Act would be appropriate with respect to which violations, if any, might be proved; thus, no action contrary to §212(a) was undertaken.—Mt. Hood Stages, Inc.—Petition for Modification, 104 M.C.C. 449 (450-51, 456-8)*.

Argument that issuance of the order sought would constitute modification of respondent's authority contrary to §212(a), since its operations are entirely consistent with terms and conditions of its certificates, is irrelevant and incorrect; respondent is not alleged to have operated contrary to its certificates and its certificates are not the sole measure of legality of its activities, as they do not specify all orders, requirements, and statutes with which carrier is required to conform, or practices in which it may not engage. And there is no merit in the further arguments that, since earlier acquisition proceedings were closed without express reservation of power to issue supplemental orders, and since adherence to its representations was not a condition to approval of the acquisitions, a supplemental order specifically enforcing such representations may not be issued. Certificates are not licenses to destroy a competitor by practices inconsistent with commitments made to secure such authority; and, if false representations are willfully made, the certificate can be revoked without resort to §212(a), and those responsible are subject to criminal penalties.—Id., pp. 457-8.

The relief sought is also available under §216 which imposes a duty on passenger carriers to establish reasonable through routes with other carriers and to establish and observe reasonable rates and practices, etc., relating to passenger service; and if it appears that the public interest will otherwise suffer, the Commission may undertake to fix the terms and conditions under which through routes shall operate. Consequently, though all legislation dealing with interchange problems is cast in general terms, and there is no language in the Act which specifically commands passenger carriers to interchange buses with other such carriers, respondent's contention that through-bus arrangements between it and petitioner cannot be required, on just and reasonable terms, is rejected. Therefore, while relief is available under §216(a) as well as §5(9), since §5(9) is the most comprehensive for accomplishing desired objectives, "It fits the bill." Respondent's motion to dismiss for want of jurisdiction is denied.—Id., pp. 455-6, 458-9.

Jurisdiction over the proposed merger is reserved for 2 years after consummation of the transaction; however it must be extended to all employees of the merging carriers rather than only to those who appeared in the proceeding as protestants.—Yellow Transit, Inc.—Merger—Wilson, Inc., 104 M.C.C. 737 (765).

See also Greyhound Lines, Inc. v. United States, §5(9), n. 10; Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger Case, n. 52 below; Oregon-Washington R. & Nav. Co. v. United States, n. 56 below; United States v. Navajo Freight Lines, Inc., §5(11), n. 1.

6. Corporate simplification.—[Vols. 11-19, 21].—Signal, a contract carrier subsidiary of Leaseway, a holding company controlled by the O'Neill family, is authorized to acquire three contract carriers; Dean and Marc's by purchase and Payne by control and merger, Marc's authority to be restricted to service to be performed under a continuing contract with Sears, Roebuck & Co., as the operating rights of Dean and Payne now are. The intercorporate structure of the O'Neill family holdings is summarized showing several corporate reorganizations involving considerable corporate simplification, made subsequent to Commission admonitions in prior reports.—Signal Delivery Service, Inc.—Purchase—Marc's Delivery Corp., 104 M.C.C. 280 (281-84, 287-88).

7. Competition.—[Vols. 11-19, 21].—The mere possibility of adverse effect on competition in the New York metropolitan area, important as that area is, would not outweigh the positive advantages proceeding from Norfolk & Western unification in the large heavily industrialized and densely populated 13-state area which would reap the concrete benefits of the new system. Moreover, substantial improvements in service resulting from enlarged surviving carrier's system should attract new industry to the territory involved which, in turn, will benefit railway labor through raising and stabilizing employment levels. Furthermore, surviving carrier shall actively solicit routing via Buffalo, N. Y., gateway on lines other than Pennsylvania lines so long as Pennsylvania holds stock interest in Norfolk & Western and Wabash.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (15-16, 29).

An important motive behind applicant's proposed control of parallel railroad is the desire to deny expedient access to the Chicago gateway to the end-to-end rail line seeking to acquire control of the same railroad and, also, to the short line petitioning for inclusion in either approved control transaction. If successful, this design would fortify considered applicant against increased competition from two strong, long-line rivals, as well as permit the elimination of competition from the short line. Such curtailment of competition is not justified in the record. On the contrary, the sharpening of competition contemplated by approving the control sought by the end-to-end applicant will foster benefits in service and possibly rates for shippers and clear the transportation channels to promote freer movement of commerce between territories to the advantage of shippers and carriers.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (288)*.

With carrier systems of the size involved here, it would be virtually impossible to discuss competition from the view point of each individual shipper, commodity, station, and routing involved. Cases cited by petitioner are inapplicable as none involved a consolidation or other proceeding under §5(2). Commission previously decided that public benefits outweighed the possible reduction or elimination of competition.—Pennsylvania R. Co.—Merger—New York Central R. Co., 328 I.C.C. 304 (308-10)*.

On further hearing and reconsideration in merger proceeding, the Commission reviews the issue of competition in light of its conclusion (on reexamining legislative history) that the 1940 amendment of §5 was not negative or restrictive toward mergers but, rather, was designed to promote and foster rail mergers where consistent with public interest. In determining consistency with public interest, consideration must be given to the competitive consequences involved; but the preservation of competition among carriers (though still a value) is significant chiefly as it aids in attaining objectives of the national transportation policy. Thus, fact that merger of applicant Northern Lines will result in elimination of previously existing competition, while relevant to evaluation of the competitive consequences, is not controlling or conclusive and does not automatically compel denial of the applications. A rail merger may be approved as consistent with the public interest even though it eliminates competition between railroads and even where it presents a direct conflict with the antitrust laws.—Great Northern Pac. & B. Lines—Merger—Great Northern, 331 I.C.C. 228 (269-71)*.

Therefore, competition between Great Northern and Northern Pacific in an area extending across the northern tier of States to the Pacific Coast, preservation of which was crucial to the prior denial, should not be the decisive factor in reconsideration of proposed merger. As to many communities and shippers in the area, those lines are not, in fact, competitive with each other; as to the area points common to both lines, the number of stations where rail competition would be entirely eliminated is small, and those stations do not provide any great volume of applicants' business; and, as to competitive effects beyond the northern tier States, data of record indicates that there is, and after merger will continue to be, substantial intermodal and intramodal competition at points in applicants' territory which, commercially, are the most significant.—Id., pp. 271-4.

Furthermore, denial of the applications for the purpose of preserving the competitive *status quo* would merely perpetuate existing dominance of GN and NP in the northern tier States, with the Milwaukee line relegated to an increasingly marginal and deteriorating role. On the other hand, notwithstanding elimination of competition between the Northern Lines, a properly conditioned merger—with the new company competing against a substantially strengthened Milwaukee—will serve to actually enhance rail competition, achieve a more desirable competitive pattern and, at the same time, afford substantial benefits to the shipping public throughout the territory involved. Proposed merger transactions, subject to the conditions imposed, will be consistent with the public interest; approved.—Id., pp. 271, 275-6, 288-92.

In view of the Commission's established policy against the creation, preservation, or extension of duplicate operations by motor carriers under common control, which operations, except for the common control, would be competitive with each other, proposed management arrangement presented in §5 application of two individuals for authority to acquire control of applicant carrier through management cannot be found consistent with the public interest. Noncarrier individual applicants manage (and own 48 percent of stock of) a regulated motor carrier whose regular- and irregular-route authority substantially embraces area in which applicant carrier is authorized to operate; and fact that one of the commonly controlled carriers would perform regular-route general commodity service, and the other would conduct irregular-route specified commodity operations, warrants no departure from the Commission's policy.—Weiss—Control—Hart & Clark Transfer Co., Inc., 97 M.C.C. 682 (685-6).

Protestants' contentions that the proposed unification of operating rights will adversely affect their operations is, as to one protestant, not supported by the record since the record shows that the volume of traffic interchanged between this protestant and acquired carrier remained constant subsequent to the contract between applicants and even showed an increase for certain months over the previous year. As to the other protestant, it has expressed generally fear of serious consequences from approval of the transaction without proof of specific loss of traffic or revenue which neither warrants denial of the application nor the imposition of a tacking restriction in view of the fact that after unification of applicants' operating rights it will be required to operate over circuitous routes between Georgia and Tennessee while protestant may operate directly between points in the two states.—Thurston Motor Lines, Inc.,—Control and Merger, 104 M.C.C. 1(10).

Protestant's potential loss of a valuable interline connection which its predecessor had previously enjoyed with vendor cannot, standing alone, form a basis for approval or denial of a purchase application, since it is a private agreement between carriers which can be terminated by either or both of them at any time. Further, the evidence does not show that vendee has refused or will refuse to interline traffic with protestant as vendor has done in the past, nor is it conclusive that protestant, which might not wish to interline with vendee for competitive reasons, cannot find other similar interline arrangements, in spite of its contention that it has been trying unsuccessfully to do so since its predecessor's previous arrangement with vendor was terminated.—Sharpe Motor Lines, Inc.,—Purchase, 104 M.C.C. 127 (134).

While the service proposed by vendees differs in certain operational respects, there is a broad field in which both types of service overlap. However, it is clear that both applicants seek authority to transport substantially the same commodities between substantially the same points and, therefore, both services in this respect, must be considered competitive with one another and with the similar joint-line or single-line services of protestants, and, at least as to protestants, present competition by two potential additional carriers in lieu of the past competition afforded only by vendor.—Lyons Trans. Lines, Inc.—Control and Purchase, 104 M.C.C. 599 (607).

While applicants here concede that they have never interlined traffic with each other the Commission held that the lack of interchange between the parties was not controlling where it was clearly established that each has participated in substantial interchange operations with other motor carriers to and from their respective authorized territories.—Branch Motor Exp. Co.—Control—Middle Atl. Transp., 109 M.C.C. 807 (820).

See also Central Pac. Ry. Co. Control case, n. 3 above. Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase case, n. 3 above.

Diversion of traffic by more aggressive carrier:—[Vols. 16, 17, 19, 21].—In merger application proceeding, Commission found no evidence of any substantial adverse effect upon competition in the immediate territory to be served by enlarged surviving carrier; at least one connecting carrier may be helped by proposed unification.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (15, 31).

Approval of acquisition of control resulting in extension of applicant's railroad would probably not be warranted if its proposed operation would substantially endanger or impair operations of other common carriers; however, the Commission is not required to insulate protesting lines from all risks in their transportation business in areas where strong rail competition exists nor need it determine with mathematical precision the amount of traffic that might be diverted. The involved traffic is mostly shipper-routed and thus influenced by service (speed, transit privileges and facilities, care in handling, shipper conveniences, etc.) and other factors not readily ascertainable from any tabulation of car movements no matter how accurately compiled; furthermore, applicants are as prone to minimize as protestants are to exaggerate the susceptibility of traffic to diversion.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (293-4)*.

However, protestant's use of data processing system to determine estimates of car movements subject to diversion did not consider nature or ownership of equipment in which shipments were transported, railroad upon which shippers or receivers were located, complete route of movement, reconsignment or diversion in transit, availability of facilities which govern stoppage in transit, or use of transit privileges; thus, applicant's estimate of traffic diversion more nearly reflects the losses to be incurred by other carriers. And, under circumstances shown, such losses are not so large as to warrant a denial of control application. Moreover, benefits to be derived by acquired carrier as subsidiary of applicant and to the shipping and traveling public outweigh adverse effects to competitors, particularly in view of imposition of *Detroit, T. & I. R. Co. Control* traffic conditions as revised in *Toledo, P. W. R. Co. Control* case. And, since applicant has agreed on the record to protect routes and interchanges of protestant, imposition of that condition would serve no useful purpose.—Id., pp. 293-4, 307-9.

About 60 percent of traffic of railroad to be controlled is overhead traffic delivered to it by its connections at each end of the central route. Moreover, record does not show that traffic now moving over the central route tends to be fixed by commercial and transportation considerations important to shippers, nor is there any substantial "in transit" storage in Utah or Nevada or any other special factors to tie traffic to railroad's route for any length of time. Thus, the best interests of either control applicant would require solicitation for its own long-haul route rather than a route in which controlled railroad's connections would share.—Southern Pac. Co.—Control—Western Pac. R. Co., 327 I.C.C. 387 (401-2).

Although vendee would probably be more aggressive in seeking traffic at considered intermediate points on vendor's regular route, record does not show that the foreseeable increase in competition would be detrimental to protestant carriers' operations. Existing carriers often lose some traffic where a stronger and more aggressive carrier takes over operations of a less stable carrier, but that factor is not sufficient by itself to justify finding that purchase application should be denied, that service at intermediate points should be canceled, or that service at such points under the unified rights should be restricted.—Overnite Transp. Co.—Purchase—Rutherford Freight Lines, 97 M.C.C. 568 (575).

Protestants' contention that vigorous activity by vendee under temporary authority has disrupted the existing competitive balance with respect to other carriers in the area served by vendor and points served by vendee by diverting traffic from the carriers now serving the area is not supported by the evidence. Moreover, vendee's exhibit shows that each of the protestants realized its largest operating revenues in 1964, after vendee had already operated the vendor's rights for over two years, and all had lower operating ratios than in 1963. Denial of the transaction or imposition of a restriction on the rights sought to be purchased based merely on protestants' apprehensions of loss of traffic or disruption of the existing competitive pattern is not warranted.—Interstate Motor Freight System—Purchase—Eaton Truck—104 M.C.C. 248 (255-56)*.

When the purchasing carrier is stronger financially, has more and better equipment and facilities than the selling carrier, some readjustments in competitive relations of carriers and an intensification of competition between points in the liquidating carrier's territory almost always occur; however the protestants have sufficient financial strength to make the necessary adjustments and meet the competition without difficulty. The extent to which protestants claim that their operations would be affected is speculative and conjectural, and in the absence of a showing with some particularity how much traffic they would lose or to what degree their operations would be harmed, their apprehensions may be accorded little weight.—Ryder Truck Lines—Control and Merger, 104 M.C.C. 328 (338-39).

Protestants' contention that the proposed transaction threatens present and potential competitive relationships between the two carrier applicants, protestants and others is unfounded. Here the record demonstrates that the carrier applicants have actively utilized their involved operating rights and in so doing have maintained closely coordinated activities with Greyhound for many years; that these operations as well as the established service which applicants would render as feeder and bridge carriers serving Greyhound, protestants, and other carriers, will continue to be effected autonomously by the two carriers, and where as here carrier applicants have interlined or interchanged passenger traffic with one another and with Greyhound for a long period, it must be assumed that competing carriers have adjusted themselves to this mode of operations. Further, protestant MK&O is not an effective competitor for applicant, and at best, its annual revenues which would be subject to diversion would not adversely affect its operations to any material extent.—Jefferson Lines—Purchase—Jefferson Trans., 104 M.C.C. 497 (510).

Protestant's contention that its existence or ability to continue operations is threatened by the proposed transaction is not borne out by the record in the absence of any concrete evidence demonstrating the extent, if any, that Transcon's operations would be impaired, considering this protestant's strength in the South and Central States, and its accelerated growth on a system wide basis as compared with Greyhound.—Id., (510).

Commission, citing *Gordons*, 87 MCC 149, held that lack of interchange movements does not, by itself, create a presumption of harm to competing carriers out of potentially expanded service to be conducted by acquiring carrier. General fears of potential diversion, contrasted with specific evidence of probable harm, do not constitute proof that harm will result from involved transaction. See *McLean*, 97 MCC 693—Caravan Refrigerated—Pur.—Bilyeu Refrigerated, 109 M.C.C. 843 (854).

Protestants have not shown in any significant degree the manner in which they would be adversely affected by approval of this transaction but have evinced only an apprehension of injury or of traffic diversion which is entitled to little consideration. See 90 MCC 636.—Matlack, Inc.—Control—Southern & T. I. Mc-Cormack, 109 M.C.C. 861 (867-8).

Monopoly: [Vols. 13-15, 17-19, 21].—In considering the claimed antitrust aspects of this transaction, it is to be observed generally that the passenger bus industry has an inherently, although somewhat limited, monopolistic nature which reflects the public utility characteristics of for-hire transportation. Thus there is no merit to the suggestions of protestant MK&O and intervenor, the Department of Justice, as to the creation of a "third force". Moreover, the fears of protestant MK&O and the Department that the future development of carrier applicants (or a system of strong independent carriers which might include those two carriers) would be foreclosed by virtue of the attainment by Greyhound of control over their affairs through the transaction are unjustified and entitled to little consideration absent a showing, contrary to the record here, that the business of protestants and other carriers would be affected in any material way. Any reduction in competition and/or adverse affects resulting to protestants and other carriers are readily outweighed by the public benefits of record.—Jefferson Lines—Purchase—Jefferson Trans., 104 M.C.C. 497 (511-512).

In view of Greyhound's participation at the hearing, and considering that its company witnesses and evidence introduced in support of the §5 application were available for cross-examination, dismissal of that application because of its nonjoinder as a necessary party thereto is not required. In view of the foregoing, however, Greyhound must be considered a necessary party applicant. Approval is conditioned upon the filing, by Greyhound Lines, Inc. of a verified statement indicating its assent to and joinder in the §5 application on this basis.—Id. 507.

Union of first and sixth largest tank line carriers in nation does not per se connote monopoly nor does fact that Chemical Leaman will be allowed to serve a larger portion of the United States in single line service allow this conclusion. Numerous tank line carriers remain, and their operations are large and growing. Tank carriage is relatively new and faces an accelerated demand for service.—Chemical Leaman Tank Lines, Inc.—Pur.—Ryder, 104 M.C.C. 686 (694, 699).

New and different service: [Vols. 16, 19, 21].—The Commission did not depart from its "new service" doctrine—that acquisition of motor carrier operating rights that will permit purchaser to establish a new competitive service in an area already adequately served by other carriers is not consistent with public interest in the absence of evidence showing a real need for the new service—in approving intervening defendant's proposed purchase of motor carrier rights which it found were not dormant because vendor had been rendering substantial service thereunder. Evidence presented did not require a finding of dormancy; and since record shows that vendor, in addition to holding out its services, actually had been conducting substantial operations under its certificate, proposed purchase would not result in any significantly new competition by vendee with other carriers in the area. Complaint dismissed.—Blue Ridge Transfer Company, Inc. v. United States, 283 F. Supp. 858 (859-61)*.

In approving §5 purchase application where the evidence clearly showed that the service proposed by vendee from and to points in Arizona and California would constitute a new service not previously performed by vendor in conjunction with vendee or any other carrier, and applicants have not shown inadequacy of existing services, or a need for the service proposed, protestants are entitled to protection from the establishment of additional competition. Where the institution of a new service is proposed, applicants must show a need therefor, and may not escape the required showing by contending that protestants have not submitted positive proof of diversion of specific traffic as a result of the proposed transaction.—Braswell Freight Lines, Inc.—Purchase—Shayler, 101 M.C.C. 1 (17).

Unification of applicants' operating rights would not result in the creation of multiple new and different services since applicants, in addition to interchanging traffic with each other also engaged in interline operations with other carriers on traffic moving to and from their respective territories.—Thurston Motor Lines, Inc.,—Control and Merger, 104 M.C.C. 1 (8-9).

In view of the fact that liquidating carrier has been actively participating in the handling of traffic to and from surviving carrier's territory through interchange with numerous carriers including surviving carrier, the proposed operations following consummation herein would not constitute a new service in the sense that the protestants have not been faced with the competition.—Ryder Truck Lines—Control and Merger, 104 M.C.C. 328 (338).

Approval of the proposed purchase would result in a new competitive service in Colorado with other household goods carriers, since applicants freely admit that they had never participated in traffic together; further, vendee's witness testified that vendee did not interline traffic originating at or destined to Colorado with motor carriers other than vendor, and that even its household movements on military tenders were confined to that area within vendee's specifically authorized territory.—Fogarty Bros. Transfer, Inc.,—Purchase—Transport Van Lines, 104 M.C.C. 665 (667).

The institution of single-line service in lieu of joint service is not a new service.—Michigan Express, Inc.—Control and Merger—Cushman, 104 M.C.C. 894 (897).

A new competitive service will result where applicants had not interlined traffic with each other prior to commencement of operations under temporary authority nor did one of the applicants have any participation in interline movements with other carriers serving points in the other applicant's territory. Applicants failed to show that a new competitive service is required by public interest, and proposed operations would be detrimental to protestants. Denied.—Ryder Truck Lines—Control—Merchants Frt. System, 109 M.C.C. 654 (664-7).

See also Cooper Motor Lines, Inc. v. United States, case, n. 48 *Discontinued*, below. Fogarty Bros. Transfer—Purchase—Grennon & Son, n. 110 *Restrictions*, below.

Passenger service: [Vols. 14, 21].—Where a carrier has invested substantial funds in equipment and solicitation of traffic and has succeeded in establishing a charter service known to and relied on by the public in the territory traversed by its regular routes, any substantial inroads on revenues derived from those operations could materially affect adversely its ability to continue efficiently the regular-route operations it is obligated as a certificated carrier to provide to the traveling public, a result obviously inconsistent with public interest. That the carrier was under no duty to provide charter service at the outset is immaterial, since, upon establishment of efficient and remunerative charter operations, its well-being and the traveling convenience of its patrons are inextricably bound to future continuance of such an efficient and profitable service. Operations established under the incidental charter authority of §208(c) are therefore entitled to the same degree of protection against new competition as those established under rights conferred by a certificate.—Eagle Charter Bus Service, Inc.—Purchase—Eagle Bus Lines, 93 M.C.C. 705 (709).

Approval in this purchase proceeding will create two independent and competitive motor carriers performing a similar transportation service between the same terminal points, Boston, Mass., and Rochester, N.H., albeit over different routes, whereas only one, vendor, has operated heretofore. Generally, such a result is not looked upon with favor unless the evidence shows a need for the additional service without any material harm to existing carriers. However, although protestant is concerned primarily with a possible diversion of traffic from it between Boston and Rochester, it has failed to adduce any evidence concerning the volume of its passenger traffic and revenues earned therefrom between those two points; therefore, there is no basis for finding that it would be materially harmed by the introduction of a new carrier. Under these circumstances, the operating rights which vendor would retain pose no obstacle. Approved.—Eastern Massachusetts Street Ry. Co.—Lease—Trailways, 101 M.C.C. 410 (414).

In the prior report it was found that, since Greyhound's purpose in seeking authority to acquire control of bus lines operating in Texas and New Mexico in order to conduct St. Louis-El Paso through-bus operations was to preclude Continental Trailways from instituting a through-bus operation over such routes in combination with acquired carriers, approval of proposed transactions would not be consistent with the public interest; however, applicants' through-bus operations were viewed therein not as conveniences and services to the public, but solely as competition-foreclosing practices against Continental. Also, the present satisfactory arrangements, which proposed transactions would preserve, were considered not to be threatened by possible sale to hostile persons of stock of one of acquired carriers held by independent executor of deceased stockholder's estate, but rather were considered as a threat to services of carriers other than Greyhound, who provide support to acquired carriers' operations.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 101 M.C.C. 655 (670-1)*.

On reconsideration, however, Greyhound's dominance in the motorbus industry does not require that considered applications be denied; since its share of the market would not be increased as a result of proposed transactions. Acquired carriers have no bus competition over their routes; like all bus companies, their major competition is the private automobile; also, they would continue to operate autonomously as feeder or bridge carriers. Moreover, Greyhound already controls the pattern of those carriers' service, and has for many years, to the extent that it would if proposed transactions were approved. Accordingly, subject to condition that acquired carriers' existing routes and channels of trade with other bus lines, via existing junctions and gateways, be kept open, and certain other conditions, proposed transactions may be found consistent with the public interest; approved.—Id., pp. 672-5.

In determining that a portion of contract carrier authority previously found to be dormant should be revitalized, and in approving proposed purchase thereof, the five criteria of §209(b) were considered in detail.—H. Prang Trucking Co., Inc.—Purchase—Hyer Trucking, 97 M.C.C. 611 (613)*.

Where protestants contended that all traffic was subject to diversion by the use of dormant rights and the Commission found pursuant to the test of substantiality that route segments considered were not dormant; it was held that without specific evidence to contrary, it cannot be assumed that the diversion to applicants of a substantial amount of protestants' traffic will occur, especially where service under temporary authority led to the opposite conclusion.—Branch Motor Exp. Co.—Control—Middle Atl. Transp., 109 M.C.C. 807 (822).

The test of substantiality, *New Dixie*, 75 MCC 659, used to determine the issue of dormancy was not whether service in certain regional or local areas was representative but whether service over each route segment, when measured against the system of operations as a whole, was substantial and important to the transferor's network of regular routes.—Id., p. 815.

See also Associated Truck Lines, Inc.—Purchase—Marion Trucking, §5(2), n. 48 below; McCloud River Trucking Co.—Purchase—Zamboni, n. 48 below.

Single-line service: [Vols. 16-19, 21].—Commission held that a restriction against service between certain points in Michigan and Ohio recommended by hearing examiner should not be imposed. Although applicants were not substantial competitors in the area to be served they have conducted modest operations. What is contemplated is the institution of single line service in lieu of joint service, which is not a new service. There is no basis for conclusion that vendee's operations will be detrimental to protestants.—Michigan Express, Inc.—Control and Merger—Cushman, 104 M.C.C. 894 (897).

See also Eazor Express, Inc.—Control and Merger Case, §5(2), n. 110 restrictions. Eazor Exp., Inc.—Purchase—Fleet Highway Freight Case, n. 126 below.

Transcontinental traffic: [Vols. 16-19, 21].—Although rail carriers no longer have the monopoly in freight transportation they enjoyed in 1923, record shows existing non-rail competition is not as effective in the area as in others. Therefore, no grounds exist for concluding that coordination of any of the concerned facilities is necessary to preserve the inherent advantages of rail transportation available in the affected area. Moreover, both control applicants possess a southern transcontinental route; and, while one operates a central route in competition with carrier to be acquired, the other provides the only single-line service between Chicago and the Pacific Coast, thus servicing these points in the same elapsed time as the central route railroads. Accordingly, the southern single-line railroad does not need a central route to compete successfully with other rail applicant; further, its control of Western Pacific would lessen intramodal rail competition as substantially as exclusive control of that route by competing applicant. Nor is there a compelling reason to attempt to achieve a balance in competition between competing applicants or terminate existing competition between the two central railroads. Elimination of Western Pacific as an independent carrier would not strengthen competition in the western region.—Southern Pac. Co.—Control—Western Pac. R. Co., 327 I.C.C. 387 (400-1, 403).

7a. Agreement not to compete.—[Vols. 12, 13, 17, 18, 19].—On further consideration the Commission noted that, for Commission purposes, vendor stockholder's agreement not to compete should not be treated by motor carrier, who is redeeming its stock, as an intangible asset subject to amortization. However, the Commission expressed no opinion to the reduction of net income by such amortization for income tax purposes, because that is a matter subject to interpretation under the Internal Revenue Code.—La Casse—Control—Interstate Exp., Inc., 101 M.C.C. 567 (572)*.

8. Price to be paid.—[Vols. 11-19, 21].—Agreed terms of stock exchange in proposed rail merger found just and reasonable for all stockholders when, under the exchange ratio, common stock of new company will be exchanged for that of merging lines: (1) Northern Pacific stock, on a share-for-share basis; (2) Great Northern stock, on share-for-share basis, plus one-half share of new preferred stock for each share held; and (3) Burlington stock, on basis of 3.25 shares for each share held by minority stockholders (with remaining 97.18 percent, owned by Northern Pac. and Great Northern, being cancelled). While problems concerning Northern Pac.'s natural resources properties caused difficulty in negotiating fair and equitable terms, stock exchange ratio was determined primarily on the basis of earnings rather than property values; and reflected the higher market value of Great Northern stock while preserving for Northern Pac. stockholders equal participation in future earnings of the combined enterprise. Record shows that exchange ratios are just and reasonable, in that they meet requisite tests: (1) they are results of arms-length bargaining and (2) they fairly reflect contribution of each group of stockholders to the combined system.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (253-60)*.

Although proposed price of $1,231,195 for acquired carrier's stock having book value of $131,186 and appraised values of $833,049 including, and $462,851 excluding, intangibles is substantial, it is not excessive in light of favorable operating results achieved by another subsidiary carrier under acquiring carrier's control, in contrast to its prior deficit operations.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (481-2); and proposed price of $5,000 for stock of another carrier, having negative book value of $31,030 including intangibles, appears not excessive, considering earnings and economies anticipated as result of merger.—Id., p. 483; also, estimated increase in survivor's annual earnings of $3,095,567 after merger of existing subsidiary carrier, and increase of $403,969 in net income after income taxes, do not appear excessive in view of rapid rehabilitation of liquidating carrier under survivor's control.—Id., p. 843.

Protestant's contention that the purchase price is excessive is based upon an unrealistic theory for computing the period for recoupment thereof. On the basis of acquired carrier's net operating revenue, protestant claims it would take a span of 120 years for surviving carrier to regain the total purchase price. However, considering applicants' giving effect statement for the year ending December 31, 1965, showing an increase in net income after taxes of approximately $260,000, and taking into account the greater operating economies and efficiency which would result from the combining of operations, surviving carrier could reasonably be expected to recoup the purchase price in from 3½ to 4 years.—Thurston Motor Lines, Inc.—Control and Merger, 104 M.C.C. 1 (10-11).

In determining whether consummation of a proposed transaction, and incidental payment of the consideration involved, would be consistent with the public interest, the question as to whether the price agreed upon should be approved cannot be determined abstractly and apart from other aspects of the transaction. The consideration is only one of the factors to be weighed, in the light of the national transportation policy, in determining whether a proposed transaction would be consistent with the public interest. The instant transaction promises definite benefits to the public through the preservation and continuance by a strong, well-managed and soundly financed motor carrier of the motor service formerly conducted by liquidating carrier, which has experienced financial difficulties, thus furnishing a basis for one expeditious, efficient and economical service to the public. On the other hand, it is not apparent, under the circumstances here presented, how payment of the purchase price would be injurious to the public. The benefits which would accrue to the public from the proposed transaction outweigh any question as to the reasonableness of the consideration to be paid by surviving carrier.—Ryder Truck Lines—Control and Merger, 104 M.C.C. 328 (335).

The higher price per share to be paid to employee stockholders appears to have been necessary to persuade the individual employees to agree to sell their holdings; however, the question of reasonableness of the total purchase price is the proper area of investigation rather than the manner in which the proceeds are to be divided among the stockholders of liquidating carrier.—Id., p. 326.

Considering all circumstances, price for purchase herein does not appear unreasonable as Commission has consistently held that a price arrived at by contracting parties as a result of arms' length bargaining is entitled to great weight unless contrary is established by definitive evidence.—Consolidated Freightways Corp. of Del.—Control, 104 M.C.C. 658 (660-1).

8a. Minority stockholders' rights.—[Vols. 12, 14-18, 21].—The price to be paid for protestant minority stockholders' shares should be determined as of the last day before the stockholder vote on whether to merge the two companies, since (1) the market price thereafter would be affected by allowance by any buyers and sellers for the fact that the ratio of value might end up as set forth in that voting; (1) operations and operational results, already influenced by surviving carrier's acquisition of control, would thereafter become more distorted by management decisions and policies dictated by surviving carrier as controlling person; and (3) the merger, approved by a majority of stockholders on the next day would have long since been effected were it not necessary to seek Commission approval and determination of stock values. However, the selection of a date does not mean that the relative value of the stocks as of that date should not make allowance for such later events as could then have been reasonably foreseen, including but not limited to improvement in liquidating carrier's net income under better management. Yellow Transit, Inc.—Merger—Wilson, Inc., 104 M.C.C. 737 (752-53).

While the Commission has the authority to impose terms and conditions including any modifications of those proposed and could require that liquidating carrier's minority stockholders be paid in all cash, all stock, or part in each, the original proposal whereby such stockholders would receive 0.15 shares of surviving carrier's stock plus some cash (or all cash where fractional share would otherwise be issuable) for each share in liquidating carrier, appears to be just, reasonable and consistent with the public interest. Therefore, determinations will proceed only on how much cash should be given in addition to the 0.15 shares of surviving carrier's stock. In order to determine the cash amount to be paid the value of both stocks in cash terms must be fixed. The outer limits of inquiry will involve divisions of joint line revenue, and the book value of liquidating carrier's equipment which was subject to an improper write down by surviving carrier under the previous control transaction.—Id., p. 753.

8b. Credit and financial structure considered.—[Vols. 12, 14-19, 21].—That proposed control transaction will result in overcapitalization of acquiring carrier by $1,135,208, compared with its present overcapitalization of $556,200, does not require denial, considering the carrier's size and facts that approximately 50 percent of its capitalization represents equity, that its ratio of long-term debt to combined long-term debt and stockholders' equity will be a favorable 56.8 percent, and that evidence supports conclusion that the overcapitalization will be eliminated within a reasonable time. However, approval is conditioned to preclude it from declaring and paying any cash dividends until the overcapitalization has been eliminated. —Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (484).

While on further consideration use of carrier's credit to finance in part acquisition of their stock is still objectionable, the facts herein are sufficiently different from *Urner—Control—Maryland Transp. Co.* (40 MCC 1) as not to warrant denial. The carriers have satisfactory earning records, which support their earning projections; and their current financial status has improved over that previously considered. And although their revised balance sheets show an over capitalization, this situation may be regarded as temporary and, based on income projections, should be eliminated within 3 years. Moreover, a policy of retaining earnings, followed for number of years by these carriers, should serve further to create a more favorable debt-to-equity relationship within a reasonable period of three years.—LaCasse—Control—Interstate Exp., Inc., 101 M.C.C. 567 (572-4)*.

In initial report the Commission denied the application for two main reasons: (1) vendee Ind-O-Transport, Inc. failed to show it would be financially strong enough to begin operations as a motor carrier and (2) rights to be purchased substantially duplicated rights of carrier Parkhill Truck Co. which vendee is commonly controlled with, and which, except for the common control, would be competitive with Parkhill's operating rights. Upon further amendment in the instant application the merger of Transport into Parkhill and substitution of Parkhill as vendee to acquire vendors' rights met the objections raised in the prior reports and the transaction was approved and authorized. Ind-O-Transport, Inc.—Purchase—Niman Transfer & Storage, 101 M.C.C. 593 (594, 596)*.

Applicant Leaseway Transportation Corp., a noncarrier controlling approximately 125 other corporations including seven motor carriers, proposes to purchase all outstanding capital stock of Refiners Transport & Terminal Corp., a motor common carrier; and contingent thereon Refiners proposes to purchase a portion of the operating rights of Mitchell Transport, Inc. While Leaseway's individual corporate balance sheet shows that its current liabilities substantially exceed its current assets, its consolidated balance sheet (consolidated with its subsidiaries) shows capitalizable assets exceeding capitalization by $7,059,632. However, since Leaseway proposes to obtain necessary funds from its subsidiaries through advances, cash dividends, or on open accounts, since information as to the amount and method to be used in securing these funds cannot be determined until near the time of consummation, and since information concerning these funds, insofar as any effect on the carrier subsidiaries involved, is essential in considering this transaction, approval is conditioned on filing an appropriate petition with the necessary information.—Refiners Transport & Term. Corp.—Purchase—Mitchell, 101 M.C.C. 611 (612, 614-6).

On further consideration proposed control transaction approved, contingent on consummation of concurrently approved merger into applicant of its six carrier subsidiaries. Under amended proposal applicant's projected income statement shows that it should have no difficulty in fulfilling considered stock purchase agreement, under which $66,700 of the total price of $230,000 is payable at closing and the deferred balance of $163,300, bearing 6 percent interest per annum on the unpaid balance, is payable in annual installments over a period not to exceed 8 years.—Schwerman Trucking Co.—Control and Merger, 101 M.C.C. 679 (683-5)*.

9. Reduction of tax payments; taxes generally.—[Vols. 11-14, 16-19, 21].—To the extent that heavy tax burdens are reflected in transportation costs, the Commission deems relief from such burdens to be in the public interest; thus, the lawful reduction of taxes is a proper objective of a §5(2) proceeding.—Norfolk & W. Ry. Co.—Control—Lake Erie & F. W. R. Co., 328 I.C.C. 219 (222-3).

Acquiring carrier desires to continue operating acquired carrier as a separate entity in order to avail itself of substantial tax benefits which may be carried forward through 1967, and in view thereof denial of control authority is not warranted solely by duplications in the carriers' operating rights. While those duplications are fairly substantial, acquired carrier's operations extend to New Orleans and points in Mississippi, an area in which acquiring carrier is not authorized to operate; moreover, latter anticipates a much earlier depletion of the tax benefit, whereupon it will seek merger authority. Acquisition of control is therefore approved, but the parties will be expected to file merger application no later than 1967.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (482).

In prior report, it was found that new corporation seeking to purchase operating rights and property of one bus line, and acquire joint stock control of another, would be classified as a personal holding company under the "60-percent of adjusted ordinary gross income" test in 1964 amendment to Internal Revenue Code and that, because of the penalty tax on undistributed personal holding company income, it would not be adequately financed. However, since record does not show any capital gains as listed in IR Code definition of "ordinary gross income" or any income of the nature enumerated in definition of "adjusted ordinary gross income," new corporation's adjusted ordinary gross income for the past 3 years would consist of gross income (operating revenues) and personal holding company income (dividends); and, as dividend portion of the adjusted ordinary gross income is less than 60 percent of its ordinary gross income, it would be exempt from the penalty tax for those years. Under those circumstances, the new company would be financially fit to consummate the transaction, and approval would be consistent with the public interest; prior findings modified accordingly.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 104 M.C.C. 652 (654-7)*.

See also LaCasse—Control—Interstate Exp., Inc. Case, n. 7a above.

10. Corporate and operating status of vendor.—[Vols. 11-19, 21].—Dormancy is not an inflexible concept nor applicable to a temporary cessation of operations alone. Dormancy has been defined as "an abandonment or termination of services the reactivation of which will result in damages either to the public interest or to intervening or protesting carriers who conducted operations during the interruption of said services." See *Arrow*, 300 F.Supp. 813. Vendor's operations were found not dormant.—Weathers Bros. Transfer Co. Inc.—Purchase, 109 M.C.C. 647 (651-2)*.

After applying the test of substantiality to applicant's past operations under a certificate of registration, Commission held that only a partial grant of authority as a common carrier was warranted for those operations shown to have been active. Mere holding out of its service by applicant is no substitute for active operation. See *McCloud*, 101 MCC 111.—Fischbsach Trucking Co.—Control and Merger—Peck, 109 M.C.C. 739 (745-7).

The "test of substantiality" is flexible, not a fixed standard. Commission must consider nature of rights involved, size and resources of the carrier tested and its authorized territory, whether regular or irregular rights are involved, and whether authority is for general or specific commodities.—Mid-American Lines—Purchase—Five J Motor Service, 109 M.C.C. 753 (756).

Test of substantiality enunciated by Commission in *New Dixie*, 75 MCC 659, applies also to the transfer of rights issued in a certificate of registration. Proof of past operations by vendor upon which applicants relied solely to support the related conversion application must be convincing and must be limited to the scope of the certificate of registration. Application herein satisfactorily meets such test; approved.—Home Transp. Co., Inc.—Purchase—Fuchshuber, 109 M.C.C. 779 (782, 787)*.

It is not expected or anticipated that irregular-route carriers of highly specialized commodities operating on a call and demand basis will be held to the same standard of frequency as, for instance, regular-route carriers of general commodities in applying the test of substantiality.—Id., p. 788*.

Commission may review nature of interstate service previously conducted by a one-State registered carrier and limit the service authorized to be transferred and converted into a certificate of public convenience and necessity to that service shown to have been actually provided. See *Palmer*, 87 MCC 160.—Id., p. 788*.

Test of substantiality stated in 75 MCC 659 has been further refined and interpreted with respect to specialized bulk carriers, such as vendor, by the findings in 104 MCC 686. As the nature of a commodity or service becomes more narrowly confined or specialized, greater leniency can be shown in determining whether vendor has conducted substantial service through-out its authorized territory. In determining whether operating authority had been actively utilized, shipments moving over the considered rights in interline service and/or pursuant to tacking operations are properly entitled to consideration. See 101 MCC 649. Commission considered vendor's entire service and found that certain certificates should be cancelled for dormancy but not others (as specified herein).—Matlack, Inc.—Control—Southern & T. I. McCormack, 109 M.C.C. 861 (865-6).

Commission has consistently held that an irregular-route carrier must show that it has rendered substantial service to a representative number of points throughout its authorized territory to successfully meet the test of substantiality set forth in 75 MCC 659. Record herein is barren of such evidence as regards vendor's operations. Vendor's use of interline service to or from authorized points does not show active and continuous service. See 109 MCC 27. Objection to a proposed transaction based upon dormancy may be overcome by a showing that such transaction serves a public need. Testimony of supporting shippers is indicative of a preference only and demonstrates that vendee would not meet any demand for service not presently being satisfactorily met by existing carriers.—Arkansas-Best—Purchase—Indianhead 109 M.C.C. 885 (889).

Commission found that not all of operations under vendor's general commodity authority are dormant. Evidence of past operations, public need, and an absence of adverse effect on protestants warrants continued delivery by vendee of construction materials, feed, salt, and liquid fertilizer, except liquid bulk commodities, but not of household goods as no evidence of transportation of such goods has been shown or has a future need for such transportation been established.—Universal Transport, Inc.—Purchase—Muck, 109 M.C.C. 871 (879-80)*.

See also Branch Motor Exp. Co.—Control—Middle Atl. Transp. at §5(2), n. 7, *reinstitution of dormant rights.*

15. Routes, rights, transferred, retained, combined.—[Vols. 11-19, 21].—Commission held that the transaction herein, if consummated, would not alter the competitive situation because consummation would result in the same number of carriers, two, providing the service at issue, as were providing it previously. Protestants' evidence of diversion is speculative on nature and the fact that vendee may be a more vigorous competitor than vendor does not warrant denial.—Fredrickson Motor Express Corp.—Purchase—Cope, 104 M.C.C. 670 (674).

Vendor permitted to retain operating rights which allow service between Atlanta, Ga., and Birmingham, Ala., while selling rights which permit some service over a different route inasmuch as vendor's serious financial difficulties make sale imperative, and it would be reasonable to assume sale would not be consummated if this service were discontinued, rendering rehabilitation of vendor's retained operations impossible.—Theatres Serv. Co.—Pur. Dixie Highways, 104 M.C.C. 778 (782-3).

Commission held, with respect to vendor's retained rights recommended to be cancelled, that the issue was not whether movements over the routes could be moved "logically," but rather, whether the test of substantial operations, stated in *New Dixie*, 75 MCC 659, had been met. Commission found that evidence of vendor's past operations successfully met such test and it was unnecessary to pass upon the question of cancelling retained rights which did not create a duplicate rights situation. Approved.—Yellow Freight System—Pur.—Norwalk Truck Lines, 109 M.C.C. 672 (674-6).

Alternate routes: [Vols. 12-17, 21].—Although the general rule is that an alternate route cannot be transferred apart from its underlying service route, in as much as vendee after the consummation of the transaction would have the identical regular route authority given to the original grantee of considered alternate routes, in that vendee holds authority over route duplicative of the portion of the service route authority that vendor would retain and the purchase will complete a route duplicating the original service route; and whereas two services would not be created since vendor will no longer serve the area in question; purchase of regular-route segment and certain alternate routes approved.—Midwest Motor Exp., Inc.—Pur.—Advance—United, 97 M.C.C. 593 (595). (But see dissent.)

Principle that alternate routes are not severable bysale from regular service routes between the same termini (49 CFR §1042.4(d)(7) is equally applicable to specifically authorized convenience routes but it has limited applicability here as it does not require convenience routes between different termini to be cancelled as result of exchange of one service route for an identical or broader service route.—Rumpf Truck Line, Inc.—Pur.—Dundee Truck, 109 M.C.C. 893 (899-901)*.

Circuitous routes: [Vols. 15, 21].—Circuity of routing, standing alone, is not enough to establish a subterfuge to avoid state regulation; where it appears that the longer interstate route is used for a logical economical or operational reason, such routing cannot be labeled a subterfuge, absent a clear indication of bad faith. While both multi- and single-State (Georgia) shipments were transported over the Georgia South Carolina-Georgia route, service was performed at intermediate points in South Carolina, as were terminal services, indicating that the route was a natural and logical choice. Further, while acquired carrier holds interstate authority that is all-Georgia which roughly parallels its interstate route through South Carolina, the all-Georgia route is seldom used. Additionally, it cannot be determined from the evidence how many shipments originated and terminated within Georgia since the waybill study presented by the state of Georgia included waybills which would not necessarily indicate a prior or subsequent interstate movement. Thus, the evidence is inconclusive and falls short of establishing that the challenged operations are spurious.—Thurston Motor Lines, Inc.,—Control and Merger, 104 M.C.C. 1 (15-16).

Commercial zones: [Vols. 15, 17, 18, 21].—Commission held that hearing examiner erred in finding that vendor, under its retained authority, could serve Moline, Ill., as a point within commercial zone of Davenport or Bettendorf, Iowa. Examiner ignored distinction made in *Commercial Zones*, 54 MCC 21 (92), between authority to serve a particular municipality and territorial authority. Hence, authority to serve "points in Iowa" is not authority to serve Illinois points.—Arkansas—Best—Purchase—Indian head. 109 M.C.C. 885 (887-8).

Common control and management: [Vols. 13, 14, 17, 19, 21].—While authority has generally been withheld where the result would be the creation, preservation, or extension of duplicate operations by separate motor carriers under common control, which operations, except for the common control, would be competitive, this policy has occasionally been departed from in recognition of the tax advantages which would accrue were an immediate unification not perfected. Accordingly, vendee is authorized to acquire control of vendor through purchase of its stock, with the admonition, that steps be taken, subject to the Commission's prior approval, to effect a merger of the carriers at the earliest practicable date.—Hall's Motor Transit—Control—Pony Express, 104 M.C.C. 353 (360-61).

Duplicate operating rights: [Vols. 12-19, 21].—Authority granted a new carrier authorized to be controlled by Transcontinental Bus System for transportation of cash letters over irregular routes in territory served by affiliated buslines is not duplicative of its parent's or affiliates' services. Transportation of property (express) by motor passenger carriers is subordinate to requirements of their passenger business and is a special service calling for commensurate compensation. Such service is not necessary for transportation of property in ordinary course of business, and many shippers will not use it, with its higher charges, for that purpose, whereas acquired carrier proposes to provide daily service between country and correspondent banks, using station wagons, at a comparatively low rate.—Continental Dispatch, Inc., 95 M.C.C. 483 (487, 491-2).

Vendor's proposed sale of certain of its operating rights while retaining authority to transport the same commodities between many of the same points is denied. A carrier has only one right to operate regardless of the number of times it may be repeated in one or more certificates; and if this right is sold, the selling carrier may not continue to transport the same commodities between the same points authorized to be served thereunder. Although such splits have been approved where the splits involved only short distances, where the highway involved was the only means of ingress and egress to and from the particular point, and where none or only a few small intermediate points were located on the segments involved, those circumstances are not present here and the grant of authority to two carriers to operate over the segments herein involved should be made only upon a showing that public convenience and necessity require both services.—Hall's Motor Transit—Control—Pony Express, 104 M.C.C. 353 (359-60).

See also East Tex. Motor Frt. Lines—Purchase—Lee at §5(2), n. 110 temporary. Eastern Massachusetts Street Ry. Co.—Lease—Trailways Case, n. 7 passenger service, above; Transport Motor Exp.—Control—Capitol Freight Lines, n. 45 conditions, above.

Extinguished rights: [Vols. 12-14, 16, 18, 19, 21].—Cancellation for dormancy is a serious action, intended to protect other carriers from revitalization of rights under which no service has been shown for substantial periods of time; moreover, opposing carriers cite no precedent which would require the Commission to cancel or restrict points internal to a carrier's overall authority and at which the carrier has shown extensive service in conjunction with its overall system, including the use of those points as joinder for the overhead traffic between the extremes of its authority.—McLean Trucking Co.—Control—Chicago Exp., Inc., 97 M.C.C. 693 (696, 697).

Liquidating carrier's Georgia irregular-route authority is not dormant since applicant's abstracts show rendition of substantial and continuous direct and interline service to a representative number of points within its authorized territory; it is immaterial that the major part of the applicant's service was conducted in the area of its regular route. Further, the situation is not distinguishable from New Dixie Lines, Inc.—Control—Jocie Motor Lines, Inc. 75 M.C.C. 659 on the basis of quantum of service nor because the vendor in that case held only irregular route authority while the instant applicant has both regular and irregular route authority. Additionally, the absence of terminal facilities is of little significance as maintenance of such facilities designed and equipped for handling less-than-truckload miscellaneous freight at other than a carrier's home base is more indicative of regular-route than irregular route operations. Thurston Motor Lines, Inc.—Control and Merger, 104 M.C.C. 1 (8).

Since there is no indication of record that liquidating carrier has handled any movements under its irregular-route specified commodity authority, it is considered to have abandoned or discontinued service in connection therewith, and this authority should be cancelled; however, considering each separate operating right as a unit, applicants have shown that the general commodity operations of liquidating carrier have been substantial and continuous.—Ryder Truck Lines—Control and Merger, 104 M.C.C. 328 (337).

Liquidating carrier's authority to transport bananas from Florida and gulf ports is not dormant even though all traffic from Florida points moved from only one of three possible origins, four shipments moved from New Orleans, two from Gulfport, and none originated in either Mobile or Galveston. Liquidating carrier's participation in the traffic meets the required standard of an irregular-route carrier i.e., it has shown a rendition of substantial service from and to a representative number of points within its separate grants of authority. The fact that the traffic has moved from a limited number of points does not justify eliminating alternative origins. Further, the protestant failed to show that he would suffer materially from the grant.—Brown Transport Corp.—Control and Merger—Osborn, 104 M.C.C. 561 (562).

Where regular-route operating rights were used sporadically and in combination with the carrier's irregular-route authorization, it cannot be found that service was an integral and appurtenant part of its authorized regular route operations; and the carrier failed to establish that it maintained equipment or facilities such as terminals and cross-dock operations commonly indicative of and associated with regular route operations. Applicants failed to show there was a need for reactivation of these rights. Denied.—Ryder Truck Lines—Control—Merchants Frt. System, 109 M.C.C. 654 (663-4).

See also Buckingham Transp., Inc. —Control and Merger, n. 52, below; Republic Van & storage Co.—Purchase—Consolidated Van, n. 48, below; Tose, Inc., v. United States, n. 45 Conditions, below.

Intermediate points: [Vols. 12, 13, 16].—In approving §5 application, the Commission rejects protestants' contention that vendor's authority to serve intermediate points on its regular routes was dormant; evidence disclosed, that while vendor's service at those intermediate points had been substantially less active than at larger points it was authorized to serve, the limited service performed is sufficient to warrant a finding that the intermediate-point rights are not dormant.—Overnite Transp. Co.—Purchase—Rutherford Freight Lines, 97 M.C.C. 568 (575).

Purchase of right to serve, as an off-route point, a point on the regular routes of both vendee and vendor, which only vendor can serve, approved where alternate routes, authorized to be purchased in the same transaction, terminate at that point; thus, adequate and efficient service in the area will be insured.—Midwest Motor Exp.,—Pur.—Advance-United, 97 M.C.C. 593 (595).

Intrastate operating rights: [Vols. 14-19, 21].—See Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, Inc. Case, §5(2), n. 126.

Off-route points: [Vols. 11-19,21].—Off-route points having populations over 20,000 and surrounding trade territories, which are not reasonably near regular route to which they appertain, but are in some instances hundreds of miles off-route in areas foreign to those generally served by vendor, take on characteristics of principal or terminal points, as to which vendor must establish either active past operations or a need for service.—Carolina Freight Carriers Corp.—Purchase—Kilgo, 93 M.C.C. 543 (553-4)*; therefore, as to 13 such points for which vendor's authority is shown to be dormant, cancellation is required of rights for all but the one where need for revitalized service is shown, also cancellation of authority to serve three of those points under vendor's irregular-route rights. And authority to serve the off-route point of Pittsburgh is limited to traffic to and from the four sourthern States shown to have been served by vendor on Pittsburgh shipments.—Id., pp. 554-5.

Regular- and irregular-route operations: [Vols. 12-19, 21].—In light of the Commission's conclusions that no new service would emerge from vendee's acquisition of vendor's authority, that the latter authority is not dormant, and that such conversion would be warranted in the public interest, findings herein are conditioned to provide for a redescription of vendor's authority in regular-route terms rather than irregular.—Interstate Motor Freight System—Purchase—Eaton Truck, 104 M.C.C. 248 (257).*

Applicant's abstracts reflecting the nature of vendor's past operations show the existence of the possibility that vendor's operations have, in fact, already developed into a repetitive operation between predominantly major points, resulting in an unlawful conversion of vendor's irregular-route rights into regular-route rights; testimony of vendee's witnesses and the shippers supporting the proposal, and the broad territorial nature of vendor's irregular-route rights sought to be acquired, clearly establish, that approval of the section 5 application in this respect would result in vendee's unlawful conversion of vendor's irregular-route rights into regular-route rights and the establishment of a regular-route operation between points via the applicant's respective territories.—Lyons Transp. Lines, Inc.—Control and Purchase, 104 M.C.C. 599 (603-04).

The unification of regular-route with irregular-route operating rights has been found consistent with the public interest, *B. & E. Transp.*, 36 MCC 561, and it cannot be assumed that vendee would conduct unlawful operations. All of vendor's irregular-route authority, covering a vast amount of easily defined territory, will be retained and the territory outside such authority can only be served by vendor's irregular-route authority.—Red Arrow Frt. Lines, Inc.—Purchase—Galveston, 104 M.C.C. 820 (825-6).

Application to convert from irregular to regular route authority denied where some of the regular routes sought exceeded territorially the underlying irregular-route authority; and where applicant would retain all its irregular route authority resulting in the overlapping and admixture of both types of authorities making impractical the preservation of real distinction between the two types of service, and would obscure any clear understanding of applicant's already complex operating rights.—Ryder Truck Lines—Control—Merchants Frt. System, 109 M.C.C. 654 (668-70).

Split routes: [Vols. 12-15, 17-19, 21].—The proposed split of authority is approved as to that portion of vendor's operating rights which authorizes service between the same points but over a different route from those rights which vendor would retain, however, vendee's rights are restricted against service at the point where the rights sold and two of those retained meet. But as to that portion of the rights to be sold that are identical to those sought to be retained, vendor has but one operating right and may not sell and retain it at the same time; approval of the transaction is therefore conditioned upon cancellation by vendor of that portion of the retained routes.—The Davidson Transfer & Storage Co.—Purchase (Portion)—Keystone Express & Storage Co., Inc., 104 M.C.C. 389 (393).

45. Control.—[Vols. 11-19, 21].—In suit to set aside Commission order approving national bus line's acquisition of control of local bus lines, plaintiff's (protestant) claims that acquiring carrier's issuance of considered deposit receipts without prior Commission approval violated §20a(2), and that by purchasing some of those receipts it obtained prior control of local carrier in violation of §5(4), are without merit. The deposit receipts were issued, not by the carrier, but by a depository bank to acquired carrier's shareholders who deposited their stock pending Commission decision on proposed transactions; thus, as they were not "securities" within meaning of §20a, their issuance without prior approval did not void the transactions as plaintiff claims. Moreover, record amply supports the Commission's conclusion that applicant's purchase of those receipts did not amount to an unlawful acquisition of control; but even if a technical violation of §5(4) could be found, the Commission found proposed transactions were in the public interest and, therefore, it would have been justified in finding that such violation did not warrant denial of the applications.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (382-3, 386-9)*.

Nor is there merit in plaintiff's claim that acquiring carrier's conduct with respect to issuance and purchase of the deposit receipts violated §7 of the Clayton Act. The Commission's duties under that act cannot be viewed apart from provisions of §5; applicant sought to obtain local carriers' stock (if the Commission approved) in exchange for its own stock to be issued with Commission approval; thus in considering its application for authority to issue stock, the Commission had opportunity to examine the transaction and at that time discharge its duty under the Clayton Act. Also, under §5, the Commission is given power to approve a transaction which furthers the National Transportation Policy even though it might otherwise be contrary to the goals of the anti-trust acts. In considered circumstances, proper test of control is not the Clayton Act formula, but the standards of §§5(4) and 5(5); and under those standards, the Commission properly found that control of the local bus lines had not been unlawfully acquired prior to its approval. The Commission's findings, conclusions, and order are fully supported by substantial evidence on the record as a whole; sustained.—Id., pp. 386, 388-9, 393.

Applicant railroad's acquisition of direct control of two subsidiaries of the Wabash railroad (whose property applicant is currently leasing) through outright purchase of subsidiaries' stock, rather than through a stock exchange, would facilitate and assure completion of applicant's control of the Wabash system as contemplated in the lease proceeding (324 ICC 1); and would reduce Federal income tax on subsidiaries' income, thereby relieving the public from tax burdens as reflected in transportation costs. Authorized.—Norfolk & W. Ry. Co.—Control—Lake Erie & F.W.R. Co., 328 I.C.C. 219 (222-3).

Railroad's acquisition of control of a short line railroad through purchase of stock by its noncarrier subsidiary formed for purposes of the transaction will be in the public interest only if competing rail carrier requesting inclusion as joint owner is included in the transaction. While the Commission recognizes the disadvantages of divided ownership, the railroad sought to be acquired, being a small switching and terminal line, is the type of carrier which can be owned and controlled equally and jointly by more than one railroad.—Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase, 330 I.C.C. 672 (679-80, 681).

While not condoning the method used by acquiring carrier applicant in creating a trust and causing stock to be transferred thereto prior to Commission approval, the trust was inadequate to authorize the trustee to vote the stock transferred to it without participation, suggestion or control from considered carrier; thus, carrier did not control or have the power to control the railroad it seeks to acquire; however, to avoid having a trust of this nature declared illegal, carriers are admonished to seek Commission's prior approval of such transactions in the future.—Id., pp. 680-1.

Transcontinental Bus System's continued control of a new subsidiary concurrently granted certificate for transportation of cash letters, authorized. The subsidiary's proposed service in same area as other Transcontinental affiliates will not amount to self-induced competition; its irregular-route authority will enable it to generate new and additional traffic by opening up more territory to solicitation and transportation of cash letters; furthermore, in instances where there is a combination bus-station-wagon line haul, its service will produce revenue for the buslines.—Continental Dispatch, Inc., 95 M.C.C. 483 (491).

Requiring cancellation for dormancy, as a condition to approval of control application, is a serious action intended to protect other carriers from revitalization of rights under which no service has been shown for substantial periods of time. Such condition should not be imposed as to points internal to acquired carrier's authority at which little or no direct service was shown where the carrier served all of them with considerable tonnage in conjunction with the overall use of its authority; neither should restrictions be imposed on tacking at those points as restrictions on operating rights are difficult and burdensome, and are not imposed where not clearly shown to be required in the public interest.—McLean Trucking Co.—Control—Chicago Exp., Inc., 97 M.C.C. 693 (696, 697).

In denying §5 application for control of motor carrier Wilson, the Commission held that since controlled carrier was to reacquire 3,043 shares of its outstanding capital stock, while the individuals seeking to jointly control it were to purchase only 615 shares, such terms were inconsistent with the public interest because they would place such financial burdens on Wilson as to transform it from a carrier with reasonable financial stability into one which is unsound.—Lewis—Control—Wilson Storage & Transfer Co., 101 M.C.C. 191 (196).

In approving §5 control application, the Commission held that where all there paragraphs of vendor's Sub-No. 23 certificate were intended to grant a single operating right (expressed in three paragraphs to avoid duplicating any part of the base certificate), it is possible, since considered commodities are appropriately within the description of both certificates, for vendor to lawfully transport shipments between points in radial area A under the base certificate and points in radial area B under the Sub-No. 23 certificate through joinder at a common point in Franklin County.—Daily Express, Inc.—Control and purchase, 101 M.C.C. 355 (363).

Although in seeking, through proposed stock control transactions, to obtain a route between St. Louis and El Paso (when it already has available two other routes between those points), Greyhound admitted that it sought to preclude protestant Trailways system bus line from instituting through-bus operations over such routes in combination with acquired carriers, Greyhound's dominance in the motorbus industry does not require that the applications be denied. Its share of the market would not be increased as result of the acquisitions. Acquired carriers would continue to operate autonomously as feeder or bridge carriers. Also, Greyhound now controls pattern of acquired carriers' service, and has for many years, to the extent that it would if transactions were approved. Therefore, subject to condition that acquired carriers' routes, via existing junctions and gateways, and connections with other bus lines be kept open, and certain other conditions, proposed transactions are approved as consistent with the public interest.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 101 M.C.C. 655 (670-5)*.

In motor carrier control and merger proceeding imposition of restrictions against tacking is looked upon with disfavor, although they may be imposed if it appears that non-imposition would have an adverse effect on protestants; however, no such restriction is proper if applicants have interlined traffic from or to territory of the other. Applicants have interline traffic, and fact minimal service is shown between New York City-New England area and the Georgia territory is mainly due to the circuity involved in having to use Pittsburgh, Pa., and Charleston, W. Va., gateways. Shippers utilize this service mainly because they need dropoff service to Pittsburgh and West Virginia areas on shipments destined to Georgia territory; and need is shown for continuation of this service. Thus, since applicant will not institute a new operation and since protestants are strong, aggressive and firmly established carriers well able to meet any resulting intensified competition, application approved.—Eazor Express, Inc.—Control and Merger, 101 M.C.C. 707 (714-16).

Evidence clearly indicates that original intention of applicant, organized for that purpose, was to acquire control of two household goods carriers and, also, that parties controlling applicant never intended that control of one be acquired without control of the other. Therefore, applicant's acquisition of control of one carrier without Commission approval and subsequent application for authority to acquire control of the other constitute a single transaction subject to §5(2); and its application cannot be approved without approval of continued control of the carrier already acquired. In view of the chain of circumstances, beginning with original purchase of the stock options, applicant's acquiring control of one carrier was only part of the entire transaction; and its arguments that the options were never exercised, and there was no existing agreement to buy stock of second carrier when control of the first was acquired, are not convicing when the evidence shows a single transaction, rather than two separate unrelated transactions, to be involved.—General Movers Corp.—Control—Martin Van Lines, Inc., 101 M.C.C. 748 (750, 760-61)*.

Approval of the application would set a dangerous precedent and encourage partial avoidance of regulation in situations where a party desired to gain control of two or more carriers and felt, for some reason, that acquisition of one might not withstand close examination by the Commission. However, this is not meant to imply that such is the instant situation, nor is it a pre-judging, in absence of all the evidence, of the portion of the transaction involving applicant's prior acquisition of control of a carrier. The Commission cannot avoid its responsibility of judging an entire transaction to consider only that portion applicant chooses to submit, even though previously consummated portion, standing alone (as a noncarrier's acquisition of control of one carrier), would be beyond its jurisdiction in the event applicant accepted denial of the portion submitted for approval rather than submit the entire transaction for consideration. Since acquisition of control of the two carriers is an indivisible whole which may not be separated by consummation of a part thereof and subsequent submission of the remainder for Commission approval, the transaction must be denied; denial is without prejudice to submission of entire transaction for consideration.—Id., p. 761.

Common control of vendee and vendor found not to exist in view of showing that vendor's stockholder borrowed on own credit, interest was paid on large loan from vendee, and hiring of an independent manager not previously affiliated with vendee.—Illinois-Calif. Express—Purchase—Ariz.—Utah Express, 104 M.C.C. 578 (584-5).

Acquisition by International Utilities of 27 percent of Chemical Leaman as a result of the transaction does not indicate control in the face of strong evidence and direct testimony that the person in control of Chemical Leaman will continue to exercise that control; although if such a change were to occur, the situation would be subject to further review.—Chemical Leaman Tank Lines, Inc.—Pur.—Ryder, 104 M.C.C. 686 (705-8).

Operating rights sought to be controlled are not dormant as protestants contend. Carrier sought to be controlled was ordered to cease its complete heavy-hauling service until its authority was redescribed and it cannot be held responsible for the resulting commodity hiatus. Evidence shows that involved carrier operated extensive heavy-hauling operations both before and after issuance of a revised certificate. Absent a showing that protestants would be adversely affected by applicant's acquisition of the revised certificate, it must be presumed that service authorized thereby can be rendered without endangering or impairing protestants' operation contrary to the public interest. Application approved.—Aetna Freight Lines, Inc.—Control—Ray Carter, 109 M.C.C. 13 (24-26)*.

A certificate, included among others to be transferred under §5, issued to vendor subsequent to close of the hearing in a §5 proceeding, should not be subject to nullification on a charge of dormancy advanced by protestants. At the time of hearing, vendor was authorized under §210a to perform temporarily the services corresponding to those sought in the certificate issued. It must be presumed that public convenience and necessity still require vendor's operations. Approved.—Transport Serv.—Control—Gould, Inc. & Colo. Frt., 109 M.C.C. 359 (371-2).

Where it appears that a certificate of registration is supported by two separate underlying State certificates which duplicate each other, it is applicants' duty to show that, to extent each supports the certificate of registration, they may be divided by selling one and retaining the other. Otherwise approval of such a division of rights would create an additional carrier operating in competition with vendor in same State. Found that rights evidenced by a certificate of registration, which duplicate, are unified and cannot be split under §5—Id., p. 375-6.

Control of a motor carrier by a rail carrier approved despite violation of the Act inasmuch as rail carrier vendee has shown that it can effect substantial savings and also render faster service on less-than-carload traffic through use of motor carrier service. Advantages to the public warrant continuation of the service, and means are available to restrict the considered authority so as to overcome the reason for the prior denial of authority to control.—Canadian Ntl. Transp.—Investigation of Control, 109 M.C.C. 392 (402-3).

Subsidiaries of a large industrial corporation, which controlled two general-commodity common carriers, were authorized to acquire control of additional general and specified-commodity carriers. Commission recognizes that many concerns with substantial interest in business enterprises other than regulated motor transportation control one or more trucking companies. Affiliation with sources of traffic could not be condemned per se. Restrictions proposed by applicants were imposed.—Encinal Terminals—Control—Shippers Express Co., 109 M.C.C. 536 (541-4)*.

Shipper testimony herein evinces only a preference for applicant's service and does not show a real need for the proposed unified service. A majority of the major geographical points involved are served by protestants herein. Also the evidence indicates that it would be possible for applicant's unified service under irregular-route authority to become entirely regular route in nature, which fact alone, based on our decision in Falwell, 40 MCC 439, is enough to warrant denial.—C.O.D.E., Inc.,—Control—Nolte Bros. Truck Lines, 109 M.C.C. 552 (558).

Where a contract may be subject to more than a single interpretation, it is incumbent upon the parties to that contract to clarify the terms. Applicants failed to present the entire transaction for Commission approval where the contract contained a condition precedent requiring approval of a proposed merger and filed an application for control, with no application to merge. Denied.—Ryder Truck Lines—Control—Merchants Frt. System, 109 M.C.C. 654 (668).

Carrier to be controlled showed record of 100 shipments a week under its authority to haul bulk flour to wide variety of points. Such operations clearly show an active service has been conducted. However, other bulk authorities were cancelled for absence of evidence that such authorities had been utilized in any manner whatsoever—Peterlin—Control—Bulk Motor Transport, Inc., 109 M.C.C. 705 (709).

Conditions imposed: [Vols. 17-19, 21].—The Commission properly found that, though employee union's petition for clarification of order in which employee-protective conditions were imposed (in proceeding approving plaintiff's move to Richmond, Va., Broad Street Station from the Main Street Station it had jointly operated with Chesapeake & Ohio) was not filed for more than three years after date of the order, the union was not barred by laches. While plaintiff criticizes the union's lack of diligence, it was not mislead thereby. And, since plaintiff moved from Main Street Station more than four years earlier, obviously the move was not influenced by reliance on an interpretation that the order excluded certain junior employees or by the union's subsequent delay in moving for clarification. Furthermore, order under attack was nothing more than a clarification of a prior Commission order and, apart from Rules 101 and 102 of the Rules of Practice, §5(9) provides adequate statutory for the Commission's action. Complaint dismissed.—Seaboard Coast Line R. Co. v. United States, 283 F. Supp 866 (868-9)*.

On appeal from Commission decision and order approving motor carriers' control and merger application, conditioned on cancellation of acquired carrier's rights in three States because of dormancy, the court is limited to ascertaining whether the Commission's conclusion has a rational basis and is supported by the evidence. The examiner's thorough and careful summary of the testimony and evidence shows that the record fully justified the finding of dormancy and, also, that substantial evidence of protestants rebutted shipper testimony offered by applicants to prove that reactivation of dormant rights in two States was required by public need for acquiring carrier's unique "special services" to shippers which other carriers did not offer; moreover, even if record showed uncontradicted evidence of a special service at one point, the Commission's conclusions could still find rational support in the evidence. There being a reasonable basis of record for its decision, the Commission's refusal to reactivate the dormant rights or to grant acquiring carrier rights in named States cannot be found erroneous or arbitrary; sustained.—Tose, Inc. v. United States, 304 F. Supp. 894 (898-900)*.

Condition (i) imposed in 76 ICC 508 on Southern Pacific's control of Central Pacific specifically reserved jurisdiction to reopen that proceeding for modification of order therein, and such jurisdiction is not restricted to orders implementing authority granted in original order; it would be illogical to assume that, once a §5(2) order is entered, the Commission is forever barred from changing or correcting it to supply deficiencies, regardless of what material changes in conditions and circumstances might occur. And though petitioner Denver & Rio Grande, in view of its agreement to the conditions when imposed, may not now be heard to question their propriety at that time, the doctrines of laches and estoppel do not bar it from questioning reasonableness of any condition under existing circumstances and seeking modification thereof pursuant to provisions of condition (i). Motions to dismiss or deny its petition for lack of jurisdiction or legal power to modify condition objected to, overruled.—Central Pac. Ry. Co. Control, 317 I.C.C. 469 (482)*.

Approval of control is conditioned upon acquiring carrier gaining and exerting sufficient control of controlled carrier's securities within 120 days to enable it to fully carry out the other conditions prescribed; otherwise, it and its corporate parent are to dispose of their holdings in acquired carrier's stocks and securities. However, authority for any necessary issuance of stock or securities in connection therewith must first be obtained under §20a provisions of the Act. Furthermore, since record does not show that control would result in manipulation of revenues of controlled carrier to the detriment of other security holders and employees, financial conditions requested will not be imposed.—Missouri Pac. R. CO.—Control—Chicago & E.I. R. Co., 327 I.C.C. 279 (310-1, 324)*.

And, while railroad seeking inclusion in the transaction requires no Commission authority to enter into negotiations to purchase or lease portion of acquired carrier's line, without conditions regarding good-faith negotiations there would be no assurance that any offer it might make would be considered by acquired carrier after consummation of the control; and, on the record, the Commission would be derelict in its responsibility to serve the public interest if it failed to make such provision. Acquiring carrier is to take such steps as will assure necessary stockholders' assent to any agreement reached for sale of that line segment or for acquisition of trackage rights thereover and to notify all parties of the consummation date; consummation of control shall constitute acquiescence in an irrevocable assent to such conditions.—Id., pp. 296-7, 306.

Modification of condition (e) by striking therefrom the name of Union Pacific as the only connection of Southern Pacific on traffic moving via Ogden does not conflict with the purposes sought to be achieved by the 1923 order approving the control or with the Pacific Railroad Acts. The primary objective of the conditions imposed by the order was the protection of the competitive position of the transcontinental route of the Central Pacific via Ogden against the Southern Pacific's possible preference for its long-haul southern route via El Paso. Moreover, the Pacific Railroad Acts clearly contemplated the addition of other railroads to the Overland route; and, although they prohibit the two named lines from discriminating against each other, they do not require or authorize either the SP or UP to prefer each other to the point of unduly discriminating against another connecting line. Further, it would be unrealistic to assume that a preference in favor of UP is necessary to protect it against possible discrimination caused by the natural free competition of the Rio Grande.—Id., 328 I.C.C. 345 (354-5)*.

Furthermore, when condition (e) was included in the 1923 order, there was practical justification for it, considering Rio Grande's physical inability to compete for transcontinental business, and its acquiescence in the condition and other provisions at that time; but now it has achieved that similarity of transportation conditions which under the Act requires equality of treatment of it with Union Pacific as connecting lines of Southern Pacific at Ogden. And, fact that considerable traffic of every nature that is interchanged between respondents at Ogden required the construction of facilities therefor is not conclusive, for the Overland line is not the only route operated by them; thus, the sums of money claimed to have been spent by respondents can hardly be charged exclusively to the development and operation, pursuant to the Pacific Railroad Acts, of the Overland route. In view of changed circumstances, condition (e) is no longer just and reasonable. Modification, approved.—Id., pp. 349, 356-8.

Railroads' acquisition of joint and equal control of small switching and terminal line through purchase of stock by their newly created railroad subsidiary approved subject to imposition of employee-protective conditions and gateway conditions. Commission's jurisdiction retained for possible future inclusion of another rail carrier as joint owner if found to be consistent with the public interest.—Norfolk & W. Ry. Co.—Control —FP&E Co.—Purchase, 330 I.C.C. 672 (682-3).

Approval of control is conditioned on cancellation of provision of stock-purchase agreement found to constitute an assumption by acquiring carrier of obligation and liability, within meaning of §§20a and 214, on certain promissory notes of acquired carrier; or, alternatively, acquiring carrier may file appropriate application under §214 and defer consummation of the transaction until it is granted.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (479).

Approval of multiple State carrier's acquisition of control of single-State carrier, through purchase of latter's capital stock, is subject to the condition that operating rights of both applicants (including those to be issued to acquired carrier in related application proceeding) which in any way duplicate the other's rights, shall be cancelled coincidentally with any act or transaction resulting in any portion of such rights being controlled by a person who does not simultaneously obtain control of the corresponding duplicating rights. Imposition of such conditions being predicated on avoidance of possible temptation to sell off duplicating general commodity rights of applicants to a third party prior to contemplated merger, termination thereof would follow approval of a merger of the carriers.—Transport Motor Exp.—Control—Capitol Freight Lines, 97 M.C.C. 721 (728).

Applicant Leaseway, a noncarrier corporation controlling approximately 125 other corporations including seven motor carriers, proposes to purchase all the outstanding capitol stock of Refiners Transport & Terminal Corp., a motor common carrier; and contingent thereon Refiners proposes to purchase portion of the operating rights of Mitchell Transport, Inc. However, since Leaseway proposes to obtain the necessary funds from its subsidiaries through advances, cash dividends, or on open accounts, since information as to the amount and method to be used in securing these funds cannot be determined until near the time of consummation, and since information concerning these funds, insofar as any effect on the carrier subsidiaries involved, is essential in considering this transaction, approval is conditioned on filing an appropriate petition with the necessary information.—Refiners Transport & Term. Corp.—Purchase—Mitchell, 101 M.C.C. 611 (612, 614-6).

On further consideration and contingent on consummation of concurrently approved merger into applicant of its six carrier subsidiaries, proposed control by applicant of Refiners Transport, Inc., and Equipment Sales & Service, Inc., through purchase of all the outstanding capital stock, approved. However, despite supplemental evidence concerning Refiners' operations, some of its rights are dormant; therefore, only the rights specified, as to which no supplemental or other data was submitted, should be canceled as a condition to approval—Schwerman Trucking Co.—Control and Merger, 101 M.C.C. 679 (683-5)*.

Commission, in accordance with its regulations governing applications for common control of carriers having duplicate operating rights stated in *Control* 109 MCC 448, approved application herein on condition that applicants submit a plan for elimination of such duplicate rights; submit reports on the developments of such plan; and provide that such rights not be severed from common ownership.—Western Gillette, Inc.—Control—Desert, 109 M.C.C. 514 (520)*.

See also Eazor Express, Inc.—Control and Merger Case, §5(2), n. 45.

Other than stock ownership: [Vols. 19, 21].—Application of noncarrier individuals, who manage (and own 48 percent of stock of a regulated motor carrier, for authority to acquire control of applicant carrier through management, denied when applicants' proposed management arrangement is found inconsistent with the public interest. Most compelling reason for such finding of inconsistency with the public interest is the Commission's well established policy against creation, preservation, or extension of duplicate operations by separate motor carriers under common control, which operations (except for the common control) would be competitive; and fact that one commonly controlled carrier would be performing regular-route general commodity service, and the other would be an irregular-route carrier of specified commodities, does not warrant departure from that policy.—Weiss—Control—Hart & Clark Transfer Co., Inc., 97 M.C.C. 682 (685-6).

The question of control, or the power of control, is one of fact which must be resolved by examination of the special circumstances present and the actualities of the intercorporate relationships resulting from approval, in light of the meaning of "control" as defined in §1(3)(b) and used in §5. Here, Greyhound would at least have the power to exercise control over the affairs of the new company to be formed and one of the companies to be acquired by it because of: (1) the purpose of the transaction—to assure Greyhound that its friendly connections utilized in part for its east-west through-bus operations would be preserved; (2) the terms of the agreement—whereby Greyhound, by virtue of its 40 percent ownership in the new company, and the provisions in the agreement and the articles of incorporation which, in effect require Greyhound's assent in those corporate actions requiring more than a majority approval of the stockholders, and Greyhound's right of first refusal on the sale of the new company's stock; (3) Greyhound's financial strength and (4) its right to withhold vital interline traffic.—Jefferson Lines—Purchase—Jefferson Transportation, 104 M.C.C. 497 (504-505).

Greyhound effectuated control and management of Oklahoma Transportation Company and its affiliates in violation of §5(4) and §7 of the Clayton Act in view of the total factual situation here presented. While Greyhound only controls 45 percent of the stock of Oklahoma, its 5 year option to purchase the remaining 55 percent could be used as one of several weapons held by Greyhound to keep the majority stockholders in line. Additionally, Oklahoma and its affiliates' routes are surrounded by those companies which are either complainants herein or affiliated in some way with Greyhound. Those carriers must therefore maintain friendly relations with one group or the other (or both) in order to enjoy interline traffic. Here, the sum of the elements equals control within the meaning of the Act.—Transcontinental Bus System v. The Greyhound Corp., 104 M.C.C. 524 (526-27).

Violations of §5(4): [Vols. 19, 21].—Whenever an applicant seeks authority to acquire control of a railroad after it has already acquired some measure of control without prior Commission approval, the conflict between §§5(2) and 5(4) must be resolved. Since denial of a §5(2) application because of a §5(4) violation may deprive the public of important transportation benefits, while approval of a §5(4) *fait accompli* rewards the lawbreaker, the Commission weighs the flagrancy of the violation in determining whether proposed control transaction will be in the public interest. A balancing test is applied by the Commission; and the preference for denying control authority to violators of §5(4) "will give way to a clear showing of public interest in approval" [371 US 115]; thus, mere similarity in degree of flagrancy of a violation as between cases does not decide the issue since public benefits of control may be greater in one case than in another.—Illinois Central R. Co. v. United States, 263 F. Supp. 421 (425-6)*.

While neither the negative character of considered unlawful control nor the self-imposed restraint of defendant railroad (control applicant) are relevant in determining whether there is a violation of §5(4), both factors may be considered in determining flagrancy thereof; the Commission considered them to be mitigating factors in instant proceeding; and there is sufficient evidence of record to support its conclusions minimizing applicant's §5(4) violation and maximizing the public benefit flowing from proposed control. The Commission's finding that the control application need not be denied simply because of the statutory violation, since applicant was not a flagrant violator of §5(4), was not arbitrary or in conflict with the law and is supported by substantial evidence of record; sustained.—Id., pp. 426-30.

Preceding creation of voting trust, control applicant clearly possessed the power to prevent a two-thirds majority of acquired carrier's class A stock from being voted at any stockholder's meeting, thereby blocking stockholder assent to various corporate transactions such as mergers, leases and sales. Although this power was not exercised nor was there an attempt to influence acquired railroad's management, the "power to exercise control" is within the meaning of the proscribed "control or management" and is in violation of §5(4). However, from and after voting trust was put into effect, applicant has had neither control nor power to control the affairs of considered railroad, and by its terms, voting trust was adequate to divest acquiring carrier of any power to control or manage said railroad. There is no requirement in law to hold a voting trust inadequate based on applicant's failure to obtain Commission's imprimatur prior to its effectuation rather than in the terms of the trust agreement or in its execution; however, to insure avoidance of unlawfulness carriers are advised to seek Commission's prior approval of voting trust.—Missouri Pac. R.

Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (317-8, 320)*.

Further, where voting trust is irrevocable for 10 years, or until all securities are sold by bank (trustee) to person not affiliated with Mo-Pac, or until bank receives Commission's order authorizing Mo-Pac to acquire control of C. & E. I. or authorizing bank to release securities for any reason, there is no affiliation between bank and acquiring railroad within the meaning of §5(6).—Id., pp. 319, 321.

"Control" encompasses every type of control in fact as well as control effectuated by means of corporate and legal devices. Thus, where vendee's major stockholder caused vendee to assume custody of vendor's equipment and records, hired one of latter's owners (a past employee of vendee) to return to vendee's employ, negotiated a large loan for vendor, caused one of his subsidiaries to take title to vendor's terminal, and attempted to revitalize vendor's operating rights through spurious interline arrangements involving preparation of false freight bills and false equipment leases, such actions (and his admissions to the Commission's representative) constitute ample grounds for concluding that control in a common interest was effected notwithstanding fact that the revitalization plan was abandoned. Also, subsidiary's purchase of vendor's terminal constituted partial consummation of the transaction, begun prior to appointment of vendor's receiver and continued with certain modifications, without Commission approval in violation of §5(4). All such existing control over vendor's properties ordered terminated.—National Freight, Inc.—Purchase—Pittsburgh Wheeling Exp., 97 M.C.C. 642 (654-5, 663).

Although applicant proceeded to consummate considered transactions without first obtaining Commission approval as required under §5, in violation of §5(4), the Commission found that, if otherwise in the public interest, under existing circumstances approval of proposed transaction should not be withheld. Applicant had retained a practitioner, who after filing instant application, was seriously injured, and who advised applicant that if no protests were filed, Commission approval would be routine. Applicant, unable to see or talk to the practitioner, merely acted on his advice on being advised that no protests had been filed. Approved.—LaCasse—Control—Interstate Exp., Inc., 101 M.C.C. 567 (569-70)*.

Vendee's control of vendor was not in violation of §5(4), since in computing the number of vehicles utilized collectively by applicants the number of trip leases per month is divided by the number of days in the month to arrive at an aggregate daily average number, and this figure is added to the number of vehicles under permanent lease without regard to the number of times per month these vehicles were used; thus for the months preceding the assumption of control by vendee less than 20 vehicles were operated and therefore applicants were not required to seek approval under 5(10).—Sawyer Transport, Inc.—Purchase—R. C. Wilson, 104 M.C.C. 233 (245-46).

A proposed transaction, objectionable because common control by an individual or group of two or more companies providing duplicating service would result, may be approved if one company is merged into the other. Herein, because applicants indicated their intention to merge the operations of vendor Bulk Motor with those of applicants, the objection of common control is alleviated and the application is approved. —Peterlin—Control—Bulk Motor Transport, Inc., 109 M.C.C. 705 (706-7), 710).

See also B. F. Goodrich Co. v. Northwest Industries, Inc., n. 5 above; Buckingham Transp., Inc.—Control and Merger, n. 52 below, n. 110 fitness of applicants, below; Consolidated Freightways Corp. of Del.—Control, §5(4), n. 1; Red Arrow Securities Corp.—Investigation of Control, §5(2) revenues; Washum v. United States, 28 USC §2325, n. 40.

46. By a noncarrier.—[Vols. 12-19, 21].—Statute does not require that a noncarrier's acquisition of two or more carriers take place in any one day or at any one time to come within "transactions" which require Commission approval. The Commission has the expertise to examine knowingly the complex transactions involving services, rates and inter-relationships of carriers within its regulatory sphere; and facts presented, on application by a noncarrier (that had recently acquired control of one carrier without prior approval) for authority to acquire control of a second carrier, exemplify a situation which needs expert, knowing interpretation by the Commission. On the record, the Commission had ample evidence before it to conclude that proposed control of household goods carrier could not be separated from applicant's recent acquisition of another such carrier since, especially in view of the relationship between the two carriers, only a single transaction was involved; and fact that the purchases did not occur at the same time does not change that result. The Commission's denial, because only a portion of the transaction was presented for its approval, sustained.—Smyth v. United States, 293 F. Supp. 387 (391-2)*.

48. Purchase.—[Vols. 11-19, 21].—While Commission's previous order (324 ICC 1) contemplated acquisition of control through stock exchange, considered authority to acquire control by stock purchase, although changing the means, may, in fact, facilitate and assure completion of applicant's control of the Wabash system. Control of two Wabash subsidiaries by applicant through purchase of their stock, authorized.—Norfolk & W. Ry. Co.—Control—Lake Erie & F. W. R. Co., 328 I.C.C. 219 (222).

Commission approved this novel transaction wherein a railroad was purchased by a corporation formed by its employees, subject to certain conditions (see pages 94-100), inasmuch as such transaction will keep the involved railroad operative as required by public necessity.—North Western Employees—Pur.—Chicago & N.W. Ry. Co., 342 I.C.C. 58 (101-2).

On further consideration the Commission approved considered application after applicants further amended their proposed transaction: the approved modified plan involved merger of initial vendee (Transport) into Parkhill Truck Co. (commonly controlled with Transport and with similar operating rights to those of vendor); and the substitution of Parkhill as vendee. This proposal is satisfactory, since duplication of operating rights in vendee presents no problem, as under instant findings such duplications will be eliminated.—Ind-O Transport, Inc.—Purchase—Niman Transfer & Storage, 101 M.C.C. 593 (595-7)*.

Considering all circumstances, price for purchase herein does not appear unreasonable as Commission has consistently held that a price arrived at by contracting parties as a result of arms' length bargaining is entitled to great weight unless contrary is established by definitive evidence.—Consolidated Freightways Corp. of Del.—Control, 104 M.C.C. 658 (660-1)*.

Application herein approved inasmuch as the procedural defect (failure of all parties in control of applicant to join the application) which required denial in the initial report, 104 MCC 578, has been corrected.—Illinois-Calif. Express—Purchase—Ariz.—Utah, 104 M.C.C. 815 (817-8)*.

Applicant, a non-carrier affiliated with a railroad in Hawaii, was allowed to buy a truck line in Ohio. The purpose of §5(2)(b) is to protect competing motor carriers from dual competition of an all-motor service in addition to rail service. It was found that the distances involved between the rail and motor carriers prevented the normal prescription of restrictions for protecting motor carriers inasmuch as the grant of authority had not and probably will not result in undue restraint of competition and the public interest requires the proposed operation.—Propane Transport, Inc.—Pur.—Propane Transport, 109 M.C.C. 384 (387-90).

The financial results flowing out of the temporary operations conducted by vendee and the absence of provable detrimental effect to protestants warrant approval of this transaction. Although not controlling, operations under temporary authority are properly to be considered in determining whether the service resulting from our approval of a transaction under §5 will have a destructive effect.—Caravan Refrigerated—Pur.—Bilyeu Refrigerated, 109 M.C.C. 843 (855).

See also Consolidated Copperstate Lines v. United States, n. 126 below; Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase case, n. 45 above.

Conditions imposed: [Vols. 19, 21].—While the Commission need not impose restrictions stipulated between applicants and protestants in §5 transactions, imposition of proposed condition on transfer of vendor's contract carrier rights as a vessel furnisher, that vendee's chartering of vessels to noncarriers be limited to boats and barges owned by it, is warranted. There is no evidence that vendor has actively engaged in chartering vessels from other persons for the benefit of still others, thus acting as a conduit for the chartering of vessels, or that there is any need for such service which would warrant the transfer of such a right to vendee when it would result in introduction of virtually a new service in competition with that offered by protestants. Further, vendee has no desire to engage in such conduit operations, and it would be singularly anomalous to impose on it an unwanted duty to engage in operations which would provide detrimental competition to protestants.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (269).

As conditions to its approval of involved transactions, Commission provided certain provisions as regards loan availability; protection of minority shareholders; future acquisitions; powers and limitations of trustees; payment of cash dividends; and contingent liability of vendor.—North Western Employees—Pur.—Chicago & N. W. Ry. Co., 342 I.C.C. 58 (73-93).

Since vendee's majority stockholder holds a forwarder permit, proposed purchase would result in control of vendors' operations by a forwarder, within prohibition of §411(a)(1), and may not lawfully be accomplished notwithstanding exception from that prohibition of carriers' acquisitions of control of other carriers under provisions of §5. Purchase approval is therefore conditioned to require that concurrently with consummation the forwarder permit be either canceled or, with the Commission's prior approval, transferred to another person.—Glendenning Motorways, Inc.—Purchase—Moland Bros. Trucking, 93 M.C.C. 194 (199).

In approving purchase of operating rights and acquisition of control by vendee, previously unrestricted purchase rights are restricted against service by vendee between points in Pennsylvania. If such condition was not imposed and if such operations were commenced and the bona fides thereof was challenged, time-consuming procedures, and perhaps extensive litigation would be required. However this restriction should not be construed as a bar to an application for Pennsylvania intrastate authority in the future.—Long Transp. Co.—Purchase—La Grou, 97 M.C.C. 631 (639).

In approving §5(2) purchase application the Commission held that although applicants are technically correct in declaring that vendor had no employees, it will not ignore the fact that there were "carrier" employees involved that were adversely affected as a direct result of this transaction; such employees should be afforded protection in the form of protective conditions.—Braswell Freight Lines, Inc. —Purchase—Shayler, 101 M.C.C. 1(11).

Vendee's overcapitalization does not constitute a bar to approval of proposed purchase since 50 percent of its total capitalization would be evidenced by stock, and its total investment in its wholly owned subsidiaries is included in capitalizable assets on a cost basis as compared with their net worth. Approval is conditioned however, on elimination of overcapitalization through non-payment of dividends by vendee to its stockholders or affiliated companies, and submission of evidence verifying amendment of its charter to reflect authority to issue necessary additional stock and the additional capital investment made by its new majority stockholder.—Refrigerated Transport Co., Inc.—Purchase—Kurtz, 104 M.C.C. 114 (117, 118).

Commission approved transaction herein as the question of vendee's financial fitness has been satisfactorily answered by its increased profitability and decreased deficits. Use of revenues from sale of vendor's equipment will eliminate major portion of indebtedness arising from this transaction but the Commission conditioned consummation of this transaction against vendee's declaration or payment of dividends unless the Commission finds that vendee is no longer overcapitalized.—Universal Transport, Inc.—Purchase—Muck, 109 M.C.C. 871 (879)*.

See also Eazor Exp., Inc.—Purchase—Fleet Highway Freight Case, Single-line service, below; Overnite Transp. Co.—Purchase—Rutherford Freight Lines, n. 70 below; Refiners Transport & Term. Corp.—Purchase—Mitchell Case, n. 8b above.

Denial, effect: [Vols. 12, 16, 17, 19, 21].—Commission approved transaction herein as vendor is facing potential bankruptcy and prompt sale of the involved operating rights is imperative if it is to avoid financial catastrophe inimical to the public interest.—Theatres Serv. Co.—Pur.—Dixie Highways, 104 M.C.C. 778 (782-3).

Discontinued operations: [Vols. 12-17, 19, 21].—In action to set aside the Commission's denial of plaintiffs' purchase application, substantial evidence of record supports its conclusion that proposed purchase was not shown to be consistent with the public interest when applicants (plaintiffs) failed to show that vendor had conducted active and continuous service under the purchase rights (both as to territory and commodities) and no public need was shown for vendee's operation of these rights. Record also supports Commission findings that the proposal contemplated sale of bare operating rights rather than those with active going concern value, and that their use in combination with vendee's rights would result in institution of a new competitive service to the detriment of existing carriers for which no need was shown. Denial of plaintiffs' application was not arbitrary, capricious, an abuse of discretion, or otherwise not in accordance with law; action dismissed.—Cooper Motor Lines, Inc. v. United States, 284 F. Supp. 754 (756-8)*.

In action to set aside the portion of Commission order approving plaintiff's proposed purchase of another motor carrier's operating rights and property which required cancellation of vendor's rights in both North and South Carolina, substantial evidence supports the Commission's conclusion that vendor's rights in those States were dormant and that no need for plaintiff's rejuvenation thereof was shown. While plaintiff urges that as a matter of law dormancy exists only where complete abandonment and discontinuance of service is shown, the concept of dormancy is not so rigidly circumscribed. A lack of substantial service to a representative number of points in the area involved may establish dormancy. Of necessity the test is elastic; and, since many factors must be considered, a simple tally of the number of shipments in a given period cannot determine dormancy.—Houff Transfer, Inc. v. United States, 291 F. Supp. 831 (834-5)*.

On the evidence presented, the Commission could properly find that vendor's operations in the Carolinas were insubstantial and its authority dormant in relation to the commodities and territory authorized, to its own over-all operations, to volume of traffic available for transportation, and to the traffic handled by plaintiff under temporary authority; also, substantial evidence supports its ultimate finding that public interest would not be promoted by authorizing plaintiff, through purchase of the rights, to institute new, unnecessary service. Thus, viewing the underlying facts in terms of vendor's insubstantial services or in terms of dormancy of its rights, it was not necessary to show that it had abandoned and discontinued service in those States. Considered as a whole, the record supports the Commission's decision that consistency with the public interest required cancellation of the dormant North and South Carolina rights as a condition to approving purchase of vendor's rights in other areas. Accordingly, since neither abuse of Commission discretion nor error of law is shown, the complaint is dismissed.—Id., pp. 835-7.

On review of all cases cited in action to set aside Commission orders denying plaintiffs' motor carrier purchase applications because the purchase rights were dormant, the court finds dormancy to mean an abandonment or termination of services the reactivation of which will result in damages either to the public interest or to intervening or protesting carriers who conducted operations during interruption of such services. The Commission's denial was based on its findings that operations ceased after first sale of the rights by bankrupt vendor's trustee and, concomitantly, an intent to resume operations in the future had no bearing on the fact of past dormancy, and that plaintiffs did not prove need for reinstitution of service thereunder; however, in 104 MCC 274, the Commission stated that dormancy is not an inflexible concept but, rather, one that must be evaluated in light of all surrounding circumstances and, in that connection, it is particularly significant that dormancy has never been applied to a temporary cessation of operations alone.—Arrow Transportation Co., Inc. v. United States, 300 F. Supp. 813 (815, 817-8)*.

While the Commission must be satisfied that operating rights sought to be transferred in a §5 proceeding were in actual use and not dormant, the court cannot ignore fact that, unlike cases in which dormancy was found and applications denied, there were no protestants in plaintiffs' application proceeding who testified as to existence, kind, and availability of their services. On the instant record, denial of the applications would serve no public or protestant interest; protestants offered no evidence to show that approval would cause them any harm, whereas interests of plaintiffs, their shippers and connecting carriers, and the creditors of bankrupt vendor heavily weigh the scales in plaintiffs' favor. Moreover, with respect to the law of dormancy as interpreted and applied by the Commission, an improper standard of law was improperly applied. Therefore, the Commission's conclusions must be set aside and the cause remanded for a hearing de novo in keeping with the court's opinion.—Id., pp. 817-8.

Densely populated off-route points at relatively far distances from vendor's regular routes have characteristics of principal or terminal points. As no shipments are shown to 9 of 13 such points in Maryland and Pennsylvania and only one each to the other 4, rights to serve those points must be considered dormant, notwithstanding substantiality of vendor's operations as a whole. No need is shown for vendee's service from 11 of those points, and limited shipper support does not justify revival of general-commodity operations from so large a community as Hagerstown to the wide territory involved. However, Cumberland shipper ships chemical products in vast quantities to applicants' territories and, if addition of vendee's service would overcome the deficiency in existing common carrier service, volume tendered such carriers might increase substantially. Approval is therefore conditioned on cancellation of authority to serve the 12 points other than Cumberland, with latter service restricted to shipments to and from points on the unified routes in North Carolina and authorized territory south thereof.—Carolina Freight Carriers Corp.—Purchase—Kilgo, 93 M.C.C. 543 (553-5)*.

And on reconsideration, following District Court's remand for further findings and conclusions on question of vendee's right to continue to serve Pittsburgh as a off-route point in conjunction with vendor's regular route between Kings Mountain, N. C., and New York City, vendor's abstract showing 5 Pittsburgh shipments is stated to be a 10 percent representative sampling over a 6 month period which, by normal projection, becomes 50 shipments. While that may not be so "substantial" as the traffic of other, more-active carriers, it is sufficient to negate any idea of dormancy or abandonment by vendor, and it may be found to have constituted reasonably active and continuous service. In addition, testimony of six shippers concerning their need for various types of service between Pittsburgh and the Carolinas, Georgia, and Florida is considered as augmenting and supporting prior Commission decision to authorize vendee to serve Pittsburgh under the unified rights, restricted to traffic to and from the four named southern States, on the basis of prior active service. Prior report clarified and affirmed.—Id., 104 M.C.C. 188 (191-2)*.

Since all but a minor portion of vendor's certificated charter rights are dormant, reactivation thereof by vendee would be inconsistent with public interest when there is no showing that existing regular-route passenger carriers, who have properly extended their services and facilites under the permissive authority of §208(c), are not satisfactorily meeting the public need for charter service in the area embraced by vendor's operating rights. As it is doubtful that the remaining rights would be of any significant value to vendee and its plans for future operations, especially as its parent company already holds authority under the incidental charter rights to provide all service that vendee could render under the small segment of vendor's rights found not to be dormant, and there is no indication that the transaction would be consummated on terms other than unconditional approval, purchase is denied in entirety.—Eagle Charter Bus Service, Inc.—Purchase—Eagle Bus Lines, 93 M.C.C. 705 (709-10).

Concerning irregular-route vendor's seasonal movement of canning materials and supplies, the Commission is cognizant of the fact that such traffic is generally not repetitive and continuous; consequently movement of a full range of authorized commodities in connection with every origin and destination area cannot be expected. Record supports conclusion that vendor's operations have been substantial and continuous.—H. C. Gabler, Inc.—Purchase—H. Earl Pitzer, Inc., 97 M.C.C. 535 (539).

In approving §5 purchase application, the Commission rejects protestants' contention that vendor's authority to serve intermediate points on its regular routes was dormant; evidence disclosed, that while vendor's service at those intermediate points had been substantially less active than at larger points it was authorized to serve, the limited service performed is sufficient to warrant a finding that the intermediate-point rights are not dormant.—Overnite Transp. Co.—Purchase—Rutherford Freight Lines, 97 M.C.C. 568 (575).

Irregular-route vendor's operating rights, territorial and commodity, which on basis of his past operations, both before and after negotiations with vendee were begun, are not dormant and purchase thereof is approved. And in determining the scope of vendor's past operations, evidence of operations built up after commencement of negotiations may be considered if it is clear that such build-up was free from prospective purchaser's control, influence, and domination.—Miami Transp. Co., Inc., Of Ind.—Pur.—Strothman, 97 M.C.C. 600 (604).

On reconsideration, since the test under §203(a)(15) that shipper must have a "distinct need" for a service is not the same as the §209 test of whether "public convenience & necessity" require the service, revitalization and transfer of a portion of contract-carrier rights found to be dormant in prior report is deemed to be consistent with the public interest when record shows that vendee's specialized, tailored service thereunder would meet individual needs of the two supporting shippers (currently being served by vendee on other traffic), whose operations are expanding, for a complete service under considered portion of vendor's rights.—H. Prang Trucking Co., Inc.—Purchase—Hyer Trucking, 97 M.C.C. 611 (614)*.

Sale of household goods authority approved, despite vendor's failure to show service to all its authorized points and combinations thereof. Since the transportation of household goods is a highly specialized service as compared to ordinary general commodity operations, the Commission does not require the same degree of proof of regularity of operations as is required with respect to transportation services unrelated to the household goods industry; issues of dormancy or sporadic operations are considered in light of the special problems encountered, with considerable weight being given to evidence of operations by a carrier commensurate with its facilities and financial abilities. Therefore, since record clearly shows that vendor actively solicited traffic to the best of its ability and that, despite limited operating facilities, it was able to show service to most of its authorized territory, any finding of dormancy with respect to vendor's rights precluded under standards applied to household goods operations.—Republic Van & Storage Co. —Purchase—Consolidated Van, 101 M.C.C. 93 (97-8).

As the record shows definite shipper interest and need, it is in the public interest to permit reestablishment of, and vendee to purchase, vendor's dormant operating rights. And although vendee motor carrier is controlled by a railroad, there is no indication that this transaction will unduly restrain competition, cause parent railroad to compete with itself or invade territory of other carriers; therefore, special circumstances exist to permit unrestricted motor carrier operations. Furthermore, although affected shippers are aware that parent railroad is controlled by another area shipper, they still strongly endorse this application. Thus, while the Commission generally denies an application where discrimination might result from a common control relationship between applicant and a controlling shipper, considered transaction approved.—McCloud River Trucking Co.—Purchase—Zamboni, 101 M.C.C. 131 (134-6)*.

In §5 purchase application where vendor's operations before entering into negotiations for sale thereof were substantially limited and then reestablished after its owners decided to sell, the Commission held that a carrier has the right to build up all or any portion of its operation, whether in anticipation of a sale thereof or otherwise, so long as it does not come under the unauthorized control, influence, or dominion of another carrier in doing so.—Associated Truck Lines, Inc.—Purchase—Marion Trucking, 101 M.C.C. 329 (355).

Although authority for vendor to purchase considered motor operating rights between Boston and Lawrence, Mass., was granted in 1959 and authority to purchase the other operating rights herein considered between Boston and Rochester, N.H., was granted in 1963, fact that operations under these rights (between Boston and Rochester via Lawrence) were not initiated by vendor until February 1964 is of little consequence in view of its active and continued operations thereafter, even though considered application was filed in February 1964. Absent proof that vendee participated in the revitalization of such rights, a vendor may stimulate or reactivate its rights for the purpose of sale.—Eastern Massachusetts Street Ry. Co.—Lease—Trailways, 101 M.C., 410 (413).

Under criteria laid down in proceedings which involve the transfer of irregular-route, special-commodity rights where questions of dormancy are at issue, a representative showing of service is necessary to support a finding that the questioned operations have been active; but a showing of transportation activity in all the territory involved is not required. The test of substantially is a flexible standard which should take into consideration the nature of the rights and the area of operation. And, as the nature of the commodity or service becomes more narrowly confined or specialized, greater leniency may be exercised in determining whether substantial operations were conducted within the authorized territory; and, in matters such as these, repetitive or continuous traffic between each and every origin and destination point or area cannot be expected.—Lester C. Newton Trucking Co.—Purchase—Buglio, 101 M.C.C. 480 (483)*.

Thus, it is the Commission's opinion that with few exceptions the over-all operations performed by vendor, viewed in light of its size and history are sufficient to negate any contention of dormancy. While there is evidence of scant movement inbound to New Jersey, the nature of vendor's inbound rights in relation to its over-all service, the variable origins, and the seasonal nature of the transportation services required for the considered commodities are such that it would be inappropriate to dismember the rights to the extent of leaving in effect authority to conduct only one-half of a complete service. Vendor's authority to New Jersey points is generally from the same origins served outbound as destinations and embraces primarily the commodities used by the same food processors served outbound.—Id., p. 485.

Moreover, in light of vendee's temporary lease of vendor's operations, the effect of this transaction on competing carriers would be minimal. Vendee, prior o the commencement of temporary lease operations, participated in joint service involving shipments from Salisbury, Md., Philadelphia, Pa., and New York, N.Y., to points in Pennsylvania, New York, Massachusetts, Connecticut and Rhode Island. And unification of vendor's operating rights, as exemplified by operations conducted under temporary authority, would permit a continuation of such transportation in single-line operation, resulting in an improved, rather than a new, service.—Id., pp. 485-6.

In purchase proceeding involving question of dormancy of part of the purchase rights, the main issue is the scope of operations under vendor's rights. Although exhibits reflect mostly shipments moving after negotiations between the parties had begun, and, as to a portion of the operations, even after the contract was signed, there is no evidence that any of that traffic was the result of any control, influence, or domination of vendee; thus applicants' exhibits are entitled to full consideration.—Leonard Bros. Transfer, Inc.—Purchase—Ace—R. B. Van Lines, 101 M.C.C. 649 (651).

And though one exhibit consisted of trip manifests, rather than an abstract supported by freight bills, it was entitled to full consideration in refuting an allegation of dormancy when it consisted of records kept in the ordinary course of business. In addition, shipments moving through a gateway point are entitled to consideration; fact that no movements were shown to have originated or terminated at that point is of no importance.—Id., pp. 652, 653.

Where the record establishes that little or no service has been conducted under portions of vendor's rights, the mere holding out for, and solicitation of, traffic by vendor is not sufficient in and of itself, to obviate a finding that those rights are dormant. Evidence of past operations, coupled with shipper testimony establishes need for continuance of vendor's service as to certain segments of the purchase rights; however, absent other evidence of public need, cancellation of dormant portions of applicant's operating authority is warranted to preclude detriment to the operations of existing carriers who have been performing similar service to the public and to prevent the possible creation of a surplus of transportation in the areas involved.—Refrigerated Transport Co., Inc.—Purchase—Kurtz, 104 M.C.C. 114 (123).

Vendor-lessee's operations do not merit being considered as unlawful leasing of operating rights and therefore dormant despite the technical violation that inspections of lessor's vehicles at the point of interline were performed by an employee of lessor; the evidence does not disclose that vendor's sole stockholder was aware of the inspector's employee relationship with lessor and apparently vendor had relied on lessor, an established motor carrier, that the inspector was a person who could perform the equipment inspection on behalf of vendor. Further, mitigating circumstances are present in that the stockholder of vendor lacked familiarity with the motor carrier industry and there is an absence of any evidence of willful or deliberate intent to evade motor carrier regulations.—Sharpe Motor Lines, Inc.—Purchase, 104 M.C.C. 127 (132-33).

In light of the number of shipments handled by vendor and considering its limited facilities and the restricted scope, territorially, of its operating rights, vendor has rendered a continuous competitive service to the extent traffic was available at a representative number of points within its territory.—Interstate Motor Freight System—Purchase—Eaton Truck, 104 M.C.C. 248 (254-55)*.

On reconsideration, vendor's operating rights are found to be not dormant, in view of the unique factors surrounding its past operations: the sporadic nature of vendor's operations between 1958 and 1964 is explained and mitigated in some measure by the fact that the federal government is the sole purchaser for the commodities involved, that service for that purchaser hinges on an ability to outbid other carriers and that the phasing out of purchases has resulted in the closing of six of the nine sources of supply; post-1964 operations were conducted by vendor under a lease arrangement with vendee that has not been shown to be other than bona fide, and does not constitute a revitalization of long-interrupted services with a view toward activating a certificate for purposes of a §5 transaction.—Moab Truck Center, Inc. —Purchase (Portion)—W. T. Hall, 104 M.C.C. 274 (277-78)*.

To overcome apparent dormancy, applicants must show a real need for service and not just a preference for the service of applicants. Testimony of shipper failed to indicate that adequate service was difficult to secure from other carriers including protestant, or that the service offered was inferior, the supporting shipper merely indicated preference for vendee's service. Denied.—Ruffalo's Trucking Service—Purchase —Worster, 104 M.C.C. 593 (597-8).

A highly specialized carrier is not expected to show extensive operations under any particular grant of authority, but portions under which no operations at all have been conducted are dormant and should be canceled absent a showing of shipper need therefor. The burden was on applicants to identify the segments to which shipments in its abstract pertained or show need for inactive rights, which they did not do. While individual segments will not be fragmented as to territory or commodities, totally dormant segments must be canceled as a condition to approval.—Chemical Leaman Tank Lines,, Inc.—Pur.—Ryder, 104 M.C.C. 686 (700-703).

Intermediate points between Louisville, Ky. and Nashville, Tenn., (with two exceptions) cancelled as a condition to approval based upon evidence by protestants, two small distribution carriers, that vendor did not serve the intermediate points but rather interlined with them for service to those points, a practice that had been discontinued when vendee took control of vendor under temporary authority.—Theatres Serv. Co.—Pur.—Dixie Highways, 104 M.C.C. 778 (780-781).

Where vendor has suffered economic setbacks and daily faces loss of equipment through repossession by chattel mortgage holders such factors may be considered in the determination of rendition of substantial operations under the rights sought to be transferred. Under such circumstances vendor's showing of activities consisting of 326 shipments within Texas in cited period is adequate to meet the requirement. Such service may include service to a single large point. Approved.—Red Arrow Frt. Lines, Inc.—Purchase—Galveston, 104 M.C.C. 820 (823-4).

Where vendor is shown to be serving the supporting shipper under recently granted specialized authority, the test of substantiality should not be applied too stringently.—Northern Motor Carriers, Inc.—Purchase—Bonded, 109 M.C.C. 61 (66)*.

Although most of involved traffic was in one direction, 91 percent interchanged at Milwaukee, and 54 percent of single-line shipments were less than 10,000 pounds each, vendor found to have rendered service consistent with its abilities and resources and its rights may not be considered dormant. Substantial support of shippers, freight forwarders and motor carriers for continuation of vendor's services a factor in considerations. Transfer of such rights approved.—Schneider Transport & Storage, Inc.—Pur.—Lavery, 109 M.C.C. 479 (483-4).

Protestant's allegation, that vendor's authority had long been dormant, and that his service had been reinstituted as a result of the influence and domination of the vendee, found to be without merit. Applicants have shown that they are free from domination by vendee by showing that they have conducted an independent, although coordinated, operation. Approved.—Old Colony Transp. Co.—Pur.—Holden, 109 M.C.C. 487 (492-3).

Vendor testified it had handled two household goods shipments in the past two years but did not have available any supporting documents evidencing such shipments. Commission concluded that evidence of two shipments during a two year period, even if properly supported by underlying documents, did not indicate active utilization of the involved rights. Accordingly, approval of the transaction was conditioned upon cancellation of vendor's household goods authority.—Dodds Truck Line, Inc.—Purchase—Handy, 109 M.C.C. 533 (534-5).

Finding of dormancy not warranted herein as vendor's operations under household goods authority had been commensurate with their ability and resources and had been continuous for 40 years until ill health forced owners' retirement and sale. Purchase approved.—Weathers Bros. Transfer Co., Inc.—Purchase, 109 M.C.C. 647 (651-2)*.

Commission held, with respect to vendor's retained rights recommended to be cancelled, that the issue was not whether movements over the routes could be moved "logically", but rather, whether the test of substantial operations, stated in *New Dixie*, 75 MCC 659, had been met. Commission found that evidence of vendor's past operations successfully met such test and it was unnecessary to pass upon the question of cancelling retained rights which did not create a duplicate rights situation. Approved.—Yellow Freight System—Pur.—Norwalk Truck Lines, 109 M.C.C. 672 (674-6).

Where a carrier has been conducting active and continuous operations throughout its authorized territory, it is not compelled to submit evidence of service to and from all authorized points in its service area to justify a conclusion that such operations have been of a substantial and continuous nature. See *O'Donnell's*, 104 MCC 161, record of applicant herein is sufficient to disprove a finding of dormancy. Purchase approved.—Mid-American Lines—Purchase—Five J Motor Service, 109 M.C.C. 753 (756).

Commission found rights sought to be purchased were dormant and vendee did not produce sufficient shipper testimony of a public need for the proposed service to warrant reinstitution of dormant operations which is, in effect, not unlike the institution of a new service.—Arkansas-Best—Purchase—Indianhead, 109 M.C.C. 885 (889).

See also Fogarty Bros. Transfer—Purchase—Transport Van Lines, n. 115, below. Refrigerated Transport Co., Inc.—Purchase—Kurtz, n. 115 below.

Dual operations: [Vols. 14, 16, 18, 19, 21].—Recently organized corporation's purchase of vendor's contract carrier rights cannot be approved when, immediately upon consummation of proposed transaction, management of vendee would be assumed by one stockholder who currently holds common carrier authority to transport the same commodities in the same general area. Although, in some cases where objectionable aspects of resulting dual operations could thereby be minimized or removed, restrictions have been placed on operating rights involved, common carrier's requested cancellation of part, and restriction of part, of his authority would not satisfy requirements of §210, would be inconsistent with his duty to serve the public to extent of his certificate, and, also, would complicate enforcement by the Commission.—Milton K. Morris, Inc.—Purchase—Morris, 97 M.C.C. 544 (545, 547-8).

Dual operations approved inasmuch as the named cement producer served as a contract carrier is not and could not be considered a potential consignee or customer for such limestone to be transported under common carrier authority as the said limestone is economically and chemically unacceptable to the cement producer. Because this commodity is different from those transported under Northern's permits, and operations will not be conducted for the same shippers, there appear to be no opportunities for discriminatory practices.—Northern Motor Carriers, Inc.—Purchase—Bonded, 109 M.C.C. 61 (64)*.

Interchange: [Vols. 19, 21].—Purchase application (MC-F-10077) embraced herein was denied inasmuch as vendee had not interlined with vendor in the past nor with any other authorized carrier operating over the routes between the points sought to be purchased, vendee Bruce Motor Freight's use, in connection with its authorized operations, of those routes, if acquired, would be so dissimilar to operations performed in the past by vendor as to amount to the institution of a new competitive service by vendee, without public support. East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (311-2).

Intrastate operating rights: [Vols. 12, 14, 15, 17, 19, 21].—In approving interstate carrier's purchase of rights and property of Tennessee intrastate carrier that conducts interstate operations under certificate of registration and directly related §207 application for grant of certificate to vendee to continue vendor's operations and service the Commission held that close business relationships do not conclusively show that two carriers are managed in a common interest by their owners.—Mason & Dixon Lines, Inc.—Purchase—Volunteer Motor, 97 M.C.C. 780 (795).

In a §5 proceeding to acquire interstate operations performed by vendor under §206(a)(7), and to convert them to certificated operations, scope of the operations that can be performed under the underlying intrastate rights should not be changed if such authority and the interstate service being performed thereunder affords support for the issuance to vendee of a certificate of public convenience and necessity corresponding to the intrastate operations being purchased. On the other hand, scope of the operating authority to be reflected in such a certificate issued to the vendee should not exceed the scope of the operations authorized by vendor's intrastate authority. In addition, as in the case of operations under partial exemption of former second proviso of §206(a)(1), scope of the actual interstate operations performed by vendor must be examined to assure that the certificate issued to the vendee does not exceed the scope of the actual past lawful operations. Purchase approved.—Lake Shore Delivery, Inc.—Purchase—Durst Delivery, Inc., 97 M.C.C. 623 (627-628).

Applicants' contention that the Commission should be governed in its determination of this application by the Alabama Commission's approval of the transfer to vendee of vendor's underlying intrastate authority, which supports considered interstate authority, is without merit. Any action by the Alabama Commission respecting the transfer of intrastate rights is not controlling or determinative of any action before this Commission in proceedings of the nature here involved.—Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, Inc., 101 M.C.C. 368 (372)*.

Separation of operating rights is no ground for denying the transaction if the parties responsible for the separation are not before the Commission; thus vendor's prior sale of its intrastate rights to Apex Fast Freight, Inc., is not grounds for denying the proposed purchase of vendor's interstate certificate because vendor is no longer controlled by the party who was in control at the time of the sale of its intrastate rights.—Interstate Motor Freight System—Purchase—Eaton Truck, 104 M.C.C. 248 (257-58)*.

Situation wherein sale by vendor of corresponding intrastate operating rights to another which had been registered under the second proviso of §206 (a) creating duplicate operations was eliminated by the repeal of the second proviso. Procedural safeguards now exist to prevent the registration of newly acquired intrastate operating rights by a one-State carrier until the State Commission finds that public convenience and necessity demands their use in interstate service also which decision is subject to review and countermand by this Commission.—Illinois-Calif. Express—Purchase—Ariz.-Utah Express, 104 M.C.C. 578 (585-7).

Reformation of operating rights into consolidated route description found justified to avoid the imposition of a confusing restriction, and the transfer of two separate segments of involved routes.—Schneider Transport & Storage, Inc.—Pur.—Lavery, 109 M.C.C. 479 (484).

Operating rights: [Vols. 14, 16, 18, 19, 21].—Commission authorized the transaction herein, finding that vendor's retention of irregular-route authority, similar to a portion of its regular-route authority to be sold, by virtue of its continuing control of its subsidiary would not be violative of the public interest inasmuch as the rights of the two carriers were not merged, and their operation was separate and distinct over the routes in question.—Fredrickson Motor Express Corp.—Purchase—Cope, 104 M.C.C. 670 (673-4).

Public Interest: [Vols. 14, 19].—In determining whether approval of purchase application would be consistent with the public interest, the interest of carrier employees is only one of matters to be considered. While protesting union alleges that the public interest would not be served by permitting non-union vendee to acquire operations and facilities of vendor, a unionized carrier, because vendee's possible past participation in anti-union activities makes it "unfit", such a finding would not be justified even if the alleged activities were proven. In any event, in view of vendor's declining traffic and revenues and its substantial deficits which, if continued, could only result in its demise as a carrier, the Commission cannot determine how denial of the application could be consistent with the overall public interest, including that of vendor's employees. Moreover, no weight may be given to union's offer to negotiate on lessening of labor costs in order to permit vendor to stay in business when record does not show how such reduction would be accomplished or how it would alleviate vendor's financial condition or restore its declining traffic and revenues. Approved.—Overnite Transp. Co.—Purchase—Rutherford Freight Lines, 97 M.C.C. 568 (575-7).

Proposed purchase of Alton & S. R. Co. (A&S), a terminal and switching carrier, by the Missouri Pac. R. Co., subject to the inclusion of three named carriers, was approved as such purchase would ensure continuation of vendor's interchange operation which is of critical necessity for shippers, railroads, and the general public in the maintenance of a sound transportation system. However, the sole ownership of the A&S by St. Louis SW Ry. Co. (SSW) as a separate corporation is not in the public interest as A&S would become an extension of the purchaser's line thereby according SSW a definite detrimental competitive advantage over other railroads using A&S's terminal line services; denied.—St. Louis SW Ry. Co.—Pur.—Alton & S. R., 331 I.C.C. 515 (533-35).

Dual ownership of terminal lines which act as agents for owner line-haul carriers is not uncommon *(Toledo,* 295 ICC 523). Such dual ownership resulting from approved purchase herein does not produce a conflict of interest as would derive from ownership by one railroad in two or more competitive line-haul carriers.—Id., p. 538-9.

Routes: [Vol. 19].—The exception to the hearing examiner's recommended report by the applicant was used to amend the request for authority, seeking to cancel that portion which resulted in duplications. Protestants were consulted prior to filing of the exceptions, and did not file replies. It was found that the proposed amendment cured the objections of the hearing examiner to the transaction. Approved.—Red Star Express Lines of Auburn—Purchase, 109 M.C.C. 51 (52-3).

On reconsideration, Commission approved transaction herein inasmuch as the realities of the situation and paramount public interest in continued efficient and economical operations permit vendor's retention of the segments not duplicated by service routes sold to vendee or acquired from a carrier controlled by vendor. Findings conditioned upon consummation of merger authorized in another proceeding.—Rumpf Truck Line, Inc.—Pur. (Portion)—Dundee Truck, 109 M.C.C. 893 (901)*.

Single-line service: [Vols. 12, 14, 16-19, 21].—On reconsideration of an appellate division's decision, the entire Commission found that "joinder" restriction, prohibiting with exceptions the tacking of vendor's operations to those of vendee, should be eliminated. The evidence clearly shows that, as a result of intensified competition evolving from the conversion of joint-line to single-line service, the compensatory benefits which the public will derive outweigh any possible detriment that might be incurred by the protestants. Furthermore, the Commission noted that restrictions against the joinder of operating authorities are cumbersome and lead to undesirable complications and to justify imposition of such a restriction opposing carriers must show that its nonimposition would have a material adverse effect upon their operations.—Eazor Exp., Inc.—Purchase—Fleet Highway Freight, 101 M.C.C. 719 (722, 25)*.

See also Lester C. Newton Trucking Co.—Purchase—Buglio Case, *Discontinued operations* above.

Speculation: [Vol. 21].—Vendor's sole stockholder, a certified public accountant, is not a regular or professional trafficker in operating rights despite admissions that he acquired vendor's stock for investment and resale. Such admissions suggest an unawareness of the Commission's attitude respecting trafficking or that buying or selling of motor carriers differs from purchase and sale of unregulated businesses. Further, his honest and bona fide attempt to operate vendor negates the charge of trafficking regardless of the slightly tainted interline arrangements entered into between vendor and protestant's predecessor.—Sharpe Motor Lines, Inc.—Purchase, 104 M.C.C. 127 (132).

Violation of Act: [Vols. 13-15, 19, 21].—Since the Commission's jurisdiction under §5 extends to all phases of the transaction, including sale of vendor's floating equipment and real estate holdings, and not merely to transfer of its water-carrier permit, consummation of sale of the physical properties without prior approval violated §5(4). However, as vendee apparently acted in good faith under a misinterpretation of §5 and has confined its operations with vendor's equipment to exempt towage and exempt charters, the violation does not justify denial.—Ingram Corp.—Purchase—Barrett Line, Inc., 320 I.C.C. 263 (266, 267, 268).

Past violations are not in all circumstances a bar to approval of §5 applications and the significance thereof depends on their quantity, duration, and nature. Record of frequent violations by vendee and its major stockholder, which spans many years and involves misrepresentations to the Commission, rate concessions, unauthorized operations, and leasing and inter-change infractions, clearly shows (1) that vendee's many violations of the Act and regulations were committed willfully and (2) that actions of its stockholder demonstrated flagrant disregard of the law and the Commission's authority. While there is some indication of recent improvement, corrections were apparently for purpose of facilitating pending applications and the record does not justify relying on the promises of future good faith conduct; under the circumstances, withholding approval of purchase applications is not punishment for past misdeeds, but rather to protect the public from the risks and dangers of expanded operations by vendee. Denied.—National Freight, Inc.—Purchase —Pittsburgh Wheeling Exp., 97 M.C.C. 642 (656-63).

The record clearly shows that purported interline operations between applicants were not, as contemplated by the leasing rules and regulations, for the purpose of augmenting vendor's equipment in order to transport traffic it developed, but rather a method by which vendee could transport traffic generated by it pursuant to an unlawful fictitious leasing of vendor's operating rights in violation of §5(4). These operations were preceded by negotiations between applicants; and they were performed under circumstances where vendee was contacted by shipper desiring service to vendor's territory, and, in certain instances, where shipper was referred to vendee by vendor. Furthermore, vendee furnished all tractors and trailers, furnished the drivers, paid their salaries, and bore the cost of equipment inspections. Denied.—Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, Inc., 101 M.C.C. 368 (373-4)*.

50. Leases.—[Vols. 11-19, 21].—Due to insufficient information in pleadings as to whether or not lessee is a carrier within the Act, employee union's complaint, alleging that railroad's lease agreement for lessee's operation of its piers, without Commission authority under §5(2), constitutes an abandonment of a rail line in violation of §1(18), presents no issue shown to be within the Commission's jurisdiction. Normally, the Commission will not entertain an application under §5(2) where one of the parties is a noncarrier; and if it is assumed noncarrier lessee is controlled by lessor railroad, the lease transaction still would not be subject to commission's jurisdiction. Complaint dismissed.—Brotherhood of Ry. S. S. Clerks v. Reading Co., 328 I.C.C. 11 (12-13).

Commission found defendant dock company to be a common carrier and therefore found that certain leases between it and its affiliated rail carrier were unlawful due to absence of the required Commission approval under §5(2). Further, leased tracks in question were not switching tracks exempt from the requirement of Commission approval because services on said leased tracks are an essential movement. constituting a continuation of a through journey in interstate or foreign commerce and are thus not switching tracks within meaning of §1(18). Cease and desist order entered.—United Transp. Union v. B & LE and P & C, 342 I.C.C. 849 (857-58).

Following discussions in *Drum*, 368 US 370, and *Lovell*, 92 MCC 728, respondent carrier has not unlawfully leased its operating rights to transport steel; although the steel division is a separate corporate entity, it is not utilizing respondent's operating rights without Commission approval under arrangements which in effect amount to an unlawful lease of respondent's operating rights. In determining who in reality is performing the transportation service, the so-called test of "substance" is applied to the arrangements between the parties to ascertain whether the purported carrier assumes in significant measure the characteristic burdens of the transportation business; the overall test is one of "substance," involving an evaluation of all relevant factors and neither financial risk nor any other single factor is by itself conclusive.—Gateway Transp. Co. Inc., Investigation and Revocation, 106 M.C.C. 61 (64, 66-7).

Due to illness of the owner, operations of the carrier to be leased were conducted under temporary authority by the owner's husband who is also the owner of a separate motor carrier. Such temporary authority was justified by owner's illness, did not constitute unlawful control, and resulted in the continuance of a needed direct single-line service without adverse effect on protestants. Absent evidence of such adverse effect, Commission concluded that application herein should be approved.—Bilyeu—Lease—North Central Truck Lines, Inc., 109 M.C.C. 834 (838).

See also Manufacturers Hanover Trust Co. v. United States, n. 52, below. Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger Case, n. 52, below; Sharp Motor Lines, Inc.—Purchase, n. 48, above.

52. Mergers.—[Vols. 11-19, 21].—Supreme Court affirmed the judgment of the district court at 279 F. Supp. 316 sustaining the Commission's approval of the Penn Central merger and the inclusion of three "protected" railroads into the Norfolk & Western system. However, the order was modified to permit the Reading R. Co., based on actual experience, to petition for protection conditions.—Penn-Central Merger Cases, 389 US 486 (498-526)*.

Supreme Court reversed the Commission's findings in this proceeding as regards the valuation of the Harlem River and Oak Point, N. Y. rail yards; the cost of abandonment delay; discount for bulk sale; discount for present worth; and the plan requiring Penn Central to underwrite until 1978 the stocks it had given for the New Haven properties. Commission was sustained in its other valuation determinations.—New Haven Inclusion Cases, 399 US 392 (435-489)*.

District court held there was adequate evidentiary basis for Commission's finding that consummation of merger between first and third largest railroads in northeastern United States upon prescribed conditions which would include financial indemnity to certain weaker railroads would be in public interest and that there was no basis for an injunction of such merger—Erie-Lackawanna R. Co. v. United States, 279 F. Supp. 316 (352-6)*.

Plaintiff cannot be granted the relief requested in its action seeking an order requiring defendant railroad to engage in good faith negotiations with plaintiff on terms and conditions for its inclusion (that was approved by the Commission) in the Penn-Central merger and to cease alleged economic harassment of plaintiff and, also, requiring immediate physical consummation of the merger with financial terms to be agreed on later. The Commission's order contemplated that the parties would negotiate terms and conditions for plaintiff's inclusion in the merger and if they could not agree, apply to the Commission to fix such terms and conditions; it did not prescribe a pattern or procedure for negotiating, or even require that agreement be reached. Furthermore, on the facts of record, preliminary relief sought cannot be granted because sharp issues are presented by conflicting affidavits as to whether there has been disobedience to the Commission's order.—New York, S. & W. R. Co. v. Penn Central Co., 287 F. Supp. 704 (705-6).

Moreover, while there may be merit to plaintiff's contention that defendant, by the alleged refusal to negotiate in good faith and alleged harassment, is endeavoring to squeeze plaintiff into an unfavorable bargaining position, to order good faith negotiations and cessation of alleged harassment would probably be both ineffectual and futile, especially since defendant's affidavits claim good faith negotiations and that its conduct in other respects was reasonable, not an harassment, and not prompted by any intent to harass. Since The Commission's order provided a forum for plaintiff in the event terms and conditions of the merger were not agreed upon, plaintiff's remedy is to ask the Commission to fix terms and conditions of the acquisition. And grant of plaintiff's request for immediate physical merger with financial terms to be subsequently worked out would be inconsistent with interests of third party railroads not before the court, and might subject them to diversion of traffic if immediate consummation is ordered. Plaintiff's motion for preliminary relief, denied.—Id., p. 706.

Proposed merger of Pittsburgh & L.E.R. Co., a New York Central subsidiary, into a new Delaware corporation of the same name, and merger into latter of Pittsburgh, McK. & Y. R. Co., at present jointly controlled by Old P & LE and Central, approved. Among principal advantages of the transaction, in addition to corporate simplification, are applicability of the more modern and clearly defined General Corporation Law of Delaware instead of railroad corporation laws of Pennsylvania and Ohio which now govern Old P & LE's affairs, and accrual to New P & LE of a tax benefit approximating $135,500, representing one-half of P McK & E's depreciation charges for 1965.—Pittsburgh & L.E. R. Co. Merger, 320 I.C.C. 198 (203).

Where railroad system is or should be operated in competition with other carriers, its power to control or substantially influence the management of such other carriers through preferential routing of traffic or otherwise should be restricted. Thus, in view of substantial stock holdings, the widespread holdings of the remainder of stock of survivor in proposed merger transaction (the Norfolk & Western), and the historical posture of and close management relationships between the Pennsylvania and the N&W,

the former has the power to control the N&W and is in a position to extend its control over the proposed system. Moreover, the Pennsylvania now controls the Wabash, which seeks inclusion in the merger, and together with its power to control entire N&W system proposed, it is able to influence routing of substantial traffic over new N&W system to the detriment of other carriers; the Pennsylvania must be completely divorced from that system and have all its interests therein terminated.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (32-4).

Further, if Pennsylvania's influence over N & W is eliminated, the merger of the Nickel Plate into Norfolk & Western and other transactions proposed in connection therewith are in the public interest without the inclusion of any other railroad or without the consolidation of proceedings with any other unification proceeding pending. While the Transportation Act of 1940 relieved the Commission of its duty to initiate consolidations and left such function completely in the hands of the carriers, in considering railroad's petition for inclusion in merger and control transaction, the statute does not limit its participation to passing upon a proposal on a take-it or leave-it basis; however, the Commission is specifically enjoined to consider, among other things, the effect of considered transaction upon adequate service to the public and effect upon public interest of the inclusion or failure to include other railroads. To allow full exploitation of plans voluntarily developed by the parties and to afford the fullest protection to the public interest required by §5(2)(c), and (d), the Commission's jurisdiction is reserved for 5 years to permit interested railroads to petition for affiliation with new system.—Id., pp. 16, 26, 28, 32.

Furthermore, lease of Wabash by Norfolk & Western approved for period of 8 years rather than 50 years, and in connection therewith stock exchange agreement authorized, provided transaction is completed within 6 years. Approval of merger conditioned upon the Pennsylvania's divesting itself of any present or future stockholdings in N&W and the Wabash within 10 and 6 year periods respectively, the severing of any management relationships between the former and latter within 60 days and acceptance of these conditions by written notice from the Pennsylvania. Pending completion of divestiture, Pennsylvania is required to deliver all voting rights to N&W stock to three independent voting trusts. Merger approved provided all transactions with exception of stock control of Wabash are consummated within 90 days of effective date of order.—Id., pp. 9, 11-13, 33-4, 48-50.

Commission approved merger proposed herein as it is consistent with public interest, will enable Pennsylvania R. Co. to use motor vehicle service to public advantage in its operations, and will not unduly restrain competition.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (546-7).

Commission modified its prior finding in 327 ICC 475 by finding that the merger approved therein has not been shown to be detrimental to petitioners individually or to their ability to provide a general transportation service to the public.—Pennsylvania R. Co.—Merger—New York Central R. Co., 328 I.C.C. 304 (316-8)*.

Commission authorized inclusion (subject to certain conditions) of three petitioner railroads into Norfolk & Western Ry. Co. inasmuch as petitioners will strengthen this system, safeguard against diversion of traffic from petitioners and Norfolk & Western, and create a more balanced rail competition in East in face of present and anticipated competitive conditions.—Norfolk & W. Ry. Co. and New York, Chicago & St. Louis, 330 I.C.C. 780 (826-8)*.

Commission made inclusion of the New York, N. H. & H. R. Co. (NH), its affiliates and subsidiaries, a prerequisite for the merger authorized in 327 ICC 475 inasmuch as NH has deteriorated both in nature and scope of its operations and its financial position and this inclusion will aid in maintenance of NH's required services.—Pennsylvania R. Co.—Merger—New York Central R. Co., 331 I.C.C. 643 (651-654)*.

Upon remand, Commission made precise findings as to traffic losses of a competing non-applicant carrier in compliance with court's instructions. However, Commission reiterated the finding in 255 F. Supp. 19, that such specificity is not required if adequate protective conditions for such carriers are present. Stipulated traffic conditions between applicants and nonapplicant carrier approved as just, reasonable, and consistent with the public interest as they facilitate the urgently needed merger herein and are not so costly as to neutralize the merger benefits.—Chicago & N.W. Ry. Co.—Merger, 333 I.C.C. 236 (239, 253-54).

Complaint of Providence & W.R. Co., as intervening plaintiff, questioning the Commission's determination with respect to its petition for inclusion as a leased line under terms of current 99-year lease of all its property to the New Haven (presently undergoing reorganization) in the Penn Central system, fails to state a claim on which relief can be granted. Approval of the Penn Central merger having been conditioned on inclusion of the New Haven, the Commission could later require inclusion of P&W and, in report under review, it directed such inclusion as in the public interest and found that (with two exceptions) the lease provisions constituted equitable terms therefor. In view of the Commission's broad power under §5(2)(d), there is little force in plaintiff's objection to the imposition of a condition that, unless stock voting provisions in P&W's charter were eliminated in favor of a "one-share, one-vote" provision, Penn Central might terminate the lease on notice to P&W board of directors and the Commission and, thereafter, operate the road, without a lease, for P&W's account.—Manufacturers Hanover Trust Co. v. United States, 300 F. Supp. 185 (186-7)*.

Since plaintiff's request to merge with Providence & Worcester Co., a Delaware corporation, was recently granted, the charter voting restrictions can be altered through amendment by a majority vote of the stockholders without any need for legislative approval. A "one-share, one-vote" provision would not prejudice public stockholders even if Penn Central seeks authority to abandon the line; such abandonment cannot be obtained simply by securing consent of P&W as a corporation; and Penn Central would still be bound to operate P&W, despite termination of the lease, until granted Commission authority to abandon. Since either railroad can apply for authority to abandon, and the Commission can fix the fair rent for the interim, there is no apparent reason why Penn Central's operation of P&W for the lessor's account after termination of the lease would be inappropriate. Complaint dismissed.—Id., pp. 187-8.

Upon further hearing, and careful reconsideration of each substantive issue and every advantage and disadvantage that might result from proposed rail merger and related transactions, the Commission concludes that proposed unification, subject to appropriate conditions to protect competing railroads, affected employees and the general public, will be consistent with public interest. As modified by the conditions specified, most of which are the topic of agreements entered into by applicants and intervening railroads since time of prior decision denying the applications, proposed transactions present an entirely new perspective for intramodal competition in efficient, economical movement of transcontinental, western and Pacific Coast traffic; that perspective forecasts a stronger capability of the railroads to prosper and to effect many efficiencies and savings from which the public will benefit. Based on the entire record—including material adduced at the further hearing—proposed transactions, subject to the conditions imposed, are entirely consistent with the public interest; approved.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (244-5, 276-89)*.

Furthermore, as to the effect of unification on motor carrier rights and operations now controlled by the individual applicants, such authority held by the railroads or their motor carrier subsidiaries involve operations in unrelated and unconnected geographic areas, and are restricted mostly to services which are auxiliary to or supplemental of rail service. Following unification each motor subsidiary would continue to operate its own equipment, under its own authority, over its own routes; thus, proposed transaction would create no new motor carrier network; also, since the only change as to the railroads' motor rights would be in their ownership by the new company in lieu of individual applicants, there would be no adverse effect on competing motor carriers. However, in interest of corporate simplification, after consummation the new company should give early consideration to consolidation (subject to prior Commission approval) of the motor operations into a separate corporate entity and, also, to similar consolidation of the subsidiary motor carriers to be acquired.—Id., pp. 284-5.

Commission reinstated and affirmed its prior reports and orders (published at 331 ICC 643 and 331 ICC 754) in this merger proceeding as modified with respect to property valuation of the New York, N. H. & H. R. Co. (NH), a railroad included in this merger, inasmuch as the district court, in 289 F. Supp. 418 held that Commission erred in certain specifics in computing liquidation value of the NH. Inclusion of NH in this merger as of Jan. 1, 1969, approved and directed inasmuch as the continuance of NH service without interruption is a public interest matter of paramount importance and will insure that continuation. Inclusion of Providence & Worcester R. Co. and Norwich & Worcester R. Co. as leased lines of NH in this merger authorized and directed as such inclusion will benefit the merging parties and assure an adequate transportation service to shipping public that would be jeopardized by a failure to include these lines. —Pennsylvania R. Co.—Merger—New York Central R. Co., 334 I.C.C. 25 (30-74, 74-78, 86-93)*.

Commission approved merger proposed herein, subject to prescribed conditions, as such merger will improve rail service through elimination of interline delays, access to a large pool of specialized equipment, and other measures available to the larger rail system. However, inclusion of Southern R. Co. in the merger is rejected. Applicant may gain a slight competitive advantage over Southern through merger but not enough to significantly affect either carrier or the public interest. Southern's inclusion would dislocate shippers geared to present competitive structure, would not increase efficiency or safety, and would destroy healthy competition in some areas. The Seaboard-Piedmont transaction, although a voluntary merger, is an inclusion within the definition stated in 320 ICC 122 and the intent of §5(2)(d).—Seaboard Coast Line R. Co.—Merger—Piedmont, 334 I.C.C. 378 (390-92).

Commission found merger proposed herein, subject to stated employee-protective conditions, consistent with the public interest; approved.—Southern Pacific Transportation Co.—Merger, 334 I.C.C. 866 (872).

Proposed merger approved, subject to indicated conditions, as the record herein shows that shippers will be especially benefited by the merger through the introduction of increased piggyback of TOFC (trailer-on-flatcar) service as well as many other benefits.—Louisville & N. R. Co.—Merger—Monon Railroad, 338 I.C.C. 134 (140-1).

Where (after instant application was filed) the merger of acquiring-carrier applicant and another motor carrier was approved in another proceeding, and the principals of that merger were fully cognizant of pendency of embraced investigation proceeding, it must be presumed that they were aware that appropriate sanctions might well be imposed if any violations were disclosed by the investigation. It follows that, because of such awareness, consummation of the merger was at their peril insofar as outcome of instant proceeding is concerned; and no one can seriously argue that any such unlawful operations should be judged by the same criteria as those normally applied in §5 proceedings which involve lawfully conducted operations. Accordingly, approval of proposed control and merger should be limited to authorizing continuance of services where public benefits are such as to warrant conclusion that the public would be penalized if they were discontinued. Approved, for continuance by acquiring carrier of overhead regular-route, single-line, service in connection with rights it would acquire.—Buckingham Transp., Inc.—Control and Merger, 97 M.C.C. 700 (713-15).

Misrepresentation in a prior control application proceeding which, as part of the record, is relied upon by the Commission as the basis for authorization in instant merger proceeding does not render the provisions of §5 ineffective, and is ground for denial of proposed merger. Such misrepresentation is aggravated by the proposal to saddle surviving carrier, a financially weak company, with its owner's personal obligations to liquidating carrier's stockholders, which had been incurred in connection with consummation of the control transactions. Denied.—Kenneth Hudson, Inc.—Merger—The

Blue Line, Inc., 101 M.C.C. 384 (387).

Proposed merger into applicant of its six-carrier subsidiaries with assumption by applicant of all their liabilities, cancellation of their capital stock and dissolution of their individual corporate structures is consistent with the Commission's views on corporate simplification. And while applicant is overcapitalized and its long-term debt is approximately 12.5 times its shareholders' equity, proposed merger will eliminate the problem of overcapitalization and will reduce applicant's long-term debt to approximately 3.1 times its shareholders' equity; furthermore, fixed charges incurred would be no greater than those outstanding in the now separate companies and neither employees nor the shipping public would be adversely affected. However, approval is conditioned to prohibit the issuance of any securities or the assumption by applicant of any of its subsidiaries' obligations evidenced by securities, unless evidence is first submitted that the issuance or assumption is exempt or that approval therefor has been obtained under §214.—Schwerman Trucking Co.—Control and Merger, 101 M.C.C. 679 (681-3, 685)*.

See also Ind-O Transport, Inc.—Purchase—Niman Transfer & Storage, n. 48 above.

Conditions: Supreme Court concluded that Commission erred in withdrawing all protective conditions save the traffic ones and permitting immediate consummation of Penn-Central merger (327 ICC 475) as such withdrawal removes necessary protection from three smaller railroads. Case remanded to Commission for a decision as to future of these protected railroads and their inclusion in a major system.—B. & O. R. Co. v United States, 386 US 372 (388-392)*.

Commission approved inclusion of the New York, S. & W. R. Co. in merger approved herein as operations over the main lines of this carrier are vital in connecting applicants' lines and applicants are willing to accept such inclusion.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (521-22).

Commission ordered the New York, N.H. & H. R. Co. (New Haven) included in merger approved herein inasmuch as the public interest requires a complete restructuring of all New Haven operations in order to preserve its necessary operations.—Id., p. 522-27.

Commission modified its prior report in 327 ICC 475 as to inclusion of petitioners in the merger approved therein by removing the requirement for joinder of applicant Penn Central in a petition for inclusion and by binding applicant to accept inclusion if Commission so orders.—Pennsylvania R. Co.—Merger—New York Central R. Co., 328 I.C.C. 304 (320-22)*.

Protective conditions originally prescribed in appendix G of the prior report on this merger, 327 ICC 475, is modified herein to provide the protected railroads greater clarification and advantages which would improve their competitive positions whether or not the merger occurs. Modifications of traffic and indemnity conditions and protective provisions were prescribed but no need was shown for any capital loss indemnification condition.—Pennsylvania R. Co.—Merger—New York Central R. Co., 330 I.C.C. 328 (334-62)*.

Commission imposed conditions (appendix I herein) requiring parties to this merger, Penn-Central, to maintain gateways at Maybrook and New York Harbor as vital passages to the New England area, thus reducing the diversionary effect on intervening railroads' traffic to inclusion of New York, New Haven, and Hartford R. Co. in this merger.—Pennsylvania R. Co.—Merger—New York Central R. Co., 331 I.C.C. 643 (730-737)*.

Commission modified traffic protective conditions imposed in a prior report on this merger, 331 ICC 643 (appendix I), in the interests of clarification. Petitioners' requests for protective conditions are denied in light of the Supreme Court's statement in 389 US 486 that competition "is merely one consideration in a rail merger and that Commission's retention of jurisdiction in this proceeding provides an easily available means of recourse to the protected carriers".—Pennsylvania R. Co.—Merger—New York Central R. Co., 331 I.C.C. 754 (757-61)*.

To ensure that proposed merger will not cause a downgrading of the present Evansville, Ind.—Chicago, Ill. Line, Commission required applicant Louisville & N. R. Co. to provide at least the same level of service and maintenance over such line as is presently provided for a period of 10 years from the date of this report.—Louisville & N. R. Co.—Merger—Monon Railroad, 338 I.C.C. 134 (145-6).

See also Southern Pacific Transp. Co.—Merger, n. 52 above.

55. Operating agreements (contracts).—[Vols. 11-19, 21].—On reconsideration, review board's grant of authority to acquire trackage rights under 5(2)(a)(ii) is confirmed since the parties have met the public interest requirement of 5(2); however, the order is modified to authorize operation of the properties under 5(2)(a)(i) since the agreement between the parties envisions that the entire operation of the lessor company will be conducted by the lessee. The mere fact that the transaction may actually be one included in those referred to in subparagraph (i) instead of in subparagraph (ii) does not invalidate the board's authorizations since the Commission is not bound by the name which parties may apply to a transaction for which they seek approval. —Seaboard Air Line R. Co.—Trackage Rights, 331 I.C.C. 361 (364)*.

56. Operation under trackage rights.—[Vols. 11-19, 21].—Although plaintiff Union Pacific, in action to enjoin the Commission's orders, contends that Milwaukee railroad's application to acquire trackage rights between Longview Junction, Wash., and Portland, Oreg., should have been filed under §1(18)-(21) which requires hearings and a finding of public necessity, and not under §5(2), the Commission had authority to consider that application under §5(2)(b) in accordance with its long-established practice. Under §5(2), which permits acquisition of trackage rights, public hearings are discretionary with the Commission; and there was no abuse of its discretion in not granting a hearing, for Union Pac. to update the evidence it presented at hearings on the proposed Burlington Northern merger (approved on condition that Milwaukee be permitted to serve Portland), when the trackage rights involved were bound up with the merger proceedings and the Commission had heard practically all the evidence plaintiff seeks to present.—Oregon-Washington R. & Nav. Co. v. United States, 324 F. Supp. 124 (126-7)*.

Moreover, there is no merit in plaintiff's further contention that Milwaukee's trackage rights application under §5(2) constituted an admission that a hearing is necessary or that all parties contemplated further hearings on trackage rights. Therefore, since the Commission's orders authorizing the grant of trackage rights to Milwaukee without a hearing were not arbitrary, but were based on proper standards supported by ample evidence, they are sustained and the injunction suit is dismissed.—Id., p. 127.

The Commission has no power to compel a carrier to acquire trackage rights. —Industrial Corp. of S. Hackensack, N. J. v. N. J. & N.Y. R. Co., 324 I.C.C. 272 (273).

Commission herein prescribed terms and consitions for applicant's continued operations under trackage rights over rail line of Southern Pacific Co. In regard to the basis for payment for both bridge and local rights, the Commission need not be mathematically precise but must only find the limits of trackage rights charges within a range of reasonableness. The Commission has not adopted any particular formula for determining trackage rights charges but has employed various bases (see 307 ICC 329). Valuation of $17 million set as rental basis for bridge rights herein.—Atchison, T. & S.F. Ry. Co.—Operating Agreement, 331 I.C.C. 367 (372-73).

Further, the Commission found that it would be unfair to charge applicant as an operating expense a portion of the current value of an unreplaced facility retired for obsolesence or disuse. Commission also refused to set a time limit on trackage rights herein as its jurisdiction is continuous and terms and conditions may not be revised or such rights terminated with prior Commission approval, as was stated in 328 US 134. Finally, Commission's power to impose condition requiring arbitration to settle controversies as to the meaning of terms and conditions it imposes has been consistently recognized. Such a condition does not delegate authority to arbitrators to prescribe terms and conditions or to change conditions imposed by the Commission.—Id., pp. 381-84.

Commission clarified conditions prescribed in its prior report requiring indicated payment by applicant, as an operating expense, for a retired and unreplaced facility for which a Commission-approved reserve has not been created (see 309 ICC 289), and on which depreciation is not authorized by Commission's accounting rules.—Atchison, T. & S. F. Ry. Co.-Operating Agreement, 333 I.C.C. 342 (345-6)*.

Proposed operation by Louisville & N.R. Co. over certain line under trackage rights approved as such transaction will result in substantial benefits to Chicago area and points served by applicant by permitting more efficient transportation that will not adversely affect public or adequate transportation service.—Louisville & N. R. Co.—Trackage Rights, 334 I.C.C. 412 (417).

A trackage rights agreement, like a merger, is a transaction within the purview of §5(2) and an application under §5(2) must be filed for acquisition of trackage rights despite a condition granting such rights in prior merger agreement (appendix L, 331 ICC 352). Such a condition is not self-executing as asserted by respondents.—Great Northern Pac.-Merger-Great Northern, 338 I.C.C. 782 (784-6)*.

See also Calumet Western Ry. Abandonment case, § 1(18), n. 66. Louisville & N. R. Co. Abandonment case, §1(18), n. 60; Seaboard Air Line R. Co.—Trackage Rights, §5(2), n. 55.

58. Consolidation.—[Vols. 11-13, 16,17, 19].—As between rail applicants seeking to acquire control of another railroad, there exists less opportunity for end-to-end railroads to consolidate yards, facilities, and functions than exist for generally parallel railroads operating in direct competition with each other; and the minimal amount of duplicative trackage involved would result in less abandonment of line than would be the case where the affiliating carriers operate side-by-side. Moreover, the success of a plan for consolidating direct competitors depends, not so much on improving and maximising use of facilities and exploiting advantages of position, but, rather on shrinking of plant, consolidating functions and eliminating competition; thus, there would be little motive for parallel carrier to expend its energies in championing the cause of a competitor, in derogation of its own direct and permanent interests, even though competitor would be within its control.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (285-7)*.

60. Affiliates, subsidiaries, holding companies.—[Vols. 11-17, 19, 21].—***In general:*** [Vols. 19].—Since protestants fail to establish an "affiliation" between applicants' controlling stockholders within the meaning of §5(6) of the Act, they are unable to show that as a result of such relationship liquidating carrier's controlling stockholder purchased stock in the carrier as an accommodation purchaser for surviving carrier. The record shows nothing more than the existence of a proper business relationship effected through interline arrangements between two carriers while the controlling stockholder of liquidating carrier had a minority interest in another carrier and prior to his purchase of controlling interest in liquidating carrier.—St. Johnsbury Trucking Co., Inc.—Control and Merger, 104 M.C.C. 137 (140).

See also Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co. case, n. 100 below. Norfolk & W. Ry. Co.—Control—Lake Erie & F. W. R. Co. case, n. 45 above; St. Johnsbury Trucking Co., Inc.—Control and Merger, n. 45 above.

Holding companies: [Vol. 19].—Purchase by Signal, a contract carrier, of two other contract carriers and merger and control of another is conditioned upon continuing Commission jurisdiction to insure that the operating rights of Signal and its several carrier affiliates which are all under the common control of Leaseway, a holding company controlled by the O'Neill family, shall be consistent with the public interest.—Signal Delivery Service, Inc.—Purchase—Marc's Delivery Corp., 104 M.C.C. 280 (288).

Motor carriers: [Vol. 19].—Acquisition of New England Transp. Co., a motor carrier subsidiary of an included railroad, by parties to this merger is consistent with public interest inasmuch as motor carrier operations make a vital contribution to the included carrier's overall operations and there is no evidence that such an acquisition would adversely affect other motor carriers or unduly restrain competition.—Pennsylvania

R. Co.—Merger—New York Central R. Co., 331 I.C.C. 643 (725-28)*.

In the initial report on reconsideration, 97 MCC 587, the Commission found that as a result of a somewhat modified plan and newly submitted financial data, applicant-vendee Transport presented an improved financial picture; however, application denied on ground that the operating rights sought by Transport substantially duplicated those of Parkhill Truck Co., which was commonly controlled with Transport. On further consideration, however, a further modified plan, involving merger of Transport into Parkhill and the substitution of Parkhill as vendee, approval, since duplicate rights in vendee present no problem, as under the findings the duplication eliminated.—Ind-O Transport, Inc.—Purchase—Niman Transfer & Storage, 101 M.C.C. 593 (594-6)*.

Noncarriers: [Vols. 19, 21].—See McCloud River Trucking Co.—Purchase—Zamboni, n. 48 above.

Rail and motor carriers: [Vol. 19].—See McCloud River Trucking Co.—Purchase—Zamboni, n. 48 discontinued, above.

Railroads: [Vol. 21].—See Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co. case, n. 45 *Violations*, above.

70. Employees.—[Vols. 11-14, 16-19, 21].—As held in 339 US 142, one intent of §5(2)(f) was to provide mandatory protection for employees affected by railroad consolidations; such protection can be accorded by terms provided by the Commission or (as is more likely) terms of a collective agreement which the Commission adopts or approves as adequate for required 4-year period, or longer if it so provides. Purpose of the statute is not to freeze jobs but to provide compensatory conditions and, in discharging its duty, the Commission often has adopted the labor conditions in collective agreements. When the Commission adopts or approves a pre-merger collective agreement, however, the last sentence of §5(2)(f)—"notwithstanding" provision—is not read out of the Act; such agreement becomes a "condition" of the "approval" and the Commission deems the provisions thereof to be "a fair and equitable arrangement to protect the interests of" affected employees. Hence, significance of the "notwithstanding" proviso is that it provides machinery for the terms of a pre-merger collective agreement and thus supplies the minimum measure of fairness required under first sentence of §5(2)(f).—Norfolk & W. Ry. Co. v. Nemitz, 404 US 37 (41-3)*. [But see dissent]

In railroad employees' suit to recover damages for alleged violation by defendant railroad (survivor in N&W-Nickel Plate merger) of employee-protection provisions of commission order in merger proceeding, the court has jurisdiction over the issue of whether plaintiffs received all the benefits to which they were entitled. However, the court's function being to delineate minimal requirements of the law and employee-protective orders, not to construe definitively the agreement between surviving railroad and employee unions which the Commission adopted as part of its order, interpretation of the agreement and order as to meaning consistent with the law, is a matter to be left to arbitration. Statutory protective agreement governing employees' rights following rail merger can alter, supplement, or vary the Commission's order, so long as it does not abridge the protection afforded; however, while agreement may lessen protection of certain classes of employees, without altering total protection level, such dimunition should be permitted to stand only if, in light of overall protection scheme as so modified, it is benign.—Nemitz v. Norfolk & W. Ry. Co., 309 F. Supp. 575 (580, 582-4)*.

Statutory protection afforded employees against being placed in a worse position with respect to employment as result of N&W-Nickel Plate merger requires, as minimum protective benefits, a wage freeze for four years after merger consummation. And, since purchase of employer "Sandusky Line" of Connecting Ry. Co. during course of the merger resulted in split of the Toledo seniority district, so that employees unable to find work on the line could no longer seek work at other points in the district, wage freeze to which they are entitled applies to earnings throughout seniority district and is not limited to wages earned on purchased line; plaintiffs are entitled to damages on that basis. However, the court must accept provisions of the Commission order as correct and, since time for seeking review thereof has expired, it has no jurisdiction to determine whether total wages may be reduced because of seasonal furlough or decline in revenues, exceptions embodied in the order. Question of whether plaintiffs' loss of wages is compensable because of inability to work throughout Toledo district, or not compensable because of exceptions in the order, is matter for arbitration, as provided in Commission protective order.—Id., pp. 582-3, 585.

As the lower court properly held, appellees (railroad employees) are entitled to damages to the extent that their compensation was diminished by their inability to perform work throughout the Toledo Division seniority district; but they are not entitled to damages to the extent that their compensation may have been diminished by furloughs due to seasonal requirements, or by any decline in traffic or revenues. However, contrary to its conclusion that the question of damages was a matter for arbitration, since the trial court has jurisdiction of appellees' claims, it must adjudicate those claims in their entirety—the basic dispute between the parties as well as the relief to be accorded to each appellee. Therefore, the district court's judgment is modified, in accord with the court's opinion, and the action remanded to that court for further proceedings. —Id., 436 F. 2d 841 (850)*.

On petition of labor union, the Commission properly modified its findings in 320 ICC 52 (that employees of Chesapeake & Ohio at its Richmond, Va., Main Street Station, if affected by approval of Seaboard Air Line's withdrawal from joint use thereof and use of another station, were entitled to benefits of §5(2)(f) and the same protection as that prescribed for Seaboard employees who might be affected, with cost to be borne by Seaboard) to show that the prescribed protection included not only C&O employees who had worked at Main Street but, also, junior employees who worked in the same seniority district and had been "bumped" by employees from Main Street who had seniority, if they were adversely affected. While the junior employees were not expressly mentioned in the court's prior decision (261 F. Supp. 101), they were implicitly included; neither the court nor the Commission had authority to, and neither undertook to, exclude such employees who might be affected by the transaction. Considered order expressly stated what had been implicit; the Commission simply clarified its prior order, which it had authority to do, and the result it reached was proper.—Seaboard Coast Line R. Co. v. United States, 283 F. Supp. 866 (867-9)*.

And since the question of whether and to what extent, if any, the junior employees may be adversely affected was properly found to be a matter for settlement by the parties under the arbitration provisions of the prescribed employee-protective conditions, or by the courts, the Commission was not required to determine which junior employees had been adversely affected by the transaction; generally, the Commission does not determine the actual effect, if any, on individual employees. Accordingly, the absence of a finding pertaining to any effect on individual junior employees does not destroy validity of the Commission's order; complaint dismissed.—Id., p. 870.

District court has subject-matter jurisdiction in suit by members of railroad union seeking damages claimed to result from defendant railroad's alleged violation of employee-protective conditions imposed on the parties and incorporated in Commission order approving defendant's purchase of "Sandusky Line" from Connecting Ry. Co., and to enjoin further violation of that Commission order; the court is given jurisdiction to enforce Commission orders by provisions of §9, §16(12), and 28 USC §§ 1336, 1337, and the rights of plaintiffs, if any, are founded on such an order. Though defendant argues that the Railway Labor Act, not I.C.C. Act, governs, §5(11) gives the Commission exclusive and plenary jurisdiction to approve §5 transactions and does not exclude Railway Labor Act from operation thereof. Also, defendant's argument that plaintiffs' cause of action is based on alleged violation of a collective bargaining agreement, not a Commission order, must be rejected; plaintiffs are suing on the order itself, and employee-protection terms originally included therein, and not upon any agreements between the union and railroad made after—and altering—an order of the Commission.—Nemitz v. Norfolk & W. Ry. Co., 287 F. Supp. 221 (224-9)*.

And since union members have attempted in vain to invoke arbitration clause of an agreement between the union and railroad which was incorporated in the Commission order as part of the employee-protective conditions, plaintiffs are not required to exhaust any other remedies before presenting their claims to the court; the doctrine of exhaustion of administrative remedies presupposes existence of adequate and efficient remedies. Moreover, plaintiffs are attempting to pursue a remedy specifically created by Congress in §§ 9 and 16(12) and those statutes make no reference to administrative exhaustion as a mandatory prerequisite. However, defendant's claim of accord and satisfaction and plaintiffs' allegation that union members never intended to accept amounts already received as settlement of their claims, or as anything except partial payment of what was owed them under the Commission order, raise a material question of fact; accordingly, neither of the cross motions for summary judgment on that matter may be granted. Ruling upon plaintiffs' rights under actual terms in the Commission order is reserved pending determination of factual questions.—Id., pp. 229-31.

Though §5(2)(f) provides certain safeguards for railroad employees affected by a rail merger, it does not prevent the discharge of employees as the result of such a merger but, rather, it relates only to questions of employee compensation. The section authorizes a railroad and an employee union to enter into an agreement protecting the interests of workers affected by a merger; and, in connection with merger of Delaware, L. & W. R. into defendant railroad, an Implementing Agreement was entered into between the railroad and defendant unions representing its employees. To extent that plaintiffs (employees of DI&W who were furloughed by defendant railroad two years after the merger, but never recalled) may have been wronged, it appears to have been due to misapplication of the Implementing Agreement and not to a violation of law. Therefore, lower court properly dismissed that portion of complaint alleging that defendant railroad violated the statute by wrongfully "discharging" plaintiffs.—O'Marra v. Erie Lackawanna R. Co., 407 F. 2d 674 (677-8)*.

Although a substantial part of managerial and clerical work to be eliminated as result of approved mergers is performed by machine, and none of such work is assigned to particular employees whose services could be dispensed with, in accordance with the statutory requirements the conditions prescribed in 317 ICC 557, as supplemented in 317 ICC 729 and 320 ICC 377, including §§ 4, 5, and 9 of the Washington Job Agreement of 1936, are imposed.—Pittsburgh & L.E. R. Co. Merger, 320 I.C.C. 198 (204).

In merger proceeding, conditions prescribed in Southern Ry. Co.—Control—Central of Georgia Ry. Co., 317 ICC 557, as supplemented and clarified in 317 ICC 729 and 320 ICC 377, imposed for protection of railway employees not covered by agreements and adversely affected by the transactions.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (50).

Except for modification respecting arbitration, conditions imposed in the *Southern-Central* case, as supplemented and clarified, conform substantially to the *New Orleans* conditions (a combination of the *Oklahoma* conditions and the provisions of the Washington Agreement); thus, imposition of the *Southern* employee protective conditions, including sections 4, 5 and 9 of the Washington Agreement, substantially incorporate the terms sought by employees. Further, fringe benefits, including vacation rights and privileges, are regularly the subject of collective bargaining and not likely to be altered summarily by unilateral action of carriers. Under the *Southern-Central* fringe benefits provision the dismissed or displaced employee is entitled to the same benefits which would have accrued to him had he been retained in the employ of his home road; but he is not guaranteed better fringe benefits than would have been his had he not been dismissed or displaced as a result of the §5 transaction approved.—Missouri Pac. R. Co.—Control—Chicago & E.I. R. Co., 327 I.C.C. 279 (311-3)*.

Inasmuch as §5(2)(f) provides that employee protection may be established by agreement between a railroad and employees' unions, the Commission finds the agreement herein consistent with public interest and can make no requirement as to protection of employees covered by the agreement but Commission will require, as a condition for approval of considered merger, that this agreement also apply to employees not represented by signatory unions.—Pennsylvania R. Co.-Merger-New York Central R. Co., 327 I.C.C. 475 (543-46).

Since acquiring carrier applicant and Railway Labor Executives' Association consented to imposition of the New Orleans conditions for protection of adversely affected employees and since carrier required to be included as joint owner in the transaction has voiced no opposition thereto, authorization of acquisition of joint and equal control through stock purchase of a small switching and terminal line is subject to imposition of considered employee-protective conditions.—Norfolk & W. Ry. Co.—Control—EP&E Co.—Purchase, 330 I.C.C. 672 (682).

On further hearing upon remand by Supreme Court, Commission clarified its order of Dec. 3, 1962 to specifically provide for the inclusion, in employee-protective conditions imposed therein, of the New Orleans conditions (282 ICC 271) and §§4, 5, and 9 of the Washington Agreement (cited herein), except as §5 is modified by Commission's order of Nov. 7, 1962.——Southern Ry. Co.—Control—Central of Georgia Ry. Co., 331 I.C.C. 151 (185-7)*.

On reconsideration and further hearing of proposed railroad merger and related transactions, the situation as to protection of employees has been considerably changed since time of the prior decision which denied the applications. Applicants have reached an agreement with some employee representatives that provides "attrition-type" protection (within concept expressed in 328 ICC 684) for railroad employees, plus various monetary benefits, retirement allowances, and protection against loss from sale of homes and lease cancellations; also, they are negotiating with other unions and indicate willingness to enter into similar agreements with all affected employees. Pursuant to §5(2)(f), the Commission makes no requirements for protection of employees who have entered into such an agreement; but it does find the agreement not to render proposed transaction inconsistent with the public interest.—Great Northern Pac. & B. Lines, Merger—Great Northern, 331 I.C.C. 228 (231, 276-8)*.

However, the interest of all carrier employees affected by proposed unification—both those represented by a union and those not so represented—must be weighed, and Commission approval must be conditioned on fair and equitable arrangements for their protection. All the employees then are free to enter into separate protective agreements. Analysis of the agreements already reached is convincing that interests of employees covered thereby will be adequately and fairly protected by the terms thereof; therefore, in the interest of uniformity and in view of applicants' willingness to extend attrition conditions to all employees, approval of proposed transactions is conditioned on requirement that attrition conditions, the same as those in agreements already reached, be applied to all affected employees who have not entered into separate agreements.—Id., pp. 276, 278-9.

Agreements signed by merger applicants with employee representatives of the included New York, N.H., & H. R. Co. do not render the inclusion inconsistent with public interest. Commission therefore made no requirements for protection of employees covered by these agreements but non-signatory employees are required to enter a written commitment indicating their agreement to the plan.——Pennsylvania R. Co.-Merger-New York Central R. Co., 331 I.C.C. 643 (729)*.

Upon remand, Commission found that traffic conditions stipulated herein by the involved parties so offset traffic diversion from an involved, nonapplicant railroad as to protect such carrier's employees from job loss. Such stipulated conditions meet the court's requirement for employee protective conditions and accordingly Commission will impose no further such conditions.—Chicago & N. W. Ry. Co.—Merger, 333 I.C.C. 236 (252-3).

In view of limited number of employees the record indicates will be affected by the proposed merger, Commission provided a

90-day period following consummation of merger within which interested parties are to negotiate employee protective agreements, failing which the Commission will prescribe employee protective conditions.—Louisville & N. R. Co.—Merger—Monon Railroad, 338 I.C.C. 134 (193-7).

Employees of a railroad subsidiary to a railroad which is a party to a merger found to be "affected employees" due to a trackage rights condition of such merger which reduced jobs through elimination of an interchange. Such employees are entitled to "fair and equitable" arrangements. Oklahoma conditions imposed.——Great Northern Pac.—Merger—Great Northern, 338 I.C.C. 782 (787-9)*.

Commission denied petition by a dismissed carrier employee seeking a lump sum severance payment because said employee had not used arbitration machinery in pressing his claim and such machinery is the proper forum for settlement of individual labor disputes, not this Commission.—Cooper v. Penn Central Transportation Co., 342 I.C.C. 459 (463-4).

Petition of intervener, a former general traffic manager and vice-president of acquired carrier, alleging that, notwithstanding assurances contained in application and given otherwise by acquiring carrier's management that no drastic changes affecting acquired carrier's employees were contemplated during temporary control, employment of general-office employees was terminated, is vague regarding the number of employees allegedly represented by petitioner, or whether they have consented to such representation. Only 5 of 20 employees dismissed are still unemployed; petition does not disclose whether petitioner's position (he being now employed by another carrier) has worsened or improved, and information contained therein does not warrant finding that effect of the transaction on acquired carrier's employees warrants imposition of conditions for their protection. However, jurisdiction of the matter is retained for 1 year from date of consummation of control.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (476).

Unlike mandatory provisions of §5(2)(f) concerning protection of employees in cases involving unifications of rail carriers, the protection which must be afforded motor carrier employees, if any pursuant to §5(2)(c) is not subject to any fixed formula and must be based on circumstances existing in the particular case. Taken as a whole, the Act makes clear the congressional intent that public policy demands fair and equitable treatment of motor carrier employees, but the law does not require imposition of conditions for their protection; had Congress intended that rail and motor carrier employees be afforded the same protection, it would not have made §5(2)(f) mandatory and §5(2)(c) discretionary with the Commission. Therefore, considering both employee and carrier interests, approval of proposed purchase is subject to the condition that any employee of vendor or vendee separated from his employment as result of consummation thereof must receive, for not more than 3 months, severance pay at the rate specified, paid by vendee. — Overnite Transp. Co. — Purchase — Rutherford Freight Lines 97 M.C.C. 568 (577-80).

In approving §5 purchase application the Commission held that the Interstate Commerce Act, taken as a whole, makes clear the Congressional intent that public policy demands fair and equitable treatment of employees of motor carriers involved in 5 proceedings and that §5(2)(c)(4) of the Act provides that in passing upon any proposed transaction under the provisions of §5(2) weight shall be given to the interest of the carrier employees affected.—Braswell Freight Lines, Inc.—Purchase—Shayler, 101 M.C.C. 1(10).

Although Refiners' intervening employees fear that Leaseway's (a noncarrier corporation controlling approximately 125 other corporations including seven motor carriers) proposed purchase of Refiners Transport & Terminal Corp. and Refiners subsequent purchase of part of Mitchell Transport Inc.'s operating rights will have an adverse effect on them and that protective conditions are necessary and proper, their petition fails to indicate manner in which they will be affected or what conditions might be necessary. Moreover, Leaseway states that none of the employees of either Refiners or Mitchell would be affected adversely by this transaction and that all personnel of Refiners will be retained except those who may voluntarily resign or do not wish to continue their employment. Thus, the Commission finds that, since no adverse effect on employees would result from consummation of proposed transaction, no protective conditions are necessary.—Refiners Transport & Term. Corp.—Purchase—Mitchell, 101 M.C.C. 611 (617).

Determination by local of union that this transaction was a purchase, requiring vendor's employees to be placed at bottom of seniority list, was based upon inadequate and incorrect information. While recourse to NLRB may be open to employees to correct situation, this is not necessary where the action affects employees as a result of §5 transaction. Condition imposed requiring that Chemical Leaman dovetail Ryder's drivers and mechanics with its own as required in its master labor agreement on the occurrence of a merger.——Chemical Leaman Tank Lines, Inc.—Purchase—Ryder, 104 M.C.C. 686 (708-9).

See also National Freight, Inc.—Purchase—Pittsburgh Wheeling Exp. case, n. 5 above; Reardon v. Pennsylvania-New York Cent. Transp. Co. 28 USC §2201, n. 2.

Applications; Proceedings

100. Parties.—[Vols. 12-19, 21].—Noncarrier corporate parent is a necessary party to control proceeding only by virtue of its stock interest in carrier applicant; and both applications are interdependent, for if either were found to be contrary to the public interest and denied, then there would be no grounds for granting application of the other. Record shows that principal market for noncarrier's natural gas is the St. Louis area; whereas, most of coal handled by carrier to be controlled is shipped south to Joppa, Ill., or north to the Chicago area; thus, there is no basis for denying parent's application on conflict of interest ground, nor for denial of carrier's application because of any disability of its corporate parent; and in finding that control of another carrier by applicant will be in the public interest, Commission must also find that indirect control of other carrier by corporate parent will likewise be in the public interest.—Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., 327 I.C.C. 279 (313-5)*.

Motion that noncarrier holding-company be dismissed as a party applicant in proceeding on new corporation's application for authority to acquire stock control of bus line, denied. Noncarrier would own 40 percent of stock of new corporation (organized pursuant to agreement between it and individual 60-percent stockholder) and, under the articles of incorporation, would have power to elect 2 of its 5-member board of directors, could control the increase in or sales of its corporate stock and the disposition of its operating rights and properties, and would have the power to control the traffic flowing over its lines and those of another bus line sought to be controlled through purchase of its stock from the holding company (assuming approval and consummation of holding company's and new corporation's proposed transactions). While each of those facts and circumstances, standing alone, may not warrant finding that noncarrier would jointly control newly formed carrier within meaning of §1(3)(b), collectively, they permit of no other finding; thus, holding company is a necessary party applicant.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 97 M.C.C. 733 (740)*; Id., 101 M.C.C. 655 (666-7)*.

In addition to vendee, its subsidiary and its noncarrier affiliates were all joined in the §5 application as applicants inasmuch as their purchase collectively of the physical properties of vendor herein considered is an integral and inseparable part of the entire transaction in which vendee proposed to acquire all of the operating rights and certain other properties of vendee.—East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (318).

Intervention: [Vols. 16, 21].—Commission permitted one petitioner to intervene herein for limited purpose of seeking inclusion in a merger approved in 327 ICC 475 and other two petitioners for the limited purpose of participating in any subsequent proceedings.—Pennsylvania R. Co.—Merger—New York Central R. Co., 328 I.C.C. 304 (306-07)*.

Petition of acquired carrier's former vice-president for permission to intervene on behalf of himself and other of the carrier's employees whose services were terminated during temporary control, granted, since it will not unduly broaden the issues and petitioner conditionally favors approval of the transaction and does not seek oral hearing.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (475).

105. Applications.—[Vols. 14-17, 19, 21].—The Commission need not impose restrictions stipulated between applicants and protestants in §5 transactions even when they are offered as amendments to the applications.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (269).

There is no basis for protestant's contention that in §5 proceedings the application is not necessarily part of the record unless made such as the hearing, since rule 1.19 of Rules of Practice provides that, to the extent protestants do not deny recitals of material and relevant facts in pleadings filed by applicants before the oral hearing, such facts constitute evidence and are part of the record.—Continental Dispatch, Inc., 95 M.C.C. 483 (492).

See also East Carolina Ry. Abandonment case, §1(19), n. 1.

110. Scope of issues.—[Vols. 12-19, 21].—***Antitrust Act violations:*** [Vols. 12, 14, 17, 21].—When, in remanding supplemental report and order in control proceeding, the court held that there was but one general issue before the Commission for determination (indicating that condition (e) in 1923 order approving Southern Pac.'s control of Central Pac. Ry., 76 ICC 508, and the 1924 agreement between Southern Pac. and Union Pacific which recites all conditions of the order, are but two separate aspects of one general issue) and did not expressly affirm the "just and reasonable" determination in that report, the Commission cannot equate the court's silence to affirmance of its finding as to justness and reasonableness of condition (e); and the "just and reasonable" issues under §5(2) are not res judicata. In view of nature of the remand, therefore, all evidence and issues are considered as within the scope of the reopened proceeding, including those pertaining to condition (e) and §5(2) and those concerning validity of the 1924 agreement and actions of the parties thereunder.—Central Pac. Ry. Co. Control, 328 I.C.C. 345 (346-7)*.

See also Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co. case, n. 100 above. Southern Pac. Co.—Control—Western Pac. R. Co. case, n. 111 below.

Certificate under §207: [Vols. 12-19, 21].—Interpretation of certificates is normally a matter for consideration under other sections of the Act, and the Commission is reluctant to make a finding in that respect in a §5 proceeding, especially where the application is determinable on other grounds and an interpretation might have a widespread effect on an entire field of the transportation industry, with no opportunity for carriers concerned to be heard. While the record does not establish the prevalence in other certificates of the operating description employed in vendor's certificate or the extent to which an interpretation thereof would affect the motor passenger industry, such interpretation is not necessary to a decision on the merits of purchase application. Therefore, in view of conflicts in opinions of counsel and the parties, as well as in informal views expressed by a former and a present official of the Bureau of Motor Carriers, instant proceeding is not the proper forum for the interpretation requested and none will be made.—Eagle Charter Bus Service, Inc.—Purchase—Eagle Bus Lines, 93 M.C.C. 705 (710-1).

Evidence of past unlawful operations conducted by vendor pursuant to a certificate of registration, in good faith under color of right, is entitled to appropriate consideration in connection with whether a continuance thereof by vendee would meet a public need. See *Helphrey*, 97 MCC 549, as affirmed in *Best Way*, 253 F. Supp. 314, and cases cited therein.——Wilson Trucking Corp.—Purchase—Compton Lines, Inc., 104 M.C.C. 806 (811).

Commission found that the rule established in 106 MCC 100 with regard to certification of shipper support applies to §207 applications related to a §5 application. However, in a related §207 application it is sufficient that applicants show past continued operations performed under the certificate of registration. Where such past operations are sufficient to grant the related §207 application, shipper testimony is not required. Approved.——Pittsburgh & N. E. Trucking Co.—Control & Merger, 109 M.C.C. 56 (58-9).

Commission can deny a §5 application, or an application filed under §207 directly related to a specified §5 proceeding, without independently considering the public convenience and necessity. See *Hart*, 226 F. Supp. 635. Herein, since vendor is not entitled to a certificate of registration, there are no interstate and foreign commerce rights to be transferred. Commission noted that it would give favorable consideration to a request by the purchaser to incorporate the evidence presented in the directly related application into the separate application.—All-American Transport, Inc.—Control and Merger, 109 M.C.C. 243 (250-51)*.

Where conversions of certificates of registration to certificates of public convenience and necessity are involved as a matter directly related to a §5 application, the objective is to preserve existing motor carrier operation. New operations instituted under temporary authority cannot alone be considered as evidence of past lawful operations supporting such a public need and are not the best evidence of a public need for its continuance.——Transport Serv.—Control—Gould, Inc., & Colo. Frt., 109 M.C.C. 359 (378-9).

In accordance with Commission's findings in previous registration conversion applications involving California intrastate certificates, in which there was no evidence that the applicant had ever transported commodities requiring specialized service, the Commission has expected such commodities, even though the California certificate had authorized their transportation. Authority granted to transport general commodities with the exceptions of commodities of unusual value, commodities in bulk, and commodities requiring special equipment as there was no record of vendor ever transporting such commodities.——Western Gillette, Inc.—Control—Desert, 109 M.C.C. 514 (521)*.

Inasmuch as California route descriptions differ considerably from the manner in which routes are described in Commission certificates it has been necessary to interpret and restate the operating rights of vendor as set forth in its certificate of registration in the terms and manner normally used in certificates of public convenience and necessity. See *Howard's*, 97 MCC 341, 349.——Id., p. 521.

Although vendor has shown that it has engaged in some transportation of explosives, it has not shown that it has done so extensively nor has it demonstrated that it possessess the higher than usual degree of fitness required for such authority. Authority granted will exclude classes A and B explosives——Id., p. 521-2*.

Interpretation of Texas state certificate authorizing transport of two lists of special commodities, entitled the "Wales Record" and the "Union City Record", concludes that such commodities fall within the heavy-hauler, self-propelled articles, or *Mercer* (74 MCC 459) description categories as used in Commission certificates.—Home Transp. Co., Inc.—Purchase—Fuchshuber, 109 M.C.C. 779 (788-9)*.

Contracts: [Vols. 12, 14-19, 21].—Provision in stock-purchase agreement between the parties whereby, should the Commission deny the application, acquiring carrier reserved the right to assign its right to purchase the stock to a third party of its choice and who in its judgment would be acceptable to the Commission, is no more than a standard provision customarily appearing in comparable agreements. And, contrary to the examiner's finding, the assignment provision does not reveal any attempt by acquiring carrier to obtain the proposed control through assignment of the agreement to another in the event of denial of the transaction.—General Movers Corp.—Control—Martin Van Lines, Inc., 101 M.C.C. 748 (753-4, 759-60)*.

Control within §5: [Vols. 12-18, 19, 21].—In approving §5 purchase application, the Commission found on the issue of control or management in a common interest, that close business relationships do not conclusively show that two carriers are managed in a common interest by their owners, nor do close working arrangements in advertising, accounting, leasing, interchange, etc., necessarily indicate management in a common interest.—Mason & Dixon Lines, Inc.—Purchase—Volunteer Motor, 97 M.C.C. 780 (795).

Upon institution of interstate operations by applicant pursuant to issuance of a certificate as authorized in the report, jurisdiction within the scope of §5(2) under the principle stated in 39 MCC 620 for continuance of its control within its environmental corporate complex extended to all corporate entities within the complex. Both noncarrier holding companies in the chain of continuance in control of applicant are considered motor carriers under part II of the Act.—Greyhound Lines, Inc., Ext.—Grand Canyon, 109 M.C.C. 96 (115-6).

See also Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, Case, n. 52, above; Southern Pac. Co.—Control-Western Pac. R. Co. case, n. 111 below.

Convenience & necessity: [Vol. 15].—See Aetna Freight Lines, Inc.—Control—Ray Carter, at §5(2), n. 45.

Divisions: [Vol. 15].—The division of interline revenues between the merging carriers made when liquidating carrier was under surviving carrier's control is not supported by the evidence and has operated to injure the interests of protestants. Such provision, providing that liquidating carrier received 10 percent less than the divisions otherwise set forth in the uniform transcontinental division sheets, while surviving carrier received 10 percent more is not shown to be justified particularly in view of the fact that a similar arrangement between surviving carrier and a wholly independent carrier provided that the independent carrier received 10 percent more of the interline revenue and surviving carrier 10 percent less. Accordingly, in computing income data for the proposed merger transaction, the 10 percent shift of interline revenues is restored insofar as possible.—Yellow Transit, Inc.—Merger—Wilson, Inc., 104 M.C.C. 737 (758-59).

In determining the price of liquidating carrier's stock, the appropriate factors for consideration are (1) invested capital, which is tangible net worth, adjusted, plus deferred income taxes and long-term debt; (2) earnings as related to market price; and (3) earnings paid out as related to market price. These factors are compared with those of 20 publicly held motor carriers, a procedure made necessary because liquidating carrier's stock was not widely traded and its market value was unrealistic because of the relationship to surviving carrier existing just prior to the decision to merge the two companies.—Id., p. 762.

Dual operation: [Vol. 12-14, 17-19, 21].—Commission authorized applicant to control a contract carrier of automobiles, although already in control of a common carrier of automobiles with some duplicate authority with the restriction that contract carrier's rights to services under contract with one shipper, General Motors, and conditioned common carrier's rights against services for that shipper. Restrictions are not favored but operations of the carriers resembled each other sufficiently to warrant imposition of said restriction.——Ryder System, Inc.—Control—Complete Auto Transit, 109 M.C.C. 275 (286-8).

Fitness of applicants: [Vols. 17-19, 21].—The significance of past violations depends on their quantity, duration, and nature. However, record in purchase proceeding shows that vendee has a history of frequent violations spanning many years and involving willful misrepresentations to the Commission; also, while actions taken by vendee's major stockholder in effectuating and continuing unlawful control of vendor's operations afford ample grounds for a finding of unfitness, his fraudulent efforts to revitalize vendor's dormant rights (including, among other things, false freight bills and false equipment leases) and his admissions thereof to the Commission's representative remove any doubt with respect thereto. Although there is some indication of recent improvement, corrective measures were taken only after Commission investigation disclosed the wrongdoing and then only to facilitate the pending applications; considering the flagrant disregard for regulation shown, reliance on any promises or representations of future good faith conduct is not justified. Denied.—National Freight, Inc.—Purchase—Pittsburgh Wheeling Exp., 97 M.C.C. 642 (654-6, 660-3).

Since acquired carrier's controlling individuals have been superseded, and the violations of §5(4) which had been effectuated have been terminated, the Commission is relieved of the necessity of considering the fitness of the persons formerly in control, as an element in determining whether proposed control and merger transaction merits approval; however the law violation found to have been effectuated under such former control remains of importance to the extent that it is necessary to determine whether an overriding public interest exists to permit continuance of the operations conducted under unlawful control and management.—Buckingham Transp., Inc.—Control and Merger, 97 M.C.C. 700 (713).

Since additional information submitted at a further hearing solely on question of vendee's financial fitness shows that vendee is now financially fit to consummate proposed, the application is granted in part. Vendee's overcapitalization does not constitute a bar to approval since 50 percent of its total capitalization would be evidenced by stock, and its total investment in its wholly owned subsidiaries is included in capitalizable assets on a cost basis as compared with their net worth. Approval is conditioned however, on elimination of overcapitalization through non-payment of dividends by vendee to its stockholders or affiliated companies, and submission of evidence verifying amendment of its charter to reflect authority to issue necessary additional stock and the additional capital investment made by its new majority stockholder.—Refrigerated Transport Co., Inc.—Purchase—Kurtz, 104 M.C.C. 114 (117, 118).

Applicants are fit to consummate the proposed transaction since the record is insufficient to warrant a finding that vendor fraudulently obtained his certificate in order to permit vendee to combine its authority with that of vendor. The evidence indicates that vendor was inexperienced in the transportation industry and in obtaining his certificate he relied heavily on vendee's sole stockholder who was related to him by marriage; that he made sincere attempts to raise cash to go into the trucking business, and while he failed to inform the Commission that due to changed circumstances he would be unable to operate if a certificate was issued to him, such failure does not constitute fraud.—Sawyer Transport, Inc.—Purchase—R. C. Wilson, 104 M.C.C. 233 (242-44).

Applicant's financial fitness to consummate the proposed control and merger is a prime factor in determining whether the transaction is consistent with the public interest. No such finding is warranted herein since applicant would have a negative working capital position and its debt-equity ratio will probably be unsatisfactory since its income is running substantially below prediction. Further, applicant's overcapitalization should not be ignored in determining its financial fitness despite prior authorization to recapitalize since it might also be overcapitalized if only the control transaction were consummated. Additionally, the findings prerequisite to statutory authorization cannot be made in the absence of more information concerning applicant's non-carrier corporate parent's ability to curtail $3,350,000 in acquired obligations since the impact on applicant's operations which would result from its parent's possible inability to meet its obligations could be severe in view of applicant's financial condition and because it depends upon the parent's ownership of tangible property utilized by applicant in its operations.—Consolidated Freightways Corp. of Delaware—Control. 104 M.C.C. 379 (384-85).

Working capital (current assets less current liabilities) equal to one month's expenses exclusive of depreciation is not a minimum requirement for financial fitness as was stated in prior reports in this proceeding. Consequently, applicants' capital needs were overstated and source of capital underestimated. Such prior findings withdrawn.—Consolidated Freightways Corp. of Del.—Control, 104 M.C.C. 658 (661-2)*.

Department of Transportation, an intervener herein, withdrew its opposition upon applicants' stipulation of compliance with the Department's safety regulations. However, consummation of purchase transaction would result in applicants' loss of identity as motor carriers making said stipulation impossible to enforce. Commission, therefore, approved application but required this proceeding to remain open for one year to permit the Department to petition for supplemental action if safety compliance is not accomplished and maintained.—Interstate Truck Service—Purchase—Safeway, 109 M.C.C. 195 (201-2).

In addition to vendee, its subsidiary and its noncarrier affiliates were all necessary parties to properly joined as applicants in this §5 application. Accordingly, consideration must be given to the ability of each party to meet their commitment to pay their proportionate share of the total purchase price.—East Tex, Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (318).

Despite significant overcapitalization, vendee's overall financial picture is favorable as shown by conversion of its working capital deficit into a surplus, reduction of its capital deficit by nearly half, its proven ability to sell vendor's equipment, and its increasing profitability. Transaction approved.—Universal Transport, Inc.—Purchase—Muck, 109 M.C.C. 871 (879)*.

See also Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, n. 9 above; Refrigerated Transport Co., Inc.—Purchase—Kurtz, n. 8b above; Schwerman Trucking Co.—Control and Merger case, n. 8b above.

Intrastate operating rights: [Vols. 12-15, 17-19, 21].—Question of the validity of the Commission's order stating that permit issued to liquidating carrier (in proposed merger proceeding) by the Washington Public Service Commission constituted a certificate of public convenience and necessity within meaning of the second proviso of §206(a)(1) and authorizing carrier to engage in operations in interstate or foreign commerce corresponding to operations authorized by the said permit, is not a question for determination in the merger proceeding. Therefore, protestants' motion for continuance of §5 proceedings pending determination of liquidating carrier's single-State status, and their motion to strike certain data presented by that carrier, are both denied.—Helphrey Motor Freight, Inc. —Purchase—Manning Freight, 97 M.C.C. 549 (556-7, 561-2)*.

In approving §5 purchase application the Commission held that it was necessary for multiple-state vendee seeking to continue the operations performed by vendor within a single State by virtue of claimed "grandfather" rights under §206(a)(7), or a certificate of registration, to obtain a certificate of public convenience and necessity under §207.—Lake Shore Delivery, Inc.—Purchase—Durst Delivery, Inc., 97 M.C.C. 623 (627).

Where operating rights of a multiple-state carrier are limited to nonradial irregular routes which are territorially confined to points in Arizona, and holder of certificate of registration is authorized to operate over regular routes wholly within California, there can be no common point between the two carriers for lawful interline. Use of points within commercial zone bordering the state line to extent that extend beyond confines of Calif. into Arizona are unlawful because such points are beyond underlying California authorization of the certificate of registration.—Reliance Truck Co.—Control and Merger, 109 M.C.C. 495 (501)*.

See also Arrow Motor Transit, Inc.—Control, n. 126, below.

Key points: [Vol. 14].—Service of motor carrier not subjected to key point restrictions in view of special circumstances whereby only one United States point located on the U. S.—Canada boundary line may be served, and service by the motor carrier is restricted to that to be conducted in foreign commerce between points in the United States, on the one hand, and points in Canadan on the other hand.—Canadian Ntl. Transp.—Investigation of Control, 109 M.C.C. 392 (404-405).

Purchase and sale: [Vol. 15].—In proposed sale of operating rights, the Commission noted that there is no fixed formula for determining whether the purchase price is reasonable and that a carrier's earning record is not the sole criterion by which to determine the reasonableness of the proposed sale.—Brasewell Freight Lines, Inc.—Purchase—Shayler, 101 M.C.C. 1(12).

Regular, irregular routes: [Vols. 12, 14, 17, 19, 21].—In considering protestants' objections to the unification of applicants' operating rights, on the ground that the irregular-route operations of vendor will be converted to a regular-route operation, the Commission stated that operations under the unified rights will determine the type of service vendee will provide, and considering that vendee has been conducting operations under the considered rights for over two years, pursuant to temporary authority, without complaint, it must be presumed that the irregular-route operation of vendor has not been unlawfully converted to a regular-route operation.—Braswell Freight Lines, Inc.—Purchase—Shayler, 101 M.C.C. 1 (12-13).

When operations over irregular route authority tend to become regular in character, a carrier has an obligation of either checking the tendency and thereby preserving irregular route status, or of obtaining appropriate authority for conversion. Operations over irregular route authority which have become regular and which have been performed in good faith are entitled to consideration in determining whether there is a need for the regular route service. If such rights are dormant, shipper need for reactivation provides an alternate basis for approval.—Ryder Truck Lines—Pur.—Guignard Freight Lines, 109 M.C.C. 682 (685)

As applied to regular route operations evidenced by certificates of registration, it was found that regular routes should not be pulverized by requiring a showing of operations to and from each and every point on those routes. Evidence of substantial past operations is sufficient, despite the fact that it was shown by protestants that some of the points had never been served. In these circumstances, a public need by supporting shippers is cumulative, and therefore, unnecessary.—Wilson Trucking Corp.—Purchase—Compton Lines, Inc., 104 M.C.C. 806 (811-12).

Restrictions upon operating rights and services: [Vols. 12, 14-19, 21].—The Commission need not impose restrictions stipulated between applicants and protestants in §5 proceedings even when they are offered as amendments to the applications; and examiner was entitled to due deliberation on imposition of proposed restriction on contract-carrier chartering rights authorized to be transferred to chartering of vessels owned by vendee, and was under no duty to indicate his decision thereon at the hearing. However, such restriction, precluding vendee's acting as a conduit of chartering, is not barred by prohibition in §309(g) of any limitation on a water contract carrier's right to add to its equipment or services within scope of its permit, since §5 specifies that approval of transactions shall be on such terms and conditions as the Commission finds reasonable. As transfer of ownership of the permit is akin to issuance of a new permit to a different carrier, proposed restriction is unlike one imposed on authority which will continue to be held by the carrier to which initially granted; the limitation found necessary is not so much a restriction on the permit itself as a condition on approval of the transaction which could not otherwise be found consistent with public interest.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (269, 270).

Inasmuch as vendee, under temporary authority, provided service between points in Pennsylvania, by tacking its own interstate authority to considered interstate purchase rights, in approving proposed purchase transaction, the previously unrestricted purchase rights are restricted against service between points in Pennsylvania. Such restriction is acceptable to applicants and imposition thereof would preclude future use of interstate authority as a device to avoid state regulation of intrastate commerce.—Long Transp. Co.—Purchase—La Grou, 97 M.C.C. 631 (639).

In view of finding that unrestricted approval of proposed motor carrier control and merger would not have a substantial adverse effect on protestant's operations, no restrictions against tacking will be imposed. Restrictions against tacking generally are looked upon with disfavor, although they may lawfully be imposed where it appears that their nonimposition would have an adverse effect on the operations of protestants. Moreover, no such restriction is proper where applicants have each handled traffic, as here evidenced, from or to the territory of the other by interline; i.e., where no new competitive service is likely.—Eazor Express, Inc.—Control and Merger, 101 M.C.C. 707 (716).

The proposed control through stock purchase will be conditioned against transportation of certain commodities in bulk, in tank vehicles, pursuant to voluntary stipulations entered into by the parties although the Commission is not bound by such stipulations; additionally, approval of the transaction is conditioned upon modification of vendor's certificate authorizing the transportation of general commodities, without exceptions, to exclude these commodities usually excluded from rights to transport general commodities.—Hall's Motor Transit—Control—Pony Express, 104 M.C.C. 353 (365).

Removal of the no-tacking restriction is not justified by the evidence presented at both hearings. There is no evidence that vendor or its predecessor ever participated in interline movements beyond the territorial scope of its considered authority to include the four states in question; neither is there evidence of vendee's ever serving these states. To the extent that vendee's operations under the unified rights includes such interline movements it constitutes a new service, without the requisite showing of public need.—Fogarty Bros. Transfer—Purchase—Grenon & Son, 104 M.C.C. 444 (447).

Restrictions against tacking are undesirable and will not be imposed except where clearly shown in the public interest. Certificates of applicants speak for themselves, and it is not incumbent upon applicants to point out all tacking possibilities that would result from a unification. In general, acquired rights may be tacked freely with those of acquiring carrier unless protestant introduces specific evidence to justify a restriction. Burden of proof should remain upon protestants.—Chemical Leaman Tank Lines, Inc.—Pur.—Ryder, 104 M.C.C. 686 (704-5).

In general, the scope of interstate operations are governed by the interpretation or construction placed upon such certificates by the issuing State agency. However, where the limitation upon the scope of the underlying intrastate authority is clearly directed against local traffic within the State, it is inapplicable to operations in interstate or foreign commerce. See *Miller-Purchase-Newman*, 57 MCC 395.—Wilson Trucking Corp.—Purchase—Compton Lines, Inc., 104 M.C.C. 806 (810-11).

The test of substantiality is flexible, taking into consideration such factors as nature of industry and population served; carrier's size; resources, and financial viability; nature of rights involved; frequency of service; and variety of commodities transported. Commission will not pulverize an applicant's authority product by product, or part by part, so as to restrict scope of its operations where there is evidence of substantial operations in addition to bona fide operation as general commodities carrier inasmuch as a motor carrier, particularly a proviso operator, holding out to carry general commodities should not be restricted to specified commodities because its carrying space was most often occupied by a particular kind of goods. Considered in this light, applicant's overall operations warrant approval of authority as a general commodity carrier.—Ohio Fast Freight, Inc.—Control—Trumbull, 109 M.C.C. 88 (92-94).

Commission concluded that a restriction against "refrigerated" transportation by vendee seeking a certificate of public convenience and necessity to replace a State certificate of registration was not warranted. In order to achieve uniformity with the present policy of the Commission, stated in 106 MCC 1, no class of commodities not of the types usually excluded by this Commission from general commodities would be excluded merely because the intrastate authority supporting a certificate of registration sought to be acquired excludes such commodities. —St. Johnsbury Trucking Co., Inc.—Control and Merger, 109 M.C.C. 166 (169)*.

Commission has attempted in recent years to discourage or remove restrictions as unnecessary burdens upon operating rights unless shown clearly to be required in the public interest, see *Fox-Smythe*, 106 MCC 1. Restrictions in vendor's State certificate are for protection of intrastate carriers and are unnecessary for interstate traffic.—Home Transp. Co., Inc.—Purchase—Fuchshuber, 109 M.C.C. 779 (789-90)*.

Restrictions in vendor's certificate of registration are partially contained in certificate description insofar as vendee is authorized to transport commodities requiring special equipment since such commodities meet the restriction's terms. To extent they do not, a restriction is unnecessary and none will be imposed.—Id., p. 790*.

Where transferor has been conducting active overall operations of substantial proportions, our established policy against atomizing or fragmentizing certain segments of a carrier's authorized regular routes is of prime significance in considering what, if any, cancellations or restrictions should be placed upon particular segments of transferor's extensive system of regular routes.—Branch Motor Exp. Co.—Control—Middle Atl. Transp., 109 M.C.C. 807 (814-5).

Restriction imposed limiting operating rights to be sold to traffic originating at and destined to points involved in said certificate inasmuch as this authority permits operations in conjunction with authorities now held by vendor and subject of a pending purchase application by a vendee other than that herein. Restriction contingent upon consummation of said pending application. —Caravan Refrigerated—Pur.—Bilyeu Refrigerated, 109 M.C.C. 843 (853).

See also Buckingham Transp., Inc. —Control and Merger, n. 3, above. Michigan Express, Inc.—Control and Merger—Cushman at §5(2), n. 7, single-line; Ryder System, Inc.—Control—Complete Auto Transit at §5(2), n. 110 dual operations.

Revocation, suspension, abandonment: [Vols. 12-14, 17-19, 21].—Commission, citing 65 MCC 56, held that avoidance of a transaction within the scope of §5 through forfeiture, with our approval, of motor carrier status prior to consummation, is not equivalent to approval under §5; and that if a requested revocation is for that purpose, withholding termination of such motor carrier status is warranted until we have determined whether the transaction may be properly found consistent with the public interest.—Greyhound Lines, Inc., Ext.—Grand Canyon, 109 M.C.C. 96 (113-4).

Routing practices: [Vols. 15, 18, 19, 21].—See Central Pac. Ry. Co. Control case, §3(4), n. 41.

Securities: [Vols. 12, 14, 16-19, 21].—Although record does not disclose whether the long-term obligations to be assumed by survivor in proposed merger are securities within §214, on basis of the evidence presented action on the merits under §5 need not be deferred, but the transaction is approved with express understanding that, if the provisions of §214 apply, it will not be consumated until the Commission's approval under that section has been obtained through appropriate application; however, this does not preclude payment of those obligations in cash concurrently with consummation.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (485).

Although payment of proposed purchase price will not adversely affect vendee's financial structure and it will incur no fixed charges, it has been negotiating with a bank for a revolving credit fund, and approval of purchase should not be construed as authorizing issuance of any security within meaning of the Act in connection with such fund.—Carolina Freight Carriers Corp. —Purchase—Kilgo, 93 M.C.C. 543 (555)*.

Securities issuable by the subsidiary or any of the noncarrier affiliates of vendee, a motor common carrier, are not subject to the provisions of §214 inasmuch as said noncarrier affiliates are not shown to control vendee and therefore are not subject to Commission's jurisdiction as determined by §5(3) of the Act.—East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (320).

Separate agreements: [Vols. 19, 21].—Credit agreement between survivor, liquidating carrier (a wholly owned subsidiary of survivor), and a bank, containing certain limitations on declaration or payment of dividends, distribution of assets, or redemption or retirement of stock by either carrier, does not preclude their merger.—Arkansas-Best Freight System, Inc.—Control—Delta, 93 M.C.C. 474 (484).

See also Central Pac. Ry. Co. Control case, §3(4), n. 41.

Splitting routes: [Vols. 12, 13, 19].—Prior decisions in §5 acquisition proceedings limit "splitting" of operating rights to situations consistent with public interest. Evidence shows that transaction herein would create substantial duplications of operating rights upon consummation of other proceedings cited herein. Since such duplication is a contingency, restriction against vendor's authority to serve four named States will become effective only upon our approval and consummation of these other proceedings. —Caravan Refrigerated—Pur.—Bilyeu Refrigerated, 109 M.C.C. 843 (851-3).

Stock transactions:— Vols. 14, 17-19, 21].—Proposed issuance by Louisville & N. R. Co. of not exceeding 772,467 shares of $35 par-value preferred stock and 257,489 shares of $50 par-value common stock to effect a merger with Monon R. Co. approved. Request for additional issuance of stock denied as it is unnecessary to effect said merger and no other reason for issuance having been shown.——Louisville & N. R. Co.—Merger—Monon Railroad, 338 I.C.C. 134 (193, 203-4).

See also Great Northern Pac. & B. Lines, Merger—Great Northern, n. 8, above; Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase case, n. 45 above.

Temporary authority: [Vols. 12, 14-17, 19, 21].—Evidence showed that vendee's temporary control had not only stifled its prior competitive operations with those of vendor when they had been separately controlled before approval under §210a herein, but that vendee had completely captured all of vendor's traffic during its 10 months of temporary control. Thus, its subordinate sale of those routes to Bruce Motor Frt. was an attempt to barter off nothing more than "bare" operating rights for which it had no further use.——East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (309-12).

In cases involving conversions of certificates of registration to certificates of PC&N under §207 when they are directly related to a §5 application, the Commission's objective in approving temporary authority under §210a(b) pending disposition of the §5 application is to preserve existing motor carrier operations, if failure to grant such temporary approval may result in their destruction or interfere substantially with future performance of continuance service to the public. New operations instituted under such temporary authority which deviates substantially from operations conducted to such authority cannot alone be considered evidence of past lawful operations supporting a public need for their continuance. Thus, applicant's operation under temporary authority is not best evidence of public need for the proposed service.——Transport Serv.—Control—Gould, Inc., & Colo. Frt., 109 M.C.C. 359 (378-9).

See also Bilyeu—Lease—North Central Truck Lines, Inc., §5(2), n. 50, supra.

Violation of Act: [Vols. 12-19, 21].—Defendant's unilateral revision of train schedules and standards of service adversely affecting interchange with complainant at Maybrook, N. Y., through increase in transit time violates conditions imposed for complainant's protection in *Pennsylvania R. Co.*, 334 ICC 25. Defendant ordered to cease and desist and to inform public of the restoration of service. However, complainant's demonstrated lack of diligence in bringing its claim before this Commission is "something akin to laches" and, accordingly, complainant's request for an award of damages, which is discretionary with the Commission, is denied.—Erie Lackawanna Ry. Co. v. Penn Central Co., 338 I.C.C. 513 (542-5).

See also Southern Pac. Co.—Control, Western Pac. R. Co., §5(2), n. 111.

111. Procedure, generally.—[Vol. 21].—Earlier determinations of Commission that benefits of inclusion should be divided between parties to consensual arrangements in railroad merger cases did not bind Commission to follow similar practice when fixing equitable terms for involuntary acquisition of railroads under §5(2)—Erie-Lackawanna R. Co. v. United States, 279 F. Supp. 316 (320)*.

Record affords no basis for finding the Commission abused its discretion in denying Denver & R.G. W.'s petition, filed after further hearing on reconsideration of Northern Lines' merger applications, requesting (1) an opportunity to present evidence on over-all effects of the merger and pending *Rock Island* and *Milwaukee* merger applications, and (2) that decisions in the three proceedings be withheld pending determination of effects of the proposals. The Commission, in denying further hearing, recognized importance of the effect of its decision on the general railroad structure in the west and decided to handle the problem by exercising its broad power to relate the pending applications to other proposals, while at the same time going forward with instant proceeding in a manner deemed best to protect the public and competing railroads; further, it also decided that consolidation of the cases was unworkable and that final decision in each case should not be withheld until all were ready for decision.—United States v. United States, 296 F. Supp. 853 (874)*.

In addition, the Commission retained jurisdiction for 5 years (or such other period as it might, for good cause, prescribe) in order to impose just and reasonable conditions found to be required by any cumulative or cross-over problems arising from approval of the merger or any other §5 transactions with respect to the territory involved and, also, to enable it to consider among other things petitions by any railroad in the territory for inclusion in the merger authorized; moreover, it held that consummation of the merger would constitute irrefutable assent by applicants to the reservation of authority to impose, after hearing, any just and reasonable conditions found necessary and appropriate. Manner in which the Commission proceeded while, at the same time, providing for readjustments in light of the over-all situation in the territory—as it might develop—seems to be reasonable in effecting the public interest as expressed in the national transportation policy. Complaints dismissed.—Id., pp. 874-5, 877-8.

While the Commission has the necessary power under appropriate circumstances to consolidate proceedings in which the issues are closely related, delay in deciding proposed merger transaction until such time as the Penn-Central merger is ready for final determination might endanger or defeat entirely a unification shown beyond question to be in the public interest. In view of the applicants' developing and relying on record sufficient to establish public interest, the adverse effect which could result from delayed determination of issues, and the adequate safeguards to the public through imposed conditions, consolidation of considered proceedings for decision with Penn-Central merger case is not required by public interest; nor is reopening of proceeding for further hearing necessary, since record is sufficiently well developed to permit separate determinations.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (18-19).

Sections 5(2), 5(4) and 5(7) of the Act do not require summary dismissal of control applications even if applicants and railroad interveners violated the Act by unauthorized purchases of stock of railroad sought to be acquired. Although an element to be considered in determining the public interest aspects of proposed consolidations is illegal stock purchases, it is not necessarily a bar to granting such authority as would be consistent with the public interest. If motion to dismiss were granted merely upon grounds of possible illegality in stock purchases, or lack of stockholder assent to proposed transactions, the possibility of finding these proposals to be in the public interest would be precluded; motion denied.—Southern Pac. Co.—Control—Western Pac. R. Co., 327 I.C.C. 387 (393-4).

Further, although decision as to merits of control applications is warranted, the embraced investigation, and complaint proceeding alleging control applicant's violation of the Act, is continued and broadened to include three other carriers not parties therein. The alleged control or power to control is not alone rail applicant's holding of 10 percent of outstanding stock of the carrier to be controlled, but the ownership by and among potentially hostile carriers of 50 percent of such outstanding stock. Therefore, no ruling is made at this time regarding applicant's alleged violation.—Id., p. 396.

Applicants' motion that two related §5 applications in consolidated proceeding, one involving purchase of operating rights and property of one bus line and the other involving acquisition of stock control of another passenger carrier, be considered as separate and distinct transactions and that separate reports and orders be issued therein, denied. Since the examiner was able to consider each transaction separately with respect to the question of consistency with the public interest, there was nothing improper in his handling them in a single report. Moreover, operational features under one transaction and the results flowing therefrom are the same as in the other and, in addition, later filed application is contingent on prior approval of the one filed earlier. Also, in accordance with §17(3), to handle the two matters in a single report will best conduce to the proper dispatch of business and to the ends of justice.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 97 M.C.C. 733 (739-40)*.

Failure of persons in control to join the application herein makes it impossible to determine on this record whether control by them would be consistent with the public interest. Application denied without prejudice to an amended application.—Illinois—Calif. Express—Purchase—Ariz.—Utah Express, 104 M.C.C. 578 (589-90).

Change of form rather than substance in the nature of transaction was not material insofar as notice to public in Federal Register was concerned, particularly as such notice did not even purport to give all details of proposed transaction. Moreover, even if notice were to be considered defective, it was cured by subsequent republication giving notice of amendment after which ample time remained for interested persons to file for intervention. Technical objection held to be de minimus and not warranting further delay or postponement of proceedings.—Chemical Leaman Tank Lines, Inc.—Pur.—Ryder, 104 M.C.C. 686 (697-8).

Tilting of an action is purely administrative and is not determinative of the nature of a transaction which may ultimately be approved. Although this application was docketed as a purchase (portion) based on the opening statement, no difference has been shown between this transaction and a true statutory merger, which is what it has been found to be, notwithstanding its title.—Id., p. 708-9.

Upon amendment, in which all parties in control of vendee joined application and submitted satisfactory financial and other data as required by exhibit A to the application, the defect which required denial in the initial report, 104 MCC 578, has been corrected. Application approved.—Illinois—Calif. Express—Purchase—Ariz.—Utah, 104 M.C.C. 815 (816-7)*.

All parties, other than noncarrier individuals, controlling a carrier-applicant are required to submit financial and other data required by the Commission. The noncarrier holding corporation in control of vendee joined the application herein by affixing its representative signature but its failure to submit the required data and the failure of those persons in control of said noncarrier to join the application makes the application fatally defective unless appropriately amended. Denial of application on other grounds renders such failures moot but these requirements will be present in all future §5 proceedings.—Arkansas—Best—Purchase—Indianhead, 109 M.C.C. 885 (889-90).

Commission held that a hearing examiner may take official notice of a finding in another matter already determined by the Commission, although not yet administratively final, where the parties to each proceeding were the same, and where each party had the opportunity to present evidence and to crossexamine adversary witnesses on the particular issue involved.—C. O. D. E., Inc.—Control—Nolte Bros. Truck Lines, 109 M.C.C. 552 (557).

See also Pennsylvania R. Co.—Merger—New York Central R. Co., at §17(6), n. 15., Pittsburgh & N. E. Trucking Co.—Control & Merger at §5(2), n. 110, Certificate under §207.

112. Hearing; notice.—[Vols. 14-19, 21].—In suit to enjoin Commission orders authorizing grant of trackage rights between Longview, Wash., and Portland, Oreg., to Milwaukee railroad without a hearing, Union Pac. R. basically contends that the application should have been filed under §1(18)-(21) which requires hearings and a finding of public necessity, instead of §5(2) under which public hearings are within the Commission's discretion. However, §5(2) permits a railroad, with Commission approval, to acquire trackage rights over another line; and the Commission was authorized to consider the application under §5(2)(b) in accordance with its long-established practice. While it is also claimed that the Commission abused its discretion in not granting a hearing, practically all evidence UP seeks to present was heard at hearings on the Burlington Northern merger which the Commission approved on condition that the Milwaukee have access to Portland. And there is no merit in UP's contention that the §5(2) application constituted an admission that a hearing was necessary or that all parties expected further hearings on trackage rights. Commission orders sustained.—Oregon-Washington R. & Nav. Co. v. United States, 324 F. Supp. 124 (126-7)*.

Petition for hearing denied as hearing is not necessary when the Commission's approval of a trackage rights agreements and consummation of the proposed transaction will not adversely affect existing transportation service to the public (see *Operation*, 282 ICC 297) as is case herein where even petitioner for hearing favors applicant's access to the Chicago area.—Louisville & N.R. Co.—Trackage Rights, 334 I.C.C. 412 (416-7).

Applicants' contention that the examiner did not consider the whole record, but rendered his decision on the "realities of the situation" not sustained. On review of the examiner's report in light of the testimony and briefs, it is concluded that his reference to "realities of the situation" was a prosaic statement and did not suggest that extra-record matters were controlling; that the examiner considered all of the evidence of record; and that applicants have been accorded a full and fair hearing. Furthermore, the Commission's consideration of the record was *de novo* and any errors as to minor facts in the report did not affect the Commission's decision or ultimate conclusions.—Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, 97 M.C.C. 733 (741).

See also Pennsylvania R. Co.—Merger—New York Central R. Co., at §17(6), n. 15.

115. Evidence.—[Vols. 12-19, 21].—In action to set aside and enjoin Commission order approving bus lines' control application, plaintiff (protestant) claims the order was obtained by fraud upon the Commission on the part of applicant, and that disclosure of certain facts would have shown a §5(4) violation which would have led to a different Commission decision. But giving false or misleading testimony during a judicial proceeding does not constitute a fraud upon the court unless it appears that the court was so misled by such testimony as to render a decision based on a mistaken view of material facts; this is equally true in an administrative proceeding. There is no showing that the Commission was misled in any material way by the testimony plaintiff relied on or that any part of its decision was based on a mistaken view of the facts. Also, plaintiff's reliance on §5(4) is misplaced; the Commission concluded, on facts before it, that no prior unlawful control of the carriers had been acquired and its conclusion is amply supported by the record. Plaintiff clearly has not shown that order under review was obtained by fraud; its motion for relief based on fraud, denied.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (378, 381-4)*.

In discussing merits of proposed merger transaction, the Commission takes official notice of facts obtained from annual reports filed with the Commission by carriers involved, a report of the Securities and Exchange Commission, and data obtained from recognized finance and industry publications; however, pursuant to the Administrative Procedure Act, parties challenging them are afforded opportunity to show to the contrary upon timely filed petition setting forth objections.—Norfolk & W. Ry. Co. and New York, C. & St. L. R. Co. Merger, 324 I.C.C. 1 (10).

Through evidence of service by a prospective purchaser under temporary authority is not conclusive, it may be considered with other evidence in determining whether the transaction and resulting unified operation would be consistent with public interest.—Carolina Freight Carriers Corp.—Purchase—Kilgo, 93 M.C.C. 543 (551)*.

Also, when record shows that vendor has provided the shipping public with substantial service under its general-commodity authority between many points on its regular routes and in its irregular-route territory, it is not required to submit evidence of operations from and to every authorized point, or in connection with all combinations of its routes, in order to show that its operations have been continuous and substantial. However, many of its off-route points in Maryland and Pennsylvania, which have populations over 20,000 and surrounding trade territories, are not reasonably near the appurtenant regular route but, in some instances, are hundreds of miles off-route in areas not generally served by vendor; in this highly unusual situation, such points take on the characteristics of principal or terminal points, and vendor is not relieved from necessity to establish with certainty either that its authority to serve such distant and densely populated points has remained active through rendition of service, or, in the event it is dormant, that need exists for service from and to those points.—Id., pp. 553-3.

While traffic handled by a vendor subsequent to beginning negotiations for sale of its rights is entitled to little weight in determining scope of operations conducted under such rights, a seller has the right to augment his traffic even though he anticipates such a sale, if the augmentation is free from the "control, influence, or dominion" of proposed purchaser. Evidence does not show that any serious negotiations commenced prior to increase in interstate traffic handled by single-State acquired carrier, although a possible merger had been previously discussed; and record is not sufficient to show any control or management of applicant carriers in a common interest; therefore, acquired carrier's operations are entitled to consideration as evidence of need for continuance thereof by acquiring carrier. —Helphrey Motor Freight, Inc.—Purchase —Manning Freight, 97 M.C.C. 549 (562-3)*.

Although evidence of movements conducted after the parties have commenced negotiations for sale of the underlying rights can be accorded little weight in determining whether a transaction is consistent with public interest, the vendor has a right to build up operations after commencement of negotiations and evidence of such operations may be considered if it is clear that such build-up was free from prospective purchaser.s control, influence, and dominantion. —Miami Transp. Co., Inc., Of Ind.—Pur.— Strothman, 97 M.C.C. 600 (604).

In proposed sale of operating rights, in an attempt to show that protestants will not be adversely affected by the transaction, applicants requested the Commission to consider certain data relating to the operations of protestants since the completion of the hearing. This data is not of record and the Commission held that it would not be considered in disposing of the issues here present.—Braswell Freight Lines, Inc.— Purchase—Shayler, 101 M.C.C. 1(16).

In purchase proceeding evidence as to interline operations between applicants at Birmingham, Ala., which does not reflect vendor's continuation of a lawful prenegotiation service, is entitled to no consideration. The record shows that these operations were preceded by negotiations between applicants; that they were performed under circumstances where vendee was contacted by shipper desiring service to vendor's territory, and, in certain instances, where shipper was referred to vendee by vendor; that vendee furnished all tractors and trailers. and that vendee furnished the drivers, paid their salaries, and bore the cost of equipment inspections. Thus, these operations were not, as contemplated by the leasing rules and regulations, for the purpose of augmenting vendor's equipment in order to transport the traffic it developed, but rather a method by which vendee could transport traffic generated by it pursuant to an unlawful fictitious leasing of vendor's operating rights in violation of §5(4); therefore, evidence as to these operations is entitled to no consideration.—Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, 101 M.C.C. 368 (373-4)*.

In attempting to determine the adverse effect of joining vendor's operations to those of vendee, the entire Commission on reconsideration of an appellate division's decision took official notice of protestants' financial data as reflected in their annual or quarterly reports, in order to have a broader base upon which to appraise the competitive effect of those operations on the overall operations of protestants. Such financial data shows that protestants' operations suffered no perceptible adverse effect from vendee's management of vendor's operations under temporary authority and any resulting through operations. Approved without restriction.—Eazor Exp., Inc.— Purchase—Fleet Highway Freight, 101 M.C.C. 719 (722-4)*.

Evidence of shipments of frozen waffles by vendor, an irregular-route special commodity carrier, from Philadelphia, Pa., to Waterford, Conn., and to Binghamton, N.Y., is admissible and proper. In transporting these shipments vendor operated from Philadelphia to

New York, N.Y., thence back to Mercer County, N.J., and thence to Waterford and Binghamton. The movement from Philadelphia to New York to Mercer County was provided under separate paragraphs of vendor's grocery store merchandise authority, and thence under its processed foods authority. Although these rights are contained in one certificate, there is no indication that they were not intended to be considered as separate, distinct, and unrestricted. Under these circumstances, the questioned service was lawfully performed by a combination of the several authorizations and is entitled to consideration.—Lester C. Newton Trucking Co.—Purchase—Buglio, 101 M.C.C. 480 (484-5).

Applicant attempted to discredit protestants' witness (a former employee of applicant) by testimony of another witness regarding the former employee's animosity toward applicant, which testimony was marred by contradiction, and by questions relating to certain matters in the witness' past; however, it is most significant that applicant failed to produce witnesses, who could have been made available, to contradict facts testified to by that witness. In the absence of evidence to rebut testimony of protestants' witness, examiner properly accorded his testimony the weight to which it was rightfully entitled. Furthermore, the examiner could judge veracity from actually seeing and hearing the witnesses.—General Movers Corp.—Control—Martin Van Lines, Inc., 101 M.C.C. 748 (761-2)*.

Acquired carrier's abstract of shipments made subsequent to its contract with surviving carrier is entitled to little weight but may be considered for the purpose of showing little or no change in the pattern of operations at acquired carrier's irregular route points.—Thurston Motor Lines, Inc.—Control and Merger, 104 M.C.C. 1 (6).

Evidence not submitted at the hearing and not subjected to protestants' cross-examination is dehors the record and not entitled to consideration under rule 1.86 of the Commission's General Rules of Practice. Applicants sought to include in their reply copies of correspondence with and references to an informal staff opinion of a state Public Utilities Commission concurring in their interpretation of a state supporting certificate.—St. Johnsbury Trucking Co., Inc.—Control and Merger, 104 M.C.C. 137 (141).

Protestants' objection to admission of applicants' exhibits on the basis that they do not show "representative" past operations are insufficient to preclude consideration of the exhibits, and go to the weight to be accorded them rather than to their admissibility. Protestants based their objection on the grounds that both exhibits fail to indicate the particular routes traversed, and do not, in fact, reflect representative operations in view of the admission by the sponsoring witnesses that the shipments reflected on the first exhibit were selected at random, while those shown on the second exhibit did not include certain traffic.—Id. (142).

Protestants' objection to applicants' exhibits relates to the qualifications of the sponsoring witness rather than to the authenticity of the evidence, and as such, goes to the weight to be accorded to the exhibit rather than its admissibility. The exhibits were prepared by surviving carrier's general manager or by others under his direction and supervision, from liquidating carrier's delivery receipts. While the sponsoring witness was not employed by applicants during the period covered by the exhibits and had no personal knowledge of the operations in question, the underlying data supporting the exhibit constitutes records made in the regular course of business, and as such, it and the exhibit which it supports are admissible under rule 1.79 of the Commission's General Rules of Practice.—Id. (142-43).

Denial of the proposed purchase transaction is supported by reason of the dormancy of vendor's operating rights. Exhibit 7, which was sought to be introduced in evidence to show past operations, was properly rejected since 31 of the 40 shipments shown in the exhibit were supported by "tear copies" of the underlying bills of lading rather than originals. These "tear copies" did not withstand the test of credibility when challenged under cross-examination by protestants. They did not establish observation of a gateway, failed to show whose vehicles were used in the movements, and otherwise lacked adequate supporting data to establish the validity of information thereon. Moreover, vendor's witness appeared insufficiently acquainted with vendor's movements shown on exhibit 7. On cross-examination, he, therefore, could not qualify the abstract through his oral testimony.—Fogarty Bros. Transfer, Inc.—Purchase—Transport Van Lines, 104 M.C.C. 665 (667).

Evidence of leasing arrangements between applicants established unlawful control but was not sufficient of itself to dictate rejection of past operations submitted in support of the related §207 application as such operations were conducted under color of right—Pittsburgh & N.E. Trucking Co.—Control & Merger, 109 M.C.C. 56 (59-60).

In a §207 application related to a §5 transaction, evidence of past lawful operations under a certificate of registration satisfactorily supports approval of both applications except where such evidence was at a time when applicants were under common control in violation of §5(4), and was, therefore demonstrative of unlawful operations, such evidence was rejected as a basis for supporting the applications. Shippers' support being inadequate and the services of protestants having been found adequate to serve the involved area, applications were denied.—Reliance Truck Co.—Control and Merger, 109 M.C.C. 495 (503)*.

The quantum of shipper evidence needed to support reactivation of dormant authority is a factor which changes from case to case and there are no hard and fast standards delineating the degree of proof necessary for applicant to prevail. Commission, following its decision in *Ohio-Vermilion*, 101 MCC 444, found that a strong need has not been shown by shipper evidence herein.—Fischbach Trucking Co.—Control and Merger—Peck, 109 M.C.C. 739 (750).

Commission held that its hearing examiner erred in limiting supporting shipper testimony to the specific locales mentioned in certifications submitted by applicant in the related §207 application. The *Schaeffer* criteria, 106 MCC 100, regarding shipper testimony were met when shippers' affidavits were filed and notice given to protestants. However, applicant was not adversely affected as its past operations warrant issuance of a certificate.—Mid-American Lines.—Purchase—Five J Motor Service, 109 MCC 753 (755-6).

Commission policy requires protestants to produce specific evidence in support on a general apprehension of feared traffic diversion or any adverse effect from a proposed transaction.—Branch Motor Exp. Co.—Control—Middle Atl. Transp., 109 M.C.C. 807 (821).

See also Arrow Motor Transit, Inc.—Control, n. 126, below; Continental Dispatch, Inc., case, §5(2), n. 105; Eastern Massachusetts Street Ry. Co.—Lease—Trailways case, n. 7 passenger service, above; Eazor Express, Inc.—Control and Merger case, §5(2), n. 110 restrictions; Leonard Bros. Transfer, Inc.—Purchase—Ace-R. B. Van Lines, n. 48 discontinued, above; Pennsylvania R. Co.—Merger—New York Central R. Co., at §17(6), n. 15.

116. Official notice; res adjudicate; stare decisis.—Commission considers it advisable, before discussing merits of proposed merger, to describe events occurring after the hearings, but, nevertheless, having a bearing on the decision. Official notice is taken of these post-hearing events; and, any party challenging facts set forth in connection therewith may proceed pursuant to §7(d) of the Administrative Procedure Act.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (487).

Commission held that a hearing examiner may take official notice of a finding in another case already determined by the Commission, although not yet administratively final, where the parties to each proceeding were the same, and where each party had the opportunity to present evidence and to cross-examine adversary witnesses on the particular issue involved.—C.O.D.E. Inc.—Control—Nolte Bros. Truck Lines, 109 M.C.C. 552 (557).

See also n. 115 above.

126. Burden of Proof.—[Vols. 15-19, 21].—Applicants in purchase proceeding (plaintiffs) have the burden of proving that the proposed transaction is consistent with the public interest. And, being faced with the obstacle of dormancy, they have the duty to make an affirmative showing as to the extent of past service provided under the purchase rights so that the Commission may be properly advised in order for it to determine whether and to what extent approval of the proposal would permit institution of a new service that might adversely affect existing adequate service, i.e., to consider the impact of the proposal in the interests of competing carriers, shippers, and consignees. The Commission's conclusion that applicants failed to sustain their burden of proof is supported by substantial evidence of record; order under review is sustained.—Cooper Motor Lines, Inc. v. United States, 284 F. Supp. 754 (756-8)*.

Burden is on applicant in a §5 purchase proceeding to show that a new service will not be created; and, to sustain its burden of proof, applicant must show both (1) that prior operations under the purchase rights are not dormant and (2) use to which the rights would be put would not radically differ from their prior use. And if the Commission finds that rights to be purchased are dormant or a new competitive service would be created or that vendor proposes to sell more rights than he has, then applicant must present proof under separate §207 application that public convenience and necessity require granting the application. Record shows that the Commission's denial of two §5 purchase, and related §207 extension, applications because vendees' proposed services were so different from prior lawful service as to constitute new competitive services, and because neither carrier had met its burden of proof in showing need for the new services, is based on substantial evidence and in accordance with applicable law; sustained.—Consolidated Copperstate Lines v. United States, 293 F. Supp. 858 (861, 862)*.

In §5 application proceeding the burden is on applicant to show that a new service will not be created and, to do so, it must show that substantial operations have been conducted under its authority, and that the operating rights involved would not be put to a different use in the future. Also, if the Commission finds that proposed transaction would result in a new service, either because of reactivation of dormant rights or because of a different use, applicant then must prove that public convenience and necessity require grant of the authority sought. Evidence in motor carrier merger proceeding fully justified the Commission's findings that liquidating carrier's rights in three States were dormant and that public need for reactivation thereof had not been established. There is warrant in the law and the facts for the Commission's conclusions; sustained.—Tose, Inc. v. United States, 304 F. Supp. 894 (898-900)*.

The burden was upon plaintiffs, applicants in motor carrier purchase proceeding before the Commission, to show that the rights involved were not dormant and that a new competitive service would not in fact be created by the purchaser. Ultimate effect of the Commission's order, which approved purchase of those rights that had not become dormant, was to deny authority to purchase those claimed "rights" of vendor which were dormant and thus legally non-existent; however, the Commission's findings with respect to dormancy and the absence of a public need for a new competitive service are supported by substantial evidence of record, and are neither arbitrary nor capricious. Complaint dismissed.—Beaufort Transfer Co. v. United States, 324 F. Supp. 649 (654)*.

Provisions of §5(2) do not require a showing of penury or danger of imminent bankruptcy before proposed merger transaction can be approved. Transcendent requirement, which is indispensable under criteria set out in the statute, is that carrier show the transaction is consistent with the public interest.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (494).

As an irregular-route carrier, vendor is required to show only that it has rendered substantial service to a representative number of points within its authorized area in order to support the conclusion that its operations have been substantial and continuous.—H. C. Gabler, Inc.—Purchase—H. Earl Pitzer, Inc., 97 M.C.C. 535 (540).

The burden is on applicants to show that proposed purchase is in the public interest. That burden is not met when abstracts of representative shipments fail to show that continuance by interstate vendee of vendor's past operations would be in the public interest: first abstract shows a method by which vendee transported traffic generated by it pursuant to an unlawful fictitious leasing of vendor's operating rights; the second fails to show what shipments, if any, were interlined with vendor; and the third does not involve pertinent operating rights. Furthermore, applicants' contention that the Commission should be governed in its determination of a §5 application by the prior finding of the Alabama Public Service Commission approving the transfer to vendee of the underlying intrastate authority is without merit.—Eagle Motor Lines, Inc.—Purchase—Victory Frt. Lines, Inc., 101 M.C.C. 368 (372-4)*.

In §5 proceeding applicants have burden of proving that proposed purchase of vendor's operating rights between Boston, Mass., and Rochester, N.H., via Lawrence, Mass., will be consistent with the public interest. And, although the public interest encompasses the interests of competing carriers and their ability to perform and to continue to perform an adequate transportation service for the public, in the absence of a showing as to the quantum of traffic and revenues that protestants would lose by virtue of approval, mere apprehension that their operations will be harmed is entitled to little weight.—Eastern Massachusetts Street Ry. Co.—Lease—Trailways, 101 M.C.C. 410 (411, 13).

On reconsideration of an appellate division's decision the entire Commission noted that since restrictions against the joinder of operating authorities are cumbersome and lead to undesirable complications, opposing carriers must show, to justify imposition of such a restriction, that its nonimposition would have a material adverse effect upon their operations. And evidence showing a substantial increase in applicants' traffic since vendee assumed temporary control of vendor and commenced tacking their respective authorities and showing some of the protestants as handling substantial traffic between the same areas, in and of itself does not show that an adverse effect upon protestants' operations would result from the operations of vendee under vendor's rights, but merely that vendee's operations would be more competitive than those of vendor.—Eazor Exp., Inc.—Purchase—Fleet Highway Freight, 101 M.C.C. 719 (722)*.

When applicants sustained their burden of justifying continuation of operations under combined rights of vendor and vendee, protestants failure to show with greater particularity the manner and extent to which its operations might be impaired, taken together with unnecessary operating problems arising from imposition of the requested restriction, and the unanimous shipper testimony that protestant would not suffer any diversion of traffic as a result of unconditional approval of the application demonstrates that imposition of the restriction is not consistent with the public interest.

Protestant, who is of substantial size, fears a loss of traffic if the applicants are not restricted from serving points under their combined rights which protestant is authorized to serve. However, protestant concedes that loss of traffic and revenue to it subsequent to vendee's exercise of temporary authority is chiefly the result of lower rates.—Refrigerated Transport Co., Inc. —Purchase—Kurtz, 104 M.C.C. 114 (124).

Standards of proof applicable to transfer of certificated rights are equally applicable to the acquisition of regular-route registered rights. Evidence presented clearly demonstrates liquidating carrier's comparatively substantial operations over its regular-route rights and testimony of shipper witnesses evinces additional need for service to many of the same points and a number of other points where operations were limited. Applicants are not required to establish further that a need exists for service to and from every terminus or intermediate and off-route point involved. The evidence is sufficient to show that the shipping public is actively supporting the applications.—St. Johnsbury Trucking Co. Inc.—Control and Merger, 104 M.C.C. 137 (146).

Evidence of past single-State operations conducted by applicant in related §207 conversion proceeding under its "grandfather" certificate of registration, supported by an Illinois irregular-route certificate, shows a sufficiently representative service (except as to Joliet and Freeport) to meet its burden of proof under the "test of substantiality" which the Commission adopted, in 101 MCC 151, as applying to a vendor operating under a certificate of registration. That test permits a more lenient approach than the former test applied in similar cases, i.e., that proof be "convincing and more comprehensive than that involving a transfer of control with respect to a certificate where the issue of public convenience and necessity previously had been determined"; also, an irregular-route carrier's operations will vary as to points served and frequency of service and, to prove that its operations have been substantial and continuous, it is only required to show "substantial" service to a "representative" number of points within its authorized territory.—Arrow Motor Transit, Inc.—Control, 104 M.C.C. 436 (438-9).

With respect to Freeport and Joliet, applicant claims its past service was authorized because commercial zones thereof touch its 50-mile radial State authority; however, although the Freeport commercial zone possibly does touch the 50-mile radius, that constituted no authority to serve parts of that zone outside the radius; and Joliet and its commercial zone are well beyond the radius. In any event, record shows that applicant served Freeport under color of right, but it is void of any similar evidence with respect to Joliet. It is well established that evidence of past operations will support a finding of convenience and necessity and will warrant a grant of authority substantially identical thereto; furthermore, past operations conducted illegally, but under color of right, have also been found to support a finding of public convenience and necessity. As a matter directly related to approved control transaction, therefore, and applying the "test of substantiality," grant of authority to serve Freeport, but denial as to Joliet, will be consistent with evidence of applicant's past Illinois intrastate operations.—Id., pp. 439-40.

Applicants successfully sustained their burden of proving vendor's operations free from domination by vendee by showing that an independent, although coordinated, operation has been conducted. Application approved.—Old Colony Transp. Co.—Pur.—Holden, 109 M.C.C. 487 (491-2).

Regulations of the Commission

34 FR 18122, Nov. 11, 1969, Part 1134: Control or Consolidation of Motor Carriers or Their Properties, §1134.1 Application for authority to merge properties or franchises. (a), "B.M.C. 44" changed to OP-F-44"; §1134.50 Application for authority to acquire control, "B.M.C. 45" changed to "OP-F-45" both effective on publication in the Federal Register.

35 FR 7559, May 15, 1970, Part 1134: Control or Consolidation of Motor Carriers and Their Properties, new regulation, §1134.51 Control of duplicate operating rights, added, effective 35 days from date of service.

37 FR 9672, May 16, 1972, Part 1111: Railroad and Water Carrier Consolidation Procedures, heading of part revised to read as set forth; and §1111.2(b)(13) and §1111.4(b) and (d) revised, effective on date of publication in Federal Register.

Section 5. (3) Noncarrier deemed carrier upon acquiring control.—[Unchanged. See vol. 11, p. 9212.]

Amendments, see footnotes, vol. 6, p. 5169, vol. 11, p. 9212; historical note, vol. 6, p. 5169

Notes of Decisions

Volume 11—p. 9213; Volume 12—p. 10272; Volume 13—p. 10980; Volume 14—p. 11477; Volume 15—p. 12052; Volume 16—p. 12686; Volume 17—p. 13355; Volume 18—p. 14121; Volume 19—p. 15267; Volume 21—p. 16761.

10. Controlling person subject to reports, accounts, securities provisions.—[Vols. 11-19, 21].—Noncarrier corporation already controlling certificated water carriers and authorized to purchase chartering and towage rights and physical properties of a water contract carrier is subject to the accounting, recording, and reporting requirements of §313, since its interests and investments will be in water transportation or in business related thereto.—Ingram Corp.—Purchase—Barrett Line, Inc., 324 I.C.C. 263 (270).

Securities issues of noncarrier parent of carrier applicant are regulated by Securities and Exchange Commission and Federal Power Commission; thus, subjecting these issues to Commission regulation could disrupt the established patterns of such issues and lead to jurisdictional conflicts; moreover, it is neither necessary nor advisable to subject it to common carrier regulation in view of fact that its common carrier subsidiaries are under and will remain under Commission regulation whatever action is taken regarding noncarrier parent. Therefore, noncarrier corporate parent is subjected to the provisions of §5(3) only to extent of making such periodic and special reports as may be required pursuant to §§20(1) and (2); however, Commission jurisdiction retained should further regulation be required.—Missouri Pac. R. Co.—Control—Chicago & E.I.R. Co., 327 I.C.C. 279 (315-6)*.

Commission ordered noncarrier Northwest Industries, which is acquiring control of a rail carrier through merger approved herein, to file periodic and special reports as the Commission may require pursuant to §§20(1) and (2) of the Act. Since said noncarrier derives most of its income from nontransportation activities it should not be subject to other sections of the Act at the present time.—Chicago & N.W. Ry. Co.—Merger, 333 I.C.C. 236 (240-1).

Because Leaseway, a noncarrier corporation, controls approximately 125 other corporations including seven motor carriers, it is ordered subject to provisions of the Interstate Commerce Act only to the extent that it is required to make such periodic and special reports as the Commission may require pursuant to §220. Leaseway is presently subject to provisions of the Securities and Exchange Act and further requirement that it secure Commission authorization for issuance of securities, which apparently would be predominantly unrelated to its motor carrier activities, could hamper those operations. Therefore, at this time, public interest does not require that Leaseway be subjected to the security provisions of the Act. In addition, it is also unnecessary that Leaseway file annual reports with the Commission since each of the carriers under its control is subject to the Commission's jurisdiction and presently submits such reports. Requiring additional reports would serve little purpose.—Refiners Transport & Term. Corp.—Purchase—Mitchell, 101 M.C.C. 611 (619-20).

The two corporations which constituted intermediate control between vendee and the individuals ultimately in control found to be principally engaged in activities related to transportation. On this basis they are both found to be carriers pursuant to §5(3) of the Act and subject to the reporting requirements therein.—Illinois-Calif. Express—Purchase—Ariz.-Utah, 104 M.C.C. 815 (818)*.

The subsidiary and noncarrier affiliates of vendee herein, a motor common carrier, are not found to exercise control over vendee and are therefore not subject to the provisions of §5(3) of the Act.—East Tex. Motor Frt. Lines—Purchase—Lee, 109 M.C.C. 299 (320).

Commission did not subject a noncarrier seeking control to provisions of §214 inasmuch as adequate protection is afforded by our reservation of jurisdiction and by restricting carriers to be controlled (directly or indirectly) from declaring or paying dividends, making advances to affiliated companies, encumbering its assets for noncarrier purposes, and engaging in any other intercompany property transactions. This restriction is not intended to restrict normal business dealings between controlling carrier and its carrier subsidiaries but rather to require Commission approval for transactions between such carriers and their affiliates.—Matlack, Inc.—Control—Southern & T. I. McCormack, 109 M.C.C. 861 (868-9).

Section 5(3) requires that a party seeking control in an application under §5, herein a noncarrier holding corporation owning all the outstanding stock of vendee, be henceforth considered a carrier subject to the requirements of the Commission. However, denial of this application on other grounds made such subjection a moot point.—Arkansas-Best—Purchase—Indianhead, 109 M.C.C. 885 (890).

Section 5(4). Unauthorized control; unlawful.—[Unchanged. See vol. 11, p. 9213]

1. Construction and interpretation.—Although both carriers involved herein are controlled by the United States Steel Corp., the Commission found that such control is not in violation of §5(4) inasmuch as the effectuation of this common control occurred prior to enactment of the present statute. However, operations over tracks leased by one carrier to its affiliate are in violation of §5(4) because such leases were entered into without Commission approval. Cease and desist order entered without prejudice to a filing under §5(2) to cure this deficiency.—United Transp. Union v. B & LE and P & C, 342 I.C.C. 849 (856-58).

A lawful lease of properties and operations of a carrier precludes a finding herein of unlawful control of the lessor by the lessee during the lease. There is no evidence that lessor would attempt to retain its control under by assignment of its right to purchase the stock to a third party in the event of denial of the transaction.—Consolidated Freightways Corp. of Del.—Control, 104 M.C.C. 658 (659)*.

Respondents found to have effected unlawful control or management in a common interest following prior denial of application for control by purchase of a minority stock interest, election of common directors, and various other indicia of common control. It is no defense to plead their belief that such action did not contravene Commission's jurisdiction in view of clear language of the statute and the recent denial of authority on grounds which relied on a strict interpretation of the statute.—Canadian Ntl. Transp.—Investigation of Control, 109 M.C.C. 392 (401-2).

Although discussions by defendants of their problems with the Commission personnel do not warrant condonation of the law violation, they do evidence a concern for and a desire to conform to the provisions of the Act. Commission, therefore, found that the §5(4) violation had not been shown to have been willful, flagrant, or in disrespect for the applicable law.—Reliance Truck Co.—Control and Merger, 109 M.C.C. 495 (502)*.

A marital relationship created no presumption of unlawful common control. Evidence proves that applicant's wife purchased the carrier to be leased with her own finances, both carriers were operated independently of each other, all records were maintained separately, and there were no common employees. Such evidence effectively refutes any contention of unlawful common control.—Bilyeu—Lease—North Central Truck Lines, Inc., 109 M.C.C. 834 (837-8).

Although members of applicants' families held a significant interest in other carriers, such a relationship does not per se prove control, management, or operation in a common interest. However, close family interests are presumptive of control and all applicants are charged to disclose any interest, including family interests. Failure to make such disclosures is in violation of §5(4).—L & M Express Co., Ext.—North Carolina, 110 M.C.C. 845 (850).

Section 5 (5-8). Control effected by other than prescribed methods; Affiliation; Investigation; Injunctions.—[Unchanged. See Vol. 11, p. 9213-9215.]

Amendments, see footnotes, vol. 6, pp. 5170-5176, vol. 11, pp. 9213-9215; historical notes, pp. 5170-5176; cross references, vol. 9, p. 7461.

Section 5. (9).—[Unchanged. See vol. 11, p. 9215, vol. 15, p. 12054.]

Amendments see footnotes, vol. 6, p. 5177, vol. 11, p. 9215; historical note, vol. 6, p. 5177.

Notes of Decisions

§5(9): Volume 2—p. 1387; Volume 6—p. 5177; Volume 9—p. 7464; Volume 12—p. 10272; Vol. 13—p. 10981; Volume 14—p. 11478; Volume 15—p. 12053; Volume 16—p. 12687; Volume 18—p. 14122; Volume 19—p. 15270; Volume 21—p. 16763.

10. Supplemental orders.—[Vols. 12-16, 18, 19, 21].—See also Seaboard Coast Line R. Co. v. United States, §5(2), n. 45 *Conditions*.

Language of §5(9) and the few cases ruling on scope of that law are persuasive, contrary to plaintiff's argument, that it gives the Commission requisite power to enter considered order requiring Greyhound to cease and desist from practices found to violate the representations (amounting to assurances of public benefit and interest and no harm to existing carriers or service) which it made in earlier acquisition proceedings. The Commission was acting in response to carrier's failure to abide by its representations; it was supplementing orders made in the earlier proceedings, for good cause shown, and the supplemental order entered did not change the literal scope of Greyhound's certificates. That supplemental order simply attached conditions to the original orders which could have been attached in the first place, and which only incidentally (and in one respect) affect scope of the certificates acquired; also, other requirements relating to destructive practices, not to actual carrier operations, do not even remotely affect the certificates. Thus, in no way can the Commission's action be described as a partial revocation or suspension of carrier's certificates requiring §212(a) procedure.—Greyhound Lines, Inc. v. United States, 308 F. Supp. 1033 (1037-8)*.

Similar reasoning applies to plaintiffs' argument, relative to the required through bus service, that §216(a) and (e) is the exclusive statutory power by which the Commission may order maintenance of a through bus. The Commission could have required through bus service as a condition of the acquisition under its §5(2) power; thus, if carrier's representations induced it not to so condition the original order, subsequent breaches of those representations may be dealt with under §5(9), especially under the full procedural due process afforded in the case. Since it is not disputed that commitments were made in the acquisition cases, nor that the Commission has a duty to consider public interest and the competitive effects in each acquisition proceeding, it cannot be said that the Commission did not rely on representations honorably made in the earlier proceedings. Commission findings, both as to nature of statements that were made and as to practices held inconsistent with them, are amply supported by the evidence of record; plaintiffs' motion to set aside the supplemental order at issue, denied.—Id., pp. 1038-9.

Further, the court has jurisdiction over Commission counterclaim, filed in suit to set aside order, seeking specific enforcement of the supplemental order which would require Greyhound to restore practices and traffic patterns in existence, or contemplation, on date of commission approval of the fifth earlier acquisition, in the ten particulars counterclaimed. The order, in addition to proscribing three principal practices, proscribed all practices found to be unreasonable or inconsistent with carrier's prior representations and ordered it to restore the earlier practices and traffic patterns. It is not essential to enforcement of such order that each practice sought to be enjoined be specified therein, for the court may refer to the record, examiner's report, and Commission opinion to determine what the order was meant to include; thus, in effect, destructive practices reflected in record and opinions under review are part of the order and, contrary to carrier's argument, the court has power to specifically enjoin them. Since examiner's report and the Commission's opinion, taken together, encompass all the practices sought to be enjoined, the counterclaim for enforcement is granted in full.—Id., pp. 1039-40.

The Commission has plenary authority under §5(9) to reopen and modify a prior order issued under §5(2) if, in light of changed conditions, requirements imposed thereby are no longer just and reasonable within meaning of that section; and holding of Supreme Court in 340 US 419 that a §5(2) order lacks the finality of an unconditional certificate of convenience and necessity, and may be reopened and modified to insert restrictive conditions, suggests that the Commission has such authority independent of §5(9). It would be illogical to assume that, once a §5(2) order is entered, the Commission is forever barred from changing, modifying, or correcting it to supply deficiencies, regardless of what material changes in conditions and circumstances may occur.—Central Pac. Ry. Co. Control, 317 I.C.C. 469 (482)*.

Therefore, pursuant to §5(9) and the authority contained in condition (i) in the 1923 order approving Southern Pac.'s control of Central Pac. Ry., and in view of the changed circumstances and developments since that time, including current existence of several central transcontinental rail routes, condition (e) in the 1923 order is modified by striking therefrom the name of Union Pacific as the only connection of Southern Pacific on traffic moving via Ogden, Utah, between considered territories. In addition, the 1924 agreement between those connecting lines (and any agreements or memoranda of understanding pursuant thereto) is required to be cancelled or amended to accord with condition (e), as modified.—Id., 328 I.C.C. 345 (356-8)*.

Under the provisions of §5(9) the Commission is specifically authorized, upon a showing of good cause therefor, to issue, from time to time, such orders, supplemental to any order made under paragraphs (1), (2), or (7) of §5, as it may deem necessary or appropriate.—Southern Ry. Co.—Control—Central of Georgia Ry. Co., 331 I.C.C. 151 (184)*.

Section 5. (10) Unifications, consolidations, etc., of motor carriers only.—[Unchanged. See vol. 21, p. 16764.]

Section 5. (11) Plenary nature of authority under section.—[Unchanged. See vol. 11, p. 9216.]

Amendments, see footnotes, vol. 6, p. 5178, vol. 11, p. 9216; historical note, vol. 6, p. 5178.

Notes of Decisions

Volume 2—p. 396; Volume 6—p. 5178; Volume 9—p. 7464; Volume 14—p. 11478; Volume 15—p. 12054; Volume 16—p. 12687; Volume 17—p. 13357; Volume 18—p. 14123; Volume 19—p. 15270, Volume 21—p. 16764.

1. Relief from antitrust laws, in general. —[Vols. 14-16, 18, 19, 21].—See also East Tex. Motor Frt. Lines—Purchase—Lee, at §5(2), n. 100.

In suit to set aside Commission order approving applicant's control of local bus lines, there is no merit in claim of plaintiff (protestant) that, by dismissal of antitrust complaint which it filed during pendency of the control proceedings, the Commission abdicated its responsibility under the Clayton Act. The Commission's duties under that act cannot be viewed apart from provisions of §5; and on considering §20a application to issue stock necessary to effect agreed exchange, it could examine the entire transaction and at that time discharge its duty under the Clayton Act. Moreover, principles of National Transportation Policy are the dominant yardstick for measuring carrier consolidations; also, under §5, the Commission is empowered to approve a transaction even though it might otherwise by contrary to Clayton Act goals. Giving proper effect to necessary interaction between the two statutes, the Commission acted well within its discretion in dismissing the antitrust complaint since matters raised were fully under correct legal standards in the §5 proceedings; an agency is not required to cover the same ground twice. Order under review is amply supported on the record; sustained. —Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (389-91, 393)*.

In approving merger of Northern Lines into a new company which would control and operate a 27,000-mile network of rail lines in northern tier of States, the Commission acted within the framework of statutes dealing specifically with transportation, and in harmony with the antitrust policies without being bound to the relevant-market standards of the antitrust laws. Since proposed transactions come within §5, the over-all guide is the national policy to further the public interest in efficient transportation; and, contrary to contentions of the Justice Department, the Commission did not construe the national policy as embodying a presumption in favor of rail mergers. In considered report, the Commission recognized competition as an indispensable factor in the public interest equation, though not the only one to be weighed; it was not required to further determine areas of effective competition through analysis of the relevant geographic and product markets, as those terms are used in antitrust cases. The Commission was guided by applicable laws and made findings, supported by substantial evidence, requisite to the validity of its action; sustained.—United States v. United States, 296 F. Supp. 853 (862-9, 877-8)*.

Section 5(11) is a more recent and more specific expression of congressional policy than §1 of the Sherman Act and §7 of the Clayton Act, and in terms relieves an acquiring carrier, upon the Commission's approval of the acquisition, from operation of the antitrust laws; and, though §5(11) does not authorize the agency to "ignore" those laws, there can be little doubt that the Commission is not to measure such proposals by the standards of the antitrust laws. The problem is one of accomodation of §5(2) with the antitrust legislation; the Commission remains obligated to estimate the scope and appraise the effects of curtailment of competition resulting from an acquisition, and consider them along with advantages of improved service and other matters of public interest to determine whether the acquisition will assist in effectuating the over-all transportation policy.—United States v. Navajo Freight Lines, Inc., 339 F. Supp. 554 (557)*.

In addition to the §5 provisions, statutory scheme of the Act encompasses almost every aspect of the motor carrier business; and the doctrine of primary jurisdiction—a workable allocation of business between courts and an agency possessed of expertise in its field and charged with enforcement of a statutory scheme—has generally been recognized in antitrust suits where there is a real possibility that an agency might subsequently approve the conduct in question, and that such approval would immunize it from the antitrust laws. In view of policies behind the primary jurisdiction doctrine and the cases which have applied it in the antitrust field, therefore, primary jurisdiction of any case alleging violations of the Clayton Act, because of one motor carrier's acquisition of stock of another, should rest with the Commission. Defendants' motion to dismiss civil antitrust complaint for lack of jurisdiction, on ground that the Commission has primary jurisdiction with respect to all questions involved, granted.—Id., pp. 557-8, 561, 565-6.

The commission has no authority under §20a to grant immunity from the antitrust laws; however, when it approved securities issued in conjunction with carrier activity which has been approved under §5, and specifically finds such issuance necessary to carry out the approved activity, the issuance of securities will share the activity's immunization. Thus, antitrust exemption for REA's 1959 notes was granted by the Commission's order which approved issuance thereof to named creditor railroads without competitive bidding and, also, held that issuance of the notes as evidence of REA's non-negotiable debt to owning railroads was necessary and appropriate for performance of carrier's services pursuant to joint venture to conduct railway express service, initially approved in 1929. Therefore, insofar as it challenges transactions involving the 1959 notes, REA's antitrust suit constitutes an attack on validity of the Commission's order which, under the Urgent Deficiencies Act, must be before a three-judge court; and to that extent, the complaint is dismissed for lack of subject matter jurisdiction.—REA Express, Inc. v. Alabama G.S.R. Co., 343 F. Supp. 851 (856, 858-9).

But challenge of transactions involving the non-negotiable debt to shareholding railroads does not attack a Commission order when the Commission at no time, directly or indirectly, approved that debt as necessary to railroads' joint venture. In its opinion approving initial operating agreement, the Commission emphasized that approval of the debt would be beyond its limited authority under §5(1); the opinion which approved REA's 1938 notes cannot be read as approving the method for financing repayment thereof when, apart from describing the non-negotiable debt, the Commission nowhere indicated its views as to legality of the debt; also, absent clear language to that effect, order approving the 1959 notes cannot be taken as granting a broad retroactive antitrust exemption to that debt. Thus, as no

Commission order specifically approved the non-negotiable debt, REA's antitrust claim based on alleged necessity of the debt to the joint venture is not an attack on the Commission's orders. Insofar as the complaint alleges invalidity of the 1959 notes, due to premature termination of amended operating agreement, defendants' motion to dismiss is denied.—Id., pp. 857-8, 859-60.

Appraisal of the competitive effects of a §5 transaction is not determined by the terms of any criteria laid down by the antitrust laws even though the proposal may, in fact, reduce competition, but must be balanced against other public interest factors of record which may outweigh and override the reduction, if any, of competition. While transactions approved under §5 are, by virtue of §5(11), exempted from the applicability of the antitrust laws, the Commission is not unmindful of the possibility of potential competitive restraints or monopoly powers as factors to be considered in relation to the adequacy of transportation service resulting from and following our approval of a given transaction under §5.—Jefferson Lines—Purchase—Jefferson Trans., 104 M.C.C. 497(509).

Section II of the Clayton Act clothes the Commission with authority to investigate and administer §7 of that act as related to carriers under its jurisdiction. A subsequent paragraph of that section exempts from the application of the section purchases by carriers of stock in other carriers "solely for investment", such stock not being used to bring about, or in attempting to bring about, the substantial lessening of competition. The subject transaction whereby Greyhound acquired 45 percent of Oklahoma Transportation Company has not been exempted from application of the antitrust laws by regulatory agency approval since no application for authority to obtain the stock was sought under §5(2) of the Interstate Commerce Act, nor was relief from the operations of the antitrust laws sought under §5(11) of that Act. This record shows that the subject transaction in and of itself, as an integral part of Greyhound's plan to capture the feeder and bridge traffic in the area, has the effect of substantially lessening competition and clearly violates §7 of the Clayton Act.—Transcontinental Bus System v. The Greyhound Corp., 104 M.C.C. 524 (554-559).

2.—State laws.—[Vols. 14-19, 21].—Provision of constitution of the State of Washington prohibiting consolidation of the stock, property, or franchises of competing railroads operating within the State must give way to the federal power to regulate commerce among the States, which is the basis for the statute giving the Commission authority to pass on railroad merger applications; furthermore, the statute provides that carriers which merge with the Commission's approval are relieved from the operation not only of federal antitrust laws but of all prohibitions of State law.—United States v. United States, 296 F. Supp. 853 (875-6)*.

Section 5(11) of the Interstate Commerce Act grants the Commission exclusive and plenary jurisdiction so that no state law either applies or needs to be interpreted. Thus, applicant's contention that Nebraska law regarding dissenting stockholders should be applied to establish protestants' rights is properly rejected.—Yellow Transit, Inc.—Merger—Wilson, Inc., 104 M.C.C. 737(742).

3.—Other acts.—[Vols. 18, 19, 21].—The plain language of §5(11), conferring exclusive and plenary jurisdiction on the Commission to approve §5 transactions and relieving the carriers from all other restraints of federal law, indicates that Congress intended the Commission to have jurisdiction to prescribe the method for resolving labor problems arising directly from approved transactions; and omission of any proviso excepting the Railway Labor Act from the operative provisions of §5(11) indicates a congressional intent to include that Act as a "federal restraint" from which the parties to a §5(2) proceeding are relieved. Therefore, defendant's contention that suit against it by members of railroad union (seeking damages claimed to result from defendant's alleged violation of employee-protective conditions which were included in the Commission's order approving defendant's purchase of certain rail lines and equipment) should be dismissed because plaintiffs have not exhausted their administrative remedies under the Railway Labor Act is clearly untenable.—Nemitz v. Norfolk & W. Ry. Co., 287 F. Supp. 221 (224, 227-8)*.

No collective bargaining agreements are superseded by operation §5(11) whenever conditions are imposed under §5(2)(f), and, in the absence of lawful reasons requiring modification of outright nullification, private contracts between the parties remain in full force and effect and coexist alongside the conditions imposed under §5(2)(f).—Southern Ry. Co.—Control—Central of Georgia Ry. Co., 331 I.C.C. 151 (168-71)*.

Section 5. (12), (13), (14).—[Unchanged].

Section 5a. Agreements between carriers.—[Unchanged, except for the amendment, as set forth below, by the act of Feb. 5, 1976, Pub. L. 94-210, §208, 90 Stat. 42. See vol. 14, p. 11481.]

In paragraph (1)(A), "part I, II, or III" is struck out and "part I (other than a common carrier by railroad), part II, or part III" is inserted in lieu thereof.

Historical Note

The amendment by Pub. L. 94-210, 90 Stat. 42, is effective 270 days after the date of enactment of the act. [See also vol. 14, p. 11483]

Notes of Decisions

Volume 15—p. 12056; Volume 16—p. 12688; Volume 17—p. 13358; Volume 18—p. 14124; Volume 19—p. 15273; Volume 21—p. 16769.

2. Construction and interpretation.—[Vols. 15, 17-19, 21].—That applicant for membership in a carrier association is already a member of another group is not a basis for denying it admission. Decision in 301 ICC 781, relied on by the association for denying carrier's application, was not intended to establish a test for membership in two bureaus; rather, it meant that if a carrier determined that its operations required dual membership, there was nothing in §5a to prevent it. Any motor common carrier seeking membership in a motor common carrier agreement must be admitted to membership, as a right, upon the same terms as existing members.—Movers' & Warehousemen's Assn.—Agreement, 323 I.C.C. 61 (63-4)*.

Upon complaint regarding improper conduct of respondents' collective ratemaking activities the Commission reviewed the agreement presently in force. As this review discloses numerous deficiencies and inconsistencies with §5a standards the Commission, upon its own initiative, may and did broaden the scope of the investigation beyond that of the complaint.—Midwest Motor Carriers Bureau, Inc.—Agreement, 335 I.C.C. 647 (648-9)*.

4. Carriers of one class; agreements not within §5a provisions.—[Vols. 15-19, 21].—Although proposed motor carrier ratemaking agreement provides for listing carriers of other classes in tariffs published by the association, carriers by rail or water subject to parts I or III of the Act, respectively, may be listed in such tariffs solely as participants in joint rates with the new motor carriers therein with whom they have through routes upon execution of required separate rate and tariff agreement and payment of established fees or assessments; approved.—National Assn. of Specialized Carriers, Inc.—Agreement, 323 I.C.C. 714 (715, 716, 720).

5. Independent action; ratemaking procedure.—[Vols. 15-19, 21].—There is no basis for concluding that a large household goods carrier would dominate the smaller members of the association, if admitted as a member, or establish rates which are unlawful; carriers have the right of independent action, guaranteed by §5a, and, the lawfulness of rates established pursuant to the agreement is always subject to review by the Commission. These two safeguards, therefore, obviate such fears.—Movers' and Warehousemen's Assn.—Agreement, 323 I.C.C. 61 (62)*.

The Commission found the emergency docket procedure inconsistent with established §5a standards as it is neither definite nor specifies circumstances requiring deviation from regular procedure. Regular procedure found not in compliance with prior report requiring elimination of all references to proxy voting and clarification of manner of selection of carrier nominees to fill interim vacancies on rate committees as conditions for approval.—Midwest Motor Carriers Bureau, Inc.—Agreement, 335 I.C.C. 647 (652-3)*.

Proposed amendment to eliminate quorum requirements in favor of a majority of the members present and voting for action on proposals considered by the tariff committee not approved as the Commission has consistently required quorum requirements to prevent dominance of collective activity by a minority of the members.—Steel Carriers' Tariff Assn., Inc.—Agreement, 335 I.C.C. 655 (659-60).

6. Furtherance of the national transportation policy.—[Vols. 15-18].—Proposed amendment to §5a agreement of a motor carrier association, which would exclude new members if their annual gross revenue exceeds $30 million, is not in furtherance of the national transportation policy. It is well settled, see 278 ICC 147, that any motor common carriers seeking membership in a motor carrier agreement must be admitted to membership, as a right, upon the same terms as existing members. Proposed amendment would impinge upon the right of motor common carriers operating within the involved territory to be admitted to membership upon the same terms as existing members; disapproved.—Movers' & Warehousemen's Assn., 323 I.C.C. 61 (62)*; and the matter of an applicant for membership in the association (a household goods carrier) not being a carrier of the same class as present members has no bearing on issue presented in application for approval of that amendment.—Id., p. 63.

Upon reconsideration, the Commission finds lack of exclusive control over ratemaking activities by signatory carriers vests excessive authority in an independent agent and permits domination of signatory carriers by the agent. Such domination is not in furtherance of the national transportation policy. Order terminating approval entered, withheld 3 months to allow filing of a revised agreement.—Midwest Motor Carriers Bureau, Inc.—Agreement, 335 I.C.C. 647 (651)*.

Proposed amendment to extend the territorial scope of the agreement to areas now covered by operating authority of none, one, or only a few of the signatory motor common carrier members not approved as not in furtherance of the national transportation policy since collective ratemaking cannot exist where there is no authority to perform transportation service and since applicant has shown no need for antitrust exemption where only one or a few carriers have authority.—Steel Carriers' Tariff Assn., Inc.—Agreement, 335 I.C.C. 655 (658-9).

8. Notice.—[Vols. 15-19, 21].—Proposed new article in applicant rate bureau's bylaws relating to establishment of an interrelated committee to meet with similar interrelated committees of other motor carrier rate bureaus, for sole purpose of discussing rate matters under consideration by organizations constituting the committees jointly meeting and reporting recommendations thereon to the standing rate committee, should be amended to provide for giving notice of meetings and matters to be considered by the interrelated committee in the same manner accorded proposals covered by the agreement, including a provision which would afford any interested person (including shippers) an opportunity to appear and present views on the subject being considered. Such changes are warranted and are necessary to meet the standards for approval of §5a agreements.—National Assn. of Specialized Carriers, Inc.—Agreement, 323 I.C.C. 714 (719).

Since §5a agreements are required to contain provisions that notice of final actions taken by rate bureaus be given in the same manner and to the same extent as proposals, even in unopposed proceedings, the Commission reversed the examiner's conclusion that respondents need not give notice of disposition of proposals to parties who did not file representations thereon. The principle that adequate notice be given to all interested parties is firmly established in §5a proceedings. However, so far as appeared on the record in the instant proceeding a nominal subscription charge would not constitute a restraint on the notice requirements of §5a.—Household Goods Carriers' Bureau—Agreement, 329 I.C.C. 258 (259-61).

Commission hereby orders all agencies operating pursuant to agreements approved under §5a to amend such agreements so as to give shipping public notice of independent action by member carriers in the same manner and same extent that notices of collective action are given and no other collective procedures under the agreement are thereby invoked. All future agreements submitted to Commission must contain such an appropriate rule.—Notice of Independent Action, 332 I.C.C. 22 (32).

Provisions of agreement giving notice of regular docket ratemaking proposals are inadequate as the specified 10-day period should exclude the date of notification, Saturdays, Sundays, and holidays. Similar notification provisions for emergency docket proposals are inadequate for the same reason and also as they are illusory and misleading to shippers.—Midwest Motor Carriers Bureau, Inc.—Agreement, 335 I.C.C. 647 (652-3)*.

Proposed amendments of the ratemaking agreement providing that notice of collective or independent actions be given to interested parties or nonmembers on a "subscription basis" in lieu of present policy of publication in a transportation journal of national distribution or public notice not approved as phrase "subscription basis," standing alone, is indefinite.—Steel Carriers' Tariff Assn., Inc.—Agreement, 335 I.C.C. 655 (660).

10. Parties.—[Vols. 15, 18, 19].—Fair administration of §5a requires that all interested parties be afforded an adequate opportunity to express their views regarding proposals prior to a final determination, and the agreements approved by the Commission in other §5a proceedings have afforded interested parties an opportunity to make representations on proposals in writing or orally. The right to determine whether the nature of proposals warrants an oral hearing may appropriately be reposed in a rates and tariffs committee composed of carrier members, and so long as the right to make representations to proposals is preserved, no need appears for a requirement that oral hearings be granted on every proposal at the option of an interested party.—Household Goods Carriers' Bureau—Agreement, 329 I.C.C. 258 (262).

12. Evidence.—[Vols. 15-18].—Evidence presented for the first time in exceptions, relating to ineligibility of an applicant for membership in motor carrier association because it is not a carrier of the same class as present members, is not properly before the Commission. And association's motion for oral hearing to determine (1) the status of membership applicant as a carrier, (2) the relationship between it and its agents in ratemaking, (3) anticompetitive effect of its participation in association's activities, and (4) the reach and ambit of decisions such as 276 ICC 183, 208, and 215 is denied; none of those matters bears upon the propriety of the proposed amendment itself, and must, in the context of the limited issue herein be considered irrelevant.—Movers' & Warehousemen's Assn.—Agreement, 323 I.C.C. 61 (63)*.

18. Approval of agreements by Commission.—[Vols. 15-19, 21].—Protestant's petition that the Commission rescind its approval of association agreement, at least until such time as it is admitted into full membership, is too drastic an action to be taken at this time, in view of the ultimate disapproval of proposed amendment which would exclude it from membership.—Movers' & Warehousemen's Assn.—Agreement, 323 I.C.C. 61 (64)*.

Proposed motor carrier ratemaking agreement covering organization and procedure of applicant association; incorporating applicant's bylaws and rules of tariff publication procedure which accord to each party thereto the free and unrestrained right to take independent action either before, after, or during any determination made through procedures established by the agreement; and limiting participation therein by carriers of different classes to matters relating to transportation under joint rates or over through routes; approved. However, since provision is made for amending applicant's bylaws, approval is subject to condition that, to extent that any change in bylaws might result in revision of the rate procedures and to safeguard any carrier's right of independent action, the amended agreement be approved by the Commission; approval is also conditioned on adoption of suggested amendment to article of the bylaws relating to establishment of interrelated committee.—National Assn. of Specialized Carriers, Inc.—Agreement, 323 I.C.C. 714 (716, 718-20).

Carrier groups are not required to seek approval from this Commission of their concealed loss and damage claim rules unless they desire the protection from antitrust laws which §5a would afford for agreements within its scope.—Loss and Damage Claims, 340 I.C.C. 515 (535).

Proposed amendment of previously approved ratemaking agreement providing procedures for expulsion of members who fail to furnish Conference with requested information and data in support of collectively adopted changes in rates and related matters was not approved. Explosion from membership is too drastic a penalty to exact for refusal, or perhaps, inability to supply data and information but it is hereby recommended that the Commission give further consideration to the problem encountered when data necessary to comply with established procedures are not voluntarily supplied by members to the bureaus upon request therefor.—Middle Atlantic Conference—Agreement, 341 I.C.C. 164 (168).

Section 5b. Agreements between carriers subject to part I.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §208, 90 Stat. 42.]

(1) As used in this section, the term—

(a) 'affiliate' means any person directly or indirectly controlling, controlled by, or under common control or ownership with, any other person, and as used in this subdivision, the term (i) 'control' has the same meaning as in section 1(3)(b) of this part; and (ii) 'ownership' refers to equity holdings of 5 per centum or more in any business entity;

(b) 'antitrust laws' means the Act of July 2, 1890, as amended (15 U.S.C. 1, et seq.), the Act of October 15, 1914, as amended (15 U.S.C. 12, et seq.), the Federal Trade Commission Act (15 U.S.C. 41, et seq.), sections 73 and 74 of the Act of August 27, 1894, as amended (15 U.S.C. 8 and 9), and chapter 592 of the Act of June 19, 1936, as amended (15 U.S.C. 13, 13a, 13b, 21a); and

(c) 'carrier' means any common carrier by railroad subject to part I of this Act.

(2) Any carrier which is a party to an agreement, between or among two or more carriers, relating to rates, fares, classification, divisions, allowances, or charges (including charges between carriers and compensation paid or received for the use of facilities and equipment), or rules and regulations pertaining thereto, or procedures for the joint consideration, initiation, or establishment thereof, shall, under such rules and regulations as the Commission shall prescribe, apply to the Commission for approval of such agreement. The Commission shall, by order, approve any such agreement if approval thereof is not prohibited by paragraph (4) or (5) and if it finds that, by reason of furtherance of the national transportation policy declared in this Act, the relief provided in paragraph (8) should apply with respect to the making and carrying out of such agreement; otherwise the application shall be denied. No such approval shall be granted or continued (a) if any of the terms and conditions which are prescribed under the last sentence of this paragraph are violated or not complied with, or (b) unless the Commission receives a verified written statement (and any written supplement or addendum thereto requested by the Commission) setting forth, with respect to each carrier which is a party to such agreement (i) its name, (ii) the mailing address and telephone number of its headquarter's office, (iii) the names of each of its affiliates, (iv) the names, addresses, and affiliations of each of its officers and directors and of each person who, together with any affiliate, owns or controls any debt, equity, or security interest in it having a value of $1,000,000 or more, and (v) such other information as the Commission directs to be included. The approval of the Commission shall be granted only upon such terms and conditions as the Commission determines are necessary to enable its approval to be granted in accordance with the standards set forth in this paragraph.

(3) Each conference, bureau, committee, or other organization established or continued pursuant to any agreement approved by the Commission under the provisions of this section shall maintain such accounts, records, files, and memoranda and shall submit to the Commission such reports, as may be prescribed by the Commission. All such accounts, records, files, and memoranda shall be subject to inspection by the Commission or its duly authorized representatives. The Commission may conduct investigations, make reports, issue subpoenas, conduct hearings, require the production of relevant documents, records, and property, copy and verify the correctness of information subject to inspection, and take depositions (a) to determine whether any such conference, bureau, committee, or other organization, or any carrier which is a party to any such agreement, has acted or is acting in compliance with the provisions of this section, regulations issued under this section, and the public interest, (b) to determine whether any such organization or carrier is inhibiting an efficient utilization of transportation resources or has established practices which are inconsistent with efficient, flexible, and economic operation, and (c) for such other purposes as the Commission considers appropriate.

(4) The Commission shall not approve under this section any agreement which it finds is an agreement with respect to a pooling, division, or other matter or transaction to which section 5 of this part is applicable.

(5)(a) The Commission shall not approve under this section any agreement which establishes a procedure for the determination of any matter through joint consideration, unless it finds that under the agreement there is accorded to each party the free and unrestrained right to take independent action, without fear of any sanction or retaliatory action, at any time before or after any determination arrived at through such procedure. In no event shall any conference, bureau, committee, or other organization established or continued pursuant to any agreement approved by the Commission under the provisions of this section—

(i) permit participation in agreements with respect to, or any voting on, single-line rates, allowances, or charges established by any carrier;

(ii) permit any carrier to participate in agreements with respect to, or to vote on, rates, allowances, or charges relating to any particular interline movement, unless such carrier can practicably participate in such movement; or

(iii) permit, provide for, or establish any procedure for joint consideration or any joint action to protest or otherwise seek the suspension of any rate or classification filed by a carrier of the same mode pursuant to section 15(7) of this part where such rate or classification is established by independent action.

As used in clause (i) of this subdivision, a single-line rate, allowance, or charge is one that is proposed by a single carrier applicable only over its own line and as to which the service (exclusive of terminal services provided by switching, drayage, or other terminal carriers or agencies) can be performed by such carrier.

(b) The limitations set forth in subdivision (a) shall not be applicable to—

(i) general rate increases or decreases, if the agreements accord the shipping public, under specified procedures, adequate notice of at least 15 days of such proposals and an opportunity to present comments thereon, in writing or otherwise, prior to the filing with the Commission of the tariffs containing such increases or decreases, or

(ii) broad tariff changes if such changes are of general application or substantially general application throughout a territory or territories within which such changes are to be applicable.

In any proceeding in which it is alleged that a carrier voted or agreed upon a rate, allowance, or charge, in violation of the provisions of this section, the party alleging such violation shall have the burden of showing that such vote or agreement occurred. A showing of parallel behavior is not, by itself, sufficient to satisfy such burden.

(6)(a) The Commission is authorized, upon complaint or upon its own initiative without complaint, to investigate and determine whether any agreement previously approved by it under this section, or terms and conditions upon which such approval was granted, is not or are not in conformity with the standards set forth in paragraph (2) and with the public interest, and whether any such terms and conditions are not necessary or whether any additional or modified terms and conditions are necessary for purposes of conformity with such standard. After any such investigation the Commission shall, by order, terminate or modify its approval of such an agreement if it finds such action necessary to insure conformity with such standard, and shall modify the terms and conditions upon which such approval was granted to the extent it finds necessary to insure conformity with such standard or to the extent to which it finds such terms and conditions not necessary to insure such conformity. The effective date of any order terminating or modifying approval, or modifying terms and conditions, shall be postponed for such period as the Commission determines to be reasonably necessary to avoid undue hardship.

(b) The Commission shall periodically, but not less than once every 3 years, review each agreement which the Commission has by order approved under this section to determine whether such agreement, or any conference, bureau, committee, or other organization established or continued pursuant to such agreement, still conforms with the standard set forth in paragraph (2) and the public interest, and to evaluate the success and effect upon the consuming public and the national rail freight transportation system of such agreement and organization. The Commission shall report to the President and to the Congress on the results of such reviews, as part of its annual report pursuant to section 21. If the Commission makes a determination that any such agreement or organization is no longer in conformity with such standard, the Commission shall by order terminate or suspend its approval thereof.

(7) No order shall be entered under this section except after interested parties have been afforded a reasonable opportunity for a hearing.

(8) Parties to any agreement approved by the Commission under this section and other persons are, if the approval of such agreement is not prohibited by paragraph (4) or (5), hereby relieved from the operation of the antitrust laws with respect to the making of such agreement, and with respect to the carrying out of such agreement in conformity with its provisions and in conformity with the terms and conditions prescribed by the Commission.

(9) Any action of the Commission under this section (a) in approving an agreement, (b) in denying an application for such approval, (c) in terminating or modifying such approval, (d) in prescribing the terms and conditions upon which such approval is to be granted, or (e) in modifying such terms and conditions, shall be construed as having effect solely with reference to the applicability of the relief provisions of paragraph (8).

(10) The Federal Trade Commission, in consultation with the Antitrust Division of the Department of Justice, shall periodically prepare an assessment of, and shall report to the Commission on (a) any possible anticompetitive features of (i) any agreements approved or submitted for approval under this section, and (ii) any conferences, bureaus, committees, or other organizations operating under such agreements, and (b) possible ways to eliminate or alleviate any such anticompetitive features, effects, or aspects in a manner that will further the goals of the national transportation policy and this Act. The Commission shall make such reports available to the public.

(11) Any conference, bureau, committee, or other organization established or continued pursuant to any agreement approved by the Commission under this section shall make a final disposition with respect to any rule, rate, or charge docketed with such organization within 120 days after such proposal is docketed.

Historical Note

STUDY OF CONGLOMERATES

SEC. 903. The Commission shall undertake a study of conglomerates and of such other corporate structures as are presently found within the rail transportation industry. The Commission shall determine what effects, if any, such diverse structures have on effective transportation, on intermodal competition, on revenue levels, and on such other aspects of national transportation as the Commission considers to be legitimate subjects of study. The Commission shall prepare a report with appropriate recommendations and shall submit its report to the Congress within 1 year after the date of enactment of this Act. (Pub. L. 94-210, 90 Stat. 148)

Section 6. Schedules and statements of rates, etc., joint rail and water transportation—(1) Schedule of rates, fares, and charges; filing and posting.—[Unchanged. See vol. 9, p. 7472.]

Amendments, see footnotes, vol. 2, p. 1413; historical notes, p. 1414, vol. 12, p. 10273, vol. 13, p. 10982.

Notes of Decisions

Volume 2—p. 1416; Volume 6—p. 5192; Volume 9—p. 7472; Volume 11—p. 9221; Volume 12—p. 10274; Volume 13—p. 10982; Volume 14—p. 11483; Volume 15—p. 12060; Volume 16—p. 12692; Volume 17—p. 13362; Volume 18—p. 14128; Volume 19—p. 15277; Volume 21—p. 16775.

Constitutionality and Construction

2. Construction.—[Vols. 2, 6, 12, 19, 21].—In action seeking a court decree holding considered "rent-a-train" grain tariff to be illegal, *per se*, and requiring the Commission to strike that tariff from its files, plaintiffs must concede that the Commission has primary jurisdiction, under §6 and §15, to determine whether any tariff complies with provisions of the law; also, they must concede that, in areas which Congress placed within the competence of Commission jurisdiction, a controversy must first be submitted to the agency for decision, subject to review by a three-judge district court. The logical effect of such concessions is to refute the court's jurisdiction over the complaint. Question of the validity of the "rent-a-train" tariff is being investigated by the Commission and determination thereof will depend on consideration of many factors and, therefore, must await conclusion of the investigation. Accordingly, the court should not take jurisdiction of instant action; to do so would by-pass administrative plan created by Congress, which gives the Commission first consideration of rate-making matters, subject thereafter to judicial review. Complaints dismissed.—Rardin Grain Co. v. Illinois Central R. Co., 288 F. Supp. 813 (815-7)*.

Commission found assailed schedules not just and reasonable due to vagueness and ambiguity of certain provisions regarding minimum charges and weights, time periods, empty movements and other provisions as stated. A finding that ambiguous provisions are not shown just and reasonable is proper. See 332 ICC 408. Protestants' reliance on 315 ICC 311 is ill-founded. That case was instituted by regulated carriers asserting that they were subject to injury due to a destructive competitive practice. Protestants herein are not regulated carriers nor has the issue of destructive competition been established. —Grain by Rent-a-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (117, 124-25).

Contention that assailed tariff does not state rates as required by §6(1) and is unlawful *per se* is not valid. Although weight has historically been the most common pricing unit, Rule 4(i) of our Tariff Circular No. 20 specifically provides for publishing rates per "other unit" as alternative to the specifically enumerated units of "per 100 pounds, per ton, per car." Once proposed tariff is amended to include a guaranteed minimum number of trips, it will contain certain rates and charges clearly stated in form of specific amounts for definitely described units, augmented by per ton and per train-mile charges involved.—Grain bv Rent-A-Train, IFA Territory to Gulf Ports, 339 I.C.C. 579 (588-90)*.

Rates, Fares, and Charges

35. Export and import rates.—[Vols. 2, 6, 12, 15, 16].—See also International Joint Rates and Through Routes, at §1(1), n. 52.

Commission reaffirmed its conclusion in 337 ICC 625 that we may accept for filing a tariff which establishes joint rates on import-export traffic between carriers subject to our jurisdiction and water carriers subject to the jurisdiction of the Federal Maritime

Commission but that a general rule governing such filings is not necessary at this time.—International Joint Rates and Through Routes, 341 I.C.C. 246 (247-8)*.

Charges (Other than Rates and Fares)

55. All services offered and performed.—[Vols. 2, 6, 9, 11, 16, 17, 19, 21].—To expedite or delay a shipment constitutes a special service; and §6(1) requires that rail service offered and the charge therefor be published in tariff form and be available to all, in order to vary the standard norm of service which requires handling with "reasonable dispatch." Railroad's practice of holding shipments of potatoes from California to Kansas City, Mo., (routed over circuitous routes by shippers to secure greater transit time pending development of a more favorable market) at points on its direct routes for period of time equal to the time necessary to accomplish the circuitous movement, constitutes a service of delay which results in free warehousing to shippers and undue detention of refrigerator cars. Therefore, since carrier's tariff does not provide for either holding such shipments in transit, or charges therefor, considered service of delayed delivery violates §6(7) and §1 of the Elkins Act; carrier ordered to cease and desist from unlawful practices shown to exist.—Routing Exceptions, A., T. & S.F. and Connecting Carriers, 325 I.C.C. 228 (235-7, 238)*.

58. Demurrage.—[Vols. 2, 6, 9, 11, 17].—See Chicago & N. W. Ry. Co. v. Union Packing Co. at §6(7), n. 215, and Southern Ry. Co. v. Champion Papers, Inc., at §6(7), n. 217.

66. Protective service.—[Vols. 2, 6, 11-14, 16, 21].—From the discussion at 281 ICC 604-606, and the Commission's holding in 276 ICC 9, it became apparent that increases in protective service charges would not be permitted in the absence of an elaborate cost presentation. Such a presentation is not susceptible to use in general increase cases which are primarily revenue need cases. —Mechanical Protective Serv. of Perishables—Nationwide, 340 I.C.C. 470 (499).

The lack of underlying papers to the study submitted by respondents and the insufficiency of the testimony precluded a finding that the study had been properly conducted or that the results thereof were representative of mechanical protective service traffic. And despite the fact that respondents averred that the proceeding was not a revenue-need proposal, the failure to introduce any revenue-expense comparison prevented a determination of whether mechanical protective service was currently a deficit operation. Proposed increases denied. See also, §15(7), n. 50. Id., p. 499.

Rules and Regulations

81. In general.—[Vols. 2, 6, 9, 12, 21].—Schedules filed by respondent railroads on canned goods from the Pacific coast to eastern destinations not approved as they fail to contain provisions to protect minimum weight applicable to car ordered by shipper and a limited two-for-one rule during season specified by shippers. Ordered cancelled without prejudice to filing of new schedules.—Canned Goods, Between Pacific Coast and the East, 332 I.C.C. 55(63-6).

Commission prescribed new rules and regulations for filing and publishing both joint and combination rates over international-domestic through routes. These rules permit such filing and publishing in connection with any carrier subject to parts I, II, and III of the Act by amendment of 49 CFR §§1300.67 and 1307.22.—International Joint Rates and Through Routes, 337 I.C.C. 625 (632-36).

84. Limitations upon liability.—[Vols. 2, 21].—Carriers' rules and practices governing the handling of loss and damage claims do affect the value of service rendered by carriers and should, therefore, be published in their tariffs.—Loss and Damage Claims, 340 I.C.C. 515 (536).

Form and Effect of Publication

136. Plain and definite statement required.—[Vols, 2, 6, 9, 11-19, 21].—Rules providing that line haul rates include the loading and unloading of the carrier's vehicle "when this service can be performed by one man" found to be vague and indefinite, since no provision was made as to who is to decide when a shipment can be loaded or unloaded by one man. Thus, it was not clear under what circumstances the line haul rates include this service. The indefiniteness of the phrase is even more pronounced when considered in light of the fact that respondents' rules also provided that shipments which, because of weight, dimensions, or physical characteristics, cannot be handled by one man are not entitled to loading and unloading service. The considered phrase is unnecessary and confusing, and this type of rule violates rule 10(a) of the Commission's Tariff Circular 20 and §6 of the Act; ordered cancelled.—Detention of Vehicles & Loading & Unloading Provisions, 329 I.C.C. 220 (227).

The Commission found a rule providing that line-haul rates include loading and unloading to service "performed by one man" to be vague and indefinite, and that provisions for loading and unloading without restrictions are not lawful. Also, since proposed alternate rules would permit the use of two men at any time in loading and unloading service, but not necessarily in all instances, a shipper or consignee would be unable to determine when and under what circumstances this service would be furnished. Such rules are uncertain and indefinite, and are therefore in violation of Tariff Circular 20 and §6 of the Act and are ordered cancelled.—Id., pp. 227-9.

Proposed unit of charges involving express rates on phonograph records from Richmond, Ind. to all express stations in the United States is novel in that it is a combination of two traditional units of transportation charges, cubic displacement and piece, but since both consignee and competitor are able to determine the charges by reference to the packaging of the articles, charges found to be just and reasonable.—Phonograph Records—REA—Richmond, Ind., to U.S. Points, 329 I.C.C. 391 (396-98).

Protestants' contention that proposed cancellation of wharfage absorption at indicated Gulf and South Atlantic ports by respondent railroads is in violation of §6 requiring plain and definite statement of rates found not proven. Respondents' tariffs are filed with the Commission and show the extent to which waterborne rates include port terminal services and charges.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (528).

Regulations of the Commission

34 FR 12343, July 26, 1969, Part 1300: Freight Schedules; Railroads, §1300.67 Export and import traffic—ocean carriers, revised, effective upon publication in the Federal Register.

34 FR 12593, Aug. 1, 1969, Part 1300: Freight Schedules; Railroads, §1300.67 Export and import traffic—ocean carriers, effectiveness of order of July 15, 1969 (34 FR 12343) stayed pending further order of the Commission.

35 FR 15444, Oct. 3, 1970, Part 1300: Freight Schedules; Railroads, §1300.67 Export and import traffic—ocean carriers, revised (Ex Parte No. 261; Special Permission No. 70-275), effective Oct. 26, 1970.

36 FR 11781, June 18, 1971, Special Permission No. 71-5600 Returned Shipments; Waive Rule. Relief from Rule 4(i) of Tariff Circular 20, to publish rules governing applicable rates on rejected or returned shipments, granted; expiration date June 4, 1976.

36 FR 16228, Aug. 20, 1971: Special Permission No. 72-810, Fares, Charges, Etc.; Postponement of Effectiveness of Increases, Reestablishment of Lower Rates. Effective Aug. 16, 1971, rules of various Commission tariff circulars are waived to extent necessary to permit carriers to publish and file tariff supplements mandated by the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries.

36 FR 16228, Aug. 20, 1971: Suspension Docket No. 8664, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 17, 1971, and later, which would be in violation of the Executive Order of Aug. 15, 1971 entitled Providing for Stabilization of Prices, Rents, Wages, and Salaries, is suspended, effective Aug. 16, 1971.

36 FR 16975, Aug. 26, 1971: Suspension Docket No. 8664, Sub. No. 1, Stabilization of Rates and Charges, August 1971. Operation of schedules of new increased rates, fares and charges, etc., filed to become effective Aug. 24, 1971, and later, is suspended, effective Aug. 23, 1971.

36 FR 21857, Nov. 16, 1971: Suspension Docket No. 8688, Stabilization of Rates and Charges, Operation of schedules publishing new increased rates, fares and charges, etc., which, if permitted to become effective, would result in rates and charges that would violate Executive Order No. 11627, dated Oct. 15, 1971 (except those currently under suspension and investigation), ordered suspended, and use thereof deferred, for indefinite period pending further Commission order.

36 FR 22300, Nov. 24, 1971, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.0 - §1311.5, new Part 1311 added, effective day after date of publication in Federal Register.

36 FR 22341, Nov. 24, 1971: Suspension Docket No. 8688, Sub-No. 2, vacates indefinite suspension of operation of certain schedules, subject to conditions set forth, effective on date of order.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub No. 1) Stabilization of Rates and Charges, certain schedules of increased rqtes suspended by order of Nov. 19, 1971.

36 FR 23108, Dec. 3, 1971: Suspension Doc. No. 8688 (Sub. No. 3) Stabilization of Rates and Charges, certain schedules of increased rates suspended by order of Nov. 24, 1971.

37 FR 335, Jan. 11, 1972, Part 1300: Freight Schedules; Railroads, §1300.62 Notice for changes of rates within Alaska and the Hawaiian Islands (Rule 62 of Tariff Circular No. 20), revoked, effective Jan. 1, 1972.

37 FR 1107, Jan. 26, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, special procedures prescribed by order of Nov. 19, 1971 (36 FR 22300) revised in order to conform to, and implement, §300.16 of the regulations of the Price Commission (37 FR 652), effective on date of order.

37 FR 3354, Feb. 15, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program; Price Commission having deferred until March 10, 1972 public utility rate increases proposed to become effective on or after Feb. 10, 1972, carriers are directed to defer indefinitely the effective dates of all increased rates, fares, charges, etc., proposed to become effective during the Price Commission deferral period, effective on date of order.

37 FR 6149, March 24, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program. Carriers authorized to cancel indefinite postponement of effective dates of proposed increased rates, fares, charges, etc., required by the order of Feb. 11, 1972, effective on date of order.

37 FR 9398, May 10, 1972, Part 1300: Freight Schedules—Railroads, §1300.30 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 9398, May 10, 1972, Part 1303: Passenger Service Schedules—Rail and Water Carriers, §1303.36 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 9398, May 10, 1972, Part 1304: Express Companies Schedules and Classifications, §1304.42 Transmission of publications to subscribers, added, effective June 21, 1972.

37 FR 12239, June 21, 1972, Parts 1300, 1303 and 1304: Order of May 1, 1972 (37 FR 9398) requiring transmission of tariffs and schedules to subscribers and other interested parties, stayed pending disposition of timely filed petitions for reconsideration, effective on date of order.

37 FR 14308, July 19, 1972, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, entire Part 1311 revised, effective on day following publication in the Federal Register.

37 FR 18550, Sept. 13, 1972, Part 1300: Freight Schedules—Railroads, §1300.30 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 18550, Sept. 13, 1972, Part 1303: Passenger Service Schedules—Rail and Water Carriers, §1303.36 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 18551, Sept. 13, 1972, Part 1304: Express Companies Schedules and Classifications, §1304.42 Transmission of publications to subscribers, amended, effective 60 days after publication in Federal Register.

37 FR 25399, Nov. 30, 1972, Parts 1300, 1303, and 1304: Order of Aug. 28, 1972 establishing regulations for the transmission of tariff and schedule publications to subscribers and other interested parties, which had been stayed, made effective 30 days after publication of order in Federal Register (11/30/72).

38 FR 2177, Jan. 22, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, Pursuant to end of Phase II and beginning of Phase III, mandatory application of regulations is suspended, effective Jan. 11, 1973, until further notice; but such regulations shall be construed as voluntary guidelines.

38 FR 3389, Feb. 6, 1973, Part 1311: Special Procedures for Tariff Filings Under the Wage and Price Stabilization Program, §1311.5 Standards applicable during Phase III of the wage and price stabilization program, adopted Jan. 30, 1973.

38 FR 16231, June 21, 1973, Part 1300: Freight Tariffs: Railroads, Water Carriers, and Freight Forwarders subject to Interstate Commerce Act, amended to more easily indicate kinds of carriers subject to Part 1300.

Section 6. (2) Schedule of rates through foreign country.—[Unchanged. See vol. 9, p. 7483.]

Amendments, see footnotes, vol. 2, p. 1455; historical notes, p. 1455.

Notes of Decisions

Volume 2—p. 1455.

Section 6. (3) Change in rates; fares, etc.; notice required, simplification of schedules.—[Unchanged. See vol. 9, p. 7484.]

Amendments, see footnotes; vol. 2, p. 1456; historical notes, p. 1456.

Notes of Decisions

Volume 2—p. 1457; Volume 6—p. 5210; Volume 9—p. 7484; Volume 12—p. 10276; Volume 16—p. 12694; Volume 17—p. 13366; Volume 18—p. 14130; Volume 19—p. 15280; Volume 21—p. 16779.

Changes in Schedules

1. In general.—[Vols. 2, 6, 9, 12, 16].—See also Notice of Increases in Frt. Rates and Pass. Fares, at §13.(4), n. 29.

Proposed change in rail classification rule 24 and similar rules in other tariffs pertaining to the use of overflow cars not shown just and reasonable. Respondents assert that former rule led to abuses in connection with incentive rates, e.g., sending lead car to one destination and overflow car to another under the terms of the stop-off rule. Such evidence is insufficient justification for proposed change as the proper way to handle such abuses is to apply specific restrictions on the rates.—Freight in Excess of Full Carload, 337 I.C.C. 509 (515-6).

Respondents' cost evidence introduced to show that service rendered in accordance with rule 24 has been expensive is not sufficiently reliable to be probative. Furthermore, cost data stated are not used in any meaningful manner considering the issue herein. Schedules ordered canceled.—Id. p. 516.

Simplification of Schedules

12. In general.—[Vols. 2, 6, 9, 19].—Commission concluded that the overlapping application of general increases has resulted in unduly and unreasonably complex tariffs. Commission ordered respondents to update their tariffs sufficiently to enable shippers and carriers to ascertain the applicable rates and charges with certainty and without unreasonable difficulty.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (136-7).

Section 6. (4) Joint tariffs.—[Unchanged. See vol. 9, p. 7486.]

Amendments, see footnotes, vol. 2, p. 1461; historical note, p. 1461.

Notes of Decisions

Volume 2—p. 1461; Volume 6—p. 5214; Volume 9—p. 7486; Volume 11—p. 9226; Volume 12—p. 10277; Volume 13—p. 10985; Volume 14—p. 11486; Volume 15—p. 12063; Volume 16—p. 12695; Volume 17—p. 13367; Volume 18—p. 14130.

Section 6. (5) Copies of traffic contracts to be filed.—[Unchanged. See vol. 15, p. 12063.]

Amendments, see footnotes, vol. 2, p. 1466, vol. 15, p. 12063; historical note, vol. 2, p. 1466.

Notes of Decisions

Volume 2—p. 1466; Volume 21—p. 16779.

2. Filing contracts, agreements, or arrangements as to traffic.—[Vol. 2].—Rules and practices governing the handling of loss and damage claims affect both regulated traffic and adequate service so that, as there is no question that the adoption by the carrier groups involved of the concealed loss and damage claims rules constitutes an agreement among carriers, the agreements adopting such rules and practices should be filed with this Commission.—Loss and Damage Claims, 340 I.C.C. 515 (535-6).

Section 6. (6) Form and manner of publishing, filing, and posting schedules; unlawful use.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §209, 90 Stat. 45, the words "shall prescribe; and the" are struck out and the language, as set forth below, is inserted in lieu thereof. See vol. 11, p. 9227.]

*** shall prescribe. The Commission shall, beginning 2 years after the date of enactment of this sentence, require (a) that all rates shall be incorporated into the individual tariffs of each common carrier by railroad subject to this part or rail ratemaking association within 2 years after the initial publication of the rate, or within 2 years after a change in any rate is approved by the Commission, whichever is later, and (b) that any rate shall be null and void with respect to any such carrier or association which does not so incorporate such rate into its individual tariff. The Commission may, upon good cause shown, extend such period of time. Notice of any such extension and a statement of the reasons therefor shall be promptly transmitted to the Congress. The ***

Notes of Decisions

Volume 2—p. 1468; Volume 6—p. 5217; Volume 9—p. 7488; Volume 11—p. 9227; Volume 14—p. 11487; Volume 17—p. 13367; Volume 19—p. 15282.

1. Form of schedules prescribed by Commission.—[Vols. 2, 6, 9, 11, 17, 19].—The Commission's tariff rules do not require that rates reduced to meet competition be symbolized to indicate the type of competition that is being met, or in fact for what reason, if any, they are reduced; all that is required is that a reduction symbol be shown.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (611).

Although the proposed tariff rule, which appeared on the surface to be so simple, provided for the nonapplication of domestic rates on import and export traffic where there are in effect commodity rates or rates derived from exceptions ratings published to apply specifically on import or export traffic via any route from or to Great Lakes, north Atlantic, south Atlantic and Gulf ports found unlawful because the determination of an applicable rate on such traffic would be so onerous and complicated as to contravene rule 4(i) of Tariff Circular No. 20; proposed schedule ordered cancelled.—Application of Domestic Versus Import or Export Rates, 339 I.C.C. 9 (11).

Section 6. (7) Transportation without filing and publishing rates forbidden; rebates; privileges.—[Unchanged. See vol. 9, p. 7489.]

Amendments, see footnotes, vol. 2, p. 1472; historical notes, vol. 2, p. 1472, vol. 16, p. 12695.

Notes of Decisions

Volume 2—p. 1475; Volume 6—p. 2518; Volume 9—7489; Volume 11—p. 9228; Volume 12—p. 10277; Volume 13—p. 10985; Volume 14—p. 11487; Volume 15—p. 12064; Volume 16—p. 12696; Volume 17—p. 13367; Volume 18—p. 14131; Volume 19—p. 15282; Volume 21—p. 16780.

Prohibitions and Purposes

3. Privileges extended to be authorized by tariff.—[Vols. 2, 6, 9, 11, 15, 19].—As held in 173 F. Supp. 397, affirmed per curiam, 362 US 327, any transportation provided over internal circuitous rail routes solely to achieve increased time in transit, i.e., delay, constitutes an additional service, privilege or facility which must be published in tariff form; that rule determines the issue, in instant case, of whether plaintiff railroad's holding practice amounts to such a service since, as record clearly shows, shippers' purpose in routing shipments of potatoes over plaintiff's internal circuitous routes (some of which require backhauls) was to increase transit time in order to secure a more favorable market. The Commission correctly concluded, in investigation proceeding, that railroad's practice of holding such shipments at points on its direct route for period of time equal to that necessary for movement over specified circuitous route constituted a service of delay which violated §6(7) and the Elkins Act because there was no provision made therefor in its tariffs and there was no published charge for the service. Commission order sustained and complaint, as to that order, dismissed.—Atchison, T. & S.F. Ry. Co. v. United States, 282 F. Supp. 430 (431, 433-4, 437)*.

5. Effect of tariff in force.—[Vols. 2, 6, 9, 11, 12, 14-19, 21].—Everyone is charged with notice of legal tariff rail rates; and rail carriers must collect the full rate published in their tariffs, regardless of ignorance, misquotation, or other equitable considerations. Therefore, railroad which charged defendant shipper less than the legal tariff rate for goods shipped is entitled to collect full lawful charges on the shipment, even though carrier had marked the waybill at a lower price and shipper had relied thereon. Railroad's motion for summary judgment granted; judgment entered against defendant shipper in the amount of undercharges claimed.—St. Louis-S.F. Ry. Co. v. Miller Floors, Inc., 293 F. Supp. 869 (870-71).

Railroad tariffs, duly filed with the Commission, bind both carrier and shipper with the force of law; that is because provisions of the Act requiring tariffs to be filed involve not only the regulation of carrier-shipper relations, but also the interest of the general public in adequate, nondiscriminatory transportation at reasonable rates. And because of the public interest, it is of no consequence that plaintiff railroad had knowledge of shipper's practice of not complying with governing transit tariff and acquiesced therein; carrier cannot waive a provision of the tariff and estoppel cannot be applied against it.—Atchison, T. & S.F. Ry. Co. v. John Sexton & Co., 339 F. Supp. 1202 (1205, 1206).

Principles Governing Tariff Interpretation

10. In general.—[Vols. 2, 6, 9, 11-19, 21].—Where there is no issue of fact in a carrier's action to recover freight charges allegedly owned by shipper, and words of the tariff are used in their ordinary meaning with no particular connotation in the expert field of the Commission, then interpretation of a tariff ordinarily presents a question of law; however, as a tariff is no different from any contract, its true application must sometimes be determined by the factual situation on which it is sought to be impressed. In interpreting a tariff, its terms must be taken in the sense in which they are generally used and accepted; and it must be construed in accordance with the meaning of the words used. Also published rules relating to tariffs should have a reasonable construction and should be interpreted in such a way as to avoid unfair, unreasonable, absurd, or improbable results.—Penn Central Co. v. General Mills, Inc., 439 F. 2d 1338 (1340, 1341).

A tariff must be construed to avoid unjust, absurd, or improbable results; and all the pertinent provisions must be considered together, giving effect so far as possible to every word, clause, and sentence therein. The Commission misinterpreted tariff publishing rates from El Centro, Calif., to Philadelphia, Pa., as permitting application of those rates on shipments from central California, under the intermediate rule, although the shipments did not originate at or pass through El Centro. While paragraph (3) of tariff routing instructions provided that rates would apply via all routes made by lines of carriers parties thereto, it expressly did not supersede the provisions of paragraph (1) that the rates applied only to directly east-bound traffic through Western Gateways in Arizona, thus, precluding routing through central California. Therefore, the El Centro rate cannot be applicable over hypothetically constructed westward route through the central California origins; rate published from actual origins to Philadelphia was properly charged by the railroads.—Samuel P. Mandell Co. v. Pennsylvania R. Co., 336 F. Supp. 565 (569, 574-5)*.

It is well established that plain tariff provisions should be interpreted as published, notwithstanding that intent of the framer may be aborted thereby. At issue was whether a charge, named in another tariff item and specifically restricted to apply on rates to shipside, was applicable on shipments delivered to Government port facility under proviso in governing line-haul tariff specifying that aforementioned tariff item will apply. Commission held that provisions restricting additional charge to rates to shipside may not be ignored and thus the additional charge was inapplicable. Refund directed.—United States of America v. Southern Pacific Co., 337 I.C.C. 504 (507-8)*.

Freight charges on empty tank cars moving from construction points to points where rubber lining was installed were found inapplicable. Interpretation of the governing tariff provisions shows that these movements were between two home points which are defined as points where car owner has arrangements for construction, repair, or storage and which are published as such points in the Official Railway Equipment Register at the time of movement. Thus, the cars are instrumentalities of transportation to be credited with mileage for equalization purposes.—Tariff Provisions on New Empty Tank Cars, 341 I.C.C. 257 (262-63).

12. Ambiguities construed against maker.—[Vols. 2, 6, 9, 12, 14-16, 17-19, 21].—See also Grain by Rent-A-Train, at §6(1), n. 2 and Western Forest Inds. v. Aberdeen & R.R. Co., at §6(7), n. 14.

Since a tariff should be construed strictly against carrier that drafted it, any ambiguity or doubt as to its meaning should be decided in favor of the shipper. However, such ambiguity or doubt must be a reasonable one and should not be the result of a straining of the language; also, there must be a substantial and not a mere arguable basis in order to justify resolving such doubt against the carrier.—Penn Central Co. v. General Mills, Inc., 439 F. 2d 1338 (1341).

Railroad's export tariff, as applied to plaintiff's shipments that were billed "For Export to South Vietnam" and (as customary) were delivered by defendant carrier to naval facilities at California ports where rail carriers were not permitted to operate, found to be ambiguous. Two tariff items providing that export rates apply on (1) freight which railroad delivers to water carriers at Pacific Coast ports of interchange and (2) freight moved on bills of lading showing destination beyond Pacific Coast ports, and not diverted or held en route by shipper, create a substantial ambiguity when applied to considered situation, since the first item appears to exclude from coverage that which the second item appears to include. Such substantial ambiguity must be resolved against the rail carrier. Moreover, construing the tariff ambiguity against defendant carrier also has the effect of avoiding an unjust and improbable result with respect to rates charged on exports moved through a Government depot and on other exports via the same port.—Caterpillar Tractor Co. v. Atchison, T. & S.F. Ry. Co., 333 F. Supp. 885 (886-7).

14. Practices of carriers; handling, etc.—[Vols. 2, 6, 9, 12, 13, 15, 16, 18].—Modification of rules reducing rates of lumber when loaded to fullest visible capacity by basing such rates on cubic capacity of cars found not just and reasonable as such modifications do not cover all commodities and do not allow for irregularities in a car's capacity caused by repairs. Also, tariff rules presently published by defendant railroads establishing reduced rates on lumber at weightloads no greater than 55,000 pounds when loaded to fullest visible capacity and moved from the Pacific coast to eastern destinations found lawful, but ordered cancelled as they are ambiguous and lack adequate means of endorcement.—Western Forest Inds. v. Aberdeen & R.R. Co., 332 I.C.C. 408 (421-22).

Proposed schedules cancelling absorption of wharfage charges at indicated Gulf and

South Atlantic ports by respondent railroads ordered cancelled to the extent they are shown not just and reasonable from failure to reduce shipside rates and other charges to reflect the cancellation of absorption.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (528-9).

15. Construction not to be strained or unnatural.—[Vols. 2, 6, 9, 11-19, 21].—See also Caterpillar Tractor Co. v. Atchison, T. & S.F. Ry. Co., at n. 12, *supra*.

While a tariff must be construed in accordance with the meaning of words used therein, a strict construction against the drafting carrier is not justified where it ignores a permissible and reasonable construction which conforms to intentions of the tariff framers, avoids possible violations of law, and accords with the practical application given by shippers and carriers alike. Also, published rules relating to tariffs must be reasonably construed so as to avoid unfair, unreasonable, absurd, or improbable results. Therefore, as the trial court's interpretation of disputed language in considered rail classification "follow-lot" rule is a permissible and reasonable construction which conforms to apparent intent of framers of the tariff, whereas interpretation urged by defendant shipper would lead to an unfair, unreasonable, absurd, or improbable result, judgment of the lower court in favor of plaintiff is affirmed.—Penn Central Co. v. General Mills, Inc., 439 F. 2d 1338 (1341-2).

Rate Governed by Date of Acceptance of Shipment

39. Exceptions; storage and demurrage.—[Vols. 2, 6, 12, 15, 17, 19].—At Baton Rouge, La., heavy-duty rail cars were subject to regular demurrage charges for delay in unloading, and, in addition, were assessed special detention charges, to assure prompt release. Detention tariff set forth detention charges of about $25 per car per day after free time, but the free time period was not defined. Therefore, allowable free time provided by the demurrage tariff of 48 hours was inapplicable in connection with detention as well as demurrage. But other rules in the demurrage tariff, such as provisions for no charges on partial days of delay, have no application in computing special detention costs.—Delta Southern Co. v. Atchison, T. & S.F. Ry. Co., 332 I.C.C. 899 (902-3).

Commodity Rates

46.—Whether specific designation supersedes general description.—[Vols. 2, 6, 9, 11-19, 21].—Single-factor transit rates on piling and posts in §2 of governing tariff applied on complainant's shipments of round timber poles and pilings, creosoted in transit, rather than lower rates named in §4 of same tariff on "Timber, NOIBN." As posts, poles, and piling are each specifically named and separately rated in the governing classification, under the tariff definition of "NOIBN" the §4 rates would not apply thereon. And though §2 names rates on telegraph or telephone poles only, and there is thus no specific description covering other poles, complainant has not shown that the rates applicable on "posts" and "pilings" would be inapplicable on "poles."—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (536).

And for purposes of applying aggregate rule in the governing tariff, it is immaterial that description of "poles" and "piling" in one tariff naming rates beyond the transit point is more specific than lower-rated description "round timber" in another tariff, since, under a pertinent alternative provision, if a given article is provided with a rate in both those tariffs the lower of the two applies, and a reasonable construction of "round timber" includes creosoted poles and piling.—Id., pp. 538-9.

49.—Commodity description; determination by analogy.—[Vols. 2, 6, 9, 11-19, 21].—In deciding on the applicable rate, actual identity of article shipped is determined, and then the proper tariff classification is ascertained. While not any one is controlling, factors to consider in determining identity of a shipped article are the bill of lading description, manufacturer's description for sale purposes, and function and use of the article; on that basis, disputed government shipments of generator sets mounted on some type of trailer are found to be, in reality, trailer-mounted generator sets. Where shipped article can be classified under either of two tariff provisions, however, the more specific provision controls. Two items in governing classification refer to generator sets, but Item 73720 is the more specific and more closely fits disputed shipments, since it expressly refers to generator sets mounted on trailers; and under classification analogy rule, plaintiff is entitled to have its charges computed pursuant to Item 73720. Thus, railroad is entitled to recover amount of claimed overcharges deducted, after government post-audit, from other bills due it.—Southern Pac. Transp. Co. v. United States, 454 F. 2d 740 (744-5).

In railroad's suit against shipper which seeks application of the class 35 rate of $2.08 on radio and television towers contained in governing class rate tariff, instead of the $1.33 rate charged, on defendant's shipment of used television tower material, the important question is what commodity was in fact transported by the railroad. Equipment shipped was not a tower per se, but rather dismantled tower material; and fact that defendant intended to later use that loose salvaged steel to redesign and reconstruct a television tower is immaterial, since nature of the shipment when tendered determines its status for rate purposes. Plaintiff railroad transported loose salvaged steel, and protected it as nothing more than that; it cannot now charge a higher tariff rate on equipment of a technical nature which would have required proper packing and protection and, in fact, was not shipped. Evidence is convincing that the applicable rate is the $1.33 that was charged and that defendant paid. Judgment for defendant, with recovery of its reasonable attorney's fees and costs.—Chicago, B. & Q. R. Co. v. Duhamel Broadcasting Co., 337 F. Supp. 481 (482-3).

51. Use to which article put.—[Vols. 2, 6, 9, 11-19, 21].—In railroad's suit to recover additional freight charges on shipment of used television tower material, the fact that defendant shipper intended to subsequently use such loose salvaged steel to redesign and reconstuct a television tower is immaterial; nature of the shipment at the time tendered determines its status for rate purposes.—Chicago, B. & Q. R. Co. v. Duhamel Broadcasting Co., 337 F. Supp. 481 (483).

Although transportation characteristics of feed, fertilizer, and technical grade ureas are generally the same, evidence is conclusive that they are three separate commodities. Urea containing 42 or 45 percent nitrogen does not meet the high standards required by technical or industrial consumers, only the 46-percent grade being sufficiently free from impurities, and then only if it contains the proper amounts of certain other elements, while for feed purposes urea containing 42 percent nitrogen is the strongest that can be used. Complainant's own evidence shows that over a 4-year period all the 42-percent-nitrogen urea sold by it was used for feed, all the 45-percent was used as fertilizer, and predominant use of the 46-percent was for technical or industrial purposes; notwithstanding some 46-percent urea is used as fertilizer, evidence as a whole refutes complainant's contention that the predominant value of the urea it produces is as fertilizer.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I C.C. 102 (106-8).

Even if "only" in tariff description "Urea, having value only for fertilizer purposes," is not construed literally, it cannot reasonably be found that the 42-percent-nitrogen urea used exclusively for feed purposes and the 46-percent used predominantly for technical or industrial purposes have value "only for fertilizer purposes"; those two grades plainly have considerable value for other purposes, and fact that they may have value to the fertilizer industry does not change their character for ratemaking purposes. Complainant's own "predominant use" theory supports conclusion that its ureas containing 42 and 46 percent nitrogen are feed and technical grade ureas taking rates under tariff descriptions signifying those grades, and were not entitled to lower rates maintained on fertilizer grade urea.—Id., pp. 105, 109.

53. Rates applicable to articles as commercially described.—[Vols. 2, 6, 9, 11-19, 21].—Terms used in a tariff must be taken in the sense in which they are generally accepted commercially. Complainant testified that the trade to which it sells urea regards the various grades separately according to nitrogen content and use, and a national weekly listing price quotations on chemicals classifies urea containing 46 percent nitrogen as industrial, that with 45 percent as agricultural, and that with 42 percent as feed grade. Moreover, a manufacturer's description of his products for sale purposes may be considered in determining their transportation characteristics, and complainant represented that it produced three separate products and advertised them as such under appropriate descriptions. Tariff descriptions of feed, fertilizer, and technical ureas are not shown to be ambiguous or not generally understood as applying on three separate commodities. Rates on feed, fertilizer, and technical ureas applied on complainant's shipments containing 42, 45, and 46 percent nitrogen, respectively.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (105, 109).

Publications of American Society for Testing Materials and the Board of Standardization, Department of Purchase, City of New York, refer to and describe piles made of wood as round timber piles; such trade references are entitled to weight in determining whether complainant's shipments of poles and piling, creosoted in transit, could move under the "round timber" tariff description. As poles are shown to be 55 or 60 feet in length and made of pine, a reasonable construction of that commodity description would include creosoted poles and piling.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (539).

Proportional and Transshipment Rates

66. Tariff limitations restricting use.—[Vols. 2, 6, 9, 11-13, 15, 17, 19].—Commission found that whenever proportional rates are provided between transit and destination points they take precedence over other rates by application of the "rate-break" rule herein cited, and in effect they constitute minimum rate provisions. Fact that proportional rates do not apply over the actual route of movement is immaterial and thus assailed rates are applicable and otherwise lawful.—Lincoln Grain, Inc. v. Missouri Pacific R. Co., 335 I.C.C. 779 (781-2).

Assailed multiple-car rates on cement in bulk found applicable and not shown unlawful as transshipment rates, like proportional rates, do not extend beyond the points to which they are named and do not include further transportation services beyond such points unless specifically stated in governing tariff provisions. The meaning of the word "transshipment" is not controlling of applicability. Commission found that the decision by a hearing examiner in a previous case, cited herein as supportive of complainant shipper, was in error in finding the rate at issue therein, which is identical to the assailed rate in instant case, to be applicable as based on the dictionary definition of the word "transshipment".—Lone Star Cement Corp. v. Central R. Co. of N.J., 335 I.C.C. 786 (790).

Combination Rates

80. Not applicable when single-factor through rate is published.—[Vols. 2, 6, 9, 12-14, 16-18, 21].—The applicable rates on export carload shipments of automobile parts from Detroit, Mich. to Laredo, Tex. were the single-factor through rates subject by tariff provision to the single-factor rates from Detroit to Deming, N. Mex. as maximum. Lower combination rates sought by complainant shipper were not applicable because a factor in each combination was restricted against applying on export shipments.—Fabricas Auto—Mex., S.A. v. N.Y. Central R. Co., 332 I.C.C. 1(7).

Rates Fixed by Combination Rule

96. Effect upon the aggregate of intermediate rates.—[Vols. 2, 6, 9, 13-19, 21].—That rate charged on certain shipments was the lower of two single-factor rates published in different tariffs, each subject to an aggregate-of-intermediates rule, does not preclude application of still lower charges based on a three-factor aggregate, on theory that the more general provisions of the aggregate rule would not supersede the more specific provisions of alternative rule to which the rate charged was subject. The aggregate rule does not "supersede" the specific provisions of the tariff, but becomes operative only after consideration of those provisions under which assailed rate would produce the lower charges of the two basic rates, and since that rate was subject to an aggregate rule and a lower combination was available, latter was applicable.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (512-3).

And where the higher of two single-factor rates published between other points in different tariffs was subject to an aggregate rule and the lower was not, the aggregate rule was inoperative in resolving the conflict between them, since an aggregate rule operates only to displace a higher and otherwise applicable rate. Lower of such conflicting rates was applicable on complainants' shipments under alternative rule, and there was no tariff authority for invoking the aggregate rule to which the higher rate was subject.—Id., p. 514.

Intermediate Provisions

109. In general.—[Vols. 6, 9, 11-19, 21].—The Commission's interpretation of considered tariff intermediate-point rule, which permitted application of lower rate from El Centro, Calif., on plaintiff's produce shipments from central California points to Philadelphia, Pa., clearly contravenes prevailing decisional law. Because the tariff provided for "specific routing," the Commission held that shippers were free to tack together any lines of the carriers parties thereto; but, as the court held in 212 F. 2d 812, a route constructed for application of an intermediate rule must be reasonable in light of the extent and direction of circuity and the commercial usage of the route. Furthermore, on review of recent apposite cases, the court holds in instant case that the choice of lines shippers have in constructing such a route is limited by a rule of reasonableness, whether tariff routing is designated as "open" or "specific." The Commission should not have adopted the strained interpretation of the intermediate rule that it did in its decision awarding reparations against defendant railroads; and in shipper's suit for enforcement, the reparations order will not be enforced.—Samuel P. Mandell Co. v. Pennsylvania R. Co., 336 F. Supp. 565 (573-4, 575)*.

116. Reasonable and practical routes.—[Vols. 2, 9, 11-16, 18, 19, 21].—As held in 212 F. 2d 812, a "route" for "intermediate point" rate purposes must not be unreasonable, and its unreasonableness depends on (1) the extent and direction of circuity, and (2) commercial usage of such "route"; also, two recent apposite court decisions establish that directional backhaul is not a prerequisite to a finding of unreasonableness, but is merely a variety of circuity, and that the degree of circuity is not determinative of unreasonableness. On the basis of those principles, and on stipulated facts of instant case, the hypothetically constructed route from El Centro, Calif., to Philadelphia, Pa., which the Commission sanctioned in its decision awarding reparations against defendant railroads because, under tariff intermediate-point rule, lower rate from El Centro was applicable on plaintiff's shipments of produce from central California points to Philadelphia, is found to be arbitrary, unreasonable and contrary by law. Therefore, the court will not enforce the Commission's order awarding reparations to shipper; judgment in favor of defendants.—Samuel P. Mandell Co. v. Pennsylvania R. Co., 336 F. Supp. 565 (571-3, 575)*.

Conflicting Rates

160. Export and domestic rates.—[Vols. 2, 6, 9, 11-18, 21].—Railroad's export, rather than domestic, rates are found applicable on plaintiff's shipments which were billed "For Export to South Vietnam" and consigned to purchaser in care of naval facilities at two California ports, even though defendant carrier did not deliver them to water carriers at the ports but, as was customary, to tracks just outside government facilities where rail carriers were not permitted to operate. One item in the tariff provides that export rates apply only to freight delivered by the railroad to water carriers at Pacific Coast ports of interchange, while another item provides that export rates apply to freight moved on bills of lading showing destination beyond Pacific Coast ports, and not diverted or held en route by shipper; as applied to instant situation, the two items create a substantial tariff ambiguity which must be resolved against the rail carrier. Therefore, in suit by shipper seeking a refund of the difference between lower export rates and higher domestic rates charged, the court holds that export rates published in defendant's tariff apply on considered shipments. Judgment for plaintiff.—Caterpillar Tractor Co. v. Atchison, T. & S.F. Ry. Co., 333 F. Supp. 885 (886-8).

Routing

180. Restriction in tariff.—[Vols. 2, 6, 9, 11, 12, 15-19, 21].—Proposed tariff provision by respondent railroads restricting joint carload rates on shipments of fresh potatoes southbound from central Oregon only to shipments loaded in special refrigerator cars and moved over specified routes found lawful. Respondents' evidence proves that a revenue need exists for such restriction, an adequate supply of such cars exists, and that shippers may comply without undue additional burden on them.—Routing Restrictions on Fresh Vegetables, 335 I.C.C. 665 (670).

All tariff supplements establishing new interchange points were authorized with the exception of the establishment of Bound Brook, N.J., in lieu of Allentown, Pa., subject to conditions stated herein. Of these conditions, four were set forth for the first time herein and eleven were set forth in F.D. 26659, an abandonment proceeding including the provision for the establishment of a trust fund for certain of petitioner's revenues earned via the Lake Junction, N.J., interchange point.—Routing Via Oak Island Jct., New Jersey, 341 I.C.C. 129 (153-60).

181. Unrestricted rates apply over any route made up of lines of participating carriers.—[Vols. 2, 6, 9, 11-19, 21].—In its decision awarding plaintiff reparations against defendant railroads, due to alleged overcharges, the Commission held that because the tariff provided for routing via all routes made by lines of any carriers parties thereto, shippers were free to tack together any lines of the participating carriers for intermediate rule purposes; however, its interpretation of the intermediate-point rule clearly contravenes prevailing decisional law. The Court of Appeals held in 212 F. 2d 812, that a "route" for intermediate-point rate purposes must be reasonable in light of the extent and direction of circuity and the commercial usage of such route; and on review of recent apposite cases, the court in suit to enforce the reparations order holds, further, that the choice of lines shippers have in constructing such a route is limited by a rule of reasonableness, whether tariff routing is designated as "open" or "specific." The Commission's reparations award, not enforced.—Samuel P. Mandell Co. v. Pennsylvania R. Co., 336 F. Supp. 565 (573-4, 575)*.

Observance of Published Tariff

215. Departure from rate named in tariff unlawful.—[Vols. 2, 6, 9, 11, 12, 14-19, 21].—See also Southern Pac. Co. v. Miller Abattoir Co., at n. 263 below.

In railroad's suit against consignee to collect freight charges allegedly due on shipments delivered under bills of lading containing a "freight prepaid" notation, judicial recognition of consignee's defense of estoppel will not contravene anti-discriminatory purpose of the statute. On appeal from lower court's rejection of appellant's estoppel defense, the court holds that a consignee who has paid consignor full amount of the charges may raise the defense of estoppel against a carrier's claim for freight charges. Such a rule will not erode the purpose underlying §6(7) as long as the grounds for estoppel will not serve, directly or indirectly, as a cover for freight rate discrimination.—Southern Pac. Transp. Co. v. Campbell Soup Co., 455 F. 2d 1219 (1222).

The law is clear that demurrage cannot be waived by agreement between the parties; and it is equally clear that demurrage cannot be charged where cars are kept on the shipper's property for carrier's convenience until the point at which they are appropriated to shipper's use. In view of the fact that, since it was railroad's practice to place unordered "piggyback" trailers in loading slots at shipper's dock for its own convenience, the free 10-hour loading time (provided by tariff) began to run at the time that shipper started its loading operation, not at time trailers were positioned; that loading of any given trailer was completed within 3 hours; and that shipper immediately prepared a bill of lading and notified railroad of the waiting shipment, there was not any detention beyond the free time for which demurrage could be charged. In railroad's suit to recover demurrage charges from shipper, therefore, the court finds, as a matter of law, that defendant owes no demurrage charges on any of plaintiff's claims.—Chicago & N.W. Ry. Co. v. Union Packing Co., 326 F. Supp. 1304 (1306-8).

217. Strict compliance with tariff rules as to service offered.—[Vols. 2, 6, 9, 13-19, 21].—See also Norfolk & W. Ry. Co. v. Permaneer, Inc., at §1(6), n. 538, and Penn Central Co. v. General Mills, Inc., at n. 15 *supra*.

Dispute in railroad suit against shipper is over what charge, if any, is due plaintiff for services rendered under rail tariff publishing (1) a single car rate that was subject to regular demurrage or detention rules affording consignee up to 48 hours free time for unloading and specifically providing for "constructive placement," under which, on request, railroad would hold a car at the terminal until customer was ready for actual delivery, and (2) a lower "annual volume rate," available only to certain large scale shippers (such as defendant), that prescribed a special detention rule allowing only 24 hours free unloading time and making no provision for constructive placement. Defendant shipper who, during period in question, received cars or constructive placement claims that annual volume rate, and detention charges thereunder, applied; however, in view of the Act and provisions of the tariff, since shipper availed itself of constructive placement feature of the regular demurrage rules, it must pay for such services under the higher single-car rate. District court holding that the single-car rate applied, affirmed.—Southern Ry. Co. v. Champion Papers, Inc., 427 F. 2d 155 (155-6)*.

222. Carriers' duty to collect tariff charges.—[Vols. 2, 6, 9, 11-19, 21].—See also Chicago, R.I. & P.R. Co. v. Furniture Forwarders of St. Louis, Inc., 28 USC §1337, n. 1.

As the lower court concluded, in railroad's action against consignee of "prepaid" shipment to recover freight charges allegedly due, the meaning of §6(7), which imposes on carrier both the right and the duty to collect its full, published tariff charges on freight delivered, does not sustain plaintiff's claim that, under the Act, it has an absolute right and duty to collect —and consignee has an absolute duty to pay—all lawful charges which cannot be defeated by any error or mistake of carrier, regardless of whether or not it results in double payment by consignee. Therefore, considerations of common law equity were not precluded; and the public policy underlying express purpose of the Act (i.e., to prevent preferences in tariff rates) did not compel plaintiff to bring suit against consignee for "prepaid" freight charges which, in fact, consignor had not paid.—Missouri Pac. R. Co. v. National Milling Co., 409 F. 2d 882 (883-4)*.

Accordingly, the trial court's decision on the merits, (1) that where carrier had made the full lawful charge and, itself, marked the bill of lading "prepaid" thereby, in effect, extending credit and looking to consignor for payment, and consignee did pay consignor for both the goods and the freight charges, the public policy against preferences was not involved; (2) that the doctrine of estoppel was properly interposed and could be applied against the railroad by defendant consignee; (3) that the railroad should not be rewarded for its admitted negligence by penalizing consignee simply because consignor (who received payment and who apparently was insolvent) had not paid freight charges claimed to be due; and (4) that, as no genuine issue of material fact was presented, defendant was entitled to judgment on the pleadings, as amended, is affirmed.—Id., pp. 884-6.

Under §6(7), carriers are forbidden to charge any rate other than published tariff rate; and it is carrier's duty as well as its right to collect full tariff charges. Thus, in entering judgment for the railroad on its claim for additional charges incurred when shipments of lambs consigned to defendant were stopped by federal inspectors to check the lambs for screw worms, the trial court properly included prejudgment interest. Applicable tariff provided that all expenses accruing at stopping points, such as charges for inspection, would be in addition to the through rate; and to allow the carrier to recover its lawful charges without awarding prejudgment interest would be to diminish the tariff charge by an amount representing value of the use of money owed during the period prior to judgment. Such a diminution would be contrary to the statute; thus allowance of prejudgment on the railroad's claim was correct.—Southern Pac. Co. v. Miller Abattoir Co., 454 F. 2d 357 (362).

Judicial recognition of appellant consignee's defense of estoppel, in railroad's action to collect from consignee its freight charges on shipments that moved under bills of lading which carried "freight prepaid" notations, will not contravene the antidiscriminatory purpose of the statute. When railroad delivered the shipments under "prepaid" bills of lading which signified that it would look to shipper for payment of freight charges, and consignee assertedly relied on that representation and reimbursed shipper for full amount of the charges, but carrier was unable to collect from shipper, consignee who paid amount of the charges to consignor may raise the defense of estoppel against carrier's claim for freight charges. Accordingly, since the lower court has not ruled on the merits of appellant's estoppel defense, the case is remanded for further proceedings in conformity with the court's opinion.—Southern Pac. Transp. Co. v. Campbell Soup Co., 455 F. 2d 1219 (1222).

Inasmuch as, pursuant to §3(2) and §6(7), a railroad is obligated to collect from the shipper or consignee accrued demurrage charges as extended freight charges in the absence of an agreement to exonerate, plaintiff is not required to proceed first or jointly against others liable for freight charges in its action to recover demurrage charges incurred during longshoremen's strike on 53 carloads of pig iron shipped "FAS Vessel, Mobile, Ala." and delivered to consignee named on the bill of lading. Therefore, even if defendant (who had agreed to purchase 36 of the carloads) was beneficial owner of the pig iron when demurrage charges were incurred, its mere ownership thereof would not render it liable for the freight charges or demurrage; such liability may be created only by contract or by statute.—Southern Ry. System v. Leyden Shipping Corp., 290 F. Supp. 742 (745-6).

In railroad's action to recover undercharges from shipper, rail carriers are required to collect the full tariff rate on goods shipped, notwithstanding ignorance or misquotation of rates or any equitable considerations. Everyone is charged with notice of carrier's legal tariff rate; and no act or omission of the railroad, except running of the statute of limitations, can preclude its recovery of full amount of the applicable tariff charges. Therefore, although plaintiff had marked the waybill (and collected freight charges) at a lower rate and defendant had relied thereon, railroad is entitled to collect full lawful tariff charges. Moreover, though shipper claims it could have deducted the full charges from purchase price of the goods, if quoted the correct rate, estoppel is not a defense that can be invoked where preference results; nor may shipper plead laches as a defense, since laches is an equitable doctrine without application to a suit at law. There being no genuine issues of fact, plaintiff's motion for summary judgment is granted.—St. Louis—S.F. Ry. Co. v. Miller Floors, Inc., 293 F. Supp. 869 (870-71).

While the court recognizes that abundant authority supports railroad's position in its actions against consignees of "prepaid" shipments to recover freight charges allegedly due, the principles stated in 276 F. Supp. 367, aff'd 409 F. 2d 882, and rooted deeply in considerations of fairness, clearly represent the better view of the law. Accordingly, statutory construction does not sustain plaintiff's claim so as to interdict considerations of common law equity and, since no overpowering public policy compelled carrier to bring action under the statute which forbids granting of any preferences in tariff rate treatment, double payment by consignee is not required. Carrier made full and proper freight charges and extended credit to, and looked for payment from, consignor (shipper) by stamping the bills of lading as prepaid; and when defendant consignees, relying on that representation, accepted delivery and (prior to shipper's bankruptcy) paid the purchase price and full freight charges to consignor—who never remitted to carrier—they are not responsible for shipper's nonpayment.—Missouri Pac. R. Co. v.

Lake Charles Grain & Groc. Co., 320 F. Supp. 1064 (1065-6).

223. Liability for payment.—[Vols. 2, 6, 9, 13, 19, 21].—Tariff provisions to collect demurrage charges from the party (other than the consignor or consignee) ordering the detention of the car result in an unjust and unreasonable practice.—Free Time In-Car Storage at U.S. Ports, 329 I.C.C. 763 (772).

231. Misquotation by carriers or tariff error.—[Vols. 2, 6, 9, 11-18, 21].—See also St. Louis—S.F. Ry. Co. v. Miller Floors, Inc., at n. 222 *supra*.

That there may have been some errors in rate-basis numbers shown in tariffs naming assailed rates does not relieve defendants of their obligation under §6 to charge the applicable rates.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (513).

243. Device to depart from tariff forbidden.—[Vols. 2, 6, 9, 11].—The Commission has condemned shippers' practice of listing a higher-rated commodity on the bill of lading under a certain description to obtain lower rates, even though the higher-rated commodity may be used for the same purpose as the lower-rated. Complainant's description of shipments of industrial and feed grade ureas as "fertilizer" on bills of lading, though it invoiced them to customers as technical or feed grade, resulted in undercharges, and its admission that undercharges had accrued as result of "clerical errors" indicates that at time of shipment it understood that different rates applied on fertilizer, feed, and technical ureas.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (104, 109-10).

Actions Before the Courts and Commission

260. Construction and interpretation of tariffs by Commission.—[Vols, 2, 6, 9, 12, 16-19, 21].—In action to set aside Commission orders dismissing plaintiff's complaint for recovery of overcharges on shipments of "cast iron buttons" (having 82-percent average iron content) that are recovered from blast furnace slag, the Commission's findings that commodity shipped was iron bearing slag properly classified as "scrap iron" under the railroads' tariffs, and not slag bearing iron classifiable as "slag" as plaintiff contended, are reasonable and supported by substantial evidence of record; and since such findings involve the exercise of Commission expertise and include questions of judgment governing classification interpretation, the court should accord them great deference. Thus, upon review of the whole record, and notwithstanding some evidence therein which might be deemed supportive of plaintiff's contrary opinion, the Commission's challenged interpretation should be sustained. While the effect of that interpretation was to deny plaintiff recovery of alleged overcharges, the Commission also found the scrap-iron rate charged on the shipments applicable and not shown to be unjust or unreasonable. Commission orders sustained.—Price-Watson Company v. I.C.C., 287 F. Supp. 872 (873, 874-6)*.

Complainants submitted little or no evidence relating to the comparative values of the subject commodities, except for the mill list prices as of July 1970 for 11 prefinished hardwood plywoods and one unfinished softwood plywood ,amufactured by one of the shippers. There was little or no effort made by complainants to show that the costs, the transportation characteristics, the average loading, the average value, the competitive circumstances, or any other relevant factor affecting the higher-rated commodities were the same or similar to the commodities moving under the lower "incentive" rates. Assailed rates found applicable, and not shown to have been or to be unjust or unreasonable.—Plywood, Hardboard & Particleboard v. Aberdeen, 340 I.C.C. 836 (844-845).

263. Actions to enforce provisions.—[Vols. 2, 6, 11-15, 17-19, 21].—See also Chicago, B. & Q. R. Co. v. Duhamel Broadcasting Co., at n. 49 *supra*, and Chicago & N.W. Ry. Co. v. Union Packing Co., at n. 215 *supra*.

District court correctly held, in railroad's action against shipper to recover freight charges on various multi-car shipments, that the rational and logical meaning of the words "CL rate or rating on entire shipment" in §2(a) of classification Rule 24 is that the entire shipment should receive the c.l. rate on the lead car—which is filled to capacity—even though the trailer car is not full and that, in absence of the quoted clause, trailer car could be charged a higher rate. This gives shipper the same (but not higher) rate on the trailer car, regardless of weight of a shipment, as it receives on the lead car or cars. Interpretation urged by defendant, which conveniently ignores "CL rate" and emphasizes "rating on entire shipment," would permit an unjust and absurd result that is neither reasonable nor consistent with purposes of the tariff. While the disputed language is not perfect, when the rule is read in its entirety, the proper interpretation is as set forth by the lower court. Judgment affirmed.—Penn Central Co. v. General Mills, Inc., 439 F. 2d 1338 (1341-2).

In railroads' suits to collect storage and demurrage charges on carloads of grain that were consigned to defendant elevator and held in constructive placement short of destination because they could not be received on defendant's interchange track, the district court correctly ruled that, under applicable tariffs and Commission car service orders, the free time allowed for unloading was to be computed from first 7:00 a.m. after notice to consignee of constructive placement, but was not to include time for movement between the hold point and destination. When cars in question were constructively placed, plaintiffs sent required notices thereof to defendant and calculated the free unloading time, and the storage and demurrage charges with reference thereto; also, though actual travel time was less, 24 hours was allowed for movement from hold points to the elevator, in each case, which was not counted against the cars. Accordingly, district court's judgment against defendant for storage and demurrage charges on cars that were not unloaded within the free time allowed, affirmed.—Fort Worth & D. Ry. Co. v. Goodpasture, Inc., 442 F. 2d 1294 (1296-7, 1298).

Under §6(7), carriers cannot charge any rate different from the tariff rate; as a corollary, consignee who accepts goods shipped to him is liable for all freight charges due under applicable tariffs despite the carrier's misquotation or miscalculation of charges. And a contract to carry for less than tariff rates, being void, will not prevent recovery of the tariff rates because it is the carrier's duty as well as its right to enforce payment of the full tariff charges. Therefore, when the applicable tariff provided that all expenses accruing at stopping points, such as charges for inspection, would be in addition to the through rate, consignee of considered shipments of lambs became liable upon accepting them for all charges incurred by the railroad in the stoppage required by freight tariff which forbade rail shipment of livestock from origin state unless it had been inspected and found free of screw worms. —Southern Pac. Co. v. Miller Abattoir Co., 454 F. 2d 357 (359-60).

Thus, in railroad's action against consignee to recover additional charges incurred when shipments were stopped by federal inspectors to check the lambs for screw worms, wherein consignee asserts a breach of the shipping contract as both a defense and a counterclaim, inasmuch as the alleged breach is no defense to carrier's claim, the lower court correctly granted railroad's motion for summary judgment on its claim for freight charges. The court was also correct in allowing prejudgment interest on the railroad's claim; since the only lawful charge for the shipments is the full tariff charge, to allow recovery without prejudgment interest would be to diminish the tariff charge by an amount representing value of the use of money owed during the period prior to judgment; and such a dimunition would be contrary to the statute.—Id., pp. 359, 362.

The statute requires rail carriers to collect full lawful tariff rates, regardless of ignorance, misquotation, or any equities which might lie with the shipper; and no act or omission of carrier, except running of statute of limitations, can estop or preclude its recovery of full amount of applicable tariff charges. In railroad's action against shipper to recover alleged undercharges, defenses of estoppel and laches asserted by defendant are without merit as a matter of law; therefore, since there are no genuine issues of material fact presented, plaintiff's motion for summary judgment is granted; judgment entered against defendant in amount of undercharges claimed.—St. Louis-S.F. Ry. Co. v. Miller Floors, Inc., 293 F. Supp. 869 (870-71).

264. Set-off and counterclaim.—[Vols. 2, 6, 9, 11-15, 17-19].—See also Burlington Northern, Inc. v. United States, Gov't. traffic, §66, n. 1.

Consignee's allegation, in railroad's suit against it for additional charges incurred when shipments of lambs were stopped by federal inspectors to check them for screw worms, that it suffered damages because of carrier's failure to give the immediate notice of stoppage in transit called for in the livestock contract—though no defense to the claim for freight charges—constitutes an independent claim that is a proper subject for counterclaim. Railroad's argument that to allow recovery for alleged damages would offend §6(7), i.e., that an unscrupulous carrier could give a disguised rebate to its customer through purposely failing to give the immediate notice called for, was rejected by the Supreme Court in 281 US 14. Moreover, a customer who is truly damaged by carrier's breach of its shipping contract, whether breach is intentional or not, receives no "rebate" when carrier pays it the amount of its loss; thus, if consignee was damaged through railroad's breach of the shipping contract, §6(7) does not stand in the way of recovery.—Southern Pac. Co. v. Miller Abattoir Co., 454 F. 2d 357 (360-1).

Furthermore, contrary to plaintiff's position, publication in the Federal Register of freight tariff which explicitly stated that screw worms existed in Arizona, origin of the shipments, and that livestock leaving the state would be stopped for inspection, does not satisfy shipping contract provision that the carrier "shall immediately give notice" when a shipment is stopped in transit by quarantine. Accordingly, insofar as the lower court's order entered judgment for the railroad on consignee's counterclaim, it is reversed; and upon remand, if it is found that plaintiff railroad failed to give the immediate notice called for in the livestock contract, consignee may recover on its counterclaim any damages to which it can prove itself legally entitled.—Id., pp. 361-3.

Section 6. (8)-(10). Preference to shipments for United States; Schedule lacking notice of effective date; Penalty.——[Unchanged. See vol. 9, p. 7521.]

Amendments, see footnotes, vol. 2, pp. 1530-1532; historical notes, pp. 1530, 1531; vol. 17, p. 13389; vol. 21, p. 16800.

Notes of Decisions

§6(8): Volume 17—p. 13389; Volume 18—p. 14148; §6(9): Volume 2—p. 1531; Volume 19—p. 15307; §6(10): Volume 2—p. 1531.

Section 6. (11) Jurisdiction of Commission over transportation by rail and water.—[Unchanged. See vol. 11, p. 9238.]

Amendments, see footnotes, vol. 2, p. 1535, vol. 11, p. 9238; historical note, vol. 2, p. 1536.

Notes of Decisions

Volume 2—p. 1536; Volume 6—p. 5279; Volume 9—p. 7524; Volume 11—p. 9239; Volume 12—p. 10289; Volume 13—p. 10997; Volume 15—p. 12076; Volume 17—p. 13389; Volume 18—p. 14148; Volume 19—p. 15307; Volume 21—p. 16800.

Section 6. (12) Jurisdiction of Commission over carriers contracting with water carriers operating to foreign country.—[Unchanged. See vol. 11, p. 9239.]

Amendment, see footnote, vol. 11, p. 9239.

Through arrangements by water to foreign country

2. Construction and interpretation.—This section empowers Commission, once a voluntary establishment of international joint rates has been made, to require carriers subject to our jurisdiction to enter into like kinds of arrangements with other water carriers in the same trade. Section 6(12) also affirmatively indicates that arrangements for through routes and joint rates between domestic carriers subject to our jurisdiction and oceangoing carriers were contemplated. —International Joint Rates and Through Routes, 337 I.C.C. 625 (629).

Section 7. Combinations to prevent continuous carriage of freight prohibited.—[Unchanged. See vol. 9, p. 7526.]

Historical note, see vol. 16, p. 12715.

Notes of Decisions

Volume 2—p. 1542; Volume 6—p. 5280; Volume 9—p. 7526; Volume 16—p. 12715.

Notes of Decisions

Volume 2—p. 1547; Volume 7—p. 5281; Volume 9—p. 7527; Volume 11—p. 9240; Volume 12—p. 10289; Volume 13—p. 10998; Volume 14—p. 11501; Volume 15—p. 12077; Volume 16—p. 12715; Volume 17—p. 13390; Volume 18—p. 14149; Volume 19—p. 15308; Volume 21—p. 16801.

To Whom Right of Action Accrues

43. Person bearing charges.—[Vols. 2, 7, 9, 13, 16-19, 21].—When the basic issue in consolidated complaint proceedings is merely one of tariff interpretation, relief sought is refund of any overcharges found to exist, and complainants paid to defendants the charges assailed, the question of who must in final analysis absorb those charges, as between buyer and seller, is immaterial. Even if, as defendants allege, seller-consignors absorbed part of the freight charges or granted complainants (buyer-consignees) equalization allowances, defendants would still be liable to complainants for any timely filed claims for over-charges collected from and paid by complainants.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (517).

46.—Consignee.—[Vols. 2, 7, 9, 11, 15].—Although complainant consignees rely largely on copies of bills of lading and freight bills to support their rule 1.100 statements, introduction of original paid freight bills is not the only method by which claims for reparation may be proved. That defendants have had opportunity to inspect the claim statements, and that they have not indicated that any other party has asserted claims for reparation on the shipments involved, while not significant in and of themselves, are facts entitled to weight when witnesses for both consignors and complainants testified that complainants bore the charges and defendants do not challenge the finding in the prior report that where the shipments were prepaid by the consignors they were subsequently invoiced to complainants and paid by latter to the consignors. It is clear that complainants bore the charges; thus their right to file the complaints for reparation was not contingent on assignments from the consignors and the "first step" rule announced in 88 ICC 492 is not controlling.—Thermoid Co., Southern Division v. Baltimore & O.R. Co., 323 I.C.C. 155 (162, 164)*.

Against Whom Liability Accrues

60. Carriers at fault.—[Vols. 2, 9].—See Futorian Manufacturing Corp. v. St. Louis—S.F. Ry. Co., at §15(8), no. 68.

Failure to Furnish Transportation

111. In general.—[Vols. 2, 7, 11, 17].—See also Johnson v. Chicago, M., St. P. & P. R. Co., at §1(4), n. 1.

Though plaintiff also sought injunctive relief, only his claim for damages under §8 for violation of carrier's duty under §1(4) is now before the court, an injunction against railroad's unauthorized abandonment of branch line used for coal shipments from his mine having been denied in 264 F. Supp. 437 because of pending Commission decision on the abandonment application. However, there are no damages to be recovered when, after physical deterioration of a tunnel made it impossible to provide service, the railroad suspended all operations over the branch line and lawfully imposed an embargo on further freight shipments. While validity or reasonableness of embargoes usually is for Commission determination, plaintiff elected to sue in court for damages instead of filing a complaint with the Commission, pursuant to §9, and could not challenge the embargo before the Commission. Moreover, since the Commission decided that tunnel need not be restored, to award damages for railroad's failure to restore the tunnel and provide service would result in an unjust and undue burden. Defendant's motion for summary judgment granted.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (312-13).

Unreasonable Rates and Charges

122. Voluntary reductions.—[Vols. 2, 7, 9, 12, 14, 17-19, 21].—Before an award of reparation under §1 may be made, it must appear that the assailed rates exceed a reasonable maximum level, and it is well settled that a voluntary reduction of a rate by a carrier does not indicate that the former rate was unreasonable. Assailed rates on feed and industrial grade ureas are not shown to be unreasonable when their present low level is due to various rate reductions made by defendants to meet competition, and still lower rates on fertilizer grade urea are on depressed basis established to meet competition.—W. R. Grace & Co. v. Illinois Central R. Co., 323 I.C.C. 102 (111,114).

128. Change in long-established relationship.—[Vols. 2, 7, 17-19].—Assailed rates on ammonium sulphate were incorrectly based on grouping of that commodity with increased rates on chemicals. Ammonium sulphate has had a long rate parity relation with fertilizer. We find that a refund is due to the extent that the increases on chemicals exceeded the increases on fertilizers.—Allied Chemical Corp. v. Norfolk & Western Ry. Co., 341 I.C.C. 266 (269-70).

Complainant is not entitled to damages for misrouting in the amount of $75.50 (the difference between original prepaid rate and the higher applicable rate) even though carrier neglected its duty to inform shipper of a conflict between the rate and route inserted in shipper's bill of lading. The shipment moved over the lowest rated available route permitting the requested stopoff and thus was not misrouted.—Futorian Manufacturing Corp. v. St. Louis-S.F. Ry. Co., 335 I.C.C. 156 (159-60).

Undue Preference and Prejudice

180.—Proof and measure of damages.—[Vols. 2, 7, 9, 11-19, 21].—Generally, evidence sufficient to establish violation of Interstate Commerce Act is not necessarily sufficient to support an award of reparations; assailed practice must be shown to have resulted in unreasonable charges in the past or otherwise to have caused damage.

No damage was shown as a result of railroads' unlawful practice of refusing to fully absorb interline switching charges and complainants are not entitled to damages as a matter of law.—Mid-States Packers, Inc. v. United States, 363 F. Supp. 275 (276-77)*.

When relief for the future is prescribed under an affirmative §3(1) finding, it does not follow that an award of reparation is warranted. To justify such an award, complainant must show, with the same degree of certainty as required by a court of law, that he has been damaged by the unlawful rate situation and the amount of his damage. Though complainant obviously has been and is being disadvantaged by the rate disparities in favor of its nearest competitor, it has not proven a monetary loss with that meticulous precision required by the statute as construed by the Commission and the courts. Reparation denied.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co.. 323 I.C.C. 601 (615)

Charges paid by complainant shipper were found unlawful due to violations of §§2 and 3(1) but have not been shown unjust and unreasonable for services performed. Fact that other shippers obtained same or greater services at a lesser charge furnishes no measure of damage to complainant. See 293 ICC 243, 246. Evidence herein, although sufficient to establish violations of the Act, is insufficient to support an award of reparations.—Public Belt R. Comm. v. Aberdeen & R. R. Co., 335 I.C.C. 162 (182-3).

Even though defendants' failure to fully absorb interline switching charges was found unduly prejudicial in violation of §3(1), complainants have failed to show that such practice resulted in unreasonable charges in the past or otherwise damaged complainants and therefore they have failed to prove that they are entitled to an award of reparations.—Armour & Co. v. Sioux City Term. Ry. Co., 341 I.C.C. 118 (128).

Section 6 of Interstate Commerce Act

193. Overcharge.—[Vols. 2, 7, 9, 11, 13, 14, 17, 19, 21].—See Price-Watson Co. v. I.C.C. at §6(7), n. 260, and United States v. Southern Pacific Co., at §6(7), no. 10.

Complaints Seeking Reparation

211. Sufficiency in general.—[Vols. 2, 9, 17-19].—Complainant seeks reparation in the amount of difference between charges paid under assailed rates and lower charges previously in effect. Assailed rates resulted from cancellation of transit privileges to complainant shipper of feed from Vicksburg, Miss. to destinations in Louisiana. Complainant has not made a prima facie case to show such cancellation unreasonable or otherwise unlawful. Complaint dismissed.—The Merchants Co. v. Illinois Central R. Co., 329 I.C.C. 713 (716).

217. Necessity of through charge being in issue—parties.—[Vols. 2, 7, 9, 11, 15-19, 21].—Where a complaint seeking reparation is concerned, the total through charge must be considered. Complainant United States has not brought charges for the through movement into issue but only charges for movement from Lathrop, Calif., to Fort Benning Junction, Ga. Commission cannot relate its finding as to reasonableness of a rate for such portion of a through movement.—United States v. Central of Georgia R. Co., 332 I.C.C. 33 (36).

Proof of Damages

221. Showing of proximate cause and financial damage prerequisite to award.—[Vols. 2, 7, 9, 11, 16, 17, 21].—See also Mid-States Packers, Inc. v. United States, at §8, n. 180.

Although initial defendant carrier had a duty to notify shipper of a conflict between the rate and route in shipper's bill of lading, whether or not failure to perform that duty resulted in damages to shipper is a matter to be specifically shown. No resultant damages to shipper were proved and shipper is entitled only to refund of overcharges beyond the applicable rate, which refund defendant has agreed to make.—Futorian Manufacturing Corp. v. St. Louis—S.F. Ry. Co., 335 I.C.C. 156 (160-61).

230.—Rule 100 statements.—[Vols. 2, 7, 9, 12, 14, 15, 21].—Complainant consignees are entitled to reparation to bases found reasonable in 303 ICC 743 on asbestos shipments from Canadian origins to destinations in the Carolinas as detailed in their rule 1.100 statements. Evidence establishes that the southern delivering carriers were willing to consider the statements submitted to them but that the Canadian and eastern carriers would not join in the certification. Defendants do not challenge the findings and testimony to effect that complainants paid or bore the charges involved, and have presented no evidence that any other persons have sought reparation on the shipments in question; nor do they contend that the rule 1.100 statements filed with the southern carriers were not accompanied by basic transportation papers enabling carriers' auditors to check their accuracy, or that each defendant did not have opportunity to make such a check. It is apparent from stipulations by counsel for complainants and defendants that the statements submitted were adequately supported by transportation documents (whether originals or copies), as well as by testimony of witnesses for consignors, consignees, and certain defendants. Amounts of reparation determined.—Thermoid Co., Southern Division v. Baltimore & O. R. Co., 323 I.C.C. 155 (158-9, 162, 164-5)*.

Attorneys' Fees and Costs

250. Proceedings before Commission.—[Vols. 2, 7, 9, 12, 15, 17].—The Commission has no power to award costs in a complaint proceeding before it.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (273).

Section 9. Remedies of persons damaged; election; witnesses.—

[Unchanged except that, by §243(a) of Public Law 91-452, Oct. 15, 1970, 84 Stat. 931, the second sentence was amended by striking "; the claim" and all that follows in the sentence and inserting in lieu thereof a period. See vol. 9, p. 7575.]

Amendments, see footnotes, vol. 2, p. 1650; historical note, p. 1650.

Notes of Decisions

Volume 2—p. 1651; Volume 7—p. 5368; Volume 9—p. 7575; Volume 11—p. 9246; Volume 12—p. 10294; Volume 13—p. 11001; Volume 14—p. 11505; Volume 15—p. 12082; Volume 16—p. 12724; Volume 17—p. 13402; Volume 18—p. 14158; Volume 19—p. 15319; Volume 21—p. 16811.

Election of Forum

31. Option of forum matter of right.—[Vols. 2, 7, 9, 12-15, 17, 19, 21].—Though validity or reasonableness of embargoes placed by carriers on freight shipments is usually left to determination of the Commission, plaintiff elected not to file complaint with the Commission as to embargo on further shipments over railroad branch line used to ship coal from his mine but, instead, to sue in court to recover damages from defendant for carrier's violation of its duty to provide service; and having elected the court route, he could not challenge the embargo before the Commission. However, the embargo having been lawfully imposed, plaintiff cannot recover on his claim for damages when physical conditions—deterioration of a tunnel—made it impossible for the railroad to provide transportation service over that branch line.—Asbury v. Chesapeake & O. Ry. Co., 314 F. Supp. 310 (312, 313).

Exclusive Jurisdiction of Commission and of Courts

37. General statement of rule.—[Vols. 2, 7, 12, 15, 16, 18, 19, 21].—See Nemitz v. Norfolk & W. Ry. Co., at §5(2), n. 70.

46. Particular questions as to damages of which Commission's determination is prere-

quisite. ***Application of tariff charges.***—[Vols. 2, 7, 9, 12, 15-19].—Construction and application of tariffs is not a matter within the primary and exclusive jurisdiction of the Commission unless the tariffs are couched in highly technical words used in a peculiar sense and require the Commission's expertise for their proper construction and application. Accordingly, when the district court found that the tariffs in dispute in railroads' suits to collect storage and demurrage charges were in non-technical words being used in their ordinary sense, and that the Commission's expertise was not required, the court correctly decided that it had jurisdiction to interpret and apply the tariffs.—Fort Worth & D. Ry. Co. v. Goodpasture, Inc., 442 F. 2d 1294 (1297-8).

Section 10. (1)-(4) Violations of regulations by carrier: false billings, classification, claim; inducing unjust discrimination; penalties.—[Unchanged. See vol. 9, pp. 7582, 7583, 7586.]

Amendments, see footnotes, vol. 2, pp. 1671, 1686, 1694, vol. 9, p. 7582; historical notes, vol. 2, pp. 1680, 1687, 1694, vol. 9, p. 7584.

Notes of Decisions

Volume 2—pp. 1672-1694; Volume 7—p. 5378; Volume 9—pp. 7582-7586; Volume 12—p. 10295; Volume 13—p. 11002; Volume 18—p. 14160; Volume 21—p. 16812.

Section 11. Interstate Commerce Commission; appointment, term, and qualifications of commissioners.—[Unchanged. See vol. 11, p. 9247.]

Amendments, see footnotes, vol. 2, p. 1696, vol. 9, p. 7587, vol. 11, p. 9247; historical note, vol. 2, p. 1696, vol. 21, p. 16813.

Historical Note

Reorganization Plan No. 1 of 1969, effective October 11, 1969, transferred from the Interstate Commerce Commission to the Chairman of the Commission the executive and administrative functions of the Commission, including functions with respect to (1) appointment and supervision of personnel employed, (2) distribution of business among such personnel and among administrative units of the Commission, and (3) the use and expenditure of funds; and provided that the Chairman, in carrying out any of the transferred functions, shall be governed by the guidelines and safeguards specified. The reorganization plan also transferred, effective January 1, 1970, the Commission's function of choosing the Chairman from among the Commissioners to the President without, however, precluding Commission designation of a Commissioner to be acting chairman and to perform the Chairman's functions when no Presidentially designated Chairman is available. 34 FR 15783, Oct. 14, 1969. Historical Notes, see vol. 19, p. 16813.

Notes of Decisions

Volume 2—p. 1697; Volume 7—p. 5379; Volume 12—p. 10296; Volume 13—p. 11003; Volume 14—p. 11506; Volume 15—p. 12084.

Section 12. Authority and duties of Commission; witnesses; depositions—(1) Authority, duties and proceedings of Commission, witnesses; exemptions.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §207, 90 Stat. 42, paragraph (1) is designated (1)(a) and new paragraph (b) is added, as set forth below. See vol. 11, p. 9247.]

(b) Whenever the Commission determines, upon petition by the Secretary or an interested party or upon its own initiative, in matters relating to a common carrier by railroad subject to this part, after notice and reasonable opportunity for a hearing, that the application of the provisions of this part (i) to any person or class of persons, or (ii) to any services or transactions by reason of the limited scope of such services or transactions, is not necessary to effectuate the national transportation policy declared in this Act, would be an undue burden on such person or class of persons or on interstate and foreign commerce, and would serve little or no useful public purpose, it shall, by order, exempt such persons, class of persons, services, or transactions from such provisions to the extent and for such period of time as may be specified in such order. The Commission may, by order, revoke any such exemption whenever it finds, after notice and reasonable opportunity for a hearing, that the application of the provisions of this part to the exempted person, class of persons, services, or transactions, to the extent specified in such order, is necessary to effectuate the national transportation policy declared in this Act and to achieve effective regulation by the Commission, and would serve a useful public purpose.

Historical Note

On August 9, 1973, the Commission recommended to Congress legislation to amend §§12(1), 204(a)(6), 304(a), and 403(a) of the Interstate Commerce Act to enable the Commission to exempt certain transportation from regulation upon a finding that the regulation is not necessary in order to effectuate the National Transportation Policy and that regulation would serve no public purpose. (S. 2458). Annual Report, 1974, p. 84.

Amendments, see footnotes, vol. 2, p. 1701, vol. 11, pp. 9247-9248; historical notes, vol. 2, p. 1701, vol. 15, p. 12084, vol. 16, p. 12726.

Notes of Decisions

Volume 2—p. 1702; Volume 7—p. 5380; Volume 9—p. 7588; Volume 11—p. 9249; Volume 12—p. 10296; Volume 13—p. 11003; Volume 14—p. 11506; Volume 15—p. 12085; Volume 16—p. 12727; Volume 17—p. 13305; Volume 18—p. 14160; Volume 19—p. 15320; Volume 21—p. 16813.

Functions of Commission

9.—Legislative.—[Vols. 2, 7, 9, 21].—Commission instituted this proceeding as empowered by §12(1) in order to formulate a uniform requirement as to public notice of independent action by member carriers of an agency operating pursuant to §5a as present regulations vary greatly and include practical potential for collective action under the guise of independent action. Amendments to §5a agreements in force and for future application ordered so as to give same notice for independent as for collective action.—Notice of Independent Action, 332 I.C.C. 22 (23-4).

Powers and Duties

15. In general.—[Vols. 2, 14, 19].—Commission recommends that the Interstate Commerce Act be amended so as to incorporate the proposed legislation, contained in appendix F hereto, as regards the adjudication of loss and damage claims by this

Commission and requirements for cargo insurance.—Loss and Damage Claims, 340 I.C.C. 515 (588-97).

19. Carrier management in general.—[Vols. 2, 7, 9, 13, 15-19].—Commission found that as long as voluntarily established multiple-carload rates on iron ore from Pilot Knob, Mo. to Granite City, Ill. are reasonable and lawful, this Commission may not interfere with defendant railroads' managerial prerogatives as to method of operation of their physical plants for such movements. —The Hanna Mining Co. v. Missouri Pac. R. Co. 332 I.C.C. 166 (171).

Inquiry into Business Management of Carriers

36. Scope of inquiry.—[Vols. 2, 19].—The Commission will not consider the question of whether carriers have updated their master tariffs so that current rates include the applicable general increases. We have instituted appropriate monitoring procedures relative to special permission applications which are required in connection with the publication of master increase tariffs. This ongoing activity does not require separate and what would be duplicating consideration of the update problem as an ingredient of this proceeding. However, the Commission will continue close scrutiny of carriers' progress in this area.—Investigation of Railroad Freight Rate Structure, 340 I.C.C. 868 (872-73).

Labor-management relations regarding wages, rules, and working conditions, among others, have been the subject of recurrent consideration by Congress and the Executive during the past decade. In light of the constant efforts of Congress, the Executive, and the courts to resolve problems arising from labor-management relations over the recent past, and our lack of jurisdiction to effect changes, the inclusion of this subject as a phase of this investigation would not be beneficial, we believe, and, therefore, is not warranted at this time.—Id., pp. 873-74.

Execution and Enforcement of Act

40. In general.—[Vols, 2, 17].—Commission may promulgate regulations governing the procedures which regulated carriers are to follow in processing loss and damage claims inasmuch as Congress conferred upon the Commission by this section broad regulatory power to administer and execute the provisions of the statute and to carry out the Congressionally declared national transportation policy even in the absence of specific statute provisions conferring such authority. See 344 US 298, 301-11. Also, Commission reaffirmed its findings in 314 ICC 467 that it has no jurisdiction to determine the merits or measure of damages of any particular loss and damage claim, those being cognizable only in the courts.—Loss and Damage Claims, 340 I.C.C. 515 (539).

Production of Books, Papers, Etc.

59. Documents subject to inspection.—[Vol. 2].—While §12(1) gives the Commission certain powers to secure information and to conduct investigations, it does not provide for inspections of documentary materials by Commission representatives; authority in part I of the Act for such inspections arises solely under §20. Moreover, neither the questioned "Formal Demand For Examination of Records" served on plaintiff railroad by authorized Commission auditors, pursuant to §20(5), nor the counterclaim filed by the United States purported to rely on §12(1). Therefore, since carrier's budget forecast materials sought to be inspected are not "other documents" within §20(5), the Formal Demand for forecast materials was not within the authority of the Commission or its representatives under that section, and the counterclaim asserted by the United States fails to state a claim on which relief can be granted. Plaintiff's motion for summary judgment granted.—Burlington Northern, Inc. v. I.C.C., 323 F. Supp. 273 (275-6, 278-9).

Regulations of the Commission

34 FR 441, Jan. 11, 1969, Part 1000: The Commission, in Appendix I to Subpart B, item 6 under "Office of Proceedings" is amended to read as follows: 6. Chairman and Members of the Motor Carrier Board, in view of consolidation of Temporary Authorities Board and Transfer Board into new Motor Carrier Board, effective Jan. 21, 1969.

34 FR 2207, Feb. 14, 1969, Part 1001: Inspection of Records, §1001.4 Requests to inspect other records not considered public under 5 USC §552, list of location of field offices amended to reflect changes of address, effective upon publication.

34 FR 12221, July 24, 1969, Part 1004: Administrative Interpretations—Statements of Policy, heading of Part 1004 amended to read as set forth and a new §1004.2 Gifts, donations, and hospitality by carriers, added, effective upon publication in Federal Register.

34 FR 18041, Nov. 7, 1969, Part 1002: Fees, §1002.1 Fees for copying, certification, and related services. Heading and paragraph (h) amended, effective on publication in the Federal Register.

35 FR 7512, May 14, 1970, Part 1001: Inspection of Records, §1001.4 Requests to inspect other records not considered public under 5 USC §552, list of field offices following §1001.4 amended to reflect certain changes of address, effective upon publication.

35 FR 10448, June 26, 1970, Part 1000: The Commission, Appendix I to Subpart B is amended by adding, under "Bureau of Traffic," the following: 8. Chairman and Members, The Tariff Rules Board. Effective July 1, 1970.

35 FR 12031, July 25, 1970: Memorandum of agreement between Department of Transportation and Interstate Commerce Commission, pursuant to which railroad waybill documents and records filed with ICC will be made available to DOT for processing of information therein.

35 FR 16802, Oct. 30, 1970, Part 1000: The Commission, §1000.5 Credentials required by special agents, accountants, and examiners. * * * (c) *Definition of special agents, accounts, and examiners,* paragraph revised effective forthwith.

36 FR 8211, May 1, 1971, Part 1124: Adequacy of Passenger Service, new Part 1124 adopting certain regulations prescribed by the Federal Railroad Administration, Department of Transportation, under rail safety statutes, added, effective May 1, 1971.

36 FR 11293, June 11, 1971, Part 1002: Fees, §1002.2 Filing fees, revised and amended to read as set forth, effective Aug. 19, 1971.

36 FR 17432, Aug. 31, 1971, Part 1002: Fees, §1002.2 Filing fees, inadvertent errors in Items 17 and 45 of §1002.2(d) corrected.

37 FR 215, Jan. 7, 1972, Part 1002: Fees, effective date of fees and regulations covering services performed in connection with licensing and related services (36 FR 11294, 17432) fixed as Jan. 12, 1972.

37 FR 9027, May 4, 1972, Part 1002: Fees, §1002.2(d) Schedule of filing fees, item 40 amended, item 38 deleted, and items 39 through 45 renumbered as items 38 through 44.

38 FR 1393, Jan. 12, 1973, Part 1280: Classification and Declassification of National Security Information and Material, §§1280.1 - 1280.5 set forth I.C.C. security rules and regulations, issued pursuant to Executive Order 11652 (37 FR 5209) and National Security Council Directive of May 7, 1972, which will become effective March 1, 1973.

38 FR 5875, March 5, 1973, Part 1002: Fees, §1002.2(d) Schedule of filing fees, item 40 corrected by adding the fee of $35 in the right hand column.

38 FR 7229, March 19, 1973, Part 1000: The Commission, §1000.5 Credentials required by special agents, accountants, and examiners, revised to read as set forth in connection with issuance of new identification credentials to Commission officials and personnel, effective on date of order.

38 FR 12744, May 15, 1973, Part 1123: Determination of Avoidable Losses (Rail Passenger Service Act of 1970), new Part 1123 governing procedure to be followed in applying for Commission determination of avoidable loss, §§1123.1 - 1123.6, added, effective 35 days after service of order.

38 FR 16230, June 21, 1973, Part 1000: The Commission, Provisions of Commission's Canons of Conduct were revised, listing employees required to submit ICC Form No. 1164.

Section 12.(2)-(7).—[Unchanged. See vol. 9, pp. 7592-7596.]

Amendments, see footnotes, vol. 2, pp. 1720-1730; historical notes, vol. 2, pp. 1720-1725.

General Nature of Proceedings

3. Jurisdiction to entertain complaint. —[Vols. 3, 7, 19, 21].—See also Brotherhood of Ry. S. S. Clerks v. Reading Co., at §1(20), n. 1.

District court held that the Commission's order authorizing but not requiring railroads to put into effect rate increases on a great number of commodities is not reviewable as the plaintiff public utilities had not yet exhausted their remedies by applying to the Commission for a determination of propriety of particular rates to which they objected. An adverse ruling on such objections would be reviewable. Also, if plaintiff wished to complain of the reasonableness of a particular freight rate on coal being transported from a particular point of origin, they had a right to apply to the Commission to prescribe a different rate.—Atlantic City Electric Company v. United States, 306 F. Supp. 338 (343)*.

District court dismissed plaintiff manufacturer's action to annul Commission's order in 332 ICC 714, which permitted increased rates for selected commodities, by a general order affecting all railroads in the country. The plaintiff does not object to Commission's decision that increase in railroad revenues is needed but only to a specific rate as unreasonable and discriminatorily high. Plaintiff's claim is thus a fit subject for §§13 and 15 of the Act which administrative remedies must be exhausted first. See 11 F. Supp. 495.—Electronic Industries Association v. United States, 310 F. Supp. 1286 (1289)*.

Where aggrieved shippers had opportunity to challenge any particular rate which affected them under procedures of the Interstate Commerce Act, and rates which had become effective under Commission orders were permissive and not mandatory, district court lacks jurisdiction to review questioned rate increase orders of Commission permitting Class I railroads to effect general increase in their freight rates and charges.—Alabama Power Co. v. United States, 316 F. Supp. 337 (338-9)*.

Complaint seeking enforcement of order of bankruptcy court authorizing debtor carrier's trustee, effective upon the Commission's ratification, to acquire by conveyance or condemnation and without direct cost a right-of-way and certain trackage owned by complainant, a public corporation of the State of New Jersey, presents a matter beyond the Commission's jurisdiction. Even assuming the court's order to require, as distinguished from authorizing, defendant to acquire the property and seek Commission approval of the transaction, no provision of the Interstate Commerce Act or the Bankruptcy Act confers authority on the Commission to enforce adherence to the order.

The Commission has no power to compel a carrier to acquire trackage rights or a line of railroad; nor is there any basis under §5(4) for an order requiring debtor to cease operating over the trackage, since the essence of a §5(4) violation is unauthorized participation in a pertinent transaction involving two or more carriers, and debtor is apparently the only carrier involved. Complaint dismissed.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (273-4).

Scope of Power to Investigate

22. Duty to make investigation, reasonable grounds appearing.—[Vols. 3, 7, 13, 15].—See Steel, Inc. v. Chicago, B. & Q. R. Co., at §16(1), n. 1.

29. General revenue cases; general findings.—[Vols. 7, 9, 11-19, 21].—Orders in general revenue proceedings, and the rates and charges authorized therein, being permissive and not mandatory, increased rail rates which became effective under considered Commission orders are carrier made, not Commission made, rates; furthermore, in the Commission's ultimate conclusions and findings, any aggrieved party is assured the opportunity to challenge any particular rates which affect them under procedures provided by §13 for complaints and investigations. In such circumstances, therefore, shippers' action to enjoin and annul orders which permitted railroads to increase freight rates and charges, because of need for additional revenues to offset their increased expenses, should be governed by determination in 11 F. Supp. 487, that the court will not entertain a suit to enjoin Commission orders in a general revenue proceeding where the §13 remedy has not yet been exhausted. Accordingly, the complaint is dismissed.—Alabama Power Company v. United States, 316 F. Supp. 337 (338-9)*; Atlantic City Electric Co. v. United States, 306 F. Supp. 338 (341, 342-3)*.

District court held that Commission is correct that its action in 332 ICC 714 was in the nature of a general revenue proceeding inasmuch as Commission was primarily concerned with public need for railway service and carriers' need of revenues. Increases in rates were general, even though the percentage increase varied for each commodity but Commission did not purport to pass upon individual rates as contrasted with general level.—Electronic Industries Association v. United States, 310 F. Supp. 1286 (1288)*.

Upon further investigation in this general revenue proceeding, Commission finds increased rates and charges by respondent railroads to be just and reasonable. Such finding applies to the general bases of rates and charges and will not preclude interested parties from bringing any maladjustment to our attention for correction. Increased rates authorized herein are not considered as prescribed and are subject to complaint and investigation as provided by the Act.—Increased Freight Rates, 1967, 332 I.C.C. 280 (346)*.

Evidence proves that respondent railroads are in immediate need of additional freight revenues to offset, in part, their increased operating costs, including wages, fixed charges, and contingent interest. Accordingly, Commission vacated the interim relief granted respondents by its order of June 19, 1968 of a 3 percent general increase in favor of the full proposed increases ranging generally from 3 to 10 percent and for the most part of 6 percent or less.—Increased Freight Rates, 1968, 332 I.C.C. 590 (598-602).

Commission found proposed general increases, ranging from 6 to 10 percent in freight rates and charges just and reasonable on the large number of commodities considered herein except as specifically provided. Specific commodity movements are not at issue. Such general increases were found necessary in the prior report, 332 ICC 590, to offset increased costs. Increases approved with such modifications of our outstanding orders as may be necessary to implement the increases.—Increased Freight Rates, 1968, 332 I.C.C. 714 (714-9, 790-4)*.

Commission concluded that respondents, in Ex Parte No. 265, had shown that a serious need for additional revenues exists to meet the demonstrated increased costs of operations. Accordingly, freight rates and charges on interstate traffic may be increased not more than 6 percent, with certain limitations, as indicated.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (162-79).

In Ex Parte No. 267 embraced herein, respondents have shown a need for increased rates and charges designed to improve carriers' earnings and enable them to upgrade their equipment and facilities to provide the adequate and efficient service required by §15a(2) and the national transportation policy. Accordingly, rates and charges on certain commodities may be increased not to exceed the limitations set forth herein.—Id., pp. 179-191.

With respect to transactions with affiliated companies, the Commission is not convinced that any general detrimental impact on respondents' working capital has been shown or that our conclusions with respect to revenue needs of the railroads should be adjusted to reflect any measurable reduction due to improper use of their financial resources. Further, because of persistent doubts as to the validity of the net investment base, Commission instituted a separate investigation (Ex Parte No. 271) to determine whether such base should be utilized in the future. Similarly, Commission instituted Ex Parte No. 270, a formal investigation of the structure of freight rates and charges to determine if discrimination exists between commodities in distribution of transportation burden or the imposition of rates and charges which are unjust and unreasonable in relation to costs of transportation. —Id., pp. 156-61, 165-66, 190-91.

Evidence concerning respondents' increased operating costs, revenue needs, and overall financial condition demonstrates that the nation's railroads as a whole and by major districts have a serious and immediate need for additional revenue; that their ability to meet current expenses and to provide necessary capital for improvements in equipment, facilities, and services requires prompt revenue relief; and that interests of the public and the national defense in a sound, adequate, and efficient transportation system will be adversely affected unless proposed selective increases in rates and charges, except as specifically limited, are permitted to become effective promptly. Conversely, without that additional revenue, earnings of respondents will be insufficient to enable them, under honest, economical, and efficient management, to provide adequate and efficient railway service consistent with the public interest and the national transportation policy.—Increased Freight Rates and Charges, 1972, 341 I.C.C. 288 (276-309, 313)*.

In view of the overall revenue situation of railroads, there is no merit in some protestants' position that respondents should be required to absorb all cost increases in instant proceeding. Restatement of total cost increases occurring since last general rate increase recognizes a productivity increase reflecting a continuous decline in railroad employment levels; but those cost increases greatly exceed the maximum amount of additional revenue which could possibly be obtained if sought increases were approved in full. Various protestants also contend that several "sick" lines in the East should not be used in constructing composite or average financial data for eastern carriers or for railroads generally; however, deficit lines are part of an interrelated and interdependent railroad system and, in general-revenue proceedings, the Commission must consider the needs of the carriers as a whole or at least by major territorial groupings. Moreover, even without data from deficit lines, increases sought will not be excessive for railroads generally or for a majority of those in the eastern district.—Id., pp. 303-10.

Furthermore, in keeping with the Economic Stabilization Program and with Commission regulations thereunder (approved by the Price Commission), record shows that (1) former or existing rate level is the one in effect prior to effective date of 2.5 percent interim surcharge approved in 240 ICC 358, and that the selective percentage increases, ranging from 0 to 10 percent and averaging 4 percent, are proposed in lieu of and not in addition to that surcharge; (2) maximum amount of increased revenue the proposal would provide (if fully applied and absent limitations and holddowns required) is $401 million; (3) that such additional revenue is less than amount of carriers' actual cost increases in 1971 and, therefore, no increase in net operating revenue as part of total operating revenue is expected; and (4) for like reason, no increase in the railroads' rate of return on capital is expected.—Id., p. 311.

That (5) increase proposal is cost justified and does not reflect future inflationary expectations, for increases resulting from negotiated wage contracts are not "anticipated or speculative" but are firm cost increases the industry will have to pay; (6) additional revenue derived will only partially fulfill railroads' revenue requirements and in that sense will return a minimum amount required to assure continued service, or to meet future service requirements, and (7) will achieve the minimum rate of return needed to attract capital at reasonable costs and not impair the railroads' credit. Also, (8) Price Commission policies clearly permit a pass through of increased labor costs due to the wage contracts executed before Nov. 8, 1971, and under the circumstances of record, full labor costs resulting from those and subsequently executed wage contracts should be included in considering carriers' operating costs; and (9) the increase in productivity required to close the gap between maximum revenue obtainable under considered increases and railroads' actual increased costs will exceed by far the Price Commission's suggested 6.3-percent guideline for the railroad industry.—Id., pp. 297-9, 311-12.

Petition to file tariffs providing for increased rail protective service charges is "filed by or on behalf of railroads generally throughout the United States" and consequently is subject to procedures governing general increase proceedings set forth at 49 CFR §1102. Further, Commission granted petition to institute an investigation into the adequacy of protective service charges but conditioned its approval of filing a temporary master tariff establishing interim increases for such services upon petitioner's service of a copy of the petition on all parties involved in the last general increase Ex Parte proceeding, Ex Parte No. 281, and also upon an extension of the notice date to the general public.—Protective Service Charges—1972, 341 I.C.C. 573 (576-80).

Commission herein instituted a proceeding with a view to modification of present regulations (49 CFR §§1102, 1104, 1105, 1303, and 1306) governing the filing and posting of notice and furnishing of data to the general public of proposed general increases in freight rates and passenger fares by rail and motor carriers.—Notice of Increases in Frt. Rates and Pass. Fares, 341 I.C.C. 589 (590-94).

Parties

37. Parties of whom complaint may be made; in general.—[Vols. 3, 15, 17, 21].—Since the question at issue in consolidated investigation and complaint proceedings involving lawfulness of joint rail-motor rates, established under §216(c), is the obligation of railroads participating in such joint rates to comply with provisions of part I of the Act, not any obligations of the motor carriers, it is unnecessary that motor-carrier participants continue as respondents and defendants; and orders in the proceeding will apply only to rail participants in considered rates. However, granting of motor carriers' motion to dismiss should not be construed as a finding that motor-carrier participants in such joint rail-motor rates may never be subjected to certain requirements found in part I of the Act.—Oil Country Iron or Steel Pipe, Midwest to Okla. & Tex., 332 I.C.C. 540 (542-3)*.

Pleadings, Generally

47. Effect of faulty or inadequate pleading.—[Vols. 3, 7, 14, 16-19].—Complainant United States seeks reparation for charges on movement of a freight automobile, old, used, from Lathrop, Calif., to Fort Benning Junction, Ga. Such movement is a portion of a through movement from Oakland, Calif. Inasmuch as charges for the through movement have not been brought into issue, the complaint is fatally defective. Complaint dismissed.—United States v. Central of Georgia R. Co., 332 I.C.C. 33 (35).

The Hearing

120. Right to full hearing.—[Vols. 3, 7, 9, 11, 12, 16, 17, 19, 21].—Consideration of factual material contained in accident report officially noticed by the examiner did not constitute a prejudicial error and a denial of procedural due process to applicant's rights when the factual matter referred to was not the sole basis for recommended denial of application for approval of discontinuance of automatic trainstop system. Such other factors as train speed, physical characteristics, visibility, weather, and the safety features afforded by an ATS system were all given adequate consideration in determining whether proposed discontinuance of the ATS system under the facts of record is warranted. For a determination of this issue, consideration was given to the entire record, and it is upon this basis that the application is denied.—Southern Pac. Co. Modifications of Systems, 325 I.C.C. 168 (171-2).

Defendants' contention that §16(1) of the Act, §7(c) of the Administrative Procedure Act, and rule 1.53(a) of the Rules of Practice grant them an absolute right of cross-examination is without merit. Section 16(1) makes no mention of cross-examination but refers to §13 which imposes a duty on the Commission to investigate matters complained of in such manner and by such means as it deems proper; and while §7(c) of APA states that every party shall have the right to conduct such cross-examination as may be required for a full and true disclosure of the facts, that right is dependent upon the Commission's determination that cross-examination is necessary and upon substantial compliance with rule 1.53. Also, the question of oral hearing is a matter of agency discretion and, since the record establishes that defendants' request for oral hearing raised no material issues of fact that warranted cross-examination, there is no showing of any abuse of the Commission's discretion. In the circumstances of record, defendants' renewed request for oral hearing, denied.—Mode-O-Day Corp. v. Atchison, T. & S.F. Ry. Co., 325 I.C.C. 390 (392-3)*.

123. Requisites of full hearing.—[Vols. 3, 7, 9, 11-13, 15, 16, 18].—The principal issue in the instant proceeding is one of law. On this issue the procedure utilized has constituted a full hearing within the meaning of the Act, all parties having been given full opportunity to be heard as to the step proposed to be taken. It may also be that "*** mixed questions of law and fact [may] arise whether the practices in connection therewith are reasonable, nondiscriminatory, or otherwise lawful, which will require oral hearings for the taking of testimony. If so, requests for such hearings will receive proper consideration. In the meantime, at this stage of the proceeding, such oral hearings would not be in the interest of justice nor serve any useful purpose," [citing 232 ICC 683 (686)].—Substituted Service—Piggyback, 322 I.C.C. 301 (348)*.

Defendants' blanket objection to admission of any evidence on behalf of complainants unless and until they were afforded opportunity for cross-examination at an oral hearing did not comply with rule 1.53 when they made no specific denial of any fact stated in the complaint, nor raised any issue warranting cross-examination. Although the Administrative Procedure Act states that every party shall have right to conduct such cross-examination as may be required for a full and true disclosure of the facts, that right is dependent on the Commission's determination that cross-examination is necessary, and is based on substantial compliance with rule 1.53. Whether a sufficient showing of need for oral hearing has been made is a matter of agency discretion, and the right of cross-examination may likewise be subject to reasonable administrative control.—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (515-6).

126. Burden of proof; when upon complainant.—[Vols. 3, 7, 9, 15, 17-19, 21].—Though complainant asserts that the burden is on defendants to show that import traffic is not subject to motor competition similar to that which compelled lower domestic rates on iron and steel articles in same general territory, the burden of establishing a prima facie case rests on complainant, and on it, therefore, falls the onus of adducing evidence of motor carrier movements of those commodities from the ports to involved destinations. Complainant did not meet that burden when it merely showed that in 1 year 48.5 percent of its total import traffic moved by truck, without indicating the volume that moved from the individual ports or to the respective destinations.—Southern States Cooperative, Inc. v. Baltimore & O. R. Co., 323 I.C.C. 400 (406).

In complaint cases, the burden of proving alleged unlawfulness rests upon the complainant.—Public Belt R. Comm. v. Aberdeen & R. R. Co., 335 I.C.C. 162 (167).

127.—When not upon complainant.—[Vols. 3, 7, 9, 13, 15-19].—Existence of facts, such as differing circumstances and conditions, justifying an inequality of rate treatment is a matter of defense to be proven by satisfactory evidence; general assertions that carrier competition required reduced rates at the preferred point are insufficient as a defense where complainant's competitor at that point enjoys lower inbound rates on the same commodity. Defendants failed to instance any particular motor carrier rate or motor carrier whose competition forced such reductions, and the record was closed with filing of complainant's reply statement. Defendants cannot now introduce additional evidence, which should have been available to them previously, on an issue as to which they had the burden of proof, after an adverse ruling by the examiner, nor can they expect the Commission to make their case. Complainant's motion to strike that portion of defendants' exceptions containing additional matter concerning competition at the preferred point, granted.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (602-3).

Though defendants state in their exceptions that much of the motor competition claimed to justify reduced rates to the preferred point was created by "unregulated" carriers, this is a point that they should have advanced in their reply statement, in which under the Commission's rules they are required to present their evidence in chief. When a shipper or receiver presents evidence showing gross disparities in rates in favor of a competitor, the burden shifts to defendants to show a dissimilarity of conditions so marked as to warrant continued maintenance of the disparities. Defendants have failed to meet this burden; indeed, they virtually concede that, at least from six origins, they could not show that the preferential reduced rates were the result of motor competition, regulated or unregulated.—Id., pp. 613-4.

Evidence

130. Evidence, in general.—[Vols. 3, 7, 14, 15, 17-19].—Substantial evidence is such relevant evidence as a reasonable mind might accept as adequate to support a conclusion; it is something less than the weight of the evidence, and the possibility of drawing two inconsistent conclusions from the evidence does not prevent an administrative agency's finding from being supported by substantial evidence.—Chesapeake and Ohio Railway Company v. United States, 298 F. Supp. 734 (739)*.

Complainant contended that assailed rates to two points are representative of the entire scope of the contested rates. The Commission determined that when rates to numerous points are at issue, it is unnecessary to present evidence relating to each point. There must, however, be evidence on a sufficient and varied number to establish that the data are in fact representative of all. In the instant proceeding, destinations in five states are at issue, but evidence of only two points was presented, and both of these are in Massachusetts and are within a short distance of each other. Massachusetts is the state farthest distant from the origin of traffic and to one of the points, and the assailed rate is compensatory when the traffic is moved on the car generally used. Thus the points cannot be considered representative of all destinations.—Sea-Land Service, Inc. v. New York Central R. Co., 329 I.C.C. 589 (595).

135. Application of principles of stare decisis and res judicata.—[Vols. 3, 7, 9, 11-14, 16-19, 21].—An administrative agency, even if it has followed a consistent line for some time, may, when faced with new developments or an appreciably changed factural picture in the segment of the national life which it is charged with regulating, alter its past interpretation in a formal proceeding where such rules as the proposed TOFC service rules having future effect are to be issued. When cogent reasons and the public interest compel it, even a consistent and generally unchallenged administrative practice may be overturned.—Substituted Service—Piggyback, 322 I.C.C. 301 (331)*.

The Commission's jurisdiction to pass on reasonableness of combination rates from Canada to points in the Carolinas, based on interchange with Canadian carriers at United States points 3 and 5 miles south of international boundary, is res judicata because of determination in prior report, 303 ICC 743, sustained 366 US 272; moreover, the case was not reopened for further hearing on that issue, but merely to determine amount of reparation due complainants under the prior findings.—Thermoid Co., Southern Division v. Baltimore & O. R. Co., 323 I.C.C. 155 (161)*.

136. Admissibility, in general.—[Vols. 7, 9, 11-19, 21].—Though examiner rejected complainant's attempt in its reply statement to show that assailed rates exceeded the measure of rates prescribed on involved commodities in 204 ICC 319, on ground that it was in nature of new evidence and improper in a reply statement, the rejected exhibit contained, in part, rates already introduced in complainant's opening statements, and such comparison with rates prescribed in case cited was in response to defendants' statement and argument that the assailed rates are "well below maximum allowable levels." This was not new evidence; examiner's ruling reversed.—Matthiessen & Hegeler Zinc Co., 323 I.C.C. 601 (609-10).

Accident report officially noticed by the examiner complied with rule 82 of the Rules of Practice when it was referred to with sufficient particularity as to be readily identified. Applicant's witness on cross-examination admitted knowledge of accident that occurred on applicant's line in 1937, applicant did not object to such reference at the hearing, and, though number of the report was not referred to there was only one report issued by the Commission in 1937 covering an accident on applicant's line.—Southern Pac. Co. Modifications of Systems 325 I.C.C. 168 (171).

Defendants' motion to strike portions of verified statements of two of complainant's witnesses on ground that they involve matters not within personal knowledge of persons attesting to them and are therefore inadmissible under rule 1.50 of Rules of Practice, denied. The challenged witnesses set out their qualifications as specialists in transportation matters and the assertions objected to are their conclusions based on evidence properly submitted and on their experience. Defendants' objections go in reality to weight to be given the statements rather than their admissibility.—United States v. Southern Pac. Co., 325 I.C.C. 200 (201).

140. Official notice.—[Vols. 3, 7, 9, 11-19, 21].—The Commission is permitted to take official notice of the findings and conclusions in its own prior reports; moreover, §14(3) provides for judicial notice of published reports and orders of the Commission. Examiner's reference to a prior accident investigation report of the Commission which involved an accident on applicant's line, and his use of statements therein as a basis for comparison of present with prior traffic density to show there had been no substantial change in traffic density since installation of automatic trainstop system which applicant proposes to discontinue, did not constitute prejudicial error or denial of procedural due process to applicant's rights. Factual matter in the prior report was considered in addition to the evidence presented, and was not the sole basis for denial of the application.—Southern Pac. Co. Modifications of Systems, 325 I.C.C. 168 (170-1).

The Commission takes official notice of order of district court having jurisdiction of carrier's reorganization proceeding, authorizing defendant trustee, effective upon the Commission's ratification, to acquire certain publicly owned trackage by conveyance or condemnation, which order is filed in the Commission's finance docket pertaining to the reorganization proceeding.—Industrial Corp. of S. Hackensack, N.J. v. N.J. & N.Y. R. Co., 324 I.C.C. 272 (273).

147. General legal sufficiency of evidence.—[Vols. 3, 7, 19, 21].—In support of complaint assailing charges assessed on shipments for which defendants allegedly furnished longer cars than those ordered, complainant has introduced sworn statements of qualified witnesses having knowledge of the shipments involved, and such statements comply with rule 1.50 of Rules of Practice which provides for introduction, under modified procedure, of factual evidence by verified statements; such testimony is in addition to the bills of lading issued on dates of the shipments, and other proper documentary evidence. Evidentiary deficiencies found on review of a similar proceeding in 217 F. Supp. 918 are not present, and that decision does not require complainant to submit further documentary evidence to sustain its burden of proof.—United States v. Southern Pac. Co., 325 I.C.C. 200 (208-9).

155. Relevancy.—[Vols. 3, 7, 9, 12-15, 17-19, 21].—Based on quantity of sugar beets required to produce a pound of sugar, complainants computed an alleged deficit ("burden expense") incurred by western railroads in transportation of sugar beets to western sugar producing points, addition of which to defendants' out-of-pocket costs for transportation of sugar from such points to central territory destinations would result in costs exceeding assailed rates. Examiner ruled such evidence irrelevant in absence of complaint against the raw beet rates or showing of a specific relation between such rates and those on the manufactured product; as no compelling reason is advanced for finding that ruling erroneous, it is affirmed. —American Sugar Refining Co. v. Ahnapee & W. Ry. Co., 322 I.C.C. 717 (720).

Motion to strike as irrelevant an excerpt from a tariff of Transcontinental Freight Bureau, introduced by defendants, as well as all testimony in connection therewith, overruled; the provision cited appears to have relevance to the issues and the tariff referred to is on file with the Commission. —Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (535).

160. Expert opinion.—[Vols. 3, 9, 12, 13, 16, 17, 19, 21].—See Price-Watson Company v. I.C.C., at n. 185, below.

170. Exhibits.—[Vols. 3, 7, 9, 11, 15-18, 21].—Examiners' refusal to receive or mark certain exhibits offered by southern railroads after they had rested their case and after the date fixed for submission of their evidence was in accord with the procedural order adopted in investigation proceeding and did not constitute an abuse of discretion or deny the southern lines a fair hearing. Nor was there any error in examiners' rejection of certain data in northern lines' rebuttal cost exhibit as new and additional material beyond scope of rebuttal; since the northern lines refused to incorporate the material as part of their case in chief and to accord the southern lines the right of rebuttal, the matter constituted improper rebuttal and was correctly excluded.—Official—Southern Divisions, 325 I.C.C. 1(4)*.

180. Introduction of evidence at hearing.—[Vols. 3, 9].—The Commission has discretion to limit rebuttal evidence when it is, in reality, evidence on an entirely new subject.—Sofield Transfer Co., Inc., Extension—Containers, 115 M.C.C. 280 (286).

185. Weight accorded evidence.—[Vols. 3, 7, 9, 11, 13-17, 19, 21].—Record in Commission proceeding on plaintiff's complaint, in which it sought to recover alleged overcharges on rail shipments of "cast iron buttons" that are recovered from blast furnace slag, shows clearly that the Commission considered affidavits of plaintiff's metallurgists concerning nature of the commodity and its use and, also, accorded them the weight to which they were deemed entitled. Furthermore, since issues in that proceeding involved proper classification of the commodity, weight which the Commission is required to give expert testimony is greatly reduced by the well-established maxim that in interpreting a classification, as in tariff interpretation, the terms used must be taken in the same sense in which they are generally understood and accepted. The Commission reasonably concluded that "cast iron buttons" shipped were properly classifiable as "scrap iron," rather than "slag" as plaintiff contended. Sustained.—Price-Watson Company v. I.C.C., 287 F. Supp. 872 (875-6)*.

Argument

190. Manner of presenting argument.—[Vol. 3].—Complainant's opening statement of facts and argument, which is unverified, consists of conclusions drawn from exhibits and from verified statements of witnesses, and of argument; as the statement contains no other factual assertions requiring verification, it is considered as argument.—United States v. Southern Pac. Co., 325 I.C.C. 200 (201).

Modified Procedure

215. In general.—[Vols. 3, 7, 13-19, 21].—See Steel, Inc. v. Chicago, B. & Q. R., at GRP 53(a).

Section 13. (2) Complaints by State commissions; inquiry on Commission's own motion; expenses of State commissions.—[Unchanged. See vol. 9, p. 7625, amendment, vol. 11, p. 9261.]

Amendments, see footnotes, vol. 3, p. 1825; historical note, p. 1825; vol. 21, p. 16828.

Notes of Decisions

Volume 3—p. 1826; Volume 7—p. 5470; Volume 9—p. 7625; Volume 11—p. 9261; Volume 12—p. 10303; Volume 13—p. 11011; Volume 15—p. 12093; Volume 17—p. 13418; Volume 18—p. 14172; Volume 19—p. 15336; Volume 21—p. 16828.

2. Inquiry on Commission's own motion.—[Vols. 3, 7, 9, 11, 15, 19, 21].—In this proceeding, the Commission initiated an investigation into the national railroad rate structure. The investigation will primarily focus on these issues: the value of general freight rate increases as opposed to a more selective pattern of such increases; intercommodity rate relationships; intracommodity rate relationships; and the relationship of service characteristics to rates and costs. Commission also issued procedural and evidentiary guidelines for all parties to ensure that a comprehensive record will be developed in the series of conferences which will be scheduled between Commission staff members and representatives of interested parties. Commission also declared its intention to obtain necessary funding to allow the appointment of a "special counsel" and a supporting staff to implement the decisional process.—Investigation of Railroad Freight Rate Structure, 340 I.C.C. 868 (876-884).

Section 13. (3) Investigation involving State regulations; conference of State and interstate commissions.—[Unchanged. See vol. 9, p. 7626, vol. 11, p. 9261.]

Historical note, vol. 3, p. 1830.

Notes of Decisions

Volume 3—p. 1831; Volume 7—p. 5472; Volume 9—p. 7626; Volume 11—p. 9261; Volume 12—p. 10304; Volume 13—p. 11011; Volume 14—p. 11514; Volume 16—p. 12736; Volume 18—p. 14172; Volume 19—p. 15337; Volume 21—p. 16829.

Section 13. (4) Duty of Commission where State regulations result in discrimination.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §210, 90 Stat. 46, ":*Provided,* That" and all that follows through "hearing and decision therein" is struck out. See vol. 18, p. 14172.]

Historical note, vol. 3, p. 1830.

Notes of Decisions

Volume 3—p. 1840; Volume 7—p. 5474; Volume 9—p. 7627; Volume 11—p. 9262; Volume 12—p. 10304; Volume 13—p. 11011; Volume 14—p. 11515; Volume 15—p. 12094; Volume 16—p. 12736; Volume 17—p. 13418; Volume 18—p. 14173; Volume 19—p. 15337.

Undue, Unreasonable or Unjust Discrimination Against Interstate or Foreign Commerce

50. Revenue discriminations.—[Vols. 3, 7, 9, 11-13, 15-19, 21].—Evidence established that the commodities shipped, the wages and hours of crew members, the train performance factors, and respondents' car usages are substantially same for intrastate and interstate traffic, and generally the same service is provided to Mississippi shippers whether their freight moves in intrastate or interstate commerce. Respondents are entitled to earn revenue from Mississippi intrastate freight proportionate to that earned by such freight prior to increases on interstate freight authorized in Ex Parte No. 259. Present Mississippi intrastate rates, with specified exceptions, are unduly low and cause unjust discrimination against, and undue burden on, interstate traffic.—Mississippi Intrastate Rail Frt. Rates & Charges, 1969, 341 I.C.C. 69 (73-74).

Commission found in Ex Parte No. 259 that a critical need existed for additional revenue by nation's railroads to offset increased operations' costs not previously considered by the Commission. Respondents' rate of return on investment of 4.01 percent is right at the level considered inadequate by the Commission. Respondents' intrastate traffic is not bearing its proportionate share of revenue due to abnormally low intrastate rates thus thrusting an undue burden on, and unjust discrimination against, interstate commerce.—Virginia Intrastate Frt. Rates and Charges—1969, 341 I.C.C. 700 (721-23).

In Ex Parte No. 259 the nation's railroads showed a need for additional revenues to offset increased operating costs not previously considered by the Commission. Georgia intrastate rates are abnormally low thus preventing intrastate traffic from bearing a fair share of respondents' revenue needs and causing unjust discrimination against, and undue burden on, respondents' interstate traffic. Unlawfulness ordered removed. However, in an embraced proceeding, the Georgia maximum and minimum scale of intrastate rates was found lower than the interstate scale, for the most part, but not so much lower as to constitute a burden on interstate commerce and the investigation therein was discontinued.—Georgia Intrastate Freight Rates, 1969, 341 I.C.C. 778 (805-09).

The Commission is obligated to assure itself that intrastate traffic is paying "a fair proportionate share" of rail costs. Rail witnesses demonstrated that overall costs are higher, that respondents' rate of return on net investment is depressed and inadequate, and that costs in relation to intrastate revenues are causing a net loss to carriers on intrastate freight. Generally speaking, to extent Arkansas intrastate rates do not reflect the Ex Parte Nos. 256 and 259 increases in interstate rates, they fail to provide a fair share of additional revenue need and cause unjust discrimination against and an undue burden on interstate commerce.—Arkansas Intrastate Freight Rates and Charges, 1970, 341 I.C.C. 872 (875-77).

Intrastate rates on soybeans, rice hulls, pulpwood and woodchips are not shown unlawful. It is not apparent that the disparty between interstate and intrastate rates on these commodities is substantial and operates as a real discrimination and obstruction to interstate commerce nor that injury to interstate shippers has resulted.—Id., p. 877-83.

Investigation—Procedure

58. Quantum and character of evidence.—[Vols. 3, 7, 9, 11-13, 15-19, 21].—There is no basis of record herein to determine total increase in revenue which will be produced by sought intrastate increases. Such information, along with financial and economic data of carriers deemed necessary to certify sought increases under national Wage and Price Stabilization Program are lacking. Accordingly, Commission concludes that evidence is insufficient to meet criteria for rate increases required under §300.16 of Price Commission regulations and Commission will not order sought increases until these criteria are met.—Mississippi Intrastate Rail Frt. Rates & Charges, 1969, 341 I.C.C. 69 (78).

62. Order prescribing intrastate rate or practice.—[Vols. 3, 7, 9, 12, 13, 15-19, 21].—Commission found that the unlawfulness caused by unduly low and unjustly dis-

criminatory Mississippi intrastate rates on certain commodities, with specified exceptions, should be removed by permitting application to these intrastate rates the increases on like interstate traffic which Commission authorized in Ex Parte No. 259. However, an order effectuating the foregoing findings will not be entered unless and until respondents show that involved increases meet the criteria for rate increases under regulations of the national Wage and Price Stabilization Program.—Mississippi Intrastate Rail Frt. Rates & Charges, 1969, 341 I.C.C. 69 (77-80).

Evidence of respondents' revenue need justifies Commission's order that the increases in interstate traffic approved in Ex Parte No. 259 be applied to Virginia intrastate rates provided that such increases will not result in levels higher than the level of interstate rates or charges, in official territory, on like traffic over the same line of railroad to, from, or within Virginia.—Virginia Intrastate Frt. Rates and Charges—1969, 341 I.C.C. 700 (721-24).

The Price Commission issued notice on Feb. 10, 1972, directing that all price increases by privately owned public utilities which were not legally in effect on Feb. 9, 1972, are prohibited until the Price Commission implements changes in its regulations, if any, or until Mar. 10, 1972, whichever first occurs. Accordingly, increases in Ex Parte No. 259 levels ordered herein to remove unlawfulness would be unlawful and this Commission will enter no order effectuating increases at this time.—Georgia Intrastate Freight Rates, 1969, 341 I.C.C. 778 (780).

Commission found that unlawful discrimination in Arkansas intrastate rates should be removed by application of the level of rates approved in Ex Parte No. 259. However, Commission will withhold an order effectuating this finding unless and until respondents show that the increases meet criteria for rate increases established by the Price Commission. See 341 ICC 69.—Arkansas Intrastate Freight Rates and Charges, 1970, 341 I.C.C. 872 (873-4).

Section 13. (5) Application; Commission's exclusive authority.—[Added by the act of Feb. 5, 1976, Pub, L. 94-210, §210, 90 Stat. 46.]

(5) The Commission shall have exclusive authority, upon application to it, to determine and prescribe intrastate rates if—

(a) a carrier by railroad has filed with an appropriate administrative or regulatory body of a State, a change in an intrastate rate, fare, or charge, or a change in a classification, regulation, or practice that has the effect of changing such a rate, fare, or charge, for the purpose of adjusting such rate, fare, or charge to the rate charged on similar traffic moving in interstate or foreign commerce; and

(b) the State administrative or regulatory body has not, within 120 days after the date of such filing, acted finally on such change.

Notice of the application to the Commission shall be served on the appropriate State administrative or regulatory body. Upon the filing of such an application, the Commission shall determine and prescribe, according to the standards set forth in paragraph (4) of this section, the rate thereafter to be charged. The provisions of this paragraph shall apply notwithstanding the laws or constitution of any State, or the pendency of any proceeding before any State court or other State authority.

Section 13. (6) Petitions for proceedings; orders relating to railroads.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 52.]

(6)(a) Whenever, pursuant to section 553(e) of title 5, United States Code, an interested person (including a government entity) petitions the Commission for the commencement of a proceeding for the issuance, amendment, or repeal of an order, rule, or regulation relating to common carriers by railroads under this Act, the Commission shall grant or deny such petition within 120 days after the date of receipt of such petition. If the Commission grants such a petition, it shall commence an appropriate proceeding as soon thereafter as practicable. If the Commission denies such a petition, it shall set forth, and publish in the Federal Register, its reasons for such denial.

(b) If the Commission denies a petition under subdivision (a) (or if it fails to act thereon within the 120-day period established by such subdivision), the petitioner may commence a civil action in an appropriate court of appeals of the United States for an order directing the Commission to initiate a proceeding to take the action requested in such petition. Such an action shall be commenced within 60 days after the date of such denial or, where appropriate, within 60 days after the date of expiration of such 120-day period.

(c) If the petitioner, in an action commenced under subdivision (b), demonstrates to the satisfaction of the court, by a preponderance of the evidence in the record before the Commission or, in an action based on a petition on which the Commission failed to act, in a new proceeding before such court, that the action requested in such petition to the Commission is necessary and that the failure of the Commission to take such action will result in the continuation of practices which are not consistent with the public interest or in accordance with this Act, such court shall order the Commission to initiate such action.

(d) In any action under this paragraph, a court shall have no authority to compel the Commission to take any action other than the initiation of a proceeding for the issuance, amendment, or repeal of an order, rule, or regulation under this Act.

(e) As used in this paragraph, the term 'Commission' includes any division, individual Commissioner, administrative law judge, employee board, or any other person authorized to act on behalf of the Commission in any part of the proceeding for the issuance, amendment, or repeal of any order, rule, or regulation under this Act relating to common carriers by railroad.

Section 13a. Discontinuance or change of certain operations or services.—[Unchanged. See vol. 18, p. 14183.]

Historical Note

Discontinuance of passenger train service pursuant to §13a has been limited by the Rail Passenger Service Act, its most recent amendment, the Amtrak Improvement Act of 1974 (P.L. 93-496), having extended a moratorium on discontinuance of basic system Amtrak trains and those experimental trains that were operating Jan. 1, 1973, to July 1, 1975. The RPSA moratorium on the discontinuance of intercity passenger trains operated other than by Amtrak expired Jan. 1, 1975.—Annual Report, 1975, p. 20.

Notes of Decisions

Vol. 18—p. 14185; Vol. 19—p. 15343; Volume 21—p. 16836.

1. Constitutionality.—[Vols. 18, 19, 21].—Plaintiffs argue that, in view of the alleged constitutional questions and applicable statutes involved, the court should take jurisdiction over their action to compel defendant railroad maintain passenger train service which had been discontinued pursuant to §13a(1), and which the Commission later decided to investigate. However, railroad's failure to notify the plaintiffs in the first instance of its intention to file its discontinuance notice, and the Commission's failure in the first instance to conduct an investigation, fall far short of a violation of due process requirements of the Constitution. As a matter of law, under the circumstances, railroad had a right to discontinue considered train service; and, as §13a(1) prohibits the Commission's ordering a restoration thereof until after the investigation, clearly the court cannot order restoration (while it is pending) by directing the agency to contravene the statute. Moreover, should the Commission's findings be such as to permit discontinuance, plaintiffs and other parties would not be precluded from taking further judicial action by reason of the court's denial of injunctive and other relief prayed for. Defendants' motion for dismissal sustained.—Howell v. United States, 302 F. Supp. 772 (773, 774-5).

The Commission is entrusted with the administration of §13a(1) and with the exercise of powers defined therein, but it has not been given jurisdiction to determine the section's constitutionality. That question is for another forum.—Boston & Maine Corp. Discontinuance, 324 I.C.C. 418 (423).

2. Construction and interpretation.—[Vols. 18, 19, 21].—By enactment of §13a, Congress provided a uniform federal scheme to supersede the prior confused and time-consuming procedure under which the States supervised discontinuance of passenger trains; thus, a single federal standard was to govern train discontinuances whether interstate or intrastate, though procedure of §13a(1) for discontinuing an interstate train was made somewhat different from procedure for discontinuance of intrastate trains. But, under the statute, the Commission has the final say in each case and the same substantive standard now governs discontinuance of either interstate or intrastate trains. Whether the Commission should investigate a §13a(1) discontinuance is within its discretion, a matter which is not reviewable, but a decision to investigate indicates that a substantial question exists under the statutory standards; therefore, its report deals with the merits in each case and is reviewable.—City of Chicago v. United States, 396 U.S. 162 (165-7)*.

Judgment of the district court, which vacated and set aside the Commission's order denying railroad's petition under §13a(2) for authority to discontinue operation of two passenger trains between Chicago and Danville, Ill., vacated; proceedings remanded to the District Court with directions to remand the matter to the Commission for a determination as to whether the trains involved constitute an "intercity" service within meaning of §102(5) of the Rail Passenger Service Act of 1970.—United States v. Chicago & E.I.R. Co., 400 U.S. 987*.

In action to overturn Commission decision allowing discontinuance of certain passenger trains, the question of whether the public interest would be best served by continuing or discontinuing the trains is one that requires exercising informed expert judgment and balancing and weighing many complicated and intricate facts, which the statute leaves to the Commission. Each case must stand or fall on its own facts as presented at the hearings; and Congress assigned to the Commission, not the courts, the balancing of all factors pertinent to determination of whether a train should be continued or discontinued. In finding that public convenience and necessity did not require continuance of trains involved, the Commission relied on evidence showing the declining patronage and the adequacy of other available rail, motor, and airplane service; its finding that continued operation would unduly burden interstate commerce was based on evaluation (after considering evidence of past, and projected future, operating losses) of effect a continuation would have on carrier's financial condition. There being sufficient evidence of record and ample statutory authority to support the Commission's decision, its order is sustained.—State of New York v. United States, 299 F. Supp. 989 (994, 998-1001)*.

In review of Commission order which permitted three railroads to discontinue operating their respective segments of two interstate passenger trains south of Carbondale, Ill., and allowed one of them (IC) to effect certain changes in service north of that point, there is no logical basis for plaintiffs' theory that the Commission could not consider proposed service changes in the §13a(1) proceeding because they would take place wholly in Illinois. The statute is a remedial one which reflects Congress' concern over serious financial losses often sustained in passenger-train operations; and the basic jurisdictional requirement of §13a(1) is that a train sought to be discontinued must be operating from one State to another. Since the IC runs the trains through five States, they are interstate in character; and since, once the Commission has jurisdiction over trains involved, it can accept or reject some or all of the proposal, the Commission had authority under §13a(1) to dispose of proposed service changes. That the Commission's decision results in operation of a purely intrastate train, is certainly no bar to assumption of jurisdiction over an initially interstate operation; complaint dismissed. —City of Chicago v. United—States, 300 F. Supp. 115 (117-8)*.

District court lacks jurisdiction over suit to compel defendant railroad to maintain passenger service that had been discontinued pursuant to §13a(1); and, in present status of the case, the court has no power to order restoration of such service. After railroad filed notice under §13a of its intention to discontinue operating certain trains, and no Commission investigation was begun within 30 days, it had a right to effect proposed discontinuance although the commission later decided to investigate the matter. The Commission has specific authority to require continuance or restoration of such service after the investigation, but it lacks power to order restoration until its investigation is closed; therefore, it can hardly be argued that if the Commission is prohibited by statute from issuing such an order, the court has authority to order restoration of the service pending final Commission determination by directing that agency to contravene the statute.—Howell v. United States, 302 F. Supp. 772 (773-4).

Moreover, plaintiffs' contention that the Commission had no right in the first instance not to conduct an investigation, and further that it was bound to require continuance of the train service during such investigation, loses its viability by reason of the fact that it is within the Commission's exclusive discretion to determine whether it should investigate a proposed discontinuance and whether it should order continuance of train service during such investigation. Such discretionary powers are not subject to judicial review. Therefore, in present posture of the case, the court is without jurisdiction; defendants' motion to dismiss, for lack of jurisdiction, sustained.—Id., pp. 744, 745.

In action by members of Minnesota Public Service Commission, moving the court to assert jurisdiction and issue an order declaring the Commission's "Notice" of decision not to investigate defendant railroad's proposed discontinuance of two passenger trains to be arbitrary and null and void, and enjoining the train discontinuances permitted by that "Notice," plaintiffs' arguments are not persuasive that the court should take jurisdiction and then reverse or overrule the Commission's discretionary decision. While some dispute exists as to propriety of a three-judge court's jurisdiction over the matter in issue, decision in 238 F. Supp. 107, is still the better point of view; also, several of the cases plaintiffs cite may be distinguishable because they deal with actual orders, rather than mere election not to investigate. Thus, following the case cited, if the Commission decides not to interfere with service cutbacks, it simply terminates the investigation; and its decision to take no action is not reviewable. Defendant's motion to dismiss for failure to state a claim on which relief can be granted, and lack of subject matter jurisdiction, granted.—Anderson v. United States, 309 F. Supp. 494 (495-6)*.

Legislative history of §13a(1) clearly indicates that Congress did not intend to usurp all power of a State regulatory agency over interstate train discontinuances, but to set forth a method by which railroads could, *at their option*, submit proposed discontinuances to the Commission. Therefore, if the Commission is to obtain jurisdiction of passenger train discontinuances affecting several States, notice procedure authorized by the statute must be strictly followed; otherwise, jurisdiction properly belongs to the States. In instant case, notice requirement of §13a(1) was not met when 30 full days did not elapse between date that carrier's discontinuance notice was filed with the Commission and the effective date of proposed discontinuance; thus, the Commission obtained no jurisdiction to approve or disapprove the discontinuance, and its order instituting the investigation was defective. Also, having failed to obtain jurisdiction of the matter, it was error for the Commission to dismiss plaintiffs' (protestants') petition to reject the discontinuance notice which carrier filed with it; plaintiff's motion for summary judgment granted.—Pennsylvania Public Utility Commission v. United States, 311 F. Supp. 1024 (1026-8, 1029, 1031)*. [But see dissent.]

Prior to final hearing and order of the commission, Federal district court has no jurisdiction under the statute to grant injunctive relief sought in complaint attacking the Commission's action in not requiring continued operation of the trains involved during pendency of its investigation under §13a(1) of railroad's proposal to discontinue service of two of its passenger trains. The jurisdictional defect is in large part a matter of timeliness, since final Commission orders under §13a(1) are reviewable by the courts and when it makes a final determination then, upon request, it will be within the courts' province to review such determination. However, at this time the requisite finality is lacking to permit the court to grant requested injunctive relief requiring continued operation of the trains during pendency of the Commission investigation. Defendants' motions to dismiss for want of subject matter jurisdiction, sustained; plaintiff's petition for temporary restraining order, dismissed.—Iowa State Commerce Commission v. United States, 313 F. Supp. 648 (649-50)*.

The Supreme Court clearly set forth the meaning of §13a(2) when, in 372 US 1, it held that Congress intended to leave initial jurisdiction over trains operated wholly within a State with the State regulatory commissions. Thus, the Interstate Commerce Commission cannot take jurisdiction under §13a(2) until the State has denied the railroad's application or failed to act thereon; and if a different proposal involving intrastate trains is presented to the commission, of course it is not one denied by the State. Therefore, in proceeding on Missouri Pac. R.'s petition for authority to discontinue two pairs of trains (Nos. 14 and 17 and Nos. 15 and 16) operated between St. Louis and Kansas City, Mo., the Commission had no authority to exercise initial jurisdiction to authorize discontinuance of trains Nos. 14 and 15, which it did in substance, since such a proposal was never submitted to, heard or denied by the Missouri Public Service Commission.—Jefferson City v. United States, 318 F. Supp. 751 (755-6)*.

And though MoPac's two separate petitions to the Missouri commission, each of which involved one pair of the trains, were consolidated "on a joint record" and after hearings denied in orders referring to all four trains, that State commission did not consider or deny a proposal to discontinue four "unpaired trains"; issues to be determined by it were made by the separately filed petitions, not consolidation order or the order denying both petitions. Moreover, instant record does not show that the Commission felt it was simply modifying a request initially made to the State commission to discontinue four unpaired trains. Nevertheless, Interstate Commerce Commission order which purportedly permits discontinuance of trains Nos. 14 and 17, but leaves Nos. 15 and 16 in operation, in reality authorizes discontinuance of Nos. 14 and 15 by initiating a change of schedule for No. 15 to that of discontinued No. 17; and MoPac renumbered train No. 15 as No. 17 in implementing that order. Therefore, that part of the Commission's report and order authorizing MoPac to discontinue trains Nos. 14 and 17, set aside; defendants are permanently enjoined from discontinuing those trains until, in new proceedings, proper authority therefor is secured in accordance with law.—Id., pp. 756-7.

Defendants' motion to dismiss, for lack of jurisdiction, plaintiff's request for temporary restraining order requiring continued operation of considered rail passenger trains pending conclusion of the Commission's investigation of their proposed discontinuance (Commission notice of investigation having permitted the railroad to discontinue operating the trains pending outcome thereof), sustained. While the evidence overwhelmingly supports continuance of the trains during the Commission investigation, and the court would require their restoration if it had any discretion in the matter, the court does not have discretionary power to countermand the discontinuance when the record shows that the Commission followed the applicable statute and regulations, and that there has been no denial of due process.—United Transportation Union v. United States, 320 F. Supp. 14 (15).

Furthermore, while plaintiff contends that the Commission should be required to reinstate considered trains because the Chairman thereof represented to a Congressman of Minnesota that the trains would be continued pending outcome of the investigation, such a representation cannot serve to estop an appropriate Division of the Commission from acting in a manner inconsistent with the Chairman's statement.—Id., p. 15.

In action to set aside Commission order which permitted discontinuance of Illinois Central R.'s only two passenger trains between St. Louis, Mo., and Carbondale, Ill., the function of the court is ended once it determines that the Commission's ultimate findings are supported by substantial evidence on the whole record and do not involve an error of law. Purpose of §13a was to provide a remedy whereby a railroad could be relieved of the burden of maintaining trains which the Commission finds are not required, balancing the burden against the public need. In instant case, the Commission's findings that operation of considered trains was not required by public convenience and necessity, and that continued operation would constitute an undue burden on interstate commerce, were in keeping with the evidence presented to it.—Illinois Commerce Commission v. United States, 320 F. Supp. 205 (208, 210)*.

Record shows that the Commission considered and ruled on joint-facility expenses incurred by Illinois Central for operation of St. Louis Union Station; and the Commission finding that such cost would be saved by discontinuance of the only IC trains served by that terminal was within the scope of its authority. Also, sufficient evidence was before the commission upon which it could find that railroad would retain all the feeder revenues from considered trains when, while there was some testimony that part of the feeder value would be lost, there was sufficient other evidence on which that finding could be made. On review, the court finds no prejudicial departure from requirements of the law, nor does it find any abuse of the Commission's discretion. Commission findings and decision sustained; temporary restraining order dissolved.—Id., pp. 210-11.

Petition to set aside Commission decision permitting Baltimore & O. R. to discontinue operation of two passenger trains between Chicago, Ill., and Akron, Ohio, and to change the schedules of trains east of Akron because, since B&O did not segregate Chicago-Akron revenues and expenses, there is no evidentiary basis for the necessary findings, denied. The Commission found, on evidence of the costs incurred and losses sustained and the carrier's financial condition, that continued operation of the two trains would result in operating deficits and that discontinuance would produce an improvement in B&O's income; in making that finding, it was not required to determine how much of the projected deficit was due to the Chicago-Akron segment and how much to the segment east of Akron. The only evidence required is that continued operation of the trains involved would result in operating deficits and that discontinuance, along with the rescheduling, would provide carrier a substantial net benefit; B&O presented such evidence and the Commission accepted it.—Public of State of Indiana v. United States, 325 F. Supp. 1223 (1224, 1225-6)*.

And, contrary to plaintiffs' argument of failure to meet the statutory requirement, the Commission's finding that proposed concurrent changes in train schedules east of Akron are "permitted by public convenience and necessity" was sufficient. There is no requirement in §13a(1) that if the Commission concludes present operations or services of such trains are not required, it must find both that continuance of the existing schedule is not required by public convenience and necessity, and that continuance will unduly burden interstate commerce. If the continuation is not required, there is no need to inquire into the burden on carrier which proposed the changes. Furthermore, the Commission's finding with respect to proposed change in schedule is tantamount to a finding that existing schedules are not required by public convenience and necessity.—Id., p. 1226.

Also, there is no merit in plaintiff's argument that the discontinuance order should be set aside because it is based in part on schedule changes for two other trains over which the Commission did not obtain jurisdiction due to B&O's failure to post the statutory notice on equipment on those trains and that, the addition of two stops on the other trains being an essential element of the discontinuance proposal, such jurisdiction was necessary. The Commission, while approving proposed discontinuance, entered no order with respect to the other two trains, and its decision does not indicate that addition of two stops on those trains was essential to its authorization of the Chicago-Akron discontinuance; therefore, jurisdiction over the other two trains was not required.—Id., pp. 1226-7.

Under provisions of §13a(1), the Commission has no discretion to approve or disapprove a proposed discontinuance of train service, but must investigate a proposal to discontinue. Only upon finding that the operation of the involved train or trains is required by public convenience and necessity and will not unduly burden interstate commerce may the railroad be required to continue or restore the service investigated, and in no event can the Commission require the service to be continued for more than 1 year from the date of the order. Congress, in enacting §13a, addressed itself to a problem distinct from that reflected by overall unprofitable operation of an entire segment of railroad line. Instead, it was primarily concerned with the problem posed by passenger services for which significant public demand no longer exists and which are consistently deficit-producing, forcing carriers to subsidize them out of freight profits.—Louisville & N.R. Co. Discontinuance, 320 I.C.C. 669 (690, 694).

Municipality contends that, insofar as operation of two of considered trains is intrastate, such operations should be dismissed from proceedings relating to interstate operations. To adopt this position would require the fragmentizing of the operation of all interstate trains, an approach not intended by the statute. Section 13a contemplates two kinds of trains; those operating from a point in one state to a point in another state, and those operating wholly within a single state. The two trains fall only in the first category, and are governed by §13a(1) only. Motion to dismiss denied.—Boston & Maine Corp. Discontinuance, 324 I.C.C. 418 (423-4).

Also, individual protestant's contention that Boston & M. Corp. is a new corporation and not a carrier subject to §13a is without merit. While corporate shell of its predecessor disappeared when it came into being, predecessor's rights, liabilities, and accounts continued in the new corporation; thus, since petitioner clearly qualifies as a carrier subject to the Act, as defined in

§1(1)(a) and §1(3)(a), it is subject to §13a. And, while it may be within the province of Massachusetts to permit elimination of intrastate service, there is no legal capacity in any State to alter the railroad's status insofar as its interstate obligations are concerned.—Id., pp. 423, 451.

With respect to protestant's contention that §13a(2) does not confer jurisdiction upon the Commission to authorize in one proceeding the discontinuance of all or substantially all passenger train service within a State, it was held in 317 ICC 111 that §13a(2) applies to discontinuance of a group of trains as well as one train; record affords no basis for disturbing that finding.—Id., 324 I.C.C. 705 (707-8).

Motion to dismiss on ground that the Massachusetts Department of Public Utilities, with which carrier's predecessor filed the "application or petition", is not a "State authority having jurisdiction thereof" because State statutes delegate to the department only a limited jurisdiction over railroads, denied. Since it would be inappropriate for the Commission to attempt to define the limitations, if any, upon the jurisdiction of the State authority to act upon a petition duly presented to it in accordance with Massachusetts laws, the Commission proceeded upon the assumption that the department was "the State authority having jurisdiction" over the matter herein contemplated under §13a(2). And, there is no requirement that the presentation before the Commission be identical to that made before the State authority. Regardless of what data was presented to the Department of Public Utilities, when the Commission's jurisdiction attached upon the filing of the carrier's petition here after the department had failed to act within 120 days, the matter came to us for a determination *de novo*. Motion to dismiss denied.—Id., pp. 707-9.

Those portions of the National Transportation Policy which are particularly pertinent in a §13a proceeding direct the Commission to administer the Act so as to recognize and preserve the advantages of each (mode); promote safe, adequate, economic, and efficient service and foster sound economic conditions in transportation and among the several carriers; cooperate with the several States and the duly authorized officials thereof, all to the end of achieving an adequate national transportation system by the various modes. To this end, both the regional rail passenger problems underlying the notice of discontinuance of all interstate passenger trains and the national rail passenger crisis of which they are a part must be considered. And, the National Transportation Policy does not distinguish between "freight" and "passenger" services, nor can it be inferred that one of these services has priority over the other for regulatory purposes; moreover, §13a(1) leaves to the Commission's determination whether, in a discontinuance proceeding, one of these services may be given preference over the other under the statutory standards; however, history of national rail activity demonstrates that rail passenger services are less desirable in certain fundamental ways than rail freight service.—New York, N.H. & H.R. Co. Discontinuance, 327 I.C.C. 151 (154-5).

Prior to enactment of §13a, the power to control changes or discontinuances of passenger train service was reserved to the States. However, under §13a(1) the Commission is given specific initial jurisdiction to consider curtailments of interstate passenger operations, and when the Commission enters upon an investigation of a proposed discontinuance, continuation of all or part of the involved service may be required, for as much as a full year, only if that operation or service is required by public convenience and necessity and will not unduly burden interstate or foreign commerce. Moreover, the Commission's jurisdiction cannot be invalidated in a §13a(1) proceeding by reason of rail carrier's contractual obligations with State authorities to continue to operate the trains sought to be discontinued, since neither the statute on its face nor its legislative history indicates the Federal jurisdiction should be defeated by existence of those obligations.—Id., pp. 199-200, 201-2.

Two commonly controlled railroads may elect to proceed initially before the Commission under §13a(1) with respect to that portion of an interstate train pair which is operated by one of the carriers between points within a single state.—Kansas City S. Ry.

Co. and Louisiana & A. Ry. Co. Discontinuance, 333 I.C.C. 51 (55-7).

In considering the needs of the entire public, Commission has not excluded therefrom those passengers whose passage is based on less than full fare (see 317 ICC 5). Transportation needs of passenger using a valid pass merit no less consideration than those of a passenger paying full fare.—Penn Central Co. Discontinuance of Trains, 334 I.C.C. 312 (332).

Among matters to be considered under §13a(1) are whether public convenience and necessity require continued operation of the trains to be discontinued and whether such continued operation would constitute an undue burden on interstate commerce. Several factors, including the six listed, are to be considered; however, no one factor by itself is decisive or controlling. Where, as in instant proceeding, the evidence of railroad's operating revenues and expenses shows that the particular services result in financial losses to carrier, the overall financial condition of the carrier is a factor in determining whether the burden imposed by continuation of such services would be undue. A showing of substantial need for the service might justify its continuation even if it were performed at a substantial loss to the railroad, particularly when it involves carrier's last passenger trains in the service area. In short, the statute requires a balancing of needs, the public's and the carrier's. —Norfolk & W. Ry. Co. Discontinuance, 334 I.C.C. 506 (522)*.

In considering public need there is nothing in the statute which precludes the Commission from giving consideration to all passengers—both free and revenue. Although no precise determination can be made herein as to value of free transportation, such transportation increases cost of operation at least insofar as additional equipment is required. —Penn Central Co. Discontinuance of Trains, 336 I.C.C. 518 (525).

There is no statutory basis for finding that exemptions from provisions of §13a were intended in regard to any passenger train operating within the United States by a railroad subject to part I of the Act. Trains herein are subject to Commission's jurisdiction under principles established in 328 ICC 610.—Grand Trunk W. R. Co. Discontinuance, 338 I.C.C. 254 (256-7).

It is the essential character of the service, rather than numbering or description, that is the primary indicium of the nature of a train. Subject passenger cars transport through passengers between Cincinnati, O., and New York, N.Y., and therefore are within this Commission's jurisdiction even though locomotives and train crews may operate solely within one state. Protestants' contention that certain trains herein are segments of a through train service and that appropriate notices were not posted is without merit. Subject trains originate and terminate at stated points and through passengers must change trains to complete their journey. Applicants are not required to file discontinuance notices past the named terminals.—Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (388-89).

Evidence of record shows that all trains considered herein are primarily commuter service as defined by criteria in 338 ICC 621, especially as regards trip distances, equipment used, multiple stops, and peak period use, and are therefore within Commission's jurisdiction under §13a.—Chicago S.S. & S.B.R. Restructuring of Pass. Serv., 342 I.C.C. 154 (179-80).

15. Procedure; notice; hearings.—[Vols. 19, 21].—See also Public of State of Indiana v. United States, and United Transportation Union v. United States, at n. 2 *supra*.

District court holding, in remanding Commission decision allowing Chicago & E.I.R. to discontinue two ("Georgian") trains which it operated between Chicago and Evansville, Ind., and in conjunction with Louisville & N.R. trains between Evansville and Atlanta, Ga., that notice of proposed discontinuance was inadequate because the governors and people of Kentucky, Tennessee, and Georgia were not notified, reversed. While §13a(1) required C&EI to give notice to Illinois and Indiana, the only States in which the line operated, it made no provision for notice to States served by connecting railroads which might be affected by a discontinuance. When the Commission ruled that statutory notice requirements had been met, and permitted the discontinuance, it must have interpreted "such train" in §13a(1) to refer to a train operated by only one railroad; and only the Chicago-Evansville discontinuance was then before it. On this issue, the court accepts the definition of "train" given by the agency having supervision over the problem.—United States v. City of Chicago, 400 U.S. 8 (9-10)*.

While C&EI and L&N functioned in close harmony and, since the "Georgian" and L&N's "Hummingbird" trains connect at Nashville, Tenn., (and coaches and sleepers are transferred between them) discontinuance of service on one line might have substantial effect on the other, such relationship is not unique in railroading. Congress, being aware of the mutual interpendence of railroads, designed a federal regulatory system that displaced the state regulatory system when it could defeat a carrier's attempt to discontinue a passenger train; hence, it would distort §13a(1) to treat it so as to require the giving of notice to States which had no regulatory power over the carrier. Accordingly, Commission decision permitting L&N to discontinue its "Hummingbird" trains having also been remanded because of the close relationship to the "Georgian," the consolidated causes are remanded for district court review of any questions on the merits that may remain unsolved.—Id., pp. 10-11.

In accord with the court's earlier opinion in 400 US 8, and for similar reasons, those portions of the district court's judgment which reversed and remanded orders of the Commission authorizing the Denver & R.G.W. R. Co. and the Western Pac. R. Co. to discontinue their operations of the "California Zephyr" passenger trains, because no notices of discontinuance were served on Governors of some States, and notices were not posted at stations in some States, along the entire San Francisco—Chicago route of those trains, reversed and the cases remanded to the trial court for further proceedings; and that portion of the judgment appealed from which sustained the Commission's order authorizing Southern Pac. R. Co. to reduce the service of its "City of San Francisco" passenger trains is affirmed.—City of Chicago v. United States, 400 U.S. 987*.

In action to review the Commission's order permitting discontinuance of certain passenger trains between Carbondale, Ill., and Jacksonville, Fla., plaintiffs' suggestion that the Commission erred in failing to hold a hearing in Illinois is without support in cases or logic. Nothing in the statute requires hearings at any particular place or at more than one place; furthermore, no plaintiff ever made formal request for a hearing in Illinois. Inasmuch as plaintiffs' real concern was with discontinuance of southern leg of the train operations involved, the Commission acted properly and reasonably in holding eight days of hearings (at which plaintiffs filed briefs) in six cities in the three southern states directly affected by proposed discontinuance.—City of Chicago v. United States, 300 F. Supp. 115 (116, 118)*.

Initial issue in suit to set aside Commission decision allowing defendant railroad to discontinue two interstate passenger trains, claiming that carrier failed to effectively invoke the Commission's jurisdiction by not filing the notice thereof at least 30 days in advance of proposed discontinuance, is whether §13a(1) notice provision was complied with when, on Feb. 18, 1969, railroad filed with the Commission its notice of discontinuance of those trains effective March 20, 1969. Rule 6(a) of the Rules of Civil Procedure provides for computing any period of time prescribed by statute; reference therein to "any applicable statute" is broad and can reasonably be said to refer to any statute that will be applied in a District Court action; thus, computation of the 30-day period set forth in §13a(1) is governed by Rule 6(a). Applying that rule to the facts in instant case, date of the Commission's receipt of the notice (filing date) would not be counted, computation would begin with the next day and, counting forward from Feb. 19, the thirtieth day would be the effective date of proposed discontinuance.—Pennsylvania Public Utility Commission v. United States, 311 F. Supp. 1024 (1026-8)*.

Furthermore, while legislative history is of little aid in determining if the actual intent was that 30 full days should expire before discontinuance could take effect, Congress must have had some specific objective in mind when it approved language of the statute providing that a carrier can "file with the Commission * * * notice at least thirty days in advance of any such proposed discontinuance * * *"; and the most reasonable interpretation is that it used those particular terms to insure that 30 full days would pass before any discontinuance occurred. Therefore, since 30 full days did not elapse between date on which railroad's notice was filed with the Commission and the effective date of the proposed discontinuance, notice requirement of the statute was not met. And since carrier's failure to comply with notice provision of §13a(1) deprives the Commission of jurisdiction to approve or disapprove the discontinuance, the matter must be disposed of on that basis; plaintiff's motion for summary judgment granted.—Id., pp. 1029, 1031. [But see dissent.]

The Commission acted within the scope of its authority in accepting railroad's notice of its proposed discontinuance of two passenger trains between St. Louis, Mo., and Carbondale Ill., which was posted and served as required by §13a(1) and contained, in addition to the minimal requirements, a statement that substitute bus service would be provided by named carrier (not a party to the proceedings) upon discontinuance of those trains. It may be that under certain circumstances a notice might be so replete with redundant and immaterial matter that it would be stripped of its true purpose as a notice of train discontinuance; but in instant case, the mere assertion that the bus service would supplant train service was not so over-reaching as to invalidate the order. Also, while plaintiffs urge that addition of the bus service to the notice tended to lull people into a state of complacency, evidence of such effect was not submitted to the Commission; and the court does not find such a lulling effect to have occurred. Commission decision, which permitted the trains to be discontinued, sustained.—Illinois Commerce Commission v. United States, 320 F. Supp. 205 (209-10, 211)*.

Motions to dismiss §13a(1) proceedings, filed by protesting parties on various grounds, denied, as follows: (1) as to railroad's alleged failure to prove losses claimed, when the method used in determining financial results of operating the two trains to be discontinued are on actual bases where possible and those allocated are based on reasonable averages; (2) as to railroad's alleged failure to include freight revenues earned on the line, citing 210 F. Supp. 675, when cited case is on appeal and deals with §13a(2) proceeding; and (3) as to defect in the discontinuance notice (in that it was not served on the Governors and State commissions of Illinois, Wisconsin, Idaho and Wyoming), those states are beyond the physical limits of considered Minneapolis—Deer Lodge, Montana run; moreover, posting at stations and depots is required only at those points where the trains physically operate.—Chicago, M., St. P. & P.R. Co. Discontinuance, 320 I.C.C. 566 (572, 584-5).

Due to press of time and imminent expiration of 4-month statutory period (as briefly extended voluntarily by carrier) during which, pending investigation, railroad was required to continue operation of interstate trains involved, the Commission's order was not accompanied by a report; purpose of instant report, therefore, is to set forth in detail the findings of fact and reasons for the conclusions on which the order is predicated. And, though hearings in the three §13a(1) proceedings were held before the same examiner and at same time and place as hearing in the §13a(2) case on proposed discontinuance of intrastate trains, railroad's request that report in latter case be issued jointly with that in the §13a(1) cases is denied. As a practical matter, joint issuance of timely decisions in all four dockets would be impossible in view of (1) the number of trains involved, (2) short period of time provided for determinations under §13a(1) and carrier's unwillingness to postpone discontinuances proposed thereunder while the §13a(2) case is decided, and (3) the unusually large record.—Boston & Maine Corp. Discontinuance, 324 I.C.C. 418 (419, 424).

Similarly, due to carrier's financial crisis and its urgent need for relief from undue burdens of intrastate passenger operations, it is most appropriate that order authorizing such relief should be issued immediately upon the Commission's determination that relief is warranted; report, issued pursuant to that order and following it as soon as practicable, is intended to describe circumstances upon which order is based, and provide findings of fact and conclusions as required by Administrative Procedure Act.—Id., 324 I.C.C. 705 (706).

Also motions to dismiss §13a(1) proceedings, filed by protesting parties on various grounds, are denied, as follows: (1) State's motion (for railroad's failure to sustain its burden of proof) when evidence of record is sufficient to support the Commission's ultimate findings and to satisfy the statutory standards; (2) individual protestant's (for lack of Commission jurisdiction and alleged unconstitutionality of §13a(1)) when petitioning railroad clearly is within §1(1)(a) and §1(3)(a) definition of a carrier subject to the Act and, while the Commission is authorized to administer §13a(1) and exercise powers defined therein, the question of its constitutionality is for another forum; (3) municipality's (insofar as operation of certain trains is intrastate) when, while §13a contemplates two kinds of trains—those operating between points in different States and those operating wholly within one State—trains in issue are in the first category, and are governed by §13a(1) only.—Id., 324 I.C.C. 418 (422-4).

State protestants' motions to dismiss §13(1) proceedings, denied, as follows: (1) as to contractual obligations with State authorities to continue operation of substantially all trains sought to be discontinued, the statute, being permissive and an alternative to State procedures, on its face and in its legislative history, indicates Federal jurisdiction should not be defeated by existence of these contractual obligations; and, (2) as to railroad's inclusion of unrelated trains in a single notice, since discontinuance of all trains is now being sought, Commission's simultaneous consideration of the three general service segments in which the trains operate will facilitate rather than impede determination; moreover, the Commission's rules are not to be read so literally as to interfere with reaching a just and timely decision on the broad issues.—New York, N.H. & H. R. Co. Discontinuance, 327 I.C.C. 151 (199-201).

Protestant's motion to dismiss the "application" in §13a(1) proceeding is inappropriate; once the Commission enters upon an investigation, it must determine whether continued operation of considered trains is required by public convenience and necessity and whether such continued operation will unduly burden interstate commerce. Granting a motion to dismiss would, in effect, discontinue the investigation without making the required statutory findings to support discontinuance of the investigation or to support an order requiring continuance of service. Grounds for the motion treated as argument of protestant that continuance of the trains should be required.—Southern Pac. Co. Discontinuance, 330 I.C.C. 685 (687).

Where two commonly controlled railroads seek discontinuance of three passenger train pairs, two of which operate over lines of one of the railroads wholly within a single state, carriers may elect to proceed before the Commission under §13a(1) rather than before the State body. Motion to dismiss the Commission's investigation of the intrastate portion denied.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co. Discontinuance, 333 I.C.C. 51 (55-7).

Protestant's motion to dismiss this proceeding is based on grounds that applicant failed to sustain the Commission's jurisdiction by its substitution of State-approved bus service for rail service disrupted by the burning of a trestle. Motion denied as such substitution was the only feasible solution and does not vitiate our jurisdiction.—Seaboard Coast Line R. Co. Discontinuance of Trains, 334 I.C.C. 337 (339).

Notice and supporting statement in all proceedings under §13a is required to be mailed to Governors and State commissions of all states involved in such proceedings. Although Commission did not reject the application herein, all concerned parties are warned that failure to timely mail such notice and statement may be grounds for initial rejection by this Commission.—Louisville & N.R. Co. Discontinuance of Trains, 334 I.C.C. 566 (567).

Commission construed the phrase "at least" in §13a as regards timely filing of notice to require that only the first day in the period of computation be excluded. Thus, applicant has given the full 30 days notice required by §13a and has successfully invoked the Commission's jurisdiction.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 874 (877).

Inasmuch as discontinuance in notices herein was to become effective more than 6 months from the date of our prior decision, report, and order, the Commission's jurisdiction has been properly invoked under §13a(1) which automatically restores jurisdiction to the States upon expiration of Commission's order requiring continuance unless carrier again invokes §13a(1) to supersede State jurisdiction. Inclusion of erroneous information as to scheduling of subject trains in discontinuance notice does not render such notice invalid inasmuch as 49 CFR §1122 does not require inclusion of scheduling information. Also, oral testimony establishes that applicant had properly posted its original notice of discontinuance containing said erroneous scheduling information and, since no such information is required, it is unnecessary to decide whether certification of a revised notice was proper.—Penn Central Transportation Co. Discontinuance, 336 I.C.C. 416 (418-20).

Notice to public that passenger train operations between Chicago, Ill. and Port Huron, Mich. proposed to be discontinued held to be precise and complete and without deception to the public despite applicant's failure to specify that subject trains also operate between points in Canada beyond Port Huron.—Grand Trunk W. R. Co. Discontinuance, 338 I.C.C. 254 (257-8).

Protestants' petition to dismiss this proceeding on grounds that applicant's refusal to voluntarily continue subject trains and the Commission's condensed hearing schedule deprived them of an opportunity for a fair hearing is denied inasmuch as the district court had provided the equivalent of an extension of its order restraining proposed discontinuance. Further, the Commission in empowered by §12 to obtain from carriers such information necessary to carry out its duties and therefore Commission's closed session meetings with officials of applicant do not constitute improper ex parte communications and are not a basis for the Commission to disqualify itself. Petitioner's reliance on 269 F. 2d. 221 is inapplicable as there is no allegation herein of private approaches to members of the Commission.—Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (384-89).

20. Showing required and burden of proof.—[Vols. 18, 19, 21].—Railroad's continued operation of two passenger trains between Aberdeen, S.D. and Deer Lodge, Mont. found not required by public convenience and necessity where record is persuasive that (1) consideration of a fare increase would not significantly affect carrier's losses, as fares would have to be increased 240 percent; (2) while carrier opened the territory traversed by the trains and people settled along its line, that does not obligate it to continue passenger service; and (3) various changes in service effected as result of prior discontinuance did not constitute a deliberate attempt to discourage travel because when the length of service was shortened, carrier properly considered a comparable reduction in equipment consist on the trains in order to reduce operating losses thereon, while still maintaining adequate service to the public.—Chicago, M., St. P. & P. R. Co. Discontinuance, 320 I.C.C. 566 (573, 577, 579, 585-7).

Furthermore, continuance of considered trains was not required for survival of fast, dependable mail, parcel post and express service. In handling the mail, the U.S. Government is the carrier (with the railroad acting only as its agent under a contractual arrangement) and, since it did not protest, it may be presumed that the Post Office Dept. will make other arrangements; and express traffic has declined as result of REA choosing other means of moving its traffic.—Id., pp. 580-1.

The issue of burden of proof in a discontinuance proceeding would be decisive only if no substantial evidence were adduced or if the evidence were equally balanced. Where neither of these conditions is present, the question of which party bears the burden of proof is of more theoretical than practical importance.—Louisville & N. R. Co. Discontinuance, 320 I.C.C. 669 (671).

Notwithstanding substantial increases in population in areas served by commuter trains to be discontinued, public patronage has declined steadily during the past 12 years. Protestants urge that the railroad has not encouraged use of the trains, nor attempted to generate more business by instituting a new stop at nearby NASA plant facility; however, when prospective passengers must be coaxed by advertising to use a particular commuter train they obviously have no urgent need for it. The evidence clearly shows that the railroad investigated every inquiry concerning service at the NASA plant without success, and in absence of assurances of additional passengers who would actually use such service, it could hardly be expected to assume substantial expenditures in purchasing additional equipment, construct station facilities, and revise its schedules, merely on a trial basis; moreover, its offer to provide service to the plant on a contractual basis was declined. —Id., pp. 674-5, 680-6, 691-2.

Protestants' evidence must be considered mainly in the light of the testimony of persons who actually depend on considered trains for essential transportation needs; and, in determining public convenience and necessity, needs of the entire public as distinguished from the relatively few must be the governing consideration. Accordingly, while residents of four small points served by the trains are without primary or secondary highways, have only the railroad's service available, and must use skiffs or other small boats to reach any highway, evidence established that daily average use of the trains in the preceding year was 1 and 1.5 passengers, respectively for two of those points and none for the other two.—Id., pp. 692-3.

In discontinuance proceedings the Commission may properly give varying weights to the carrier's overall prosperity in different situations. Where directly affected communities would be subject to serious injury and continuous operation would impose relatively light burden on a prosperous carrier, it may be given great weight; but where demands of public convenience and necessity are slight and the carrier may not justly be required to continue to bear financial losses of continued operation, its overall prosperity may be given little weight. Evidence is persuasive that public needs for considered commuter service is slight; and, notwithstanding the carrier's overall prosperity, evidence of its substantial losses from operation of the trains, decreasing use thereof and resultant dwindling of revenues therefrom, warrant finding that their continued operation would constitute an undue burden on interstate commerce.—Id., pp. 694-5.

The concept of public convenience and necessity in §13a proceedings has many facets. One is seen in the number of passengers using the railroad, but it is not necessarily controlling; there are others which, in circumstances here, may be of equal or greater importance. The many employees of businesses dependent on Boston & M.'s transportation, employees of the railroad itself, and all people whose jobs would be affected by collapse of the railroad or impairment of its service are to be considered. Discontinuance of certain passenger trains would require numerous commuters and travellers to change their riding habits and adjust to alternate service; however, with demise of the railroad, jobs would be lost, unemployment would be widespread, and serious dislocation of the area's general economy could occur. In the circumstances, public convenience and necessity requirements are not to be determined principally on basis of number of passengers who have been using considered trains.—Boston & Maine Corp. Discontinuance, 324 I.C.C. 418 (453).

Record makes it abundantly clear that the railroad needs substantial help at once, if its service is to remain available. Thus, since continued operation of considered interstate passenger trains, even under optimum conditions of service, fares and passenger-use, would, in the end, help no one, but would only increase the deficit and make certain carrier's quick demise, an unjust and undue burden on interstate commerce within meaning of the statute would thereby be created.—Id., pp. 452-3; similar conclusions concerning public convenience and necessity and carrier's financial condition made in intrastate discontinuance proceeding.—Id., 324 I.C.C. 705 (723-4).

While the railroad cannot long survive without outside assistance, salutary aid is available through its contract with new Massachusetts agency, MBTA, which would make direly needed working cash immediately available and probably assure a deficit-free passenger operation for the contract term, thus offering immediate possibility of rejuvenating the carrier. That help, and carrier's survival, might be out of reach if carrier is required to continue operation of all trains in issue; continuance of unnecessary service would constitute a drain on carrier's financial resources and impose an undue and unnecessary burden on interstate commerce, and is not justified by public convenience and necessity. Moreover, carrier can provide adequate service to meet the public needs with the trains ordered continued, and at the same time realize substantial economies essential to its survival.—Id., 324 I.C.C. 418 (439-40, 454).

Carrier's condition can no longer tolerate continuance of passenger operations that fail to contribute significantly to railroad upkeep. Total net loss on considered intrastate trains, almost $2 million per year, far exceeds losses on interstate trains considered in companion report; consequently, continuance of considered trains would impose even a greater burden on the carrier and upon interstate commerce. Since all of carrier's efforts to overcome the problem have been to no avail, elimination of that burden is required in order that the railroad itself may be preserved to provide essential services over the wide New England area for the hundreds of communities which are greatly dependent upon it for their economic well-being and general welfare. Public convenience and necessity certainly permits, even requires, discontinuance of intrastate trains in issue.—Id., 324 I.C.C. 705 (723).

While record does not support contention that railroad's freight service is "more essential" to New England than passenger service, evidence clearly shows that carrier is providing a greater quantity of passenger train service than is required by the public and that about 50 percent of its existing through train schedules are not really warranted by patronage requirements. In view of carrier's financial condition, continued operation of excessive train service, not realistically responsive to a public need, constitutes an undue burden on interstate commerce; therefore, a finding that there is no justification for allowing total discontinuance of railroad's passenger service does not preclude a finding that the dual criteria of §13a(1) may allow discontinuance of particular trains.—New York, N.H. & H. R. Co. Discontinuance, 327 I.C.C. 151 (203-5).

In balancing the public need for the service in passenger train discontinuance proceeding against the financial losses suffered by carrier in rendering that service, record shows the use of the service is relatively insubstantial in view of the area's population density and passenger traffic potentially available. Financial losses from the operations involved have been heavy over an extended period of time, the name of passengers has steadily declined, and continued operation of the trains at an uneconomic level constitutes an unnecessary and wasteful service; therefore, in view of proponent carrier's large system passenger deficit and its recent poor earnings record, evidence, as supplemented on further hearing, warrants conclusion that continued operation of two considered passenger trains is not required by public convenience and necessity and continued operation thereof would constitute an undue burden on interstate commerce.—Chicago, R.I. & P.R. Co. Discontinuance, 328 I.C.C. 278 (295-6)*.

Further, while passenger revenues cannot always be determined with mathematical precision, the computation thereof should present a reasonably close approximation of the actual revenues earned; carrier's application of the average fare per revenue passenger to the total number of revenue passengers handled on each conductor's runs, during the monthly study periods, in accordance with method found acceptable in prior discontinuance cases, produces that result. —Id., pp. 290-1.

Among factors to be considered in a train-discontinuance proceeding are the effect of the discontinuance upon the localities served, use the public presently makes of the service, availability of alternative transportation, and costs incurred and financial losses sustained by carrier in providing the service; but no factor, standing alone, is decisive; in addition, the burden imposed on the carrier and ultimately on interstate commerce must be considered in direct relation to need for the service which under certain circumstances justify continuance of service even at loss to the carrier. However, as to considered trains, carrier has incurred substantial and continuing losses which it can ill-afford in view of its precarious financial health, its heavy burden of long-term debt and fixed charges, and the need to preserve and improve its important freight operations as a commercial conduit to the economy of New England. Continued operation not required.—Boston & Maine Corp. Discontinuance, 328 I.C.C. 594 (600, 605, 607)*.

The unrebutted evidence shows that current and projected out-of-pocket expenses of operating considered passenger trains, exclusive of maintenance of ways and structures and joint terminal expenses, outstrip the revenues by a substantial margin; in addition, record shows a continuing increase in operating expenses, and no probative evidence supports the allegation that decline in patronage is attributable to failure on part of applicant to maintain high standards of service, nor is there foundation for criticism of train schedules, since scheduling is dictated by head-end services. Balance lies in favor of permitting discontinuance of two trains. Authorized.—Louisville & N.R. Co. Discontinuance, 330 I.C.C. 551 (560-1).

Despite the fact that the California Zephyr moving between San Francisco and Salt Lake City has 78.2 percent passenger capacity and in summer virtually full capacity, the passenger deficit is approximately $560,000, not including maintenance and repair costs on a long-term basis. However, record is not persuasive that carrier's loss experience is hopeless and, since 135,000 people travelling on considered trains each year enjoy some of the most spectacular scenery in the country, public convenience and desire, rather than necessity or essentiality, require continuation of the service. Continued operation of subject trains for period of one year required.—Western Pac. R. Co. Discontinuance, 330 I.C.C. 577 (584, 586-7, 589).

Certain criteria and factors involved in determining public convenience and necessity in passenger train discontinuance cases under §13a are similar to those applied in rail abandonment proceedings under §1(18); and, with respect to such similar factors, the precedents applicable to abandonments usually apply in discontinuance cases; such factors include population of the service area, patronage of the service, public and private alternate transportation available to the territory, financial results of operation, and financial condition of the carrier.—Southern Pac. Co. Discontinuance, 330 I.C.C. 685 (704).

While continuation of commuter services by a trunkline railroad may be a hardship if not a burden, the commuter is an important patron since his travel is related to his working day and he is a regular, rather than an occasional customer; his needs may not be downgraded because his trip is short or unprofitable. And, in considering proposed discontinuances of the early inbound and late outbound commuter trains (operating at a loss of $32,000 annually) and the rescheduling of two remaining trains, evidence shows that the trains are fully occupied with standees on all except the late evening train; that the proposed change will result in further curtailment of service because the early inbound and late outbound trains do not carry passengers in the same direction and rescheduling of the remaining trains may be less attractive to present riders; that alternate services do not fulfill demonstrated needs; and that most patrons prefer a reasonable fare increase rather than discontinuance. Continued operation under existing schedules is required for one year.— Pennsylvania R. Co. Discontinuance—Chicago & Valparaiso, 331 I.C.C. 464 (473-5).

Although offered too late for cross-examination, the following exhibits were properly received into evidence: (1) work papers depicting methodology of financial analyst in calculating distribution of revenues and avoidable costs among three train pairs when operated by two railroads, received as detailed explanation which would tend to minimize cross-examination; (2) letter by city council member asserting that she did not authorize the mayor to represent her as favoring discontinuances, received as a statement of position; and (3) a letter from REA Express advising discontinuing use of considered trains at a future date, received as a late-filed exhibit. However, evidence of amounts paid as crew wages calculated by unidentified persons, as represented in appendix to protestant's brief, was stricken as unsupported by the record.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co. Discontinuance, 333 I.C.C. 51 (54).

In considering whether the two trains should be discontinued, it is impossible to determine the operating losses, if any, where (1) passenger revenues should be substantially greater than carrier's projections based on the first 4 months of 1968, (2) expenses applicable to "deadheading" diesel unit not needed to move one train are not properly chargeable and (3) joint-facility expense is overstated due to including such diesel unit as a part therein. Moreover, since over 100,000 passengers a year use the limited capacity trains and since carrier's system retains the mail and express revenue, railroad has the financial capacity to support passenger operations. Further, fact that application was filed almost immediately following the diversion of all headend revenues from considered trains to the new, solid mail and express train service (which was done at carrier's suggestion), record does not provide a basis for reaching a conclusion as to the actual operating results under the new arrangement. In view of the profitable operations in the past and carrier's favorable financial position, continuance of both trains is required for 9 months.—Pennsylvania N. Y. Central Transp. Co. Discon., 333 I.C.C. 638 (643-5, 647-9, 658-61).

Carrier's showing of financial losses on operation of trains involved herein is not controlling evidence supporting discontinuance as the record clearly shows that carrier has deliberately downgraded its service to discourage passengers and the Commission cannot find the burden on interstate commerce to be "undue" under §13a if such burden is voluntarily created by the carrier (see 320 ICC 319).—Southern Pac. Co. Discontinuance, 333 I.C.C. 783 (799).

Public need for subject trains' service is reflected in the number of passengers who use the train and not necessarily by the number of witnesses who appear at a hearing.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 874 (896).

Although unable to find that applicant has deliberately downgraded its service, the Commission found that applicant's lack of concern as reflected in condition of subject service (especially on-time performance) so as to preclude a finding that declining patronage represents a diminishing public need for service.—Illinois Central R. Co. Discontinuance of Trains, 336 I.C.C. 601 (616).

21. Other service available.—[Vols. 19, 21].—Discontinuance of indicated passenger trains between Omaha and Lincoln, Nebraska approved as patronage of the segment is meager and can be satisfactorily served by other trains of applicant or by alternative means of transportation available between those points.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 248 (258).

In view of the alternate service already available, it is apparent that the train passengers can obtain transportation to and from work without operation of the Boston & M. passenger trains in the 9 intrastate service areas. Some adjustment will have to be made; some inconvenience is likely and perhaps some hardship; but these factors become subordinate when measured against the drastic effect that loss of the entire railroad would have upon the economy of the New England area served by it.—Boston & Maine Corp. Discontinuance, 324 I.C.C. 705 (720).

22. Continued service needed.—[Vols. 19, 21].—Public convenience and necessity and undue burden criteria of §13a(1) are not confined to whether a given train, in fact, produces an operating deficit. Other factors to be considered are railroad's financial condition, its continuing deficits, its lack of capital to renew its existing facilities, diminishing patronage, and increasing competition from other media, as well as its strategic service value to a vast general public; and specific characteristics of each train include average patronage, average revenues, frequency, convenience of schedule, usage by commuters, usage in through connecting train service, and availability of comparable train service. Continuation of those train services which are essential to meet the demonstrated needs of the public and appear to have sufficient potential for being economically viable is required.—New York, N.H. & H.R. Co. Discontinuance, 327 I.C.C. 151 (205).

Inasmuch as the 135,000 people who travel on the California Zephyr between San Francisco and Salt Lake City each year enjoy some of the most spectacular scenery in the country, and discontinuance of those two trains would no doubt require discontinuance of connecting railroads' operations of the Zephyr trains between Salt Lake City and Chicago, public convenience and desire, rather than necessity or essentiality, require continued operation of considered trains for one year. Carrier's financial condition is stronger as result of higher earnings during past several years, its current predicament results from upward spiral of operating costs, not from its lack of diligence; and record is not convincing that material improvement in its loss experience is hopeless. However, at the end of one year, another notice of discontinuance can be filed and, if there is no material improvement, the Commission might have no alternative to permitting discontinuance of the Zephyr trains.—Western Pac. R. Co. Discontinuance, 330 I.C.C. 577 (586-7, 588).

Although, at this time, continued operation of considered trains for one more year would not constitute an undue burden on interstate commerce, four possible developments which would reduce or eliminate the burden are suggested as methods of material improvement: (1) the divisions of revenues between connecting carriers may be inequitable and, therefore, the Commission is concurrently instituting an investigation under §15(6) to determine and possibly prescribe equitable divisions; (2) the Post Office Department may decide to provide carrier with sufficient mail business to reduce the losses; (3) in view of the interest of public agencies and officials, public authorities will be given a year to implement programs of assistance to preserve the service; and (4) carrier itself should exhaust all possibilities of self-help, such as negotiations for more efficient use of personnel and changing of fares to receive more benefit.—Id., pp. 579-80, 588-9.

Although the early inbound and late outbound commuter trains to be discontinued are operating at a loss of $32,000 annually and the two remaining trains are to be rescheduled, continued operation under existing schedules of the four trains is required for one year where (1) the annual loss from operating the four trains averages $8,000; (2) trains are well patronized with daily standees except on the late outbound train; (3) survey shows good proportion of riders desire operation under existing schedules; and (4) many patrons will suffer hardships under applicant's proposal.—Pennsylvania R. Co. Discontinuance—Chicago & Valparaiso, 331 I.C.C. 464 (474-5).

Where two commonly-controlled railroads, seeking discontinuance of their last three pairs of passenger trains, have good overall profits and are financially healthy and despite the loss of all RPO mail cars and express traffic or that annual losses could amount to $480,000 from operating a single train pair, public convenience and necessity require operation of one pair of trains between Kansas City, Mo., and New Orleans, La., for 6 months to determine how anticipated losses relate to the public need.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co. Discontinuance, 333 I.C.C. 51 (65-6, 71-2).

Continued operation of carrier's "Portland Rose" trains between Kansas City, Mo., and Portland, Oreg., is required for 1 year where the public is left without satisfactory alternate service because of the severe nature of the terrain traversed, the inaccessibility of certain areas, and the weather; moreover, the majority of patrons cannot utilize railroad's luxury train whose transcontinental characteristics are undesirable. Further, despite an estimated loss of $1.7 million due to the transfer of all mail and express to other modes in early 1968, record shows 62,500 passengers a year patronize these trains in each direction, averaging 172 passengers per train trip and 40 passengers per train mile. However, additional passenger traffic to offset reduced revenue may be realized from transfer of patronage from other train discontinuances, increased population, and faster service because of elimination of headend traffic. Moreover, fact that carrier had not suffered any losses in past operating periods as well as its strong financial position precludes a finding that continuance of considered trains would unduly burden interstate commerce. —Union Pacific Railroad Company Discontinuance, 333 I.C.C. 348 (352-4, 368-9).

Although convenience and necessity warrants a finding that carrier's two night trains be discontinued, nevertheless, continued operation of its two day trains is required for a 1-year period during which time the public will be able to demonstrate by its patronage whether continued service will be essential to its needs. Record shows considered trains transported over three times the revenue passengers carried on the night trains; half the stations they serve would be without alternate rail transportation; and continued operation would provide morning and evening service from both Kansas City and Omaha to meet the public need. Moreover, the carrier is financially healthy. Therefore, despite the fact that loss of mail and express revenues will result in a projected out-of-pocket loss of $232,100, continuance of considered day trains is required.—Chicago, B. & Q. Ry. Co. Discontinuance, 333 .C.C. 395 (402-3, 405-7).

While the two considered trains have been operating at a loss, more recently aggravated by discontinuance of mail and express traffic, fact that they transport over 53,000 revenue passengers a year or an average of 73 persons per trip over the 140 miles traversed between Chicago, Ill., and Madison, Wis., is of some consequence. Even more meaningful is fact that weekend and other high-peak periods account for 57 percent of the trains' total traffic. Thus, weighing the demonstrated public use of the trains during such periods against an estimated annual loss of less than $30,000 reflecting week-end operations only as compared with the estimated annual loss of $126,000 based on full-time operations, continuance of considered trains between the two terminal cities on reduced or limited schedules is warranted.—Chicago, M., St. P. & P.R. Co. Discontinuance, 333 I.C.C. 466 (471, 479, 482-3).

Continued operation of certain east-west trains between New Orleans, La., and Los Angeles, Cal., is required as these trains provide the last reasonably direct rail passenger service between these two cities, provide the only such service at various intermediate points, and have received substantial continuing patronage. Operation ordered continued for 1 year. Record is convincing that Southern Pacific has deliberately downgraded service on its trains between New Orleans and Southern California and thereby forfeited its claim that financial losses it helped to create are an undue burden upon interstate or foreign commerce.—Southern Pac. Co. Discontinuance, 333 I.C.C. 783 (798-99, 800).

Operation of one train providing passenger service to and from Gilman, Ill. ordered continued for 1 year as record indicates a need for such service by residents of Gilman. However, discontinuance of another train serving Gilman approved as its operation was found superfluous.—Illinois Central R. Co. Change in Service, 333 I.C.C. 806 (813).

Operation of two daily trains between Harrisburg, Pa. and Buffalo, N.Y. ordered continued for 6 months on an alternate-day basis, Such partial discontinuance will significantly reduce operating deficits but will not adversely affect revenues or public interest as this is last remaining passenger service between these two points and patrons have "no place else to go".—Penn Central Co. Discontinuance of Trains, 334 I.C.C. 312 (334-6).

Considered in the light of Norfolk & W.'s overall prosperity, losses being incurred from operation of its trains between St. Louis and Detroit (the only remaining noncircuitous passenger trains between those cities), while not insubstantial, are not so great as to create an undue burden on interstate commerce. That considered trains meet a necessary and continuing public need is amply shown by the intense interest, and testimony, of the public witnesses and, also, by the fact that a substantial number of passengers still patronize the trains, especially in traveling to and from rather sizeable intermediate points. While available alternate service between Detroit and St. Louis appears reasonably adequate, alternate service between the terminals and intermediate points is not nearly as desirable or adequate. There is no alternate service which parallels route of the trains; many intermediate points are not on existing bus routes, others have only limited bus service with infrequent schedules, and available air service is not convenient to many of them. Therefore, continued operation of considered trains, for a 1-year period, is required.—Norfolk & W. Ry. Co. Discontinuance, 334 I.C.C. 506 (511-12, 522-3)*.

Operation of subject trains herein ordered continued for 1 year as they represent the last remaining rail passenger service between Flomaton, Ala. and Chattahoochee, Fla. and their elimination would significantly damage the through service of which they are an integral segment as well as destroying the last transcontinental service between Los Angeles, Calif. and Jacksonville, Fa. Applicant's financial losses are outweighed by the public need.—Louisville & N. R. Co. Discontinuance of Trains, 334 I.C.C. 566 (583).

Discontinuance of two passenger trains between Cumberland, Md. and Parkersburg, W. Va. approved as these trains operate at a substantial loss and record shows an insignificant number of passengers who may be adequately served by other of applicant's trains or by alternative carriers with little inconvenience. Fact that applicant's overall system is profitable is not controlling absent demonstrated need for service.—Baltimore & O. R. Co. Discontinuance of Trains, 334 I.C.C. 689 (703).

Inasmuch as patronage of last remaining passenger trains between Kansas City, Mo. and Tulsa, Okla. herein has been substantial and has remained reasonably constant for the past 5 years, applicant's financial losses are outweighed by continuing public need for service, especially in view of applicant's overall prosperity. Operation ordered continued for 1 year.—Atchison, T. & S. F. Ry. Co. Discontinuance of Trains, 334 I.C.C. 735 (745-7).

Operation of subject trains between Chicago, Ill. and Lincoln, Nebr. ordered continued for 8 months in view of these trains' heretofore profitable operations; applicant's failure to support its projected financial losses with acceptable data; significant patronage of these trains; applicant's deliberate downgrading of service; and the good financial position of applicant.—Chicago, B. & Q R. Co. Discontinuance of Trains, 334 I.C.C. 874 (897).

Operation of subject trains between St. Paul, Minn. and Seattle-Tacoma, Wash. ordered continued for 1 year as applicant was found to have discouraged passengers through its deliberate downgrading of service and therefore, it cannot be found that the public has abandoned its need for these trains, a view supported by large number of public witnesses opposing discontinuance. —Northern Pacific Ry. Co. Discontinuance of Trains, 336 I.C.C. 7 (38-40).

Operation of subject trains between Madison, Wis. and Chicago, Ill. ordered continued for 1 year. Applicant has received a satisfactory level of patronage for the reduced schedule on which these trains operated during a 1 year study period ordered in a previous proceeding.—Chicago, M., St. P. & P. R. Co. Discontinuance of Trains, 336 I.C.C. 105 (116).

Operation of one set of the last two sets of trains between Omaha, Nebr. and Kansas City, Mo. ordered continued for 1 year inasmuch as discontinuance of both sets of trains would remove the last passenger trains between the two termini. Both sets now operate at a loss but removal of one set and consequent increase in patronage on the remaining set will substantially reduce applicant's projected loss.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 336 I.C.C. 159 (172-3).

Operation of subject trains ordered continued for 9 months inasmuch as public use is significant especially in view of applicant's lack of facilities, the sparse population of the area served, and the inadequate alternative modes of transportation. Also, applicant's sound financial position and future introduction of service from Harrisburg to Phila., Pa. requires such continuation.—Penn Central Transportation Co. Discontinuance, 336 I.C.C. 416 (449-450).

Operation of subject trains ordered continued for 6 months in view of the heavy public reliance on the present service and the fact that the overall operation of these trains is conducted at a considerable profit. —Chicago South Shore & S.B.R. Discontinuance, 336 I.C.C. 454 (467-8).

Operation of subject trains between Pittsburgh and Philadelphia, Pa. ordered to be continued inasmuch as patronage, although declining, remains substantial; alternate service appears inadequate; and the financial loss through continued operation is substantially less than applicant projected and is not a burden on interstate commerce.—Penn Central Co. Discontinuance of Trains, 336 I.C.C. 518 (526-7).

Operation of subject trains ordered continued between Chicago, Ill., and Carbondale, Ill., for 1 year as testimony herein indicates a public need, especially by university students, for continuation of service between these two points and alternate means of service available are neither practical nor convenient. However, a portion of these same subject trains' service, between Carbondale and Memphis, Tenn., is ordered discontinued for lack of public need.—Illinois Central R. Co. Discontinuance of Trains, 336 I.C.C. 601 (615).

Commission ordered continuance of 20 of 34 trains involved herein in view of substantial passenger usage and the increase in revenues resulting from an intercity passenger fare increase and discontinuance of the 14 other trains considered herein.—Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (471-78).

Commission held that approximately half the trains sought to be abandoned should be retained due to inadequacy of other modes of transportation, possible further erosion of patronage reduced schedules would cause, and probable detrimental impact on the environment.—Chicago S.S. & S.B.R. Restructuring of Pass. Serv., 342 I.C.C. 154 (186-196).

Feeder value.: [Vols. 19, 21].—Operation of two trains between Florence, S.C., and Augusta, Ga., ordered continued for 9 months. Record shows that these trains furnish last rail passenger service between these two cities and their main worth is the feeder value to the through coach and sleeping car service to and from the Washington-New York area and such need outweighs applicant's financial losses.—Seaboard Coast Line R. Co. Discontinuance of Trains, 334 I.C.C. 337 (348-49).

25. Losses from operation.—[Vols. 18, 19, 21].—See also Illinois Commerce Commission v. United States, at n. 15 *supra;* Pennsylvania N.Y. Central Transp. Co., at n. 20 *supra;* and Union Pacific Railroad Company Discontinuance, at n. 22 *supra.*

In §13a(1) proceeding the use of systemwide expenses in making appropriate allocations with respect to those particular expenses which are not itemized in the carrier's accounts is permitted. Also, carrier's freight revenues earned on the line need not be considered; and, decision in 210 F. Supp. 675, cited by protestants in support of contention to the contrary, is without merit inasmuch as that case, on appeal before the Supreme Court, involves a §13a(2) proceeding.—Chicago, M., St. P & P. R. Co. Discontinuance, 320 I.C.C. 566 (572, 584-5).

Although the railroad has increased commuter fares between points served by the trains to be discontinued since the prior decision involving the same trains, 307 ICC 173, wherein it was found that operation between Ocean Springs and Pas Christian, Miss., was not required by public convenience and necessity but that existing public need required continued operation between latter point and New Orleans for a period of 1 year, improved operating results optimistically anticipated in that report have not materialized. Unrebutted evidence shows that out-of-pocket costs far exceed revenues accruing from operation of considered commuter trains.—Louisville & N. R. Co. Discontinuance, 320 I.C.C. 669 (673-6, 690).

Carrier continued operation of the trains for over 3 1/2 years after expiration of the 1-year period previously required, and although population increased in the area served, use of the trains substantially declined—from a daily average in 63 to an average of 38 passengers in last 5 years. Despite reduction in mileage and increased fares, revenue provided by considered trains has continued to decline while out-of-pocket losses have steadily increased thus, it is clear that the hoped for "break-even" point in annual operating results has not been achieved. Residents in the area have had ample opportunity to demonstrate, by regular patronage, that continued service is essential to their convenience and necessity; this they have failed to do. Evidence of carrier's substantial losses from operation of the trains, the decreasing use thereof, and resultant declining revenues, warrants finding that no public need exists for the commuter service and that continued operation of the trains would constitute an undue burden on interstate commerce.—Id., pp. 690-5.

In considering proposed discontinuance of all of carrier's interstate passenger service except on Connecticut River line, (cost and revenue data being considered on basis of service areas rather than individual trains and passenger data being appraised on the basis of service area and individual train and station), evidence is conclusive that carrier cannot continue to provide service without immediate and substantial help.—Boston &

Maine Corp. Discontinuance, 324 I.C.C. 418 (425, 441-51, 452).

Record shows that carrier has exploited all means for reducing costs and maximizing revenues but still is unable to stem the outflow of cash; its working capital is in a deficit position and available cash is so low that a single emergency could bring entire railroad to a standstill. The fact that the annual passenger deficit probably could not be brought below $2 million, coupled with persistent overall heavy losses for many years, extremely critical working capital position, and restless creditors, make bankruptcy almost a certainty, unless substantial relief is given immediately. Discontinuance authorized, except as to certain daily commuter-train service.—Id., pp. 427, 429-33, 442, 455.

With the intrastate train discontinuances authorized, and that authorized in companion case (324 ICC 418) involving interstate trains, most of the system costs allocable to passenger service would probably be saved; and substantial part of saving would be allocable to the intrastate trains involved. Consequently, in carrier's unique situation, overall savings attainable from discontinuances in the 9 intrastate service areas, are likely to well exceed the $2 million per year. Fare increases cannot be expected to offset the deficit because the large increase required would undoubtedly produce a significant drop in patronage. In view of the carrier's strained financial condition, its minimal cash reserves, heavy capital debt payments, and its recently declining freight revenues, service reduction and fare increases do not, in themselves, offer a practical alternative to discontinuance.—Id., 324 I.C.C. 705 (710, 714).

The total net loss on intrastate trains, almost $2 million per year, far exceeds the losses on interstate trains; consequently, continuance of the trains in issue would impose an even greater burden upon the carrier and upon interstate commerce. Elimination of that burden is required in the public interest in order that the railroad itself might be preserved to provide essential services over the wide area of New England for the hundreds of communities therein which are greatly dependent upon it for their economic well-being and general welfare. Public convenience and necessity most assuredly permits, even requires, the discontinuance of trains.—Id., p. 723.

In its study of rail deficits from passenger operations in 306 ICC 417 and 313 ICC 411, the Commission, recognizing that railroads with heavy passenger obligations have an urgent need for assistance at both State and Federal levels if solution to the problem is to be achieved, concluded that preservation of a railroad's essential transportation services depends in the final analysis upon the cooperative effort made by all having a stake in the carrier's survival. The action by the Commonwealth of Massachusetts in providing for the demonstration project of the Mass Transportation Commission and the creation of the MBTA is an example of what the Commission was advocating. This type of local action affords the people of a metropolitan area the opportunity to preserve for themselves desired rail passenger service, while making possible the retention of a distressed carrier's service necessary to the general welfare. Adjacent communities, as well, may benefit by voluntary participation. Plans of this nature might well bear emulation by other localities similarly situated.—Id., p. 724.

Hypothetical income statement showing the operating consequences of a theoretical "freight only" operation is of little more assistance than similar operating results shown in railroad's Form A annual report since in essence it is an "office analysis" intended not to show the actual costs which would be eliminated by discontinuance of passenger service but rather to estimate, from books of account, the total revenues and expenses which would not have appeared in carrier's 1964 income accounts; moreover, to convert into a freight only railroad, a substantial period of time would be needed to adjust its labor force, plant, and operating facilities for performance of those more limited operations. Furthermore, the similarity in net result between the special study and its Form A annual report and the fact that the special study projects a reduction in those expenses now common to both passenger and freight services, run contrary to accepted theory concerning the separation rules.—New York, N.H. & H.R. Co. Discontinuance, 327 I.C.C. 151 (190-3).

Similarly, the special study designed to show the effect on revenues and expenses of superimposing upon the hypothetical 1964 "freight only" operations a suburban passenger service between New Haven and Grand Central Station is rejected, since a more reliable method would be to compute the actual "avoidable costs" resulting from discontinuance of service east and north of New Haven, which area constitutes a potentially severable operating segment with separate revenue and cost characteristics. And, to the extent the projected $7.3 million annual "deficiency" in income includes $5.6 million in allowance for return on investment, at 6 percent, is utilized as an indicator of a desirable minimum level of income, there is no objection; however, a 6 percent "return" on investment is not a specific cost contributory to the "passenger deficit" as projected in the special study.—Id., pp. 194-5.

Although the Bureau of Enforcement's study to show financial results of carrier's passenger operations for 1964 based on fully allocated costs at varying levels of costs and separated as to principal groups of involved trains provides a useful starting point in determining relative burden represented by each segment, it is not conclusive because it does not determine costs as actually incurred by the particular segments of service, either on the basis of an avoidable cost analysis or an engineering study of the particular operations involved.—Id., pp. 196-7.

Terminal income of tenant and joint user in common is a relevant factor in estimating the "undue burden" for purposes of §13a proceeding and in determining the level of carrier's ultimate "passenger deficit", regardless of whether such income is transportation or non-transportation revenue. Under the terminal arrangement New Haven's actual costs and its net income are computed on a basis governed by the frequency of its passenger car entrances to the terminal itself; thus, its proportionate operating costs in using the terminal are offset to the extent that the income reduces the joint facility costs. Therefore, if its passenger service were discontinued, all of its income from this source, with one exception, would cease.—Id., pp. 198-9.

While average train mile revenues, by themselves, are not reliable quantitative measures of profitability, they have value as broad gauges of a train's potential for profit and earnings comparability within a given system of passenger service. And, although certain of considered trains show comparatively large train mile earnings for head-end revenues, nevertheless, considering their scheduling and patronage, and the availability to this traffic of other trains at comparable scheduling, head-end revenue considerations do not justify continued operation of those trains in passenger operations; however, imaginative management is admonished to find adequate means and methods of preserving such income to the corporation. —Id., pp. 215-16.

While joint facilities expenses proven savable have been acknowledged as such in most §13a cases dealing with the issue, the confusion caused by disparity between two lines of decisions (one line using a rule under which such expenses are acknowledged as savable and the other cases not applying that rule) should be dispelled. Therefore, on further consideration, the Commission concludes that it is error to disallow an expense shown to be savable. Reason and logic require that a proven fact be acknowledged; and in all §13a cases, joint facility expenses should be allowed as prospective savings where supported by specific and concrete proof. Furthermore, when such expenses (so supported) are allowable, fact that savings to proponent carrier might result in shifting expenses to other carriers using the facility or in creating an undue burden on interstate commerce is a matter wholly unrelated to whether proponent will realize a saving. However, in some instances, it may be appropriate to weigh proponent's total burden (including avoidable joint-facility expenses) against the burden thrust on the other carriers.—Chicago, R. I. & P. R. Co. Discontinuance, 328 I.C.C. 278 (286-7)*.

Even though applicant, in its data showing financial results of operation, failed to include net gain realized from piggyback and piggyback feeder operations on trains to be discontinued, and there is precedent for its position that the Commission's accounting regulations preclude it from crediting to those trains any net gain realized from the piggyback traffic hauled thereon, inclusion of those items would only serve to reduce the net operating loss and such reduction would not affect ultimate conclusion; nor would fact that systemwide its overall operations, freight and passenger, are profitable alter the situation. Continued operation of two passenger trains is not required.—Louisville & N. R. Co. Discontinuance, 330 I.C.C. 551 (557, 561).

Although the two passenger trains to be discontinued clearly are responsible for some portion of carrier's track-maintenance costs, record does not show whether unit cost used in computation thereof resulted from a prior joint study, a compromise, or an approximate figure agreed on as a result of that study and, in absence of a showing of actual savings to be realized, the $115,900 claimed as expense of track maintenance must be disallowed; savings of such nature are imprecise and cannot be treated as out-of-pocket expenses which would be eliminated by discontinuance of individual trains. However, giving effect to revenue changes and adjustments, carrier's projected 1967 operating deficit on an avoidable cost basis approximates $560,000 without considering anticipated increases in such costs as wages and rehabilitation of equipment; and such projected passenger deficit is not relatively small in relation to carrier's net income for the years 1964 and 1965.—Western Pac. R. Co. Discontinuance, 330 I.C.C. 577 (581, 583, 587).

In addition, the projected passenger deficit does not disclose true dimensions of carrier's problem; the California P.U.C. estimates that its deficit, computed on a long-term basis, is $1.2 million a year; also, maintenance and repair costs will mount as equipment needs replacement and the carrier's estimate of expenditures required in the near future for renovating, modernizing, and replacing equipment is essentially unrebutted. However, the passenger service losses result from upward spiral in costs of operation and carrier's reluctance to make large capital investments, not from lack of diligence on its part; and record is not convincing that the service is not economically viable, nor does it show that material improvement in carrier's loss experience is hopeless.—Id., pp. 587-8.

The undue burden on interstate commerce attributable to passenger trains to be discontinued is the out-of-pocket loss generated by operating those trains plus the benefit, or minus the loss, to system revenues upon discontinuance thereof. To determine this the Commission examines the out-of-pocket financial operating results of considered trains; also the pro forma results (including the net revenues from traffic to be retained and transported on carrier's remaining trains and the net feeder revenues to be lost to the remaining service upon discontinuance) of proposed discontinuance on system operations of the railroad are considered to determine if an adverse effect upon system revenues and operations might nullify the savings upon discontinuance, thus continuing the burden on interstate commerce.—Southern Pac. Co. Discontinuance, 330 I.C.C. 685 (701, 708).

Many principles governing computations of revenues and expenses in railroad abandonment cases under §1(18) are equally applicable to passenger train discontinuances under §13a; but, unlike abandonments where operating results of both passenger and freight service are examined, in discontinuances of conventional passenger trains it is only the passenger train operation and service that is involved. However, since considered trains are mixed trains, performing both freight and passenger service, the financial results of operation are properly computed from passenger train revenues and expense, and should exclude all freight revenue and expense. Record is convincing that continued operation of the two considered trains would constitute an undue burden on carrier and on interstate commerce.—Id., pp. 703-5, 710.

Since mail and express services on considered trains accounted for 86 percent of revenue in the two years preceding their diversion to other modes and since losses for 1968 without such revenue will exceed $1 million, continued operations of the six trains will unduly burden interstate commerce. Moreover, while a few riders may suffer inconvenience, the record is clear that adequate alternate public transportation service is available from four passenger trains operating daily between St. Louis, Mo., Fort Worth, Tex., and New Orleans, La., in addition to bus service reflecting approximately the same time schedules as the subject trains. Further, although some 45 witnesses testified, only about one-half actually used considered trains; therefore, discontinuance of such trains is allowed. —Missouri Pac. R. Co., Texas & Pacific R. Co. Discontinuance, 333 I.C.C. 419 (427, 436-8).

Proposed discontinuance of 2 trains between St. Louis, Mo. and Fort Worth, Tex., approved. Evidence clearly shows that applicant's loss of mail transportation revenues causes substantial deficits that a steadily declining passenger use cannot reverse. Applicant's proposal to add passenger stops to its remaining trains, the existence of alternative common carrier transportation, and lack of evidence of deliberate downgrading of service further support discontinuance. Although Commission is mindful of prior decisions stating where a railroad retains mail revenues in freight service, its financial capacity to support passenger operations may not be altered, the railroad herein historically realized insignificant amounts of passenger revenue.—Missouri Pac. R. Co., Texas & Pacific Ry. Co. Discon., 333 I.C.C. 820 (837-39).

Operation of indicated trains betweeen Galesburg, Ill. and Omaha, Nebr. ordered continued for 1 year as record indicates that passenger patronage, although declining, remains substantial. Also, return of storage mail traffic and the reduction of overstated loss factors will decrease projected revenue loss substantially.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 248 (258).

Applicant's estimate of achievable savings through elimination of train crews does not reflect the "protected" status of these employees under prior labor agreements which guarantee these employees stated compensation in event of transactions such as herein. Avoidable labor expenses are thus overstated in this respect as well as others indicated and are hence unacceptable.—Penn Central Co. Discontinuance of Trains, 334 I.C.C. 312 (333).

Railroad's data on operating results show that losses from operation of passenger trains it proposes to discontinue have increased greatly in the last 4 years, primarily because of decline in revenues; that the losses in mail and express revenues far exceeded the cost reduction of about $200,000 carrier was able to achieve from curtailed services; and that its revenue from passengers declined almost 20 percent during the same period. Considering the revenues and expenses shown for operation of those trains during the last 2 years, the revenue figures are not questioned since revenue, as reported, is the actual revenue from the trains; and, following an approved method for developing expense items, the expenses, as shown, are actual to the extent that they are available, and based on system average unit-expense data where actual figures were not available. Since the record contains adequate evidence of such expense items, it is concluded that the railroad had losses of $460,243 in 1967, and $576,466 in 1968, from operation of the two trains involved.—Norfolk & W. Ry. Co. Discontinuance, 334 I.C.C. 506 (512-15)*.

But precise amounts of loss cannot be determined on the present record, since the amount which could be saved if the trains were discontinued presents a question. For example, in the repair of locomotives and passenger cars, carrier shows savable expenses of $106,664 and $113,495 for 1968 which, in turn, are based on system average unit-expense figures. A comparison of total locomotive-miles or car-miles for 1967 and 1968 with the dollar amounts for repair charged against the respective years is indicative of whether such expenses can be reduced in proportion to the reduced number of work units involved; and those data indicate that neither the locomotive, nor passenger-car, repair expenses vary directly with the comparable total miles. However, a number of variables are involved and, while it is not possible to evaluate what portion of the expenses would be savable, the data indicate a correlation exists between operating reduced numbers of locomotive-miles and car-miles. Use of a factor of about 20 percent, to eliminate the "overhead" in accounts based on unit-expense data, would reduce repair expenses shown by about $44,000; and, if similarly adjusted, carrier's claimed operating losses would be reduced by about $64,000.—Id., pp. 515-16.

Proposed discontinuance of two passenger trains between Richmond, Va. and Atlanta, Ga. approved in view of staggering financial losses to an applicant whose financial position has steadily declined and the very small number of passengers who may be adequately served by alternative modes of transportation.—Seaboard Coast Line R. Co. Discontinuance, 334 I.C.C. 759 (775).

Discontinuance of two trains between Kansas City, Mo., and New Orleans, La., approved as applicant is suffering substantial financial losses and the minimal public need for this service may be met by alternative common carrier services. The prior case in which the public need was shown to require continued operation of the subject trains is not controlling herein inasmuch as the basic findings therein that patronage of the subject trains would increase upon discontinuance of competing trains has been clearly shown to be wrong.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co., 334 I.C.C. 807 (820, 822).

Carrier's filing of application for discontinuance is based on anticipated future operating losses from the elimination of mail and express revenues. In absence of evidence as to actual experience in operations under new arrangement, record does not provide a basis for a conclusion as regards the financial state of applicant after elimination of such revenues.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 874 (897).

Inasmuch as applicant is in strong financial condition, in part due to land grant holdings, and as its passenger revenues would have been more substantial in the absence of its deliberate downgrading of service, Commission cannot find applicant's undeniable losses to be an undue burden on interstate commerce.—Northern Pacific Ry. Co. Discontinuance of Trains, 336 I.C.C. 7 (40-41).

Subject trains operate at a substantial loss due to drop in mail revenues and a decline in passenger revenues. Remaining mail revenues are insufficient to support passenger operations and passenger revenues would have to double to offset losses. There is no probative evidence of downgrading of service and, accordingly, operation of subject trains is ordered discontinued.—Erie Lackawanna Ry. Co. Discontinuance of Trains, 336 I.C.C. 206 (234-5).

Discontinuance and reduction in service sought herein of subject passenger trains between Springfield, Mass. and Hartford, Conn. approved inasmuch as evidence is uncontroverted that applicant's deficit from such service is inordinately high and may be reduced by approval herein and in view of applicant's overall financial condition which requires appropriate remedial action.—New York, N.H. & H.R. Co. Trustees Discontinuance, 338 I.C.C. 23 (41).

Commission approved discontinuance of subject trains between Chicago, Ill. and Council Bluffs, Iowa in view of applicant's prior overall financial condition, the loss sustained on such trains, and the net savings that would be lost if the now suspended service were to be restored.—Chicago, R. I. & P. R. Co. Discontinuance of Trains, 338 I.C.C. 68 (83-4)*.

Commission found that continued financial losses of passenger trains between Chicago, Ill. and Port Huron, Mich. require a discontinuance of such trains. Reasonable substitute service exists and ill effect upon public is less damaging than continued financial drain upon applicant.—Grand Trunk W. R. Co. Discontinuance, 338 I.C.C. 254 (275-6).

Commission approved discontinuance of 14 of the 34 trains involved herein in view of obvious minimal need by public for such service, insolvency of the carrier, limited effect upon territory encompassed, proportionately large losses incurred by carrier, relatively few number of passengers involved, and minimal adverse effect on employees.—Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (478-9).

—Computation; out-of-pocket costs: [Vols. 19, 21].—Joint terminal and facility expenses are savable to the carrier, in whole or in part, depending on whether its use of the facility ceases entirely or is merely reduced upon discontinuance of considered trains; and such expenses should be allowed as prospective savings where supported by specific and concrete proof. A particular carrier's proportionate share of joint facility expenses is computed in various ways and, since such expenses may include numerous cost items (depending on the agreement among carriers using the facility), it is incumbent on proponent carrier to show the underlying basis on which the expenses are computed and the precise manner and extent to which savings will be realized upon discontinuance of subject trains; among other things, record should show that claimed joint facility expenses include proper items of cost directly assignable to subject trains and that they will not be further incurred by the carrier as a result of the discontinuance.—Chicago, R.I. & P.R. Co. Discontinuance, 328 I.C.C. 278 (286-7)*.

On further consideration, additional evidence presented by proponent railroad to clarify and supplement that already of record, including excerpts from agreements governing use of joint facilities and data showing total number of units of all roads using each facility, total expenses, cost per unit, proponent's total units and total expenses with and without operation of trains to be discontinued, shows that it used approved method for computation of its share of joint facilities expenses incurred in operation of considered trains; the expenses are reasonably related to operation of the facilities, include proper items of cost, and are direct expenses of subject trains. Record, as supplemented, clearly shows that carrier would have realized substantial savings in its terminal and joint-facility expenses if it had not operated those trains during the preceding year; analysis of restated revenues and allowable out-of-pocket costs for first 6 months of that year shows that its total savable expenses attributable to those trains would be almost $90,000 more than amount allowed in prior report.—Id., pp. 288-90, 293.

Costs associated with maintenance of way and structures are not savable since they would not be eliminated upon discontinuance of passenger trains. See 320 ICC 648. Moreover, to the extent that unfilled firemen positions are required under Arbitration Award No. 282 to be filled in freight service, their salaries and benefits would not be saved assuming discontinuance of all passenger trains. However, depreciation charges of locomotive equipment are allowable as avoidable costs on the considered trains to the extent of their use. When equipment is depreciated on a group basis, depreciation continues to be accrued until the equipment is retired regardless of its age and when new equipment replaces it, depreciation charges continue at rates set by the Commission.—Kansas City S. Ry. Co. and Louisiana & A. Ry. Co. Discontinuance, 333 I.C.C. 51 (62-64).

Commission found that expenses claimed as labor portion for repairs and certain "overhead" items for carrier's shop facilities are non-savable items. Depreciation was also held a non-savable expense where equipment was not to be retired. Additionally, the carrier overstated the wages of involved employees and failed to consider the value of certain company-related transportation.—Southern Pac. Co. Discontinuance, 333 I.C.C. 783 (788-93).

Commission rejected applicant's estimate of savable average casualty expenses inasmuch as such estimate is based on applicant's overall system expenses where the average yearly expense of the involved trains is more appropriate and accurate as an approximation.—Seaboard Coast Line R. Co. Discontinuance, 334 I.C.C. 759 (774-5).

Inasmuch as subject trains ran only 180 days during the year on a reduced schedule, applicant's depreciation figure based on 1 year's service is overstated. Also, expenses have not been based on the actual number of cars essential to the operation and should be reduced.—Chicago, M., St. P. & P. R. Co. Discontinuance of Trains, 336 I.C.C. 105 (116-7).

Applicant's projected savings in labor costs is overstated as most of the involved employees enjoy a protected labor status and such saving would not be realized immediately. Also, to the extent express revenue has been shifted from subject trains to applicant's freight service, applicant's ability to continue operating the subject trains has not been significantly reduced.—Penn Central Transportation Co. Discontinuance, 336 I.C.C. 416 (439, 450-52).

Commission reaffirmed its finding in Chicago South, 320 ICC 440, 453, that maintenance-of-way and structures expense is not properly includable as operational savings. Also, maintenance of equipment expense, various taxes, rents, and expenses for transportation not eliminated by this proposal are nonsavable costs.—Chicago South Shore & S.B.R. Discontinuance, 336 I.C.C. 454 (463-5).

Applicant's estimated savings from proposed discontinuance are overstated inasmuch as applicant would still incur the costs of transporting free passengers, and the considerable amount of company mail and materials presently moving on subject trains.—Penn Central Co. Discontinuance of Trains, 336 I.C.C. 518 (525-6).

In computation of short-term savings, the accuracy of input data need only come within a range that provides a substantial and persuasive evidentiary basis for decision. —Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (478).

—Feeder value: [Vols. 19, 21].—Feeder revenue of trains to be discontinued (revenues derived by carrier's other system trains from passengers and traffic interchanged with subject trains), developed from a ticket count for one month, is not understated merely because it is based upon a one-month study; nor is it overstated by reason of carrier's application of the 50-percent cost formula, used in abandonment and discontinuance proceedings when costs associated with production of feeder revenues cannot be accurately determined. In the absence of a more precise method, the 50-percent formula has been used in prior discontinuance proceedings as reasonably reflecting the cost of producing contributed traffic.—Chicago, R.I. & P.R. Co. Discontinuance, 328 I.C.C. 278 (291-2)*.

30. Employees.—[Vols. 18, 19, 21].—While the Commission gives consideration to the probable effect of a §13a train discontinuance on railroad employees in determining whether public convenience and necessity required continuation of such service, it has consistently held that, unlike powers granted in other sections of the Act, it has no statutory authority to condition a discontinuance under §13a(1) on labor protective conditions. Interpretation by an agency of a statute which it is charged with administering is entitled to great weight; and the Commission's interpretation of §13a(1) in 307 ICC 59, has a "reasonable basis in law"; therefore, for the reasons stated in that decision, the agency's interpretation of §13a(1) should be affirmed.—Illinois Commerce Commission v. United States, 347 F. Supp. 1217 (1219-20)*.

While public convenience and necessity embrace consideration of the interests of employees, the Commission is without warrant in the law to impose employee protection conditions in passenger train discontinuances. And, since probable effect which discontinuance of considered commuter trains will have on the railroad's employees are not such as to require continued operation of those trains, it would be contrary to the national transportation policy to require continuance of wasteful and uneconomic transportation services merely to preserve jobs of the employees.—Louisville & N.R. Co. Discontinuance of Trains, 320 I.C.C. 669 (695).

Commission restated its findings in 307 ICC 59, that it is without authority to impose conditions for the protection of railway employees who may be adversely affected as a result of discontinuance of passenger service.—Chicago, B. & Q. R. Co. Discontinuance of Trains, 334 I.C.C. 248 (258-9).

Although term "public convenience and necessity" is broad enough to embrace consideration of employee interests in §13a proceedings, this Commission has uniformly held that it lacks power to impose employee protective conditions (see 307 ICC 59, 74-76).—Penn Central Transportation Co. Discontinuance, 338 I.C.C. 380 (467-8).

35. Orders of the Commission.—[Vols. 19, 21 .—See also City of Chicago v. United States, at n. 15 *supra*, and Jefferson City v. United States, at n. 2 *supra*.

Whether investigation should be made of a §13a(1) discontinuance is within the Commission's discretion, a matter that is not reviewable; however, when it undertakes to investigate, it is under the mandate of §14(1) to make a report in respect thereto and, as a decision to investigate indicates that a substantial statutory question exists, the Commission report deals with the merits. Technical form of the order is irrelevant since, whether discontinuance is allowed or not, the Commission is deciding the merits in each case. Instant cases are similar to the "negative orders" dealt with in 307 US 125; and, in accordance with that decision, aggrieved persons may obtain judicial review of Commission orders discontinuing its investigations in two §13a(1) passenger train discontinuance cases. District court decisions, reversed.—City of Chicago v. United States, 396 U.S. 162 (164-7)*.

District court decision remanding for consolidation and further hearings (1) Commission report and order allowing Chicago & E.I.R. to discontinue two trains ("Georgian") between Chicago and Evansville, Ind., operated in conjunction with Louisville & N.R. trains between Evansville and Atlanta, Ga., because notice of the discontinuance was not given to the governors and people of Kentucky, Tennessee, and Georgia, and (2) Commission decision approving L&N's discontinuance of its "Hummingbird" trains (which connect with the "Georgian" at Nashville, Tenn.) because of its close relationship with the C&EI case, reversed and remanded. The dissent argues that "such train" in §13a(1) could be interpreted as either the C&EL's Chicago-Evansville train or the "Georgian" between Chicago and Atlanta; but only the Chicago-Evansville discontinuance was before the Commission when it ruled that statutory notice requirements had been met. On that issue, the court defers to the interpretation of the administrative agency having supervision over the problem. Consolidated causes remanded for district court review of any unsolved questions on the merits.—United States v. City of Chicago, 400 U.S. 8 (9-11)*.

Judicial review of an administrative agency's findings is quite restricted; the court is without authority to intervene, in action to review the Commission's order which authorized three railroads to discontinue certain interstate passenger trains and permitted one of them to effect proposed changes in service, unless there has been prejudicial departure from requirements of the law or abuse of the Commission's discretion. Therefore, since the Commission had jurisdiction over proposals of the railroads, and the evidence amply supported its findings that continuance of the trains was not required by public convenience and necessity and that continued operation would unduly burden interstate commerce, the reviewing court will not disturb the Commission's order. Temporary restraining order now in effect is dissolved; complaint dismissed.—City of Chicago v. United States, 300 F. Supp. 115 (118)*.

When, after defendant railroad filed with the Commission a statement proposing to discontinue two passenger trains and plaintiffs filed a protest thereto, the Commission informed plaintiffs by a "Notice" that it had decided not to investigate proposed discontinuance, the Commission's discretionary decision not to interfere with the cutbacks in service is not reviewable by the court. [Citing 238 F. Supp. 107.] Accordingly, plaintiff's request for declaratory and injunctive relief is denied; defendant's motion to dismiss for failure to state a claim on which relief can be granted, and for lack of subject matter jurisdiction, granted.—Anderson v. United States, 309 F. Supp. 494 (495-6)*.

Since the Commission is entirely a creature of Congress, the determinate question in suit to set aside its decision, which allows defendant carrier to discontinue two interstate passenger trains, is not what the agency thinks it should do but what Congress has said it can do. Accordingly, though the Commission took much testimony and did much work on the case, plaintiffs are entitled to summary judgment when, since failure to comply with notice requirements of §13a(1) deprives the Commission of its jurisdiction to approve or disapprove the discontinuance, its order instituting the investigation was defective. However, in the event that holding on §13a(1) notice requirements is not sustained, a careful review of entire record makes it clear that, as to issues raised on the merits, the court would not be justified in setting aside the decision; on record before it, the Commission's findings on the merits are proper and supported by substantial evidence; and plaintiffs failed to carry the burden of showing that the findings as to public convenience and necessity, or the Commission's use of cost, revenue or other financial data in carrier's exhibits, were erroneous.—Pennsylvania Public Utility Commission v. United States, 311 F. Supp. 1024 (1029-31)*.

The court's function, in suit to set aside Commission order requiring railroad to continue operating its passenger trains ("Wabash Cannonball") between St. Louis and Detroit for a 1-year period, is to determine whether the ultimate findings are supported by substantial evidence on the whole record and do not involve an error of law. Plaintiff's argument that the Commission's finding of public need is not supported by substantial evidence but, rather, resulted from an "arbitrary rejection" of marketing survey made by Little, Inc. for the railroad, is premised on the fact that the study was not in terms discussed in the Commission report; however, failure to specifically refer to evidence may not be equated with a failure to consider it. Moreover, there is no legal mandate that a Commission report explicitly refer, and state weight accorded, to the testimony of each witness; and considered report stated that contentions not specifically discussed had been considered and found to have no merit or material significance. The Commission's decision is not arbitrary or capricious, is in accord with applicable law, and is supported by substantial evidence on the whole record; sustained.—Norfolk & W. Ry. Co. v. United States, 316 F. Supp. 1396 (1399-1400, 1402)*.

Administrative record in Commission proceedings under §13a(2) wherein the New Haven railroad was authorized to discontinue all passenger service between Boston, Mass., and certain suburban communities, provided the authority was exercised within one year from effective date of the Commission's order, contains substantial evidence on which to base a finding that New Haven effectively discontinued those services by, within 1-year period allowed in the order, posting notices in all stations served by trains involved that on date specified New Haven's service would be terminated in accordance with Commission authority and that, pursuant to its contract with the Massachusetts Bay Transp. Authority, future service would be provided by the railroad for the account of MBTA, and also, by issuing new timetables informing the commuting public of the new relationship between it and the MBTA.—Town of Norwood, Mass. v. United States, 318 F. Supp. 1391 (1392-3)*.

Consequently, the court finds that when the New Haven was reduced to role of a disclosed agent of a disclosed principal, it had discontinued its service within meaning of the Commission's discontinuance order, and, accordingly, the Commission did not abuse its discretion in its subsequent denial of plaintiff's petition for a declaratory order. Moreover, since sufficient facts of record support the finding of discontinuance, there is no merit to plaintiff's contention that the Commission relied on extra-record evidence to support its order denying the requested declaratory order. Summary judgment for defendants; and plaintiff's motion for summary judgment denied.—Id., p. 1393.

There is no merit in plaintiffs' contention that Commission order permitting Baltimore & O. R. to discontinue two passenger trains between Chicago, Ill., and Akron, Ohio, should be reversed because the financial condition of Chesapeake & O. Ry., which owns 94 percent of B&O's stock, was not made part of the record. Although "piercing the corporate veil" may be warranted in some situations, as where fraud or misleading representations are made or where some unlawfulness may be involved, no question of fraud or unlawfulness has been raised. Moreover, the fact that C&O is profitable would not change any relevant facts in instant case because B&O itself shows a net income for three recent years. And since the Commission in effect found (with support in the record) the demands of public convenience and necessity to be slight, it was not required to make an extensive examination of B&O's financial condition. Order of the Commission, sustained.—Public of State of Indiana v. United States, 325 F. Supp. 1223 (1227)*.

Action to set aside the Commission's findings that operation by the Milwaukee railroad of two passenger trains (the Afternoon Hiawathas) between Chicago, Ill., and Minneapolis, Minn., is not required by public convenience and necessity, and that continued operation of those trains will unduly burden interstate commerce, dismissed as moot because the railroad had entered into a contract with Amtrak prior to May 1, 1971, pursuant to the Rail Passenger Service Act of 1970, and the trains in issue were not made part of Amtrak's national network.

Since the Milwaukee is no longer obligated to operate rail passenger service as a result of its contract with Amtrak, further proceedings in instant case would be purely academic. In such circumstances, the action must be dismissed, since the court has no power to decide moot questions or abstract propositions.—Illinois Commerce Commission v. United States, 347 F. Supp. 1217 (1219, 1220)*.

In accordance with decision in 317 ICC 761, since the Commission's jurisdiction in prior §13a(1) proceeding expired with expiration of the 1-year period specified in the order, it has no power to order restoration of the operations or services thus discontinued; therefore, request by protestants for restoration of service must be denied.—Chicago, M., St. P. & P. R. Co. Discontinuance, 320 I.C.C. 566 (584).

Regulations of the Commission

36 FR 5219, March 18, 1971, Part 1122: Discontinuance or Change of Operation or Service, §1122.9 Notice of discontinuance filed pursuant to the Rail Passenger Service Act of 1970, §401(a)(1), added, effective on date of order.

Section 14. Reports and decisions of Commission—(1) Reports of investigation by Commission.—[Unchanged. See vol. 9, p. 7636.]

Amendments, see footnotes, vol. 3, p. 1858; historical note, p. 1858.

Notes of Decisions

Volume 3—p. 1858; Volume 7—p.5497; Volume 9—p. 7636; Volume 11—p. 9263; Volume 12—p. 10308; Volume 13—p. 11014; Volume 14—p. 11515; Volume 15—p. 12099; Volume 16—p. 12743; Volume 17—p. 13428; Volume 18—p. 14188; Volume 19—p. 15367; Volume 21—p. 16878.

1. The report; requisites. —[Vols. 3, 7, 9, 11-19, 21].—See also Tose, Inc. v. United States, at APA, 5 USC, *Reports;* and United States v. Allegheny-Ludlum Steel Corp., at APA, 5 USC, *Procedure.*

As a result of the Commission's consideration of two §5 and two related §207 applications (involving proposed purchase of portions of vendor's operating rights by different vendees) on a consolidated record and in one report and order, the report, being one document, did not separate item by item the findings in regard to each application; however, the method of drafting its report certainly cannot be fatal to the Commission's orders. Form does not govern substance, and the Commission's findings in the §207 proceedings are fully applicable to the same issues in the purchase cases. Furthermore, a study of the Commission report warrants the conclusion that its discussion rationally separates and disposes of all issues raised in each proceeding.—Consolidated Copperstate Lines v. United States, 293 F. Supp. 858 (861-2)*.

In action to enjoin and set aside Commission order, insofar as it concludes that proposal to increase waterborne charge at western ports was not shown to be just and reasonable, challenged order is supported by findings in the report that (1) testimony presented by the carriers was inconclusive, (2) current application of the waterborne charge weakened the justification for proposed increase, and (3) the western carriers presented no clear and precise representative cost evidence showing a need for additional revenues. While the Commission may not find merely that the carriers failed to meet their burden of proof, its determination in considered case necessarily was required to be phrased in negative terms; and where the ultimate finding is in negative form, it is required only that the report contain sufficient basic findings of fact to warrant a reviewing court to conclude that the Commission did not act without rational grounds. The Commission's report contains adequate findings to support its order; complaint dismissed.—Atchison, T. & S.F. Ry. v. United States, 334 F. Supp. 651 (653-4, 655)*.

In approving proposed new per-car charges for in-transit inspection of grain in the West, the Commission failed to explain its departure from prior norms and its legal basis for doing so. Though it recognized that western railroads' line-haul grain rates included the first stop for inspection, the Commission did not require any rate reduction in relation to the reduced service; nor did it repudiate or overrule its prior decisions that a proposed separate charge for an accessorial service, presently included in line-haul rates, cannot be approved without substantial evidence that such charge is justified when measured against the overall services rendered and overall reasonableness of the resulting increased aggregate rate. Thus, for purposes of the court's review, the Commission's distinguishing of instant case from its prior decisions, and its legal basis for the decision under review, are not adequately explained. Case remanded for further Commission proceedings consistent with the court's opinion; proposed charges suspended and held ineffective until otherwise ordered by the court.—Wichita Board of Trade v. United States, 352 F. Supp. 365 (368-9)*.

Section 14. (2). —[Unchanged. See vol. 9, p. 7639.]

Section 14. (3) Publication of reports and decisions; printing and distribution of annual reports. —[Unchanged. See vol. 9, p. 7639.]

Amendments, see footnotes, vol. 3, p. 1862; historical note, vol. 11, p. 9265.

Notes of Decisions

Volume 3—p. 1862; Volume 12—p.10308; Volume 13—p. 11015; Volume 14—p. 11516.

3. Judicial notice of Commission's reports and orders. — See Southern Pac. Co. Modifications of Systems, §13(1), n. 140.

Section 15. Determination of rates, routes, etc.; routing of traffic; disclosures, etc.—(1) Commission empowered to determine and prescribe rates, classifications, etc. —[Unchanged. See vol. 9, p. 7640, vol. 11, p. 9265.]

Amendments, see footnotes, vol. 3, p. 1864, vol. 7, p. 5500; historical notes, vol. 3, p. 1865, vol. 9, p. 7640, vol. 13, p. 11015, vol. 21, p. 16880.

Historical Note

Nothing in the amendments to §15 made by §202 of the act of Feb. 5, 1976, Pub. L. 94-210, 90 Stat. 31, shall be construed to modify the application of §§2,3, or 4 of the Interstate Commerce Act in determining the lawfulness of any rate or practice; to make lawful any competitive practice which is unfair, destructive, predatory, or otherwise undermines competition which is necessary in the public interest; to affect existing law or the Commission's authority with respect to rate relationships between ports; or to affect the Commission's authority and responsibility to guarantee the equalization of rates within the same port. The Secretary of Transportation and the Commission are separately to study the effect of the amendments made by §202 on the development of an efficient and financially stable railway system and to transmit the results of their studies to Congress.—90 Stat. 39.

Notes of Decisions

Volume 3—p. 1869; Volume 7—p. 5501; Volume 9—p. 7641; Vol. 11—p. 9265; Volume 12—p. 10309; Volume 13—p. 11015; Volume 14—p. 11517; Volume 15—p. 12099; Volume 16—p. 12745; Volume 17—p. 13429; Volume 18—p. 14189; Volume 19—p. 15368; Volume 21—16880;

Nature of Commission's Functions

48. Jurisdiction statutory. —[Vols. 3, 7, 11, 19].—See Rardin Grain Co. v. Illinois Central R. Co., at §6(1), n. 2.

Nature of Matters Subject to Commission's Determination

50. Rates, fares, and charges. —[Vols. 3, 7, 9, 11, 13, 14, 17-19].—See Electronic Industries Assn. v. United States, at §13(1), n. 3.

55. Regulations, practices, and classifications, in general. —[Vols. 3, 7, 9, 11-16].—See Detroit Harbor Terminals, Inc., Terminal Allowance, at §1(5), n. 521.

Basis for Determination by Commission

67. Powers exercisable only when Act violated. —[Vols. 3, 7, 9, 12, 13].—The maintenance of reduced joint rates with the use of less than 70-ton cars could be accomplished only at the expense of revenue losses to the carriers concerned. The primary consideration is how to achieve a balance in rail transportation costs between competing shippers under similar transportation conditions without unduly sacrificing the revenues of the carriers. Since the evidence establishes substantial savings from the use of the larger cars and there is nothing in the record to establish any extra cost in providing such cars, these savings to be accomplished through innovations in equipment, service and technological efficiencies should be promoted under the national transportation policy, rather than discouraged, and passed on to all shippers in competing origins. However, the refusal of respondent to enter into reduced joint rates tied to use of less than 70-ton cars does not constitute a violation of the Act and prescription of such a basis of use, under §15(1), is not justified.—Coal, Ky., Tenn. and Va. to North Carolina, 329 I.C.C. 572 (586)*.

Section 15. (2) Orders of Commission. —[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §302, 90 Stat. 48, ", not less than thirty days, and shall" is struck out and "as the Commission may prescribe. Such orders shall" is inserted in lieu thereof. See vol. 9, p. 7649.]

Amendments, see footnotes, vol. 3, p. 1901; historical notes, p. 1901; vol. 21, p. 16882.

Notes of Decisions

Volume 3—p. 1901; Volume 7—p. 5514; Volume 9—p. 7649; Volume 11—p. 9267; Volume 13—p. 11017; Volume 14—p. 11519; Volume 16—p. 12747; Volume 17—p. 13430.

9.—Suspension or modification by Commission. —[Vols. 3, 7, 9, 11, 14, 16].—The outstanding unexpired order published in 215 ICC 684 is hereby modified to allow petitioner railroad to increase its charges for protective service on perishable freight not to exceed 25 percent of its charges published under §2 of the appropriate tariff.—Charges for Protective Service to Perishable Freight, 332 I.C.C. 136 (152)*.

Section 15. (3) Establishment of through routes, joint classifications, joint rates, fares, etc. —[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §203, 90 Stat. 39, the new sentence, as set forth below, is added to the end of the section. See vol. 11, p. 9267.]

***With respect to carriers by railroad, in determining whether any such cancellation or proposed cancellation involving any common carrier

by railroad is consistent with the public interest, the Commission shall, to the extent applicable, (a) compare the distance traversed and the average transportation time and expense required using the through route, and the distance traversed and the average transportation time and expense required using alternative routes, between the points served by such through route, (b) consider any reduction in energy consumption which may result from such cancellation, and (c) take into account the overall impact of such cancellation on the shippers and carriers who are affected thereby.

Amendments, see footnotes, vol. 3, p. 1905, vol. 11, pp. 9267-9268; historical notes vol. 3, p. 1906, vol. 9 p. 7651, vol. 21, p. 16882

Notes of Decisions

Volume 3—p. 1907; Volume 7—p. 5516; Volume 9—p. 7651; Volume 11—p. 9268; Volume 12—p. 10310, Volume 13—p. 11017; Volume 14—p. 11520; Volume 15—p. 12101; Volume 16—p. 12747; Volume 17—p. 13431; Volume 18—p. 14190; Volume 19—p. 15370; Volume 21—p. 16882.

22. Joint rates, fares, and charges. —[Vols. 3, 7, 9, 13-15, 17, 18, 21].—Refusal of defendants to participate in reduced rates conditioned on the use of 70-ton cars was found not justified on the record. Such a refusal to supply the facilities necessary to provide service to complainant restricts the free movement of coal and access to the market at reasonable rates on a related competitive basis and has, in effect, closed the routes in a commercial sense in contravention of the basic purpose of §15(3) of the Act. This refusal also violates §1(6) of the Act and must be condemned in order to provide the complainant, and its shippers, with free, open, and adequate transportation service.—Coal, Ky., Tenn. and Va. to North Carolina, 329 I.C.C. 572 (587)*'

50. Cancellation of through routes; joint rates. —[Vols. 12, 14, 15, 17-19, 21].—Following the standard definition of "consistent with public interest", i.e., the interest of the general public as manifested by the traffic moved and capable of being moved over the routes which would be closed, as well as the interest of the other carriers which may participate in the [specified] rates [302 ICC 637, 653, 303 ICC 103, 106], the Commission held that proposed through routes and joint rates cancellation would contravene the provisions of §15(3).—Lake Cargo Coal, Ky., Va., and W. Va. to Ashtabula Harbor, 326 I.C.C. 63 (71)*.

Section 15. (4) Through routes to embrace entire length of railroad; temporary through routes. —[Unchanged. See vol. 11, p. 9269.]

Amendments, see footnotes, vol. 3, 1924, vol. 11, pp. 9269-9270; historical notes, vol. 3, p. 1924, vol. 9, p. 7659, vol. 16, p. 12748, vol. 21, p. 16885.

Notes of Decisions

Volume 3—p. 1925; Volume 7—p. 5521; Volume 9—p. 7659; Volume 11—p. 9270; Volume 12—p. 10311; Volume 13—p. 11018; Volume 14—p. 11521; Volume 15—p. 12103; Volume 16—p. 12749; Volume 17—p. 13434; Volume 18—p. 14197; Volume 19—p.15376; Volume 21—p. 16885.

Relation to Other Sections

9. Sec. 3(1). —[Vols. 3, 7, 14-17, 19].—Section 15(4), which recognizes a carrier's right to its long haul, is by its express terms subordinate to provisions of §3; protection of the long haul is withheld where undue preference and prejudice forbidden by §3 are shown to exist.—Alabama State Docks Dept. v. Alabama, T. & N. R. Co., 323 I.C.C. 185 (189)*.

Applicability

32. Existing routes. —[Vols. 3, 7, 9, 12, 14, 16, 18, 21].—The physical ability to interchange traffic is not controlling in determining status as a connecting carrier. A connecting line is not confined to those carriers having a direct physical connection, see 270 US 287, but rather it applies to all lines making up a through route, see 284 US 288. Complainant and defendants are connecting carriers as they hold themselves out to the public as participants in through routes via the Baton Rouge gateway.—Missouri Pac. R. Co. v. Louisiana & A. Ry. Co., 332 I.C.C. 569 (578-9).

Section 15. (5) Transportation of livestock in carload lots; services included. —[Unchanged. See vol. 9, p. 7664.]

Historical note, vol. 3, p. 1940.

Notes of Decisions

Volume 3—p. 1940; Volume 7—p. 5530; Volume 9—p. 7664; Volume 11—p. 9271; Volume 12—p. 10313; Volume 13—p. 11019; Volume 14—p. 11522; Volume 15—p. 12105; Volume 16—p.12751; Volume 18—p.14199; Volume 19—p. 15377.

Section 15. (6) Commission to establish just divisions of joint rates, fares or charges; adjustments.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §201, 90 Stat. 34, paragraph (6) is redesignated (6)(a), and new paragraphs (b), (c), and (d) are added, as set forth below. See vol. 9, p. 7669.]

(b) Notwithstanding any other provision of law, the Commission shall, within 180 days after the date of enactment of this subdivision, establish, by rule, standards and procedures for the conduct of proceedings for the adjustment of divisions of joint rates or fares (whether prescribed by the Commission or otherwise) in accordance with the provisions of this paragraph. The Commission shall issue a final order in all such proceedings within 270 days after the submission to the Commission of a case. If the Commission is unable to issue such a final order within such time, it shall issue a report to the Congress setting forth the reasons for such inability.

(c) All evidentiary proceedings conducted pursuant to this paragraph shall be completed, in a case brought upon a complaint, within 1 year following the filing of the complaint, or, in a case brought upon the Commission's initiative, within 2 years following the commencement of such proceeding, unless the Commission finds that such a proceeding must be extended to permit a fair and expeditious completion of the proceeding. If the Commission is unable to meet any such time requirement, it shall issue a report to the Congress setting forth the reasons for such inability.

(d) Whenever a proceeding for the adjustment of divisions of joint rates or fares (whether prescribed by the Commission or otherwise established) is commenced by the filing of a complaint with the Commission, the complaining carrier or carriers shall (i) attach thereto all of the evidence in support of their position, and (ii) during the course of such proceeding, file only rebuttal or reply evidence unless otherwise directed by order of the Commission. Upon receipt of a notice of intent to file a complaint pursuant to this paragraph, the Commission shall accord, to the party filing such notice, the same right to discovery that would be accorded to a party filing a complaint pursuant to this paragraph.

Historical notes, see vol. 3, p. 1945, vol. 21, p. 16887.

Notes of Decisions

Volume 3—p. 1946; Volume 7—p. 5537; Volume 9—p.7669; Volume 11—p. 9273; Volume 12—p. 10313; Volume 13—p. 11019; Volume 14—p. 11523; Volume 15—p. 12106; Volume 16—p.12752; Volume 17—p. 13437; Volume 18—p. 14200; Volume 19—p. 15378; Volume 21—p. 16887.

Construction

7. In general. —[Vols. 3, 7, 9, 12-17, 19, 21].—Argument that requirement of §15(6) that divisions be fixed as among the several carriers means that the Commission may not recognize geographic areas or rate territories in establishing primary divisions was rejected by the Supreme Court in 261 US 184 shortly after enactment of §15(6).—Official-Southern Divisions, 325 I.C.C. 1 (30)*; and while requirement that the Commission give due consideration to importance to the public of the transportation services of the carriers concerned does not embody a sectional concept, but entails consideration of the public interest of all concerned, it does not require uniformity of divisions as between the territorial carrier groups, since §15(6) was designed to help the weak by preventing needed revenue from passing to more prosperous connections.—Id., p.27.

There is no statutory or other legal requirement that Commission find, as a prerequisite to using relative costs of service as basis for prescribing new divisions of joint, interterritorial rates, that higher costs of one group of participating carriers result from inherent territorial disadvantages. Congress enacted §15(6) with sweeping authority so as not to restrict Commission's determination for such divisions to comparisons of costs of service or other factors.—Official—Southern Divisions, 337 I.C.C. 74(92-3)*.

Prescription of Divisions

21.—Under Transportation Act, 1920. —[Vols. 3, 7, 9, 15, 17].—See Western Pac. R. Co. Discontinuance, at §13a, n. 22.

22. Mode and basis of establishment affecting power to change.—[Vols. 3, 7, 9, 14-16, 21].—Findings in original report (321 ICC 17,

84) and in first supplemental report (322 ICC 491, 524), concerning payment of intermediate switching charges from primary divisions, interpreted, to apply on all transcontinental traffic interchanged at St. Louis, Mo., or East St. Louis, Ill., by the named intermediate switching carriers, regardless of whether those carriers transport the shipments across the Mississippi River.—Akron, C. & Y. R. Co. v. Atchison, T. & S. F. Ry. Co., 339 I.C.C. 540 (545)*.

Lines of the Louisville & Nashville Railroad and Southern Railway System which run between Cincinnati, Ohio, and East St. Louis, Ill, found to be in southern territory, and thus the bridge traffic moving between official and transcontinental territories over these lines is not subject to the findings and order of the Commission in the original report (321 I.C.C. 17, 76).—Id., p. 551.

Rulings on certain primary dividing points, (border points) prescribed in original report (321 ICC 17, 85-87), first supplemental report (322 ICC 491, 525-527), and third supplemental report (335 ICC 895, 902), amplified to include as border points: El Paso, Texas, for westbound traffic over route H; Pueblo, Colo., for eastbound traffic, and Belen or Rincon, N. Mex., for westbound traffic over route I; and Denver, Colo., for eastbound traffic, and Belen or Rincon for westbound traffic over route J.—Id., p. 548.

26. Discretion of Commission.—[Vols. 3, 7, 9, 12, 21].—Commission order prescribing new divisions of joint rail rates on traffic between official and southern territories, on finding that (on a relative cost basis) northern lines' higher costs of rendering the service justified an increased share of the revenues, held not to be supported on the record when, having stated that its standard for resolving the question was the relevant costs of handling specific north-south traffic to which the divisions apply, the Commission accepted unadjusted Rail Form A territorial average costs as reflecting northern lines' higher costs of handling the north-south traffic. There are no automatic restrictions on scope of the remedies which the Commission may choose in solving a divisions case or in forming its expert judgment as to what scale of costs should be used; exact division of each rate of each carrier is not necessary, and precision and exactitute in a mathematical sense are not possible; however, nature and volume of the traffic in question must be known and exposed, if costs of other traffic are to govern a division of rates.—Baltimore & O. R. Co. v. Aberdeen & R. R. Co., 393 U.S. 87 (90-92)*.

Also, when Rail Form A costs are shown to be distorted as applied to particular traffic over which a divisions dispute arises, some effort must be made to make an adjustment which fairly reflects difference in the costs or to make it clear that there is in fact no basic, material difference; reliance on administrative "expertise" is not sufficient. Though the Commission made some "adjustments" in Rail Form A territorial average costs to reflect costs attributable to north-south traffic in issue (respecting 5 of 12 proposed adjustments), it should make specific findings on several items of the so-called "adjustment," including (1) question of the northern lines' commuter deficit, (2) costs of interchanging cars in north-south traffic at territorial border points, and (3) empty freight car return ratios. District court's ruling that, absent any evidence relating territorial average costs to the north-south traffic, the Commission's use of such average costs did not meet statutory requirement for precise and relevant findings, and its remand of the case for further proceedings, affirmed as modified.—Id., pp. 92-6.

Prescription of equitable divisions involves the making of practical judgments rather than the solving of a problem with mathematical certainty. Careful evaluation of the factors other than costs which the Commission must consider under §15(6) does not disclose that they require either northern or southern lines to be accorded higher divisions of joint interterritorial rates than the other group. The cost evidence, weighed in the same balance, affords a reasonable basis for exercise of practical judgment; everything else being substantially equal, the parties' relative costs reflecting their respective operations as to the traffic involved can properly serve as a guide for determination of just, reasonable, and equitable divisions for the future.—Official—Southern Division, 325 I.C.C. 1(49-50)*.

34. The order. —[Vols. 3, 7, 9, 12, 14, 16].—Provisions of order prescribing new divisions of Official—Southern joint rail rates are not separable, as argued by plaintiffs seeking to set aside only that part which prescribed increased divisions for northern lines; the Commission determined only one issue in two steps, i.e., it found that old divisions were unjust, unreasonable, and inequitable and prescribed new divisions for the future. The court has authority, under 28 USC §2321, to set aside "in whole or in part" an order of the Commission; however; since the order in question is not severable and the court lacks jurisdiction to prescribe divisions of rates, function of the court ends if it finds that the order is contrary to law or unsupported by adequate findings or substantial evidence. Order, in its entirety, set aside and cause remanded to the Commission for further proceedings consistent with the court's opinion.—Aberdeen & R. R. Co. v. United States, 270 F. Supp. 695 (699-700, 712-13)*.

Reasonableness

40. In general. —[Vols. 3, 19].—See Washington & Old Dominion R. Abandonment—Virginia, at §1(18), n. 60, and Western Pac. R. Co. Discontinuance, at §13a, n. 22.

Section 15. (7) Commission to determine lawfulness of new rates; suspension; refunds. —[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 36, the new sentence, as set forth below, is added to the end of the section. See vol 11, p. 9273.]

***This paragraph shall not apply to common carriers by railroad subject to this part.

Amendments, see footnotes, vol. 3, p. 1957, vol. 11, p. 9274, historical notes, vol. 3, p. 1958, vol. 21, p. 16895.

Notes of Decisions

Volume 3—p. 1959; Volume 7—p. 5543; Volume 9—p. 7676; Volume 11—p. 9274; Volume 12—p. 10314; Volume 13—p. 11019; Volume 14—p. 11524; Volume 15—p. 12107; Volume 16—p. 12753; Volume 17—p. 13438; Volume 18—p. 14200; Volume 19—p. 15379; Volume 21—p. 16895.

In General

1. Jurisdiction of courts in preventing change of rates. —[Vols. 3, 7, 17-19, 21].—See also Electronic Industries Association v. United States, at §13(1), n. 3.

Order of the Supreme Court stayed, on condition set forth, district court judgment remanding the Commission's decision (which approved proposed rail charges for in-transit inspection of grain) and suspending proposed charges in question until that court ordered otherwise, pending final determination of the appeal. Stay is subject to the condition that each railroad collecting the challenged in-transit inspection charges shall (1) keep accurate accounts of amounts received therefrom during the stay, and (2) voluntarily refund such charges (with interest) to shippers if the lower court decision is affirmed. If the district court is not affirmed, amounts of the charges collected will be disposed of by such further order as the court may deem appropriate.—Atchison, T. & S.F. Ry. Co. v. Wichita Board of Trade, 409 U. S. 801.

Although the District Court had power to suspend the operation of the Commission's order pending the final determination of shipper's suit [28 USC §2324], entering an injunction forbidding the railroads to implement a proposed change in rates is not an injunction suspending the order, and was in error. The power conferred on the District

Court by §2324 does not in itself include a power to enjoin the railroads from implementing a new charge. Rather, that power must be considered as at best ancillary to the general equitable powers of the reviewing court, and protective of its jurisdiction. Such a power must be inferred from Congress' decision to permit judicial review of agency action, and judicial review would be an idle ceremony if the situation were irreparably changed before correction could be made.—Atchison, T. & S.F. Ry. Co. v. Wichita Bd. of Trade, 412 U.S. 800 (818-819)*.

On plaintiff's motion for preliminary injunction against Commission orders allowing proposed interim surcharge on certain rail tariff rates to go into effect without suspension, the district court has jurisdiction to provide the relief sought because of the Commission's failure to issue an impact statement, under the National Environmental Policy Act, in conjunction with the challenged orders. Although the Commission has sole and exclusive power to suspend proposed rates, and its failure to suspend is not judicially reviewable, the NEPA implicitly confers authority on federal courts to enjoin *any* federal action taken in violation of procedural requirements thereof, even if jurisdiction to review the action is otherwise lacking. Moreover, recognition of that independent jurisdiction under NEPA does not undermine the Commission's broad discretion with regard to suspension, or its primary authority to determine reasonableness of proposed rates; nor does judicial insistence on compliance with non-discretionary procedural requirements of NEPA interfere with the Commission's substantive discretion. Preliminary relief granted.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (196-8)*.

Furthermore, although its earlier decision, 346 F. Supp. 189, is pending on appeal to the Supreme Court, the district court has jurisdiction to rule on plaintiff's present motion for preliminary injunction against subsequent Commission action approving proposed selective percentage increases in rail rates. In claiming the court lacks jurisdiction, defendant cites the settled rule that filing of an appeal vests jurisdiction over the cause of action in the appellate court and denies the lower court jurisdiction to take any further action in the case; however, that rule is subject to well recognized exceptions, including the principle that an appeal from a lower court order granting a preliminary injunction does not divest the lower court of jurisdiction.—Id., 353 F. Supp. 317 (320, footnote)*.

2. Breadth of investigation and suspension power of Commission. —[Vols. 3, 7, 9, 11, 12, 14-19, 21].—Determination by the Commission that a rate is unreasonable or discriminatory, being peculiarly a matter for its judgment and discretion, is conclusive and binding on a reviewing court if it is supported by substantial evidence and there is no procedural irregularity or erroneous application of law. In investigation and suspension proceeding under review, however, the record is not persuasive that the Commission fully discharged its responsibility in passing upon railroad's proposed tariff rules. Although plaintiff is disadvantaged by having the shortest direct route, Commission decision disapproving proposed rules (which would provide for its unpublished delay service at the through rate on shipments of potatoes from California origins to Kansas City, Mo., routed over its internal circuitous routes) does not reflect that consideration was given to any competitive disadvantage of plaintiff and to any unreasonable or unjust preference or advantage accruing to other rail carriers with longer lines upon disapproval of proposed tariff items. Commission order remanded for further proceedings.—Atchison, T. & S.F. Ry. Co. v. United States, 282 F. Supp. 430 (434-5, 437)*.

While decision in 372 US 658 grants the Commission broad discretion at the suspension stage in rate proceedings, the court is not convinced that it precludes a grant of preliminary relief sought. Apparent thrust of the doctrine is that judicial review is available only when rates in question are Commission-made rather than carrier-made; so long as rates are authored by the carriers, the Commission's mere failure to suspend them is not reviewable. In instant case, the finding of reasonableness does not, by itself, convert considered rates into a Commission-made tariff; but the Commission affixed detailed conditions to its approval of the interim surcharge without suspension and, also, made it amply clear that it would suspend proposed rate increases if the conditions were not added. An agency may not use its suspension power to, in effect, make rates and still avoid judicial review. And a suspension decision which blackmails carriers into submitting agency-authored rates is not distinguishable from an agency order setting those rates; such orders are, of course, judicially reviewable.—Students Challenging Regulatory Agency Procedures (S.C.R.A.P.) v. United States, 346 F. Supp. 189 (196-7)*.

The Commission has power to suspend any "new rate, fare or charge", any "new classification" or any "new regulation or practice affecting any rate, fare or charge" when "filed" and before it becomes effective. The suspension power is sufficiently broad as to include a situation where a new application of a "dormant" or inoperative rate is involved.—Lake Cargo Coal, Ky., Va., and W. Va. to Ashtabula Harbor, 329 I.C.C. 549 (551-552)*.

4. Transportation subjects which may be considered; in general. —[Vols. 3, 7, 9, 21].—Respondent railroads' contention that the Commission lacks jurisdiction over proposed schedule provisions concelling absorption of wharfage at indicated Gulf and south Atlantic ports is rejected as such cancellations are of specific amounts of wharfage absorption published in respondents' tariffs filed with the Commission and directly affect charges paid by the public to carriers subject to our jurisdiction for transportation of property.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (520-22).

5.—New rates, fares, and charges. —[Vols. 3, 7].—Expiration dates in a published tariff are not rates as that term is used in §15(7), but they are within the meaning of the language of that section as it pertains to a regulation affecting any rate. The fact that expiration provisions in tariffs become effective subsequent to rate schedules does not preclude suspension of such provisions just prior to the time they would otherwise have become operative. Instead, it is this very feature of expiration provisions in tariffs which establishes their newness for purposes of the exercise of the suspension power under §15(7) and makes them a "new regulation" which will affect the "rate, fare, or charge."—Lake Cargo Coal, Ky., Va., and W. Va. to Ashtabula Harbor, 329 I.C.C. 549 (552-53)*.

7. Latitude of managerial discretion. —[Vols. 3, 7, 9, 19, 21].—Motion to strike certain testimony of a witness for respondent MKT because neither counsel who interrogated the witness nor the witness entered an appearance, overruled; that railroad is a respondent and appearance was made on behalf of all respondents.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (599).

Suspension Period

14. Accounting order when rates automatically effective. —[Vols. 3, 21].—On reconsideration, record is convincing that railroads' basic reason for proposed per-car charges for in-transit inspection of grain is increased freight car utilization; that respondents are more concerned with increasing the use of the freight car fleet than with collecting proposed charges; and that the revenues derived from greater use of cars would substantially exceed the amount to be obtained from proposed charges. However, it is impossible to determine at this stage the amount of revenue to be collected as a result of considered charge; therefore, since such a determination is a relevant and material factor because of conflicting forecasts as to effect of imposition thereof, respondent railroads are required to maintain a record of the amount of money collected from assessment of the charge, to file reports setting forth total amount collected by each respondent during the 6-month periods specified, and to continue such 6-month reports pending further order of the Commission.—Inspection in Transit, Grain and Grain Products, 340 I.C.C. 69 (73)*.

Procedure

35. Burden of proof upon the hearing; in general. —[Vols. 3, 7, 9, 11-19, 21].—The Commission, in approving separate charges for inspection of grain while in transit (a service that had previously been provided under long-haul rates did) not adequately justify its departure from the longstanding rule that separate charges are unlawful unless the carriers can satisfy the burden of proving that their line-haul rates are insufficient to cover the entire transportation service, including that portion for which separate charges are proposed. In such instances of departure from policy, the Commission must set forth clearly the grounds on which it acted. Failure to do so resulted in remand.—Atchison, T. & S. F. Ry. Co. v. Wichita Bd. of Trade, 412 U.S. 800 (807)*.

A specific and long-standing administrative interpretation of a statute should not be overruled except for weighty reasons; such administrative rule has the force and effect of a statute and rules of evidence apply to both in the same manner. The Commission departed from prior norms when, without repudiating its well established rule as to the burden of proof on railroads proposing a separate charge for an accessorial service previously included in line-haul rates, it found proposed charges for in-transit inspection of grain in the West to be reasonable when related to costs of specific services for which they would be assessed, even though carriers failed to prove overall reasonableness of the increased rate, composed of line-haul rate plus in-transit charge, that would result from approval of proposed charges. In effect, the Commission excused respondents from meeting substantial proof requirements of its evidentiary rule because of their "inability" to sustain that burden; and as held in 347 US 645, since legal basis therefor is not explained, such a departure from prior norms is not permissible. Case remanded to the Commission; proposed charges suspended until further order of the court.—Wichita Board of Trade v. United States, 352 F. Supp. 365 (367-9)*.

No protests having been filed in connection with proposed reduction in free time from 48 to 24 hours for storage of cars held for unloading and loading or reconsignment on public team tracks, that proposal became effective as published; and in subsequent investigation instituted by the Commission into the lawfulness of such change the examiner properly ruled that respondent did not have the burden of proof with respect to lawfulness of said change and did not have to present any evidence unless protestants first submitted evidence. Found not to be unjust or unreasonable.—Reduced Free Time At Points on Long Island R., 325 I.C.C. 714 (715, 721).

Respondent sought to justify proposed changes on the ground that considered joint, single, and multiple-car rates were established with expiration dates and with the understanding of shippers and connecting railroads that the rates would be permitted to expire if and when approval was given by the Commission of a pending railroad purchase proceeding. However, much more is required in proceedings arising under §15(7); respondents are not free of their responsibilities and burdens merely because the proposed changes in rates are the result of expiration dates in tariffs, and shippers' understanding as to duration of particular rates is not controlling in §15(7) proceedings. See also 206 ICC 127 and 258 ICC 63. Accordingly, respondent has the burden of establishing that the proposed elimination of the considered joint rate is just and reasonable and it must show, where the issues are properly presented, that such action does not result in rates that contravene other sections of the Act.—Lake Cargo Coal, Ky., Va., and W. Va. to Ashtabula Harbor, 326 I.C.C. 63 (68-9)*.

In an embraced proceeding, the record indicated some misunderstanding concerning the burden of proof. The rules under investigation in docket No. 34585 and many of those in the subnumbered proceedings were in effect when the investigations were instituted and, while reissued, were not subsequently changed. The burden of proof in those instances is not upon the respondents. However, in connection with the proposed rules in I. & S. No. 8218 and the rules proposed and those changed during the pendency of the subnumbered proceedings, the burden is on the respondents.—Detention of Vehicles & Loading & Unloading Provisions, 329 I.C.C. 220 (222).

The burden of proof is on the respondents to prove that proposed rates are just and reasonable, and a minimum requirement in sustaining this burden is a convincing showing that the proposed rates will be reasonably compensatory for the service to be performed, such showing being necessary even if there is competitive justification for the proposal.—Paper, Central Territory to North Atlantic Ports, 329 I.C.C. 281 (289).

The burden of establishing that the proposed elimination of the joint rate is just and reasonable remains upon the respondent because the expiration date in the effective tariff brings into effect a change in rate. Since evidence establishes that the cancellation of the considered rates will result in rates to Ashtabula Harbor which are substantially higher than those maintained to the ports of Toledo and Sandusky, and that Ashtabula will lose considerable tonnage as a result thereof, the respondent has the burden of establishing a dissimilarity of circumstances and conditions which is sufficient to justify the preferential and prejudicial treatment of the competing ports.—Lake Cargo Coal, Ky., Va., and W. Va., to Ashtabula Harbor 329 I.C.C. 549 (553-54)*.

In a hearing to modify an existing Commission order so as to increase rail charges for protective service for perishable freight, the burden of proof is upon petitioning carrier. Burden has been met herein only by petitioner Louisville & Nashville R. Co. by introduction of probative cost evidence to show losses resulting from such service.—Charges for Protective Service to Perishable Freight, 332 I.C.C. 136 (144-5)*.

On further investigation in this general revenue proceeding, the Commission found that respondent railroads' cost data, although deficient in certain indicated aspect, is sufficient to meet the burden of proving increases rates and charges just and reasonable. The Commission herein also placed railroads on notice that in any future general revenue proceeding a realistic study on the unit costs of performing transportation services will be necessary to sustain their burden of proof.—Increased Freight Rates, 1967, 332 I.C.C. 280 (285-86)*.

Respondents failed to meet their burden of proving that proposed tariff provisions, which would substantially increase charges on boats moving on multilevel cars, would be just and reasonable when their only evidence, in support thereof, was a study of out-of-pocket costs of transporting boats on railroad-owned cars. Carriers emphasize that the rates would apply for all shippers whether equipment is furnished by carrier or shipper, but record contains little evidence as to traffic of shippers who use railroad-owned cars. Moreover, fact that the proposal was suspended on protest of shippers who use their own specially designed multilevel cars (for which railroads pay per-mile allowances) puts in issue justness and reasonableness of the rates to protestants, as well as other shippers, and protestants' evidence shows that respondents' costs are substantially overstated so far as their boat movements, using their own equipment, are concerned. To discharge carriers' burden of proof, evidence to show reasonableness of a rate increase must be concrete, affirmative, and persuasive; proposed schedules not shown to be just and reasonable.—Boats on Multi-Level Cars, 332 I.C.C. 468 (470-2, 473-6)*.

Inasmuch as respondent railroads propose schedules cancelling specific amounts of wharfage absorption at indicated Gulf and South Atlantic ports which would directly affect charges paid by the public to carriers for transportation of property, the burden of proving any such changes in rates or charges to be just and reasonable is upon the respondents.—Cancellation of Wharfage Absorption, 335 I.C.C. 477 (522).

Where respondent railroads have shown their proposed proportional rates on multiple-car shipments of canned foodstuffs from the Pacific coast to points east of the Rocky Mountains to be just and reasonable from the standpoint of their own revenue requirements, protestant carrier which claims an inherent advantage of cost has the burden of proving the existence of such advantage.—Canned Foodstuffs, Pacific Coast to the East, 335 I.C.C. 612 (631).

Rail carriers failed to sustain their burden of proof when evidence they presented, although considerable, is not convincing that proposed increase in the additive charge on waterborne traffic moving through North Atlantic, Pacific coast, and Canadian ports is just and reasonable. Record indicates that, as performed by respondents, port terminal services associated with waterborne traffic have substantially decreased since an additive charge was authorized in 1958; also, fact that the charge is now incorporated into the base rate before applying three subsequently authorized general increases weakens the justification for respondents' proposal. In the circumstances, therefore, and in absence of clear and precise representative cost evidence demonstrating a need for additional revenues, the proposed increased waterborne charge is not shown to be justified; not approved.—Increased Waterborne Charge, 337 I.C.C. 534 (535, 540-1)*.

Proposed increases in all-rail and lake cargo rates on coal not shown to be just and reasonable inasmuch as respondents introduced no cost evidence whatsoever as to part of all-rail movements and only cost data of one respondent for remainder of involved all-rail movements which cannot be considered representative. Respondents justify increased lake cargo rates to relieve a coal car shortage but do not show to what extent such traffic perpetuates the shortage.—Coal, Ill., Ind., and Western Ky. to Chicago, 339 I.C.C. 493 (498-9).

Respondents who propose increased demurrage charges and changed rules governing car detention must show that proposed rules and charges will promote equipment utilization which is primary purpose of demurrage charges and rules. Record herein does not support such a conclusion but rather indicates that carriers' inefficient service is the basis for much of inadequate car utilization. Schedules ordered canceled.—Demurrage Rules and Charges, Nationwide 399 I.C.C. 655 (667-8).

The basic issue before the Commission was whether the single-car (100 ton) rate on kaolin clay, applied to traffic moving in minimum shipments of 500 tons at one time under the multicar rate, was shown to be just and reasonable. This relational aspect of respondents' burden of proof is implicit in the term "changed rate" as used in §15(7) of the Act. And while respondents' rationale, that there was no competitive necessity for retention of a discount rate and that there were no cost savings experienced by them in the movement of large volumes of clay at one time as proposed to single-car shipments, traditionally has provided a basis for disapproval of multicar rates *when initially filed*, such was not the case here.—Clay, Points in Georgia to Savannah & Port Wentworth, 340 I.C.C. 377 (383-384)*.

Although the evidence supported the respondents' contention that elimination of the multicar rate, with a consequent 50-cent increase in the rate, would not significantly impede the export clay movement, the proposed cancellation was denied, since carriers seeking cancellation must also show the existence of circumstances or conditions by virtue of which they could not reasonably be expected to achieve cost savings normally inherent in multiple-car service. Absent this requirement shippers and others who benefit from and have come to rely upon multicar rates whenever, due to cessation of competitive pressure or other reasons, carriers lose interest in continuing the high degree of operational efficiency required to effect such savings.—Id., pp. 385-86*.

Respondents in general-increase proceeding are advised and forewarned that the Commission's acceptance of annualized costs and other data of type submitted in this and in prior general revenue proceedings is not an irrevocable commitment; and that, in the future, a much more variable data base will be required to support a request for revenue relief. To that end, a rulemaking proceeding regarding prescription of minimum evidentiary requirements in railroad general increase cases, to supplement regulations in 49 CFR Part 1002, will be instituted; however, final determination of such requirements will take time. Therefore, as an interim measure, it is decided to indicate the evidentiary showing which should be made in any rail revenue proceeding that might be begun prior to promulgation of specific procedures; and provisions relevant to such a showing, set forth in appendix B, will be referred to as "interim procedures." At the same time, it is made clear that respondents are not precluded from submitting additional evidence to support their proposals.—Increased Freight Rates and Charges 1972, 341 I.C.C. 288 (312-3)*.

50. Evidence; generally. —[Vols. 3, 7, 11, 15-19, 21].—In suspension proceeding on proposed revisions in fares applicable to interstate passenger service on the New Haven division of the respondent railroad a cost analysis having any probative value is not feasible at present as numerous arbitrary allocations, lacking in factual support, would be required. Lawfulness of proposed fares must be measured by comparisons with fares charged for similar services under substantially same transportation conditions and such other criteria as are pertinent. —Penn Central Fare Revision—1969, 335 I.C.C. 720 (731-32).

Commission prescribed cost evidence rules based on various cost formulae developed by the Commission's Cost Finding Section. Such formulae are valuable tools in estimating carrier costs but should not be given prima facie validity.—Rules to Govern Assembling & Presenting Cost Evidence, 337 I.C.C. 298 (322-7).

The record as submitted supports the division's findings of reasonableness of proposed charge for in-transit inspection of grain, and the addition of self-serving unverified statements directed to events arising after close of the hearing adds nothing of probative value; therefore, conflicting analyses of the reaction of grain interests after proposed charge became effective will not be received in evidence on reconsideration.—Inspection in Transit, Grain and Grain Products, 340 I.C.C. 69 (70)*.

But contrary to protestants' argument, the examiner's receipt in evidence of legislative history showing that improved freight car utilization was a factor in enactment of the Grain Standards Act of 1968, eliminating mandatory requirement for grain inspection, did not provide unjustified support for railroads' position that the in-transit inspection charge is just and reasonable; and reference to such legislative history did not constitute prejudicial error. From a careful review of the record and the division's findings, it is evident that consideration of the legislative history in the prior report was merely one factor supporting the ultimate conclusion that considered schedules were just and reasonable.—Id., pp. 72-3;

Protestants argued that the absence of evidence of the financial and operating results of other participants to the joint rates in issue requires disapproval of the requested increases. However, the Commission held that since the respondents were the predominant carriers in the Alaskan trade under consideration, the operating and financial data shown by them constitute an adequate representation of the entire trade. —Increased Rates and Charges, the Alaska Railroad, 340 I.C.C. 129 (162).

While a showing that most livestock shipments are handled at a financial loss, standing alone, does not justify a discontinuance of the service, it must be accorded substantial weight. See also, §15(7), n. 77.—Cancellation of CRI & P & Soo Line Rates—Livestock, 340 I.C.C. 463 (467)*.

Since the Commission determined in 297 ICC 505 that the competition in the movement of produce traffic and the unstable economic conditions in the industry require consideration of the total transportation cost to the shipper and the effect upon the movement of the traffic in determining whether increases are just and reasonable, respondents' assumption that the consumer rather than the producer would be affected by the proposed increase could not be accepted. Further, respondents failed effectively to rebut protestants' contention that the increased charges would price the western shippers out of the eastern market. Denied.—Mechanical Protective Serv. of Perishables—Nationwide, 340 I.C.C. 470 (500).

The cost evidence was not a clear and precise representation demonstrating a need for additional revenues; the absence of reliable data establishing unit costs and revenue and expense data requires a finding that respondents failed to meet the burden of showing that proposed mechanical protective service charges were just and reasonable.—Id., pp. 501-502.

Particular Justifications for Changes

65. Reasonableness of the proposed rates. —[Vols. 3, 7, 9, 14, 16, 18, 19, 21].—In judging rates for the future, reasonable prognostications as to costs and revenue should be given weight. Respondents' evidence indicating that proposed reduced rates on all freight, minimum 10,000 pounds, in straight or mixed carloads within southern territory and between that territory or St. Louis and intermediate points in Indiana, Illinois, and Missouri, exceed average fully distributed costs for the southern region by substantial amounts is a reasonable representation of costs on that traffic and warrants conclusion that the reduced rates are compensatory;

and, since the proposal is reasonably designed to recapture high-rated merchandise and l.c.l. traffic lost to motor common, contract, and private carriers, the proposed rates are just and reasonable.—Freight, All Kinds, Southern and IFA Territories, 323 I.C.C. 730 (731, 737).

Proposed reduced transcontinental incentive rates on wine, in packages, and in bulk shipments, found just and reasonable when competitively compelled and no lower than necessary to meet the circumstances and conditions attending the movement of wine to the destination territory, would result in improved car utilization, and in improving the net revenue position of the respondents for moving this traffic. The same holds true for certain proposed package rates which are below out-of-pocket cost since, as all proposed rates would alternate with corresponding present rates, even those rates would serve to reduce the burden formerly placed upon the respondents' entire operation and, in contrast to the present rates, also result in improving the net revenue position of the respondents for the movement of this traffic.—Wine, Pacific Coast to East, 326 I.C.C. 119 (156)*.

In the circumstances of record, proposed new or increased per-car charges for each stop, including the first, for inspection of grain are shown to be justified. Railroads' basic responsibility does not require them to provide in-transit service; and fact that they provide such service in the West at line-haul grain rates does not preclude modification of that practice if the circumstances justify some revision. Inspection of grain in transit is not now required by Federal statutes and railroads' service, available in connection therewith, is not essential to the grain marketing process. Grain inspection is an accessorial service for which a separate charge may properly be made; thus, even though applicable line-haul rate plus proposed charge will not exceed the prescribed maximum level of rates on grain, the Commission must determine reasonableness of the separate charge when related to specific service for which it is to be assessed.—Inspection in Transit, Grain and Grain Products, 339 I.C.C. 364 (372-3, 385-8)*.

As most grain inspections occur in western district where current railroad practice is to permit the first inspection at line-haul rates, without additional charge, proposed charges in the West represent an innovation that will have some effect on the future movement of grain; and those charges are vigorously opposed, particularly by grain markets. It is essential, therefore, to carefully consider the different car detention and switching studies submitted and, also, to scrutinize the costs shown to be incurred by railroads in furnishing in-transit service. Studies of the 16 western railroads represent a sound and valid appraisal of the costs incurred and detailed analyses thereof is convincing that, in light of the services rendered, proposed charges are just and reasonable. And proposed increase of separate in-transit charge in eastern traffic is shown to be justified based on costs; southern railroads share the same cost factors and there is very little opposition to proposed charges in the South; therefore, such findings embrace the complete proposal under consideration.—Id., pp. 369, 390-9.

But the issue of lawfulness of the in-transit charges is further complicated by inclusion of equally difficult question relating to the national freight car shortage; thus, while proposed charges are found reasonable on the usual basis of review, effect of such charges on the freight car shortage must also be considered. It is clear from the detention studies that in-transit inspection results in an unwarranted loss of car availability and that eliminating the service, or any significant part of it, will materially increase car utilization. Respondents introduced evidence showing number of car-days delay due to inspection and a reduction in their freight car fleet because of such delay; and while their figures may be somewhat inflated, there is no question but what elimination of in-transit inspection would increase the number of available cars by several thousand annually. Also, another matter not to be ignored is railroads' loss of revenue caused by the reduced car supply due to grain inspections. Accordingly, proposed new or increased in-transit charges for inspection of grain are found just and reasonable and otherwise lawful.—Id., pp. 385, 400-1.

On reconsideration, though protestants urge that railroads' basic reason for imposing the charge is to produce additional carrier revenue and not to increase car utilization, the record is convincing that respondents are more concerned with increasing utilization of their freight cars than with collecting the inspection charge; also, it is clear that revenues to be derived from the greater use of cars substantially exceeds the amount that will result from imposition of proposed charges. However, amount of revenue to be collected as result of the inspection charge cannot now be determined and, as such a determination is a relevant and material factor because of conflicting forecasts of the effect of its imposition, respondents are required to keep records and file 6-month reports setting forth the total of such charges collected by each railroad. In addition, jurisdiction is retained in order to determine upon still further review whether respondent railroads will be required to use funds derived from assessment of considered charge to upgrade freight car fleets which they operate.—Id., 340 I.C.C. 69 (73)*.

The Commission consistently has prescribed that a strike reimbursement should be based on the applicable per diem charge plus an additive to cover incidental expenses resulting from a car being held because of strike interference. The just and reasonable additive was established in 234 ICC 755, 762, as 20 percent. Since the current charge of $3.29 per car-day, increased by 20 percent, provides for a total charge of $3.95, and the present strike rate is $4.00 per day, proposed increased demurrage assessed against cars detained due to strikes was found not shown to be just and reasonable.—Strike Demurrage Charge, Nationwide, 340 I.C.C. 179 (188).

68.—Rate comparisons. —[Vols. 3, 7, 9, 15, 19, 21].—Proposed reduced rates on sulphur from Canadian origins to Streator, Ill., found lawful inasmuch as they are substantially comparable to rates on sulphur from the same origins to Chicago which were found lawful in 326 ICC 288. Cost study in that case is based on data collected later than the data used herein and is thus determinative of cost issues herein. Streator, Ill., is 7 miles from Chicago and so is subject to the same competitive influences.—Sulphur, Canadian Origins to Streator, Ill., 332 I.C.C. 130 (132-34)*.

Proposed tariffs reflected an increase in rates and in waterborne charges on TOFC and COFC movements between inland points and Pacific Coast ports, which was not justified by the rate comparisons of record. Also proposed tariffs encompassed less service than was presently available to shippers in the service under that "outer-container" rule, whereby a shipper with a rail siding may receive free truck delivery of containers and trailers which cannot be loaded and unloaded on flatcars, would be eliminated. A lessening of service cannot support an increase in rates and charges, and since the evidence provided no justification for reductions in service, the reductions themselves could not be permitted.—Containerized Freight, From and To Pacific Coast, 340 I.C.C. 388 (402-03).

69. Compelled rates.—[Vols. 3, 7, 9].—Rail-motor rates proposed by respondent Frisco railroad for indicated movements of motor vehicles are justified, within limits, as an exercise of managerial discretion intended to avert the threatened loss of substantial traffic generating more than a million dollars in annual income due to lower rates on such traffic published by competitor Santa Fe railroad, the protestant herein—Motor Vehicles, Kansas City Mo., to Southwest, 335 I.C.C. 253 (256)*.

70. Cost of service.—[Vols. 3, 7, 9, 16-19, 21].—See also Penn Central Fare Revision—1969, at §15(7), n. 50 *supra*, Transit Charges, Southern Territory, at §1(5), n. 612, and Wine, Pacific Coast to East, at §1(5), n. 80.

Costs developed in respondents' study do not justify proposed tariff provisions, which would substantially increase charges on boats moving on multilevel cars, insofar as they would apply to movements for protesting shippers who use their own specially designed cars. That study (using basic-unit costs taken from public statement No. 7-67 which assumes railroad ownership of all cars used) includes, as a major expense item, the per diem cost of renting multi-level cars; but respondents do not incur per diem rental expenses in moving protestants' boats on their own multilevel cars which are furnished the railroads on a mileage-allowance basis. Protestants' study of costs of moving boats on shipper-owned equipment (using per-mile allowance paid them for furnishing their own cars instead of per diem expense used by carriers) shows that respondents' costs are greatly overstated insofar as their movements are concerned. Costs that include a sizeable expense which respondents do not encounter in moving protestants' boats cannot justify increased rates; proposed schedules not shown to be just and reasonable.—Boats on Multi-Level Cars, 332 I.C.C. 468 (470-4, 475-6)*.

From 33 representative origins to 4 gulf ports proposed export rates on wheat exceed out-of-pocket costs by 5 to 68 percent; and proposed rates on flour in bags exceed out-of-pocket costs for 72 of those 82 movements by 1 to 34 percent; thus the vast preponderance of the proposed rates exceed out-of-pocket costs. While the rates on flour are below cost in a few instances, it is not required that rates between all origins and destinations in an extensive adjustment produce revenue at a level above out-of-pocket costs; the proposed rates on wheat and flour are compensatory on an overall basis. However, the rates on flour are disapproved on other grounds.—Wheat and Flour, Midwest & S.W. to Gulf-Chicago—Export, 322 I.C.C. 581 (603-4); and since average distances from origins on the Burlington to Chicago are less than to the Gulf ports, in view of the compensatory level of the proposed rates to the Gulf ports and the Burlington's substantially higher earnings from the same origins to Chicago the Burlington's proposed export rates on wheat and flour to Chicago are likewise compensatory and may be approved.—Id., p. 604.

While the cost of performing port terminal services has increased since approval of a waterborne additive charge in Ex Parte No. 212, 304 ICC 289, to be applied to rail rates on waterborne traffic at all ports, evidence indicates that the service performed by railroads at some ports has substantially decreased since 1958; at several ports, the carriers have sold or ceased operating their marine terminal facilities. In addition, the waterborne charge was originally established to help offset the cost of certain port services and was to accrue to the carrier providing those services or absorbing costs thereof; however, due to its being incorporated into the base rate before application of authorized general increases, the charge currently provides additional revenue for the line-haul carriers. Therefore, since respondents failed to present clear and precise representative cost evidence showing a need for additional revenues, proposed increases in the waterborne additive on traffic moving through North Atlantic, Pacific coast, and Canadian ports cannot be approved.—Increased Waterborne Charge, 337 I.C.C. 534 (537-8, 540-1)*.

Respondent railroads failed to submit cost evidence to justify proposed new or increased per-car transit charges; because of the lack of such evidence Commission was unable to determine the reasonableness of the proposed charges without consideration of representative overall movements between origin and final destination of various commodities and the total rates and charges assessed.—Transit Charges, USA, 339 I.C.C. 45 (58).

Even assuming that the complainants' cost studies were completely valid in showing that the assailed rates exceed fully distributed costs, it could not thereby be concluded that the rates exceed a maximum reasonable level. The fact that rates substantially exceed the fully distributed cost of service does not establish that they are in excess of maximum reasonable rates. When many rates are established at a level less than full cost to meet competition, other rates, not affected by competition, must return more than full cost if the carriers are to earn sufficient revenue to continue to provide service.—Public Serv. Comm. of N. Dakota v. Great Northern Ry. Co., 340 I.C.C. 739 (750).

77. Reasonableness of regulation or practice proposed; routing privilege; cancellation of rates.—[Vols. 3, 7, 9, 13-17, 19].—See also Demurrage Rules and Charges, Nationwide, at §1(6), n. 261, and Detention of Vehicles & Loading and Unloading Provisions—Investigation, at §1(5), n. 521.

Due to the special circumstances attendant to the fact that there was a constant and apparently irreversible decline in the transportation of livestock handled by respondent, that its limited equipment and facilities are not in good repair and that the cost of acquiring new cars for the dwindling volume of anticipated traffic is unwarranted, the Commission reversed a prior decision finding cancellation herein of carload rates on livestock by respondents to be just and reasonable.—Cancellation of CRI & P § Soo Line Rates—Livestock, 340 I.C.C. 463 (467)*.

77a.—Other practices.—[Vols. 7, 9, 11, 16, 19, 21].—See also Inspection in Transit, Grain and Grain Products case, n. 65, above.

In railroad's action to set aside Commission order disapproving its two proposed tariff rules, the first one providing for application of through single-factor rate on fresh fruits and vegetables to c.l. shipments of potatoes from California origins to Kansas City, Mo., routed over its internal routes which involve backhauls and out-of-line hauls, and the second one authorizing—under the diversion and reconsignment tarrif—holding schedules commensurate with such internal routes, grounds for the Commission's disapproval of those rules are inadequate to support any decision, one way or the other, on justness and reasonableness of the proposal. Plaintiff has a natural disadvantage, compared with competing connecting lines, because it has the shortest direct route; however, opinion of the Commission does not reflect consideration of that disadvantage or of any preference or advantage accruing to competing carriers with longer lines upon disapproval of proposed rules.—Atchison, T. & S.F. Ry. Co. v. United States, 282 F. Supp. 430 (433, 434-5)*.

Though the Commission disapproved plaintiff's first proposed rule because it did not conform to rule 4(k) of Tariff Circular 20 (providing that routes over which rates apply must be definitely ascertainable and how this must be accomplished), its findings are not convincing that proposed rule is per se a violation of the Tariff Circular rule. As to the second proposed rule authorizing holding schedules on c.l. shipments routed over plaintiff's internal circuitous routes, the Commission's reasons, i.e., the rule was (1) preferential of a select class of shippers, (2) authorized unreasonable use of the diversion privilege for a delay in transit, and (3) authorized internal holding already found unlawful, afford no basis for its disapproval thereof. In passing on the second rule, evidence concerning the loss of maximum use of equipment, avoidance of demurrage, and additional switching and icing expense must be weighed against any offsetting consequences of plaintiff's loss of business, both indirectly and directly routed, to other carriers if it cannot provide equivalent delay service. Case remanded to the Commission for further proceedings.—Id., pp. 435-7.

Regulations of the Commission

35 FR 13216, Aug. 19, 1970, Part 1102: Procedures Governing Rail Carrier General Increase Proceedings, new Part 1102 (§§1102.1 - 1102.4) added, effective on date of publication in Federal Register.

Section 15. (8) Hearing; schedule suspension.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 37.]

(8) (a) Whenever a schedule is filed with the Commission by a common carrier by railroad stating a new individual or joint rate, fare, or charge, or a new individual or joint classification, regulation, or practice affecting a rate, fare, or charge, the Commission may, upon the complaint of an interested party or upon its own initiative, order a hearing concerning the lawfulness of such rate, fare, charge, classification, regulation, or practice. The hearing may be conducted without answer or other formal pleading, but reasonable notice shall be provided to interested parties. Such hearing shall be completed and a final decision rendered by the

Commission not later than 7 months after such rate, fare, charge, classification, regulation, or practice was scheduled to become effective, unless, prior to the expiration of such 7-month period, the Commission reports in writing to the Congress that it is unable to render a decision within such period, together with a full explanation of the reason for the delay. If such a report is made to the Congress, the final decision shall be made not later than 10 months after the date of the filing of such schedule. If the final decision of the Commission is not made within the applicable time period, the rate, fare, charge, classification, regulation, or practice shall go into effect immediately at the expiration of such time period, or shall remain in effect if it has already become effective. Such rate, fare, charge, classification, regulation, or practice may be set aside thereafter by the Commission if, upon complaint of an interested party, the Commission finds it to be unlawful.

(b) Pending a hearing pursuant to subdivision (a), the schedule may be suspended, pursuant to subdivision (d), for 7 months beyond the time when it would otherwise go into effect, or for 10 months if the Commission makes a report to the Congress pursuant to subdivision (a), except under the following conditions:

(i) in the case of a rate increase, a rate may not be suspended on the ground that it exceeds a just and reasonable level if the rate is within a limit specified in subdivision (c), except that such a rate change may be suspended under any provision of section 2, 3, or 4 of this part or, following promulgation of standards and procedures under section 1(5) (d) of this part, if the carrier is found to have market dominance, within the meaning of section 1(5) (c) (i) of this part, over the service to which such rate increase applies; or

(ii) in the case of a rate decrease, a rate may not be suspended on the ground that it is below a just and reasonable level if the rate is within a limit specified in subdivision (c), except that such a rate change may be suspended under any provision of section 2, 3, or 4 of this part, or for the purposes of investigating such rate change upon a complaint that such rate change constitutes a competitive practice which is unfair, destructive, predatory or otherwise undermines competition which is necessary in the public interest.

(c) The limitations upon the Commission's power to suspend rate changes set forth in subdivisions (b) (i) and (ii) apply only to rate changes which are not of general applicability to all or substantially all classes of traffic and only if—

(i) the rate increase or decrease is filed within 2 years after the date of the enactment of this subdivision;

(ii) the common carrier by railroad notifies the Commission that it wishes to have the rate considered pursuant to this subdivision;

(iii) the aggregate of increases or decreases in any rate filed pursuant to clauses (i) and (ii) of this subdivision within the first 365 days following such date of enactment is not more than 7 per centum of the rate in effect on January 1, 1976; and

(iv) the aggregate of the increases or decreases for any rate filed pursuant to clauses (i) and (ii) of this subdivision within the second 365 day-period following such date of enactment is not more than 7 per centum of the rate in effect on January 1, 1977.

(d) The Commission may not suspend a rate under this paragraph unless it appears from specific facts shown by the verified complaint of any person that—

(i) without suspension the proposed rate change will cause substantial injury to the complainant or the party represented by such complainant; and

(ii) it is likely that such complainant will prevail on the merits.

The burden of proof shall be upon the complainant to establish the matters set forth in clauses (i) and (ii) of this subdivision. Nothing in this paragraph shall be construed as establishing a presumption that any rate increase or decrease in excess of the limits set forth in clauses (iii) or (iv) of subdivision (c) is unlawful or should be suspended.

(e) If a hearing is initiated under this paragraph with respect to a proposed increased rate, fare, or charge, and if the schedule is not suspended pending such hearing and the decision thereon, the Commission shall require the railroads involved to keep an account of all amounts received because of such increase from the date such rate, fare, or charge became effective until the Commission issues an order or until 7 months after such date, whichever first occurs, or, if the hearings are extended pursuant to subdivision (a), until an order issues or until 10 months elapse, whichever first occurs. The account shall specify by whom and on whose behalf the amounts are paid. In its final order, the Commission shall require the common carrier by railroad to refund to the person on whose behalf the amounts were paid that portion of such increased rate, fare, or charge found to be not justified, plus interest at a rate which is equal to the average yield (on the date such schedule is filed) of marketable securities of the United States which have a duration of 90 days. With respect to any proposed decreased rate, fare, or charge which is suspended, if the decrease or any part thereof is ultimately found to be lawful, the common carrier by railroad may refund any part of the portion of such decreased rate, fare, or charge found justified if such carrier makes such a refund available on an equal basis to all shippers who participated in such rate, fare, or charge according to the relative amounts of traffic shipped at such rate, fare, or charge.

(f) In any hearing under this section, the burden of proof is on the common carrier by railroad to show that the proposed changed rate, fare, charge, classification, rule, regulation, or practice is just and reasonable. The Commission shall specifically consider, in any such hearing, proof that such proposed changed rate, fare, charge, classification, rule, regulation, or practice will have a significantly adverse effect (in violation of section 2 or 3 of this part) on the competitive posture of shippers or consignees affected thereby. The Commission shall give such hearing and decision preference over all other matters relating to railroads pending before the Commission and shall make its decision at the earliest practicable time.

Historical Note

For the effect of the amendment made by Pub. L. 94-210, 90 Stat. 37, see the historical note following §15(1).

Section 15. (9) Market dominance; suspension.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 36.]

(9) Following promulgation of standards under section 1(5) (d) of this part, whenever a rate of a common carrier by railroad subject to this part is challenged as being unreasonably high, the Commission shall, upon complaint or upon its own initiative and within 90 days after the commencement of a proceeding to investigate the lawfulness of such rate, determine whether the carrier proposing such rate has market dominance, within the meaning of section 1(5) (c) (i) of this part, over the service to which such rate applies. If the Commission finds that such a carrier does not have such market dominance, such finding shall be determinative in all additional or other proceedings under this Act concerning such rate or service, unless (a) such finding is modified or set aside by the Commission, or (b) such finding is set aside by a court of competent jurisdiction. Nothing in this paragraph shall limit the Commission's power to suspend a rate pursuant to this section, except that if the Commission has found that a carrier does not have such market dominance over the service to which a rate applies, the Commission may not suspend any increase in such rate on the ground that such rate as increased exceeds a just or reasonable maximum for such service, unless the Commission specifically modifies or sets aside its prior determination concerning market dominance over the service to which such rate applies.

Historical Note

For the effect of the amendment made by Pub. L. 94-210, 90 Stat. 35, see the historical note following §15(1).

Section 15. (10) Shipper's choice of route to be observed.—[Unchanged; formerly paragraph (8) but redesignated (10) by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 35. See vol. 9, p. 7689;]

Amendments, see footnotes, vol. 3, p. 2010; historical notes, vol. 3, p. 2010, vol. 21, p. 16921.

Notes of Decisions

Volume 3—p. 2011; Volume 7—p. 5568; Volume 9—p. 7689; Volume 11—p. 9278; Volume 12—p. 10317; Volume 13—p. 11020; Volume 14—p. 11525; Volume 15—p. 12109; Volume 16—p. 12756; Volume 17—p. 13442; Volume 18—p. 14203; Volume 19—p. 15393; Volume 21—P. 16921.

Duty of Carrier to Comply with Shipper's Routing

62. Forwarding by cheapest reasonable available route consistent with instructions. —[Vols. 3, 7, 9, 11, 14-18].—Carrier is justified in using the route which is substantially less circuitous than the lower rated route when shipper's instructions call for expeditious service. It is the duty of the carrier to deal justly with the shipper and ordinarily this requires that shipments be routed over the cheapest route. But when the reasonable interpretation of the shipper's instructions indicates desire for expedition, resort to the more expensive short route is justified. —Peter Kiewit Sons' Co. v. Chicago, B. & Q. R. Co. 329 I.C.C. 239 (242).

68. Conflict between route and rate. —[Vols. 3, 7, 9, 11, 15-19, 21].—Commission has consistently held that where a conflict exists between the rate and route shown in shipper's bill of lading, the carrier's agent must call such conflict to shipper's attention and failure to do so renders the carrier liable for any resulting damages. No such damages were shown herein and the Commission, citing 269 ICC 739, concluded that the shipment of furniture at issue herein moved as routed over the lowest rated available route permitting the stop-off requested by complainant shipper's bill of lading and said shipment was therefore not misrouted.—Futorian Manufacturing Corp. v. S. Louis—S. F. Ry. Co., 335 I.C.C. 156 (158-60).

Section 15. (11), (12) Liability, delivery contrary to routing instructions; direction of unrouted traffic.—[Unchanged; formerly paragraphs (9) and (10) but redesignated (11) and (12) by the act of Feb. 5, 1976, Pub. L. 92-210, §202, 90 Stat. 35. See vol. 9, p. 7695.].

Compensation to Owner of Goods

37.—Allowances to be just and reasonable.—The purpose of classification in setting a multilevel system of allowances is to aggregate tank cars of relatively homogeneous costs within one group so as to apply to them a proper single allowance reflecting such costs. To achieve this purpose there necessarily must be close correlation between the methods used for classification and those used for costing. Thus, there is no undue or unreasonable discrimination in a legal sense, when similar cars of different ages are differently classified and differently compensated, because the owners of such cars experience substantially different costs. It is more appropriate that tank cars should be grouped based on their depreciated, rather than on their undepreciated, values for the setting of multilevel allowances.—Tank Car Allowances, Southern Ry. System, 329 I.C.C. 466 (480)

Contrary to respondent's contention that BVC (base value classification a system for determining reproduction values of tank cars for grouping purposes), inflates car values and, thus, improperly increases capital charges, the record shows that the substitution of BVC for Interchange Rule 112 (a formula for determining the value of a car built in a particular year), produced a slightly downward shift. Hence the adoption of the BVC system of grouping cars under the trilevel proposal would reduce, overall, the allowances payable. The Commission concluded that, in the circumstances of the instant proceedings, the use of reproduction values, as modified by the BVC system, is a just and reasonable method for determining tank car allowances, whereas the use of original costs for that purpose has not been shown to be appropriate.—Id., p. 481.

Respondent carrier's reduction of its annual charge for train-rental when carrier's performance is below the guaranteed minimum average speed stated in its tariff is an unlawful refund. The 25 mile-an-hour minimum speed is not in excess of respondent's speed in normal operation. Since no expedited service is performed and no special charge made, the refund would be made from charges collected for other services. Guaranteed minimum speed and refund provisions ordered canceled.—Grain by Rent-A-Train, IFA Territory to Gulf Ports, 335 I.C.C. 111 (119-20).

38.—Cost of service as measure of allowance.—[Vols. 3, 7, 9, 19, 21].—Actual miles run constitute the best standard for determining actual costs and, therefore, also the allowances based thereon. However, this does not mean that short tariff miles or any other distance may not be properly used as a basis for the payment of allowances. Actual mileages may be easily converted to other constructive distances through the use of an appropriate ratio based upon actual experience.—Tank Car Allowances, Southern Ry. System, 329 I.C.C. 466 (483).

Evidence was found to be persuasive that the payment of allowances on the basis of loaded miles only will encourage more efficient use of equipment in revenue service, to the economic advantage of the carriers as well as the shippers. Such a practice, which the Commission found to be just and reasonable, would also eliminate any necessity for continuing the equalization rule, and consequently, the required detailed recordkeeping. The latter rule has neither prevented circuitous routings, nor has it protected the railroads from excessive empty movement of tank cars in relation to loaded movement. Its effect has been mainly to postpone almost indefinitely any payments to the carriers for the excess empty mileages.—Id., p. 483.

40.—When refusal of allowance or service is not discriminatory.—[Vols. 3, 7].—In ordering the cancellation of the proposed trilevel allowances, the Commission did not mean to require the respondent railroads, nor did it expect them, to revert back to a single-level allowance. All parties concede that a multilevel system is preferable to, and constitutes an advancement and an improvement over, the prior system.—Tank Car Allowances, Southern Ry. System, 329 I.C.C. 466 (483).

Allowances for Particular Instrumentalities or Service

59. Pickup and delivery.—[Vols. 11, 14, 15].—On reconsideration, prior finding that there is no legal duty or holding out on the part of respondents under their line-haul rates on cotton to serve off-line cotton gins and, therefore, any service furnished by the owner in connection with movements from such gins to on rail compresses at transit points was voluntary service for which no allowance could be paid, reversed. Regardless of whether gin is located on or off the rail line, respondents' tariffs provide for payment of allowances in liew of rail movement from the rail origin to transit station; also, though allowances which are paid for railroad's substituted service from off-line gins are fictional in character, the use of fictions in ratemaking is helpful and necessary in certain situations when restrictively applied to prevent abuse. Since considered allowances in every instance for transportation by the shipper in lieu of rail service from a rail origin, they are paid for services that carriers are legally obligated to perform. Allowance provisions in respondents' tariffs are within the purview of §15(13), and are not unlawful.—Allowance for Trucking Baled Cotton—Ark., Okla., Tex., 329 I.C.C. 786 (792-5)*.

Furthermore, certain cotton marketing practices, such as tagging bales at the gin to show grower's name and name and location of the gin, obviate deficiencies enumerated in the prior findings. Those practices would prevent shipper from avoiding the transit charge, collecting more than one allowance, or designating as origin of its shipment a point having a higher allowance than that applicable from actual origin and, thereby, defeating the line-haul rate. Also, the material value of such practices should be considered in determining whether allowances paid under respondents' tariffs exceed a reasonable level.—Id., p. 791.

Publication

65. Publication of allowances required.—[Vols. 3, 7, 9, 11, 12, 14-16, 19].—The publication in tariff form of allowances on shipper-leased tank cars is not a matter of managerial discretion. Rather, it is a statutory commandment. Allowances for instrumentalities, such as tank cars, furnished to the carriers by a shipper for the transportation of the latter's traffic, regardless of whether such equipment is owned or leased by him, are subject to the tariff publication requirements of §15(13) of the Act to which carriers must adhere.—Tank Car Allowances, Southern Ry. System, 329 I.C.C. 466 (476).

Province of Courts and of Commission: Procedure

78. Burden of proof.—[Vols. 3, 13, 18].—See Tank Car Allowances, Southern Ry. System, at §15(13), n. 37 *supra*.

Section 15. (16) Other powers of Commission not excluded.—[Unchanged; formerly paragraph (14) but redesignated (16) by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 35. See vol. 9, p. 7707.]

Amendments, see footnotes, vol. 3, 2070.

Section 15. (17) Seasonal, regional, peak-period rates; report to Congress.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 36.]

(17) Within 1 year after the date of enactment of this paragraph, the Commission shall establish, by rule, standards and expeditious procedures for the establishment of railroad rates based on seasonal, regional, or peak-period demand for rail services. Such standards and procedures shall be designed to (a) provide sufficient incentive to shippers to reduce peak-period shipments, through rescheduling and advance planning; (b) generate additional revenues for the railroads; and (c) improve (i) the utilization of the national supply of freight cars, (ii) the movement of goods by rail, (iii) levels of employment by railroads, and (iv) the financial stability of markets served by railroads. Following the establishment of such standards and procedures, the Commission shall prepare and submit to the Congress annual reports on the implementation of such rates, including recommendations with respect to the need, if any, for additional legislation to facilitate the establishment of such demand-sensitive rates.

Historical Note

For the effect of the amendment made by Pub. L. 94-210, 90 Stat. 36, see the historical note following §15(1).

Section 15. (18) Separate rates, distinct rail services.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §202, 90 Stat. 36.)]

(18) In order to encourage competition, to promote increased reinvestment by railroads, and to encourage and facilitate increased non-railroad investment in the production of rail services, a carrier by railroad subject to this part may, upon its own initiative or upon the request of any shipper or receiver of freight, file separate rates for distinct rail services. Within 1 year after the date of enactment of this paragraph, the Commis-

sion shall establish, by rule, expeditious procedures for permitting publication of separate rates for distinct rail services in order to (a) encourage the pricing of such services in accordance with the carrier's cash-outlays for such services and the demand therefor, and (b) enable shippers and receivers to evaluate all transportation and related charges and alternatives.

Historical Note

For the effect of the amendment made by Pub. L. 94-210, 90 Stat. 36, see the historical note following §15(1).

Section 15. (19) Filing of schedules; total capital investment.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §206, 90 Stat. 41.]

(19) Notwithstanding any other provision of law, a common carrier by railroad subject to this part may file with the Commission a notice of intention to file a schedule stating a new rate, fare, charge, classification, regulation, or practice whenever the implementation of the proposed schedule would require a total capital investment of $1,000,000 or more, individually or collectively, by such carrier, or by a shipper, receiver, or agent thereof, or an interested third party. The filing shall be accompanied by a sworn affidavit setting forth in detail the anticipated capital investment upon which such filing is based. Any interested person may request the Commission to investigate the schedule proposed to be filed, and upon such request the Commission shall hold a hearing with respect to such schedule. Such hearing may be conducted without answer or other formal pleading, but reasonable notice shall be provided to interested parties. Unless, prior to the 180-day period following the filing of such notice of intention, the Commission determines, after a hearing, that the proposed schedule, or any part thereof, would be unlawful, such carrier may file the schedule at any time within 180 days thereafter to become effective after 30 days' notice. Such a schedule may not, for a period of 5 years after its effective date, be suspended or set aside as unlawful under section 2, 3, or 4 of this part, except that the Commission may at any time order such schedule to be revised to a level equaling the variable costs of providing the service, if the rate stated therein is found to reduce the going concern value of the carrier.

Section 15a. (1) Fair return—"Rates defined.—[Unchanged. See vol. 9, p. 7707.]

Amendments, see footnote, vol. 9, p. 7707; historical notes, vol. 3, p. 2071, vol. 7, p. 5589.

Section 15a. (2) Rule of rate-making.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §205, 90 Stat. 41, the new sentence, as set forth below, is added to the end of the section. See vol. 11, p. 9281.]

***This paragraph shall not apply to common carriers by railroad subject to this part.

Amendments, see footnotes, vol. 3, p. 2077, vol. 11, p. 9282; historical notes, vol. 3, p. 2071, vol. 7, p. 5589; vol. 11, p. 9281, vol. 12, p. 10319, vol. 13, p. 11015, vol. 21, p. 16925.

Notes of Decisions

Volume 3—p. 2077; Volume 7—p. 5590; Vol. 9—p. 7708; Volume 11—p. 9282; Volume 12—p. 10320; Volume 13—p. 11024; Volume 14—p. 11528; Volume 15—p. 12112; Volume 16—p. 12760; Volume 17—p. 13446; Volume 18—p. 14206; Volume 19—p. 15399; Volume 21—p. 16925.

1. Purpose and construction.[Vols. 9, 11, 13-19, 21].—The district court held that the Commission's order authorizing but not requiring railroads to put into effect a rate increase on a number of commodities, without prescribing a particular rate on a particular commodity, was within the Commission's power in view of the impracticability of dealing with specific rates in a proceeding in which hundreds of commodities were involved.—Atlantic City Electric Company v. United States, 306 F. Supp. 338 (342).

A discussion of the rail cost evidence of record (appendix B hereto) shows that the proposed proportional rate of 9 cents exceeds the adjusted out-of-pocket costs of 6.6 cents. Thus, the evidence clearly establishes that the proposed rate is reasonably compensatory for movements from origins on the New York Central R. Co. to Kankakee, Ill. Further, reshipping rates beyond Kankakee have been in effect and unchanged for many years. Record shows ton mile and car-mile revenues under through rates compare favorably with system average revenues and protestants rebut neither this evidence nor the presumption of reasonableness of reshipping rates. Commission finds the combination of rates into and out of Kankakee produce reasonably compensatory through rates.—Corn and Corn Products, Illinois to Official Territory, 332 I.C.C. 485 (487)*.

In light of the standards of §15A(2), Commission concludes that the proposed rates, previously found necessary to offset increased operating expenses, are not so unreasonably high as to be self-defeating nor would they have a materially adverse effect on the movement of traffic. Generally, they are within a zone of reasonableness where management is accorded substantial freedom in service pricing. There is no statutory standard requiring the making of rates to yield a certain rate of return on investment. Also, certain contentions of protestant regarding respondents' net investments are without substantial basis for the reasons given.—Increased Freight Rates, 1968, 332 I.C.C. 590 (602-08)*.

Proposed rates herein, if approved, would result in diversion of traffic from protestant which record shows will assuredly invite further rate reductions by protestant, an intramodal competitor of respondent railroad. The result would be a useless waste of badly needed carrier revenues and therefore, the proposal constitutes a destructive competitive practice.—Motor Vehicles, Kansas City, Mo., to Southwest, 332 I.C.C. 615 (624-26).

2. Effect of rates on movement of traffic.—[Vols. 9, 11-19, 21].—See Wine, Pacific Coast to the East, at §15a(3), n. 2.

3. Adequate and efficient transportation service.—[Vols. 9, 11, 13, 14, 16, 18, 19, 21].—See also Increased Freight Rates, 1970 and 1971, at §6(3), n. 12.

Commission ordered carriers herein to undertake steps to cure the numerous service deficiencies complained of on the record, especially including failure to meet schedules, terminal delays, erratic delivery, bunching of deliveries, and placing of cars unfit for use, and to conform their service to the adequacy and efficiency required by §15a. Periodic reports on the progress of such curative steps are to be made by carriers.—Increased Freight Rates, 1970 and 1971, 339 I.C.C. 125 (136-156).

Proceeding herein was undertaken to determine whether Arkansas intrastate freight rates fail to contribute their fair share to revenues required by respondents to enable them to provide adequate and efficient transportation service at lowest cost consistent with furnishing of such service.—Arkansas Intrastate Freight Rates and Charges, 1970, 341 I.C.C. 872 (875).

5. Earnings of carriers; carrier credit.—[Vols. 9, 11-18].—On further investigation in this general revenue proceeding, the Commission found that in considering reasonableness of increased freight rates substantial weight should be accorded to the need for such increases to help recover and supplement a standard credit position on investments of about 4 percent for respondent railroads, long accepted as a proper rate of return.—Increased Freight Rates, 1967, 332 I.C.C. 280 (289-290)*.

Section 15a. (3) Competitive rate-making.—[Unchanged, except by the act of Feb. 5, 1976, Pub. L. 94-210, §205, 90 Stat. 41, the new sentence, as set forth below, is added to the end of the section. See vol. 18, p. 14209.]

***This paragraph shall not apply to common carriers by railroad subject to this part.

Notes of Decisions

Volume 18—p. 14209; Volume 19—p. 15400; Volume 21—p. 16927.

2. Construction and interpretation.—[Vols. 18, 19, 21].—See also Sea-Land Service, Inc. v. Baltimore & O. R. Co., at NTP, n. 5, destructive.

While appellee railroads contend they should be permitted to maintain proposed compensatory rate on ingot molds, reduced to meet barge-truck competition, on the ground that any rate which exceeds out-of-pocket cost would enable them to make a profit on the traffic, the fact that §15a(3) was not enacted to enable railroads to price their services so as to obtain maximum revenue therefrom is made clear by the statutory language regarding protection of traffic of each transportation mode; if Congress had intended only to prevent noncompensatory pricing by regulated carriers, clearer language could easily have been used. District court erred in reading the national transportation policy and §15a(3) and accompanying legislative history as reflecting Congressional intent that inherent advantage should be determined in most cases by a comparison of out-of-pocket costs and, therefore, railroads should generally be permitted to set any individual rate so long as it was compensatory for the service. —American Commercial Lines, Inc. v. Louisville & N. R. Co., 392 U.S. 571 (575-8, 589)*.

Enactment of §15a(3) was due primarily to complaints by rail carriers that the Commission held their rates at artificially high levels in order to protect competing modes from being driven out of business by rail competition; however, original language therein which required consideration of only the effect of a rate reduction on the carrier proposing it, in cases involving intermodal competition, was rejected by Congress. And, as stated in 372 US 744, principal reason for reference to the national transportation policy in §15a(3) was to emphasize the Commission's power to prevent railroads from destroying or impairing inherent advantages of other modes by establishing a compensatory rate below their fully distributed cost and thereby force a competing lower cost transport mode to go below its own fully distributed cost and thus perhaps go out of business. Nothing in that opinion indicates a preference for either out-of-pocket or fully distributed costs as a measure of inherent advantage; rather, all that is said is that the appropriate measure "may be" neither.—Id., pp. 580-4.

And, since reference to inherent advantage was inserted in §15a(3) at the insistence of carriers that were demanding that fully distributed cost be the sole measure of that advantage, clear import of the Supreme Court's decision is that the Commission could, after due consideration, decide that some other measure of comparative cost might be more satisfactory in cases involving intermodal competition than the one it had traditionally used. However, initial determination of the question is for the Commission, operating within the statutory limits set by Congress, and the district court's action (reversing Commission disapproval of considered reduced rate) prevents the Commission from exercising its judgment in pending rulemaking proceeding which would provide a more adequate record for initial resolution of the issues. Also, while the district court objected to the Commission's failure to explain why it permitted out-of-pocket costs where competing carrier was unregulated and not where competitor was regulated, §15a(3) by its own terms applies only to regulated carriers; thus, any arbitrariness in such distinction between regulated and unregulated carriers is the creation of Congress, not the Commission.—Id., pp. 583-6, 590-3.

Therefore, district court erroneously set aside and remanded the Commission's disapproval of proposed reduced rail rate which (while below fully distributed costs of both the railroads and competing barge-truck carriers) exceeded the rail out-of-pocket cost, on the grounds that (1) the order was based on misinterpretation or misapplication of relevant statutes and (2) the Commission failed to adequately explain its reasons for disallowing the rate. The Commission adequately stated its reasons for finding that appellee railroads' rate would impair the inherent advantage enjoyed by the barge-truck service; and the lower court erred in its reading of both decision in 372 US 744 and the extent of Congress' intent to foster intermodal competition shown in legislative history of the statutes, in concluding that the Commission's comparison of fully distributed costs in determining which of the competing modes was the lower cost one contravened the objectives and purposes of §15a(3) and that, in such cases, the Commission must justify a departure from the use of out-of-pocket cost as a measure of inherent cost advantage. Reversed and remanded to the district court with instructions to affirm the Commission's order.—Id., pp. 574-6, 578-83, 593-4.

As pointed out in 372 US 744, the principal reason for Congress' reference to the national transportation policy in §15a(3) was to emphasize the power of the Commission to prevent railroads from destroying inherent advantages of other transportation modes. However, rationale, and principles stated, in that decision relate solely to intermodal competitive rate adjustments; thus, since proposed reduced rate adjustment was not prompted or established for intermodal competitive reasons, but to improve shippers' competitive position in the destination area, the decision is not applicable.—Wine, Pacific Coast to East, 326 I.C.C. 119 (154-5)*.

Moreover, the inescapable conclusion to be drawn from the court's comments in the cited case, that "something more than even hard competition must be shown before a particular rate can be deemed unfair or destructive" and that all reduced rates which force the competitive low-cost mode to go below its fully distributed costs might "not unduly impair that advantage," is that the court did not intend to prescribe a mechanical formula for the Commission to apply whenever the issue of destructive competition is presented.—Id., 329 I.C.C. 167 (173)*.

Though proposed reduced rail rates fall below Sea-Land's fully distributed costs, in some instances, they are considerably above its out-of-pocket costs; and, since its participation in considered traffic is limited and it has already reduced its rates to meet rail competition, evidence is convincing that Sea-Land will continue to operate and participate in the traffic on a profitable basis as rates which, while well above its out-of-pocket costs, are differentially below the rail rates. Proposed rail rates are compelled by a market situation already out of adjustment due to unregulated water carriage, are generally compensative, and shown to be just and reasonable from respondents' revenue requirements; therefore, any ensuing competition would not be destructive in nature but, rather, would constitute the same "hard competition" which was recognized as lawful in 372 US 744. Thus, where nonregulated carriage is a major source of competition, regulated carriers may lawfully reduce their rates below the fully distributed cost level of another regulated carrier which competes to some extent for the traffic.—Id., pp. 173-5.

As stated by the Supreme Court in 372 US 744, §15a(3) makes it clear that something more than even hard competition must be shown before a particular rate can be deemed unfair or destructive, and Congress did not regard the setting of a rate at a certain level to constitute a destructive competitive practice simply because that rate would divert some or all traffic from a competing mode. Measured by such criteria, reduced rail rates which are compensatory cannot be found to constitute a destructive competitive practice when the record does not show that they genuinely threaten continued existence of a transportation service that is uniquely capable of filling a transcendent national defense or other public need.—Grain from Idaho, Oreg. & Wash. to Ports in Oreg. & Wash., 326 I.C.C. 358 (362, 368)*.

In a case involving intermodal competition, the more particularized mandates of the national transportation policy or the clear congressional intent embodied in §15a(3) should govern lawfulness of proposed rates. And, as stated in 372 US 744, those factors should not be overridden except under extraordinary circumstances; to justify such a result, it must be shown that the proposed rates in themselves genuinely threatened the continued existence of a transportation service that is uniquely capable of filling a transcendent national defense or other public need. Protestant water carrier made no such showing with respect to proposed rail TOFC rate.—Canned or Preserved Foodstuffs from Fla. To N.Y. & N.J., 326 I.C.C. 776 (782)*.

Any rate reduction will have competitive ramifications and alter previously existing relationships. This fact is insufficient to condemn an adjustment. Those protesting the proposed Baltimore rates have shown only that the proposed rates would be inimical to their interests. Without more, and bearing in mind the large amount of paper traffic moving through New York, the Commission views this adjustment rather as a step in restoring healthy carrier competition. Changes in rates are not unlawful merely because of possible, or even probable, additional rate changes.—Paper, Central Territory to North Atlantic Ports, 329 I.C.C. 281 (290).

Complainant Sea-Land urged that it is the low-cost carrier, that its rate is below the fully distributed costs of the "Sea-Land route," and that it has been forced to publish a less-than-profitable rate in order to compete. However, even if the Commission were to determine that complainant is the low cost carrier on a fully distributed basis (which is impossible since the underlying data are not of record), its rate of 75 cents per 100 pounds is not below fully-distributed costs but rather exceeds those costs. Complainant's present rate, inasmuch as it exceeds fully-distributed costs, is not "unprofitable" in any sense of the word and the evidence shows Sea-Land has successfuly participated in the traffic at this rate. Therefore, complainant has not shown any violation of §15a(3) in this proceeding.—Sea-Land Service, Inc., v. New York Central R. Co., 329 I.C.C. 589 (597).

The undisputed facts of record show that the proposed proportional rate is competitively necessitated. Although protestant barge lines are the low-cost mode, proposed rate exceeds both barge rates and barge fully distributed costs and the effect of the proposed rate upon barge traffic is not shown to be imminently destructive or to go beyond the hard competition sanctioned in 372 US 744. Rail rates here in issue not found to constitute a destructive competitive practice.—Corn and Corn Products, Illinois to Official Territory, 332 I.C.C. 485 (487-88)*.

The Commission will not, in this investigation proceeding, consider the effect of "public cost" (the cost incurred by governmental agencies in providing transportation facilities) on intermodal competition and the rail freight rate structure. Since no carrier could establish the hypothetical costs assignable to its operations or those of its competitors, the "public cost" issue would emasculate §15a(3) and repeal the inherent advantages clause of the national transportation policy. We also have this issue in certain respects before us in another docket. —Investigation of Railroad Freight Rate Structure, 340 I.C.C. 868 (874-75).

Section 15a. (4) Revenue levels, railroads.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §205, 90 Stat. 41.]

(4) With respect to common carriers by railroad, the Commission shall, within 24 months after the date of enactment of this paragraph, after notice and an opportunity for a hearing, develop and promulgate (and thereafter revise and maintain) reasonable standards and procedures for the establishment of revenue levels adequate under honest, economical, and efficient management to cover total operating expenses, including depreciation and obsolescence, plus a fair, reasonable, and economic profit or return (or both) on capital employed in the business. Such revenue levels should (a) provide a flow of net income plus depreciation adequate to support prudent capital outlays, assure the repayment of a reasonable level of debt, permit the raising of needed equity capital, and cover the effects of inflation and (b) insure retention and attraction of capital in amounts adequate to provide a sound transportation system in the United States. The Commission shall make an adequate and continuing effort to assist such carriers in attaining such revenue levels. No rate of a common carrier by railroad shall be held up to a particular level to protect the traffic of any other carrier or mode of transportation, unless the Commission finds that such rate reduces or would reduce the going concern value of the carrier charging the rate.

Section 15a. (5) Rate relationships; shippers' competition.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §203, 90 Stat. 39.]

(5) The Commission shall, in any proceeding which involves a proposed increase or decrease in railroad rates, specifically consider allegations that such increase or decrease would change the rate relationships between commodities, ports, points, regions, territories, or other particular descriptions of traffic (whether or not such relationships were previously considered or approved by the Commission) and allegations that such increase or decrease would have a significantly adverse effect on the competitive position of shippers or consignees served by the railroad proposing such increase or decrease. If the Commission finds that such allegations as to change or effect are substantially supported on the record, it shall take such steps as are necessary, either before or after such pro-

posed increase or decrease becomes effective and either within or outside such proceeding, to investigate the lawfulness of such change or effect.

Section 15a. (6) Increase in rates (Railroad Rate Adjustment Act of 1973).—[Formerly paragraph (4) which was added by Public Law 93-69, July 10, 1973, 87 Stat. 162, but redesignated (6) by the act of Feb. 5, 1976, Public Law 94-210, 90 Stat. 41.]

(a) The Commission shall by rule, on or before August 1, 1973, establish requirements for petitions for adjustment of interstate rates of common carriers subject to this part based upon increases in expenses of such carriers resulting from any increases in taxes under the Railroad Retirement Tax Act, as amended, occurring on or before January 1, 1975, or as a result of the enactment of the Railroad Retirement Amendments of 1973. Such requirements, established pursuant to section 553 of title 5 of the United States Code (with time for comment limited so as to meet the required date for establishment and subject to future amendment or revocation, shall be designed to facilitate fair and expeditious action on any such petition as required in subparagraph (b) of this paragraph by disclosing such information as the amount needed in rate increases to offset such increases in expenses and the availability of means other than a rate increase by which the carrier might absorb or offset such increases in expenses.

(b) Notwithstanding any other provision of law, the Commission shall, within thirty days of the filing of a verified petition in accordance with rules promulgated under subparagraph (a) of this paragraph, by any carrier or group of carriers subject to this part, permit the establishment of increases in the general level of the interstate rates of said carrier or carriers in an amount approximating that needed to offset increases in expenses theretofore experienced or demonstrably certain to occur commencing on or before the effective date of the increased rates, as a result of any increases in taxes under the Railroad Retirement Tax Act, as amended, occurring on or before January 1, 1975, or as a result of the enactment of the Railroad Retirement Amendments of 1973. Such increases in rates may be made effective on not more than thirty nor less than ten days' notice to the public, notwithstanding any outstanding orders of the Commission. To the extent necessary to effectuate their establishment, rates so increased shall be relieved from the provisions of section 4 of this part and may be published in tariff supplements of the kind ordinarily authorized in general increase proceedings.

(c) The Commission shall within sixty days from the date of establishment of interim rates under paragraph (4) (b) of this section commence hearings for the purpose of making the final rate determination. The Commission shall then proceed to make such final rate determination with the carrier having the burden of proof. In making such determination, the

Commission may take into account all factors appropriate to ratemaking generally under part I of this Act and shall determine such final rates under the standards and limitations applicable to ratemaking generally under part I of this Act. If the increases in rates finally authorized by the Commission are less than the increases in rates initially made effective, the carrier or carriers shall, subject to such tariff provisions as the Commission shall deem sufficient, make such refunds (in the amount by which the initially increased rate collected exceeds the finally authorized increased rate) as may be ordered by the Commission, plus a reasonable rate of interest as determined by the Commission. Nothing contained in this paragraph shall limit or otherwise affect the authority of the Commission to authorize or to permit to become effective any increase in rates other than the increases herein specified.

(d) (A) The State authority having jurisdiction over petitions for intrastate rate increases by any carrier or group of carriers subject to part I of this Act shall, within 60 days of the filing of a verified petition for such increases based upon increases in expenses of such carriers as a result of any increases in taxes under the Railroad Retirement Tax Act, as amended, occurring on or before January 1, 1975, or as a result of the enactment of the Railroad Retirement Amendments of 1973, act upon said petition. Such State authority may grant an interim rate increase or a final rate increase. If such State authority grants any interim rate increases, it shall thereafter investigate and determine the reasonableness of such increases and modify them to the extent required by applicable law. To the extent that any such interim increases are reduced as a result of the action of a State authority, the carrier or carriers shall make such refunds (in the amount by which the initially increased rate collected exceeds the finally authorized increased rate) as may be ordered by such State authority, plus a reasonable rate of interest as determined by the State authority.

(B) If a State authority denies in toto such a petition filed with it by such carrier or group of carriers seeking relief regarding such intrastate rate increases or does not act finally on such petition within 60 days from the presentation thereof, the Commission shall, within 30 days of the filing of a verified petition by such carrier or group of carriers relating to such intrastate rates, act upon such petition by applying the ratemaking criteria of subparagraph (4) (c) of this paragraph. If the Commission grants, in whole or in part, such petition by any carrier or group of carriers, the increase authorized shall be considered as an interim rate increase as provided in subparagraph (A) above and shall be subject to final determination by the State authority in accordance with the procedures prescribed for interim intrastate rate increases as provided above, including the ordering of refunds by such State authority.

(C) If a State authority denies in part such a petition filed with it by such carrier or group of carriers, within 60 days from the presentation thereof, the Commission shall, within 30 days of the filing of a verified petition by such carrier or group of carriers relating to the intrastate rates involved, act upon such petition by applying the criteria of section 13(4) of this part.

(D) Nothing in subparagraph (A) or (B) shall be construed to abrogate the authority of the Commission under section 13(4) of this part and in the event a carrier or group of carriers subject to a refund requirement under subparagraph (A) or (B) files a petition under section 13(3), the refund requirement shall be stayed pending final order of the Commission under section 13(4) of this part.

(E) Any increased freight rates authorized shall not exceed a reasonable level by types of traffic, commodities, or commodity groups and shall preserve existing market patterns and relationships and present port relationships by increase limitations within and between the major districts to the extent possible without authorizing unreasonable increases in any district."

Regulations of the Commission

38 FR 20623, Aug. 2, 1973, Part 1107: Requirements and Procedures Relating to Railroad Rate Adjustment Act of 1973, sets forth procedures for petitions for adjustment of interstate freight rates because of increased expenses due to increased taxes, effective Aug. 1, 1973.

38 FR 22125, Aug. 16, 1973, Part 1107: Requirements and Procedures Relating to Railroad Rate Adjustment Act of 1973, a correction to rules promulgating at 38 FR 20623.

Section 16. Orders of commission and enforcement thereof—(1) Award of damages.—[Unchanged. See vol. 9, p. 7718.]

Amendments, see footnotes, vol. 3, p. 2129; historical note, p. 2129.

Notes of Decisions

Volume 3—p. 2129; Volume 7—p. 5611; Volume 9—p. 7718; Volume 11—p. 9287; Volume 12—p. 10321; Volume 14—p. 11531; Volume 15—p. 12115; Volume 16—p. 12765; Volume 17—p. 13450; Volume 18—p. 14209.

1. Reparation orders, generally.—[Vols. 3, 7, 9, 18].—There is no merit to argument that §16(1) grants an absolute right of cross-examination; that section, which does not mention cross-examination, must be interpreted in connection with §13, to which it refers, and §13(1) states that it is the Commission's duty to investigate the matters complained of "in such manner and by such means as it shall deem proper."—Steel, Inc. v. Chicago, B. & Q. R. Co., 323 I.C.C. 509 (515-6).

Section 16. (2) Proceedings in courts to enforce orders; costs, attorney's fees.—[Unchanged. See vol. 11, p. 9287.]

Amendments, see footnotes, vol. 3, p. 2135; vol. 11, pp. 9287-9288; historical note, vol. 3, p. 2135.

Notes of Decisions

Volume 3—p. 2136; Volume 7—p. 5613; Volume 9—p. 7720; Volume 11—p. 9288; Volume 12—p. 10321; Volume 13—p. 11026; Volume 14—p. 11531; Volume 15—p. 12115; Volume 16—p. 12766; Volume 17—p. 13450; Volume 18—p. 14210; Volume 19—p. 15404; Volume 21—p. 16933.

2. Enforcement of reparation orders by courts, in general.—[Vols. 3, 7, 9, 11, 15, 17-19, 21].—Suit by shipper to enforce payment of reparations award by the Commission against defendant railroads, arising from alleged overcharges, requires interpretation of certain tariffs and, in particular, the application of so-called intermediate point rule in tariff publishing rate claimed to be applicable on plaintiff's shipments. As is well settled, construction of language in a tariff presents a question of law; and for purposes of instant case, a tariff is not essentially different from any other written document. Also, it is settled law that a tariff must be construed to avoid unjust, absurd, or improbable results. Thus, it is the court's task to review the Commission's decision that, under tariff intermediate-point rule, the applicable rate on fruits and vegetables actually shipped from central California points to Philadelphia. Pa., was the claimed lower rate published from El Centro to Philadelphia; and if that interpretation is found contrary to law, the court must set it aside. —Samuel P. Mandell Co. v. Pennsylvania R. Co., 336 F. Supp. 565 (568-9)*.

The court rejects the Commission interpretation of the tariff because, as held in 212 F. 2d 812, a route for "intermediate point" rate purposes must not be unreasonable; however, El Centro-Philadelphia route sanctioned by the Commission is unreasonable in the way it constructs routes by piecing together rail lines without any semblance of relation to actual use or commercial reality. In addition, the Commission erred in its application of the intermediate-point rule so as to make rates from El Centro, rather than those from actual origin points, applicable on considered shipments; and since it also erred in its interpretation of provisions of the tariff, rate charged by the carriers from actual central California origins to Philadelphia was the proper one. Accordingly, since the court finds the hypothetically constructed El Centro route to be arbitrary, unreasonable and contrary to law, it will not enforce the Commission's reparations award; judgment entered in favor of defendants. —Id., pp. 569, 571-5.

8. Findings and order of Commission prima facie evidence.—[Vols. 3, 7, 9, 11, 12, 15, 18, 19, 21].—In shipper's suits against motor carriers to recover refunds of freight charges, claimed on basis of the Commission's order in rate-increase investigation which postponed hearing therein on condition that respondent carriers refund to shippers any increases not ultimately found just and reasonable, initial issue presented by plaintiff's motions for summary judgment is the propriety and validity of the refund order. Defendants argue that the Commission order was void for numerous reasons; however, that issue has been resolved against them by the Colorado three-judge court which, after reviewing their contentions, dismissed the complaint in Admiral-Merchants Motor Frt., Inc. v. U.S., 321 F. Supp. 353, aff'd 404 US 802, wherein carriers involved in the Commission proceeding sought to have the refund order overturned. And though, unlike instant case, *Admiral-Merchants* was not an enforcement proceeding but merely an attack on the refund order, that distinction is not relevant to the issue of propriety of the order.—Aluminum Co. of America v. Admiral Merchants Motor Frt., Inc., 337 F. Supp. 674 (677-8).

And in shipper's later suits against other motor carriers for recovery of refunds, based on the same Commission refund order, defendants' initial grounds for opposing plaintiff's summary judgment motions are the same as offered in the earlier case, 337 F. Supp. 647, which decision is incorporated herein by reference; those arguments were considered in the court's prior opinions and, as there outlined, are not found to be meritorious. In addition thereto, defendants now argue that plaintiff seeks to have the court give greater vitality and effect to contested refund order; also that, in view of suggested theory of restitution asserted in the Commission's brief submitted to that three-judge court, the Colorado court's decision upholding the order was not intended to foreclose carriers from later challenging it. Clearly, such contentions are of no merit because (1) the Colorado court rested its decision on a basis wholly apart from that suggested by the Commission and (2) instant suits are not, in any event, restitution suits.—Aluminum Co. of America v. Burlington Truck Lines, Inc., 342 F. Supp. 166 (168-70).

Also, contrary to defendants' continued description, plaintiff's cause of action is not based on a theory of reparations. Such persistent characterization of plaintiff's suits can be nothing more than a smoke screen to hide the fact that the Supreme Court has affirmed a decision which states that all carriers who participated in the Commission rate investigation, and who withdrew their objections to the refund order, are estopped from contesting and have waived their right to challenge validity of that order. While that that decision is not *res adjudicata* as to those defendants who were not parties in the Colorado court proceeding, it is not suggested that they were not part of the group of carriers in the Commission proceeding who withdrew objections to the refund order. Therefore, those carriers also are estopped from contesting the order's validity because, under the doctrine of *stare decisis*, the court must accept the Supreme Court's holding that all carriers involved with the Commission rate-increase proceedings are estopped from contesting the validity of the refund order entered therein.—Id., pp. 170-2.

Defendants also contend that the Colorado court did not affirm the Commission order, but merely refused complainant carriers the relief sought therein; such myopic reading of that opinion is belied by the statement of issues set forth by the court and the question presented on appeal to the Supreme Court which clearly indicate that both those courts were affirming validity of the refund order. In addition, under established review procedures, an affirmance of a Commission order results from a three-judge court's refusal to enjoin; thus, apart from the "presented" issues, when the three-judge court refused to enjoin or set aside the order, and the Supreme Court affirmed, those courts in fact affirmed the validity of the Commission refund order. And under the doctrine of *res judicata*, defendants are precluded from attacking that order and the court is likewise bound to accept the validity thereof in instant proceeding. Therefore, plaintiff is granted summary judgment in the amount of refunds specified in its stipulation with each defendant carrier.—Id., 678-9, 686-7, 682, 688; shipper entitled to refunds sought.—Land O'Lakes, Inc. v. United—Buckingham Frt. Lines, Inc., 351 F. Supp. 103 (109-10, 113).

And the court rejects defendants' added argument that they can now challenge Commission finding, which is only prima facie evidence in instant suits, that carriers had not met their burden of proving that proposed rates were just and reasonable, since they failed to submit evidentiary affidavits to support the claim that they did meet that burden of proof; their failure to submit supporting affidavits is peculiarily important because of the court's limited scope of review over that Commission conclusion in a §16(2) proceeding. See 383 US 576. Moreover, carriers waived any objections to that underlying finding when, as a condition for delay of the hearing on proposed increased rates, they agreed to refund any increases not ultimately approved by the Commission; also, having contested refund portion of the order before a three-judge court, they cannot now urge as invalid an aspect different than the one urged in that court. Defendants waived the right to contest validity of the order as it relates to the finding on burden of proof because of their failure to raise that underlying ground for invalidity when they challenged the refund portion before the reviewing court.—Id., pp. 172-6; Proctor and Gamble Co. v. Byers Transp. Co., Inc., 355 F. Supp. 547 (556-8).

22. Interest.—[Vols. 3, 7, 9, 11, 14].—Although final order in Commission rate investigation, on which shipper based its suits for refund of rate increases not ultimately approved, does not provide for collection of interest from the time of its entry, plaintiff's request for interest on refunds due from each defendant from date of first effective refund order is not beyond scope of the order relied on. While the order does not state that interest shall accrue if respondent carriers refuse to comply with its terms, it is nevertheless clear that §16(2), the statute on which plaintiff relies, represents Congress' policy to encourage prompt payment of moneys which the Commission orders to be paid; and denial of interest accruing from the date of an ignored commission order would tend to discourage the prompt payment of such money, in direct contradiction of Congressional policy. Accordingly, pursuant to Commission order in question, shippers are entitled to 6-percent interest on the refunds due from each carrier from date of the first effective refund order.—Aluminum Co. of America v. Burlington Truck Lines, Inc., 342 F. Supp. 166 (176-7).

26.—Attorney's fees.—[Vols. 3, 7, 9, 11, 12, 14].—Inasmuch as §16(2) was incorporated into part II of the act by §205(g), and shipper's motion for summary judgment is granted, plaintiff is entitled to allowance of a reasonable attorneys' fee as part of the costs in its suits against motor carriers for enforcement of refund order entered by the Commission in its investigation of increased motor-carrier rates.—Aluminum Co. of America v. Admiral Merchants Motor Frt., Inc., 337 F. Supp. 674 (682, 683); contrary to defendants' argument, the court concluded in its earlier opinions that §16(2) was incorporated in its entirety, rather than selectively, by §205(g). Also, the mere fact that amount of plaintiff's requested attorneys' fees almost equals amount of its underlying refund claims does not render such fees invalid. However, reasonable attorneys' fees cannot be awarded in instant suits without a breakdown of costs, attorney hours, and rates as provided in shipper's earlier suits for enforcement of the same refund order.—Aluminum Co. of America v. Burlington Truck Lines, Inc., 342 F. Supp. 166 (177-8); sum of $2500 awarded as reasonable attorneys' fees.—Proctor and Gamble Co. v. Byers Transp. Co., Inc:, 355 F. Supp. 547 (563).

Section 16. (3) Limitation of actions.—[Unchanged. See vol. 18, p. 14210.]

Historical notes, vol. 3, p. 2149, vol. 13, p. 11058.

Notes of Decisions

Volume 3—p. 2151; Volume 7—p. 5620; Volume 9—p. 7727; Volume 11—p. 9291; Volume 12—p. 10322; Volume 13—p. 11026; Volume 14—p. 11532; Volume 15—p. 12116; Volume 16—p. 12766; Volume 17—p. 13451; Volume 18—p. 14212; Volume 19—p. 15405; Volume 21—p. 16935.

In General

10. Claims of and against Federal Government.—[Vols. 3, 9, 11, 15-19].—Railroad's suit against government to recover additional freight charges allegedly due on shipments on which charges were prepaid by commercial shipper, who was reimbursed by the Government, was not barred by statute of limitations. Though brought more than three years after all prepayments, the action was timely as to all claims in issue when it was filed within three years after General Accounting Office denied payment of railroad's supplemental bills and, also, made deductions from other moneys owed the carrier. Intent of §16(3)(i) was to extend periods of limitation as to government traffic to three years from date of (1) payment of charges, (2) refund for overpayment, or (3) deduction under §66, whichever is later; and, contrary to defendant's argument, railroad is not limited to recovering only the amounts deducted. Defendant's motion for summary judgment is denied but it is granted leave to file a counterclaim for overcharges alleged to be due the Government; case remanded to Court of Claims for disposition on the merits.—Erie Lackawanna Ry. Co. v. United States, 439 F. 2d 194 (196-9, 200).

Actions for Overcharges—Subparagraph (c)

98. Complaints within six months after declination.—[Vols. 3, 7, 9, 11-19.—Complainant's letters written within 6 months of the Commission's first letter notifying it of declination of informal complaint are merely repetitive of the original submission and do not constitute a resubmission on an additional-fact basis as required by rule 1.25(f) of Rules of Practice; therefore, formal complaint filed more than 6 months after denial of the informal complaint is barred.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (535).

Accrual of Cause of Action—Subparagraph (e)

106. Time of accrual of cause of action, in general.—[Vols. 3, 7, 12, 21].—Statute relating to limitations on suits by carriers to recover for charges was intended to make the cause of action accrue at time of delivery; but with respect to transportation for the Government, §16(3)(i) was intended to extend the periods of limitation to three years from date of specific events, i.e., (1) payment of charges, (2) refund for overpayment, or (3) deduction under §66, whichever occurs later. Thus, railroad's action against the Government to recover additional charges allegedly due under applicable tariffs—a cause of action which accrued on delivery—was not barred when, though brought more than three years after prepayment of charges by commercial shipper who was reimbursed by the Government, it was filed within three years of date that General Accounting Office denied payment of carrier's supplemental bills and made deductions from other moneys owed the railroad. Defendant's motion for summary judgment because, except as to amounts deducted, railroad's claims are barred by the statute, denied; case remanded to Court of Claims for disposition on the merits.—Erie Lackawanna Ry. Co. v. United States, 439 F. 2d 194 (196-200).

As §16(3)(e) provides that the cause of action in respect of a shipment of property accrues upon delivery or tender of delivery by the carrier, date of delivery to final destination of a transited shipment, not date of delivery to the transit point, is controlling. Since rates applicable on considered shipments were single-factor transit rates, the fiction of continuous through movement is established, and the 2-year statute of limitations did not begin to run until delivery to final destination.—Atlantic Creosoting Co., Inc. v. Southern Ry. Co., 323 I.C.C. 533 (539-40).

Enforcement of Orders—Subparagraph (f)

120. Suits for enforcement of orders.—[Vols. 3, 9, 19].—Shipper's claims for enforcement of Commission order, asserted in its motions for summary judgment, were not barred by one year statute of limitation in §16(3)(f) when they arose from matters and events alleged in original complaints in its suits to recover certain freight charges, pursuant to final order in Commission rate investigation, which were filed within one year after entry of the order. By virtue of Rule 15 of Federal Rules of Civil Procedure, issues raised in the summary judgment motions must be treated as if raised in the pleadings because they were argued by the parties on those motions and, since plaintiff's "new" theory of recovery clearly arose out of transactions and occurrences alleged in its original complaints, the new issues relate back to the date of timely filed original pleadings. Therefore, though the summary judgment motions were filed more than a year after entry of the Commission order, plaintiff's claims for enforcement are not barred by the statute.—Aluminum Co. of America v. Admiral Merchants Motor Frt., Inc., 337 F. Supp. 674 (683-4); Land O'Lakes, Inc. v. United Buckingham Frgt. Lines, Inc., 351 F. Supp. 103 (111-12); Proctor and Gamble Co. v. Byers Transp. Co., Inc., 355 F. Supp. 547 (562).

Section 16.(4),(5).—[Unchanged. See vol. 9, p. 7739, vol. 11, p. 9293, vol. 15, p. 12120.]

Amendments, see footnotes, vol. 3, p. 2177; historical note, vol. 3, p. 2135; 16(5), vol. 3, p. 2178, vol. 12, p. 10324, vol. 14, p. 11533.

§16(5): Volume 3—p. 2178; Volume 7—p. 5646; Volume 17—p. 13454.

Section 16.(6)-(11).—[Unchanged. See vol. 9, p. 7740.]

Amendments, see footnotes, vol. 3, p. 2179; vol. 3, pp. 2182-2185; historical notes, vol. 3, pp. 2183, 2185, 2186.

Notes of Decisions

Volume 3—p. 2179; Volume 7—p. 5647; Volume 9—p. 7740; Volume 11—p. 9293; Volume 16—p. 12768.

§16(8): Vol. 3—p. 2183; §16(6): Vol. 18—p. 14216; Volume 19—p. 15408; Volume 21—p. 16938.

§16(6). 4. Modification of order.—[Vols. 3, 9, 11, 16, 19].—Although it is alleged that the ICA and the Commission's Rules of Practice preclude reconsideration by the entire Commission on its own motion of a decision of an appellate division, the limitation in the statute and the rules issued pursuant thereto is only a limitation upon the right of a party to seek reconsideration and in no way runs to the power of the Commission to reconsider. The right of an administrative body to reconsider at any time is inherent in its power to decide and is a necessary procedure in order to permit it to carry out properly its functions under the enabling statutes. If the Commission were precluded from correcting an error promulgated in a prior report, justice would be thwarted and would only result in imposing a totally unnecessary burden on a reviewing court to remand the proceeding to the Commission for reconsideration.—Eazor Exp., Inc.—Purchase—Fleet Highway Freight, 101 M.C.C. 719 (720)*.

Section 16. (12) Proceedings to enforce orders other than for payment of money.—[Unchanged. See vol. 11, p. 9294.]

Amendments, see footnotes, vol. 3, p. 2186, vol. 11, p. 9294; historical note, p. 2186.

Notes of Decisions

Volume 3—p. 9192; Volume 9—p. 7743; Volume 11—p. 9295; Volume 13—p. 11027; Volume 14—p. 11533; Volume 15—p. 12121; Volume 17—p. 13455; Volume 19—p. 15409; Volume 21—p. 16939.

10. Jurisdiction of Federal courts.—[Vols. 3, 14, 17, 21].—A carrier that has been included in a merger pursuant to a Commission order can seek relief in the district courts; however, on the facts presented, plaintiff railroad is not entitled to a court order requiring defendant to engage in good faith negotiations with plaintiff on terms and conditions of its inclusion in the Penn-Central merger (which was approved by the Commission) and an order requiring immediate physical merger with terms and conditions to be worked out later. The Commission's order provided for the parties' negotiation of terms and conditions and that, if they could not agree, they could request the Commission to establish such terms and conditions; it did not prescribe any pattern or procedure for the negotiation, much less require that the parties reach agreement. Preliminary relief sought by plaintiff cannot be granted because sharp issues are raised by conflicting affidavits as to whether the Commission's order has been disobeyed; plaintiff's remedy is to ask the Commission to fix terms and conditions for its inclusion in the merger.—New York, S. & W. R. Co. v. Penn Central Co., 287 F. Supp. 704 (705-6).

14. Right of parties injured to sue.—[Vols. 3, 15].—See Nemitz v. Norfolk & W. Ry., at §5(2), n. 70.

Section 16. (13) Copies of schedules, tariffs, contracts, etc., kept as public records; evidence.—[Unchanged. See vol. 9, p. 7744.]

Amendments, see footnotes, vol. 3, p. 2202; historical note, p. 2186.

Notes of Decisions

Volume 3—p. 2202; Volume 6—p. 12769; Volume 17—p. 13455; Volume 21—p. 16940.

Section 17. Commission procedure; delegation of duties; rehearings—(1) Divisions of Commission; organization; composition.—[Unchanged. See vol. 11, p. 9295.]

Amendments, see footnotes, vol. 3, p. 2213, vol. 11, p. 9295-9296; historical notes, vol. 3, p. 2213.

Historical Note

By §305 of the act of Feb. 5, 1976, 90 Stat. 53, the Commission is required, within 360 days after the date of enactment of the act, to submit to Congress an initial proposal setting forth rules of practice for the conduct of all adjudicatory and rulemaking proceedings involving railroads. After comment by the Administrative Conference of the United States, the Commission shall submit a final proposal, which shall take effect if not disapproved by either house. Not less than every 3 years, the Commission shall review the rules so adopted and shall revise such rules as it considers necessary.

Section 17. (2) Reference of matters to divisions, individual commissioners, or boards.—[Unchanged. See vol. 11, p. 9296.]

Amendments, see footnotes, vol. 11, p. 9296; historical notes, vol. 3, p. 2213, vol. 11, p. 2927, vol. 15, p. 12121, vol. 16, p. 12769, vol. 17, p. 13456, vol. 19, p. 15410, vol. 21, p. 16940.

Notes of Decisions

Volume 18—p. 14216; Volume 19—p. 15410; Volume 21—p. 16940.

1. In general.—[Vols. 18, 19, 21].—The Commission has broad statutory power to delegate its functions to a division or an individual Commissioner; item 6.4 in its Organization Minutes (26 FR 4773) refers procedural matters in a formal case to the chairman of the division assigned subject matter of the case, and Division 2 has been assigned the subject matter of complaint assailing rail rates charged; thus, according to published rules of the agency, the Chairman of Div. 2 was duly authorized to pass on defendants' requests for oral hearing and to issue appropriate orders. Also, defendants had a statutory right (not pursued) to appeal the orders denying oral hearing by a petition to Appellate Div. 2 for reconsideration, in accordance with Commission rules; but neither the examiner nor Review Board had authority to consider such appeals. Procedures set forth do not conflict with §7(b) of Administrative Procedure Act that authorizes officers who preside at hearings to dispose of procedural requests or similar matters, subject to published rules of the agency; and having failed to pursue proper Commission procedures, defendants may not now claim error in that respect.—Mode-O-Day Corp. v. Atchison, T. & S. F. Ry. Co., 325 I.C.C. 390 (391-2)*.

Regulations of the Commission

33 FR 16543, Nov. 13, 1968; Organization Minutes, in order to implement P.L. 90-586 adding a new §323, paragraph (m) of Item 4.4 amended, effective Nov. 1, 1968.

33 FR 16543, Nov. 13, 1968: Organization Minutes, paragraph (c) of Item 3.2 amended to provide for Commission approval of appointment of the Legislative Liaison Officer and Legislative Counsel, effective Nov. 5, 1968.

34 FR 488, January 11, 1969: Organization Minutes, in consolidating the Temporary Authorities Board and the Transfer Board into the Motor Carrier Board, Item 7.4 is revised, Item 7.5 is deleted, and necessary relevant changes are made in Items 4.2, 4.3, 4.4, 8.4, and 8.6, effective Jan. 21, 1969.

35 FR 4353, March 11, 1970: ICC Central and Field Organization (32 FR 8690, as amended 32 FR 10955) further amended, with respect to the Office of Proceedings, as set forth in amendment dated March 6, 1970.

35 FR 10477, June 26, 1970: Organization Minutes, concurrent with creation of a Tariff Rules Board, assignment to that Board of initial jurisdiction over regulations governing form and manner of publishing, filing, and posting tariffs or schedules, which do not involve taking testimony at a hearing or submitting evidence in affidavit form, and the designation of Division 2 as an appellate division to reconsider decisions, orders, or requirements of that Board, Item 4.3(e) is revised, new Item 7.14 Tariff Rules Board is added, and Item 8.5 is revised, effective July 1, 1970.

36 FR 16614, Aug. 24, 1971: ICC Central and Field Organization, revised current description of central and field organization, which is supplemental to the Commission's Organization Minutes, published.

37 FR 7374, May 9, 1972: Organization Minutes, in order to expedite unopposed applications under §1(18)-(20) for authority to abandon railroad lines, or the operation thereof, Items 6.5 and 7.12(f) are amended, effective on date of order.

Section 17. (3) Conduct of proceedings; seal, oaths; quorum; rules.—[Unchanged. See vol. 11, p. 9297.]

Amendments, see footnotes, vol. 3, p. 2208, vol. 11, pp. 9297 9298; historical notes, vol. 3, p. 2208, vol. 11, p. 9298, vol. 15, p. 12121.

Notes of Decisions

Volume 7—p. 5657; Volume 12—p. 10324; Volume 14—p. 11534; Volume 15—p. 12122; Volume 16—p. 12770; Volume 17—p. 13456; Volume 18—p. 14217; Volume 19—p. 15411; Volume 21—p. 16942.

1. Authority of Commission to control procedure before it.—[Vols. 3, 7, 9, 14-16, 19, 21].—See also Greyhound Corp.—Control—Tex., N. Mex. & Okla. Coaches, at §5(2), n. 111, and HC & D Moving & Storage Co., Inc. v. United States, at APA, 5 USC, Procedure.

Federal Reports Act of 1942 is not bar to Commission order to produce detailed data, including evidence about affiliates, in substantiation of operating ratios when carriers seek rate increase. That act was designed to limit the duplication of the collection of information by government agencies. The data is sought here under the Commission's authority in §17(3) of the Interstate Commerce Act to implement §406(e) relating to the regulation of freight forwarders, and is sought in connection with a specific proceeding in which a substantive determination is to be made. The Federal Reports Act is a housekeeping-type of legislation, directed only to the actions of Government agencies in the discharge of their functions as they affect each other; the third-party freight forwarders have no standing to invoke its provisions as a defense in regulatory litigation.—Freight Forwarder Increase, Transcontinental Terr., 326 I.C.C. 437 (438-9, 445).

Petition of Motor Carrier Lawyers Association for informal changes in the Commission's handling of rulemaking proceedings of general interest to the public, denied. Procedures to be instituted within the Commission in rulemaking proceedings of general interest to the public wherein written statements are to be filed in place of oral hearing, announced informally. Such procedures, aimed at discouraging those persons not intending to file statements in such proceedings from stating an intent to participate, include (1) publication of the Notice of Proposed Rulemaking and Order with a general invitation to the public including a request that a person submitting a letter of intent state, with particularity, the extent of his interest, and (2) preparation by the Commission of a notice fixing dates for filing initial and reply Statements and containing a list of parties upon whom a copy of each statement must be served, including a further statement of the Commission reemphasizing the desire of the Commission to pare the service list and stressing that any person having no further interest in receiving or filing pleadings in the proceeding should notify the Commission immediately so that a supplemental notice can be timely issued.—Petition to Amend Commission's Procedure for Rulemaking, 340 I.C.C. 190 (192).

The right of the Commission to consider an application for authority separately or in combination with other applications is a well established matter of administrative discretion based on the concept of fairness to all parties involved, the effective procedures of the Commission, and the public interest. The Commission is fully aware of the relationships between applicant's two applications and those of two protesting carriers, and comparative aspects of the several applications will be considered in evaluations made in applicant's proceedings; however, since good cause is not shown warranting consolidation of applicant's proceedings with those of protestants, applicant's request therefor is denied by concurrently issued order.—M. R. & R. Trucking Co., Extension, 105 M.C.C. 69 (72)*.

1a.—To correct errors.—[Vols. 18, 21.]—See also Carl Subler Trucking, Inc., Modification of Certificate, at §212(a), n. 10.

The Commission clearly has the statutory power—and the duty—to modify motor carrier certificates issued improperly through inadvertent errors on the part of its staff. Thus, its action in discontinuing investigation proceeding (instituted on its own motion to determine whether respondent carrier was conducting operations not authorized by the certificate in question) without determining whether the certificate could be modified on the basis of inadvertent issuance, or otherwise, cannot be sustained. Order of the Commission set aside and the case remanded for further proceedings in accordance with the court's instructions.—Akers Motor Lines, Inc. v. United States, 286 F. Supp. 213 (222-3, 226)*.

In motor carrier's action to annul, enjoin, and set aside an order of the Commission which was issued to correct its admitted error, the Commission has the power to correct its manifest error by cancelling plaintiff's outstanding incorrect certificate and reissuing a corrected certificate to it. It is undisputed that, through error, plaintiff's certificate granted interstate authority that was greater and different in scope than that applied for, and likewise greater than that indicated in the notice of application published in the Federal Register. Therefore, in issuing considered order cancelling plaintiff's outstanding certificate and reissuing to it a modified certificate granting the operating authority which it originally applied for, the Commission properly exercised its power to correct its admitted error. Commission order appealed from should be affirmed; complaint dismissed and temporary restraining order heretofore granted vacated.—May

Trucking Co. v. United States, 290 F. Supp. 38 (39)*.

It is well established, see 358 US 133, that the Commission can rectify inadvertent ministerial error. The language of respondent's certificate, authorized in its motor carrier conversion proceeding, insofar as the disputed comma is concerned merely corrects a prior inadvertent error and reflects the operations substantively authorized to be performed by it as a contract carrier; the certificate is framed in precisely the same language as would have been utilized had the error never been made, or had it previously been discovered and rectified. That the error came to light in a conversion proceeding, in no way impairs the ability of the Commission to correct it.—Zuzich Truck Line, Inc., Investigation of Permit, 96 M.C.C. 160 (163)*.

Regulations of the Commission

35 FR 13216, Aug. 19, 1970, Part 1102: Procedures Governing Rail Carrier General Increase Proceedings, new Part 1102 (§§1102.1 - 1102.4) added, effective on date of publication in Federal Register.

36 FR 8211, May 1, 1971, Part 1124: Adequacy of Passenger Service, new Part 1124 adopting certain regulations prescribed by the Federal Railroad Administration, Department of Transportation, under rail safety statutes, added, effective May 1, 1971.

38 FR 12744, May 15, 1973, Part 1123: Determination of Avoidable Losses (Rail Passenger Service Act of 1970), new Part 1123 governing procedure to be followed in applying for Commission determination of avoidable loss, §§1123.1 1123.6, added, effective 35 days after service of order.

Section 17. (4) Powers of divisions, boards, etc.; effect of orders, etc.—[Unchanged. See vol. 11, p. 9298.]

Amendments, see footnotes, vol. 3, p. 2218, vol. 11, pp. 9298-9299; historical note, vol. 3, p. 2213.

Notes of Decisions

Volume 11—p. 9299; Volume 12—p. 10325; Volume 14—p. 11535; Volume 15—p. 12123; Volume 17—p. 13457; Volume 18—p. 14218.

Section 17. (5) Findings, etc., of commissioner or board; accompanying statement and recommended order; copies to parties; exceptions; recommended order as commission's order.—[Unchanged. See vol. 11, p. 9299, vol. 19, p. 15414.]

Amendment, see footnote, vol. 11, p. 9299; historical note, p. 9300.

Notes of Decisions

Volume 11—p. 9300; Volume 12—p. 10325; Volume 13—p. 11028; Volume 14—p. 11535; Volume 15—p. 12123; Volume 16—p. 12771; Volume 17—p. 13457; Volume 18—p. 14218; Volume 19—p. 15414; Volume 21—p. 16944.

10. Reopening on Commission's own motion.—[Vols. 11-15, 17, 21].—Although examiner's recommended grant of authority sought by application heard on consolidated record with investigation into lawfulness of applicant's operations became effective by operation of law in absence of exceptions thereto, in view of finding in the investigation proceeding that applicant-respondent is in willful violation of the Act and the Commission's regulations the application proceeding is reopened on the Commission's own motion for reconsideration and concurrent disposition with the investigation.—S & C Transport Co., Inc., Investigation and Revocation, 96 M.C.C. 642 (645, 646).

Applicant in instant case instituted a civil action (C.A. No. 70-397) in Oregon district court claiming, in essence, that denial of its application was due to the fact that its application was erroneously considered under the wrong standard, i.e., those developed in 103 MCC 318. Therefore, Commission reopened this proceeding on our own motion for further processing under modified procedure, for purpose of according the parties a further opportunity to introduce additional evidence and for consideration and disposition on the record as made after the expiration of the time period for filing of verified statements. No additional evidence was submitted by the parties. Commission shall reconsider the application, anew.—Empire Fuel & Transfer Co., Common Carrier Applic., 113 M.C.C. 38 (39)*.

15. Recommended order; effect; stay.—[Vols. 12-16, 18, 19, 21].—Plaintiffs argue the Commission adopted the examiner's discussion and conclusions as the Commission's findings of fact. Judicial decisions prior to this case indicate that when the Commission refers to the examiner's statement of facts the Commission is referring to the examiner's summary of the evidence and not to the examiner's discussion and conclusions.—United Trucking Service, Inc. v. United States, 359 F. Supp. 100 (104-105).

Section 17. (6) Rehearing, reargument, or reconsideration of decisions, orders, and requirements.—[Unchanged. See vol. 11, p. 9301.]

Amendments, see footnotes, vol. 11, p. 9301; historical notes, vol. 3, p. 2204, vol. 9, p. 7745, vol. 11, p. 9302.

Notes of Decisions

Volume 11—p. 9302; Volume 12—p. 10326; Volume 13—p. 11029; Volume 14—p. 11536; Volume 15—p. 12124; Volume 16—p. 12771; Volume 17—p. 13458; Volume 18—p. 14219; Volume 19—p. 15414; Volume 21—p. 16945.

10. Rehearing; reconsideration.—[Vols. 11-19, 21].—See also Bell Lines, Inc. v. United States, case, APA, 5 USC, *Judicial Review*, below.

The Commission's broad power under §17(6) to grant rehearing, reargument, or reconsideration, and its §17(7) power to reverse, change, or modify an original decision or order, are plainly adequate to add to its findings or firm them up as it deems desirable, absent any collusion or interference with the district court. Thus, when petitions for reconsideration of the order granting temporary authority to appellant were filed and, before they could be passed on, other carriers filed suit and a single judge temporarily stayed operation of that order, the Commission was not without jurisdiction to grant the pending petitions and reopen the record to receive additional evidence (on which its second order was based) before the case was argued to the three-judge court and before the record was filed with it. In multi-party proceedings, such as instant one, some may seek judicial review and others may seek administrative reconsideration; also, in making the additional findings after its first order was stayed, the Commission did not act inconsistently with what the court had done.—American Farm Lines v. Black Ball Freight Service, 397 U.S. 532 (536, 539-41)*.

Power of the Commission to reconsider a prior decision does not necessarily collide with the judicial power of review because, while the court properly could provide temporary relief against a Commission order, that does not mean that the agency loses all jurisdiction to complete the administrative process. The Commission's action was not inconsistent with what the court had done, did not interfere in the slightest with the protective restraining order, and came before the court was ready to hear arguments on the merits. Since by the Act the Commission never lost jurisdiction to pass on petitions for rehearing, and the court's stay order did not forbid its acting on the pending petitions, it was not necessary to seek permission of the court to make those rulings. The administrative record was reopened merely to remedy a deficiency therein before any judicial review on the merits and, since the Commission fully honored the district court stay order, it acted in full harmony with the court's jurisdiction. Holding of the district court, that pendency of the review proceedings deprived the Commission of jurisdiction to reopen the administrative record, reversed.—Id., pp. 541-2.

The Commission's refusal to reopen a case to consider an argument raised for the first time after the decision is rendered will not be overturned by the court unless its action is a clear abuse of discretion. In action to set aside Commission orders approving motor carrier control applications, plaintiff's (protestant) argument that deposit receipts issued by control applicant constitute securities within §20a, and that issuance thereof without prior Commission approval voids the acquisition transactions, was not raised until after the Commission had rendered its decision; also, the Commission's refusal was clearly justified by plaintiff's failure timely to raise the issue, the dubious merit of its claim, and the complete absence of any prejudice to plaintiff. Nor is it surprising, considering the lateness of plaintiff's petition for reconsideration, that the Commission set forth no reasons for denying it. Sustained.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (386-7, 393)*.

The granting or denying of a petition for reconsideration rests within the sound discretion of the agency and denial of such a petition will only be reversed for clear abuse of discretion. As stated in 322 US 503, rehearings are not matters of right, but are pleas to discretion; and the discretion to be invoked is that of the body making the order, not that of the reviewing body. Summary denial of a petition for reconsideration is appropriate, and further findings and conclusions are unnecessary, if it is clear that such petition was given due consideration. Therefore, when the Commission's order denying plaintiff's petition for reconsideration stated that "no sufficient or proper cause appears for reopening the proceedings for reconsideration or to receive additional evidence," and plaintiffs failed to show wherein or in what way the grounds for their motion would require the Commission to reconsider its order in contract-carrier application proceeding, the court cannot say that the Commission abused its discretion; sustained.—National Trailer Convoy, Inc. v. United States, 293 F. Supp. 630 (633)*.

The grant or denial of petitions for rehearing or reconsideration rests in the Commission's sound discretion; in instant case, its refusal to order a rehearing and reopen application proceedings, requested by plaintiffs (protestants) in order to present evidence opposing certain proposed tacking, was not a clear abuse of that discretion. Plaintiffs were clearly aware of tacking aspect of considered application well before oral hearings in the consolidated proceedings were concluded, yet they made no effort to introduce evidence with respect thereto or to obtain a continuance for that purpose. Moreover, plaintiffs' petitions did not explain, as required by Rule 101(b) of the Commission's Rules of Practice, why the evidence they sought to present was not or could not have been presented at the hearing and one failed to summarize such evidence (admittedly available at that time); also, none of them explained why continuance of original oral hearing, in order to present the evidence, had not been sought. In such circumstances, denial of the petitions was clearly within the Commission's sound discretion; sustained.—Midwest Emery Freight System, Inc. v. United States, 295 F. Supp. 112 (115, 117-8)*.

Since requests for reopening of Commission proceedings are directed to its sound discretion, reversal of its refusal to reopen is permissible only on a showing of clear abuse of that discretion. The Commission's refusal to reopen the hearing on plaintiff's motor carrier application, requested to present evidence of protesting carrier's inadequate single-line service, was not arbitrary or an abuse of discretion when plaintiff had ample opportunity to present such evidence during the 21 days of hearings which extended over a six-month period. Furthermore, the reported decision indicates that the Commission in fact considered the material which plaintiff wishes to present.—Jerry Lipps, Inc. v. Interstate Commerce Commission, 299 F. Supp. 942 (945)*.

Whether to grant or deny petition for rehearing is left to the Commission's discretion and a court is justified in interfering only upon a showing of the clearest abuse of that discretion. No abuse of discretion can be found in the Commission's denial of plaintiffs' (protestants) petition for rehearing in motor carrier application proceeding when the record shows that its order granting irregular-route authority to applicant (intervenor) was based on substantial evidence and a correct application of the law. Nor did the Commission abuse its discretion in refusing a rehearing on the question of new and additional evidence relating to the applicant's trafficking in certificates; the allegation of trafficking was raised at the hearing and considered by the Commission, and the authority ultimately granted was subject to a nonseverable restriction. Commission decision and order sustained.—Garrett Freightlines, Inc. v. United States, 305 F. Supp. 149 (152-3)*.

On review of the procedures employed and the Commission rules relating thereto, the court finds no merit in allegation of plaintiffs (protestants in temporary authority proceeding) that the Commission acted arbitrarily, capriciously, and unlawfully by not rejecting or striking applicant's Petition for Receipt of Additional Evidence and Reconsideration of Order (denying the application), on grounds that under the Commission's rules no such petition would lie. Inner-agency consideration and reconsideration constitute essential elements of the administrative process and provide ways of testing and retesting, and weighing and reweighing, the various factors which ultimately contribute to shaping the final agency decision; also, inner-agency findings and rulings may be reconsideration be revised, modified, or reversed by the Commission. Moreover, though particularly referring to Commission rule relating to inner-agency action prior to issuance of an order, plaintiffs' arguments and brief on the point are not convincing. Commission orders on reconsideration, granting temporary authority to defendant carrier, are supported by the record; complaint dismissed.—Bell Lines, Inc. v. United States, 306 F. Supp. 209 (217, 218)*.

A request for additional hearings is addressed to the sound discretion of the Commission and the denial of a petition for rehearing based on a claim that the record is stale does not constitute an abuse of administrative discretion. Although the record would be considered stale, and plaintiffs through proper exercise of their rights contributed to delay in the decision, all the procedures in the Commission proceeding, and the court action, take time and no criticism of any person for exercising legal rights is implied; thus, as a practical matter there seems to be no way to avoid a so-called stale record in a case of such long complex nature. However, decisions must be made and the Commission denied motions for further hearings and entered its decision and order; and in so doing there was no abuse of discretion. Commission's decision affirmed.—Carolina Freight Carriers Corp. v. United States, 323 F. Supp. 1290 (1297-8)*.

It has been consistently held that rehearings in administrative proceedings are not matters of right, but pleas to discretion; and likewise, that the discretion to be invoked is that of the body making the order, and not that of a reviewing body. However, as the decisions in 327 US 515 and 396 US 491 make clear, that does not mean that a reviewing court may not remand for a refusal to reopen when the wide discretion accorded an administrative agency has been abused. On the special facts in considered motor carrier application case, the Commission abused its discretion in donning "complete blinders" to a new situation that it had itself created; therefore, because of the denial of plaintiff's timely request for a further hearing the order is vacated and the cause remanded for further consideration on a reopened record.—Blue Bird Coach Lines, Inc. v. United States, 328 F. Supp. 1331 (1332, 1337-8)*.

When acting within the scope of its discretion to grant motor carrier temporary authority, the Commission has the continuing right and probably the duty to reopen and reconsider its action in order to exercise proper discretion in determining needs and regulating such authorities. However, since Commission determinations may be made in absence of any hearings, the mere reopening or reconsideration *per se* cannot manifest an abuse of regulatory discretion—it must be the ultimate conclusion and action taken on reconsideration that can be the cutting sword of arbitrary and abusive discretionary action. The Commission did not abuse its discretion, nor act arbitrarily and unlawfully, in reopening defendant carrier's temporary authority proceeding and issuing the temporary authority sought; complaint dismissed.—Braswell Motor Freight, Inc. v. United States, 336 F. Supp. 709 (712-3)*.

A petition for reopening or rehearing is addressed to the Commission's sound discretion and only a showing of the clearest abuse of discretion is sufficient to overturn its denial thereof; also, it is the Commission's concern that there be a point of finality in each of its proceedings. On the other hand, the Commission has full authority to reopen its proceedings and correct any order shown to have been issued through inadvertence or mistake. Under the peculiar circumstances in considered contract carrier application case, protestant's (plaintiff's) petition to reopen the record and modify authority granted, though filed more than two years later, sufficiently stated a prima facie claim and raised many factual issues that required determination, after evidentiary hearing, before a judicious decision could be made to reopen or not reopen the proceeding. Thus, the Commission's denial of plaintiff's petition to reopen, without a hearing, is reversed; case remanded to the Commission for purpose of conducting an evidentiary hearing on the factual issues raised by the petition.—Mercury Motor Exp., Inc. v. United States, 343 F. Supp. 516 (518-9)*.

Although investigation of proposed flat increases in intraterminal, interterminal, and intraplant switching charges was discontinued when western and southern railroads, in compliance with the Commission's orders in 315 ICC 199 and 318 ICC 485, canceled the flat increases and established the authorized percentage increases and maxima, and there are thus no outstanding orders, the issues are not thereby rendered moot, since lawfulness of their proposal is put in issue by their petition for reconsideration, and the prior reports ruled thereon.—Increased Switching Charges, 322 I.C.C. 560 (561)*.

Defendant's request that complaint proceeding be reopened for further hearing if official notice is not taken of motor carrier competition as justification for the lower rates at the alleged preferred point, denied. Rule 1.101(b) of Rules of Practice provides that an explanation must accompany a request for further hearing, stating why such evidence was not previously adduced; no satisfactory explanation has been made, and no reason appears why the additional evidence was not adduced earlier.—Matthiessen & Hegeler Zinc Co. v. Baltimore & O. R. Co., 323 I.C.C. 601 (603).

The usual rule on remand is that the agency involved is free to adopt whatever procedures may be necessary to correct deficiencies exposed in a prior order (see 344 US 17) and Supreme Court's decision imposed no requirements for any further hearings to receive additional evidence and record herein warrants no further hearings but only adjustments in those cost items found inadequate by the court.—Official—Southern Divisions, 337 I.C.C. 74 (80-84)*.

Although a decision of an appellate division is final for purpose of judicial review, the entire Commission on its own motion may reconsider it. There is a definite distinction between administrative finality for purpose of judicial review and statutory authority granting the Commission continuing jurisdiction over its orders. The two are not synonymous. In amending §17(6) Congress has provided a procedure to permit more expeditious handling of Commission cases; and because the Commission sought to achieve expedition by prescribing rules limiting the right of parties to apply for reconsideration, thus permitting compliance with the requirement that all administrative remedies be exhausted before judicial review could be obtained, does not mean that the Commission is foreclosed from taking further administrative action. The ICA gives the Commission continuing jurisdiction over its orders and empowers it to reconsider, rescind, change or modify them on its own motion at any time. Had Congress intended to limit reconsideration by the entire Commission, it would have so provided in explicit language.—Eazor Exp., Inc.—Purchase—Fleet Highway Freight, 101 M.C.C. 719 (721-1)*.

Commission reopened instant proceeding as it is well settled that Commission has continuing jurisdiction over its orders and is empowered to reconsider and to rescind or modify its orders at any time, even if, as herein, they are administratively final as defined by rule 101(a)(2) of General Rules of Practice, for purpose of correcting an error or injustice. However, an administratively final proceeding is ripe for court review, and the aggrieved party has such recourse if it chooses.—Braswell Motor Freight Lines, Inc., Extension, 112 M.C.C. 558 (566-7)*.

The prior report misconstrued the nature of the application and considered it as one seeking Kingpak-type authority. Applicant contended on petition and before the court that the application was not based upon past services for exempt freight forwarders. Commission (Appellate Division 1) reopened the matter to apply the usual standards of public convenience and necessity.—Empire Fuel & Transfer Co., Common Carrier Applic., 113 M.C.C. 38 (43)*.

15. Reopening; scope.—[Vols. 13-16, 19, 21].—Petitions for reopening and rehearing are addressed to the Commission's discretion and an exception to that rule can be sustained only on a showing of "the clearest abuse of discretion." The Commission did not abuse its discretion when it denied petition to reopen control proceeding to receive evidence of applicant's new transactions in acquired railroad's securities; since effectiveness of an "independent voting trust" had been established, it was not an abuse of discretion to find that subsequent purchases of securities which were immediately poured into that trust would have no impact on the result in the case. Nor was it an abuse of discretion to deny reopening for purpose of receiving evidence of acquired carrier's improved financial condition; while the record is unquestionably stale, that fact alone is insufficient to justify an order compelling the Commission to reopen the proceeding.—Illinois Central R. Co. v. United States, 263 F. Supp. 421 (431-4)*.

A request that proceedings be reopened for presentation of additional evidence is necessarily addressed to the discretion of the Commission. In instant case, the basic and controlling facts are clear enough, and the record is sufficient to exclude possibility that additional evidence would have altered the facts or resulted in a different decision; thus, it cannot be said that the Commission failed to exercise a reasonable discretion in denying plaintiff's motion to reopen its rail abandonment proceeding so it could present more specific evidence.—Brooklyn Eastern District Terminal v. United States, 302 F. Supp. 1095 (1105)*.

Order reopening investigation of divisions of official-southern interterritorial rates was not so restricted in scope as to preclude reconsideration of the issue of proper dividing points. To accept that contention would also preclude consideration of divisions on Canadian-northern Maine traffic which are brought in issue for the first time in the reopened proceeding.—Official-Southern Divisions, 325 I.C.C. 1 (30)*.

Decisions in 284 US 248 and 322 US 503 provide basis for denial of protestant's petition to reopen record for purpose of presenting new evidence described as showing substantially changed conditions and plans of merged railroads as there would be little hope of consummating an order if litigants might demand rehearings because some new circumstance had arisen or some new trend observed. Also, factual matter in proferred evidence, a copy of speech by applicants' president, is in same vein as that already of record, would be cumulative of previous testimony, and to extent it counters protestant's arguments, would be to protestant's disadvantage.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (484-6).

Furthermore, reopening such proceedings whenever applicants exercise managerial discretion in handling and routing traffic would present an almost impossible administrative burden. It would be unrealistic to conclude that a merger would be carried out in detail exactly as proposed in hearing. Commission would hesitate to approve proposed mergers at all if we were not convinced that applicants recognize their responsibility to direct much of the savings realized into continuous improvement of operations and service to the public.—Id., p. 485-6

When, in remanding the Commission's supplemental report and order in control proceeding (finding condition (e) previously imposed in 1923 order, 76 ICC 508, not shown to be unjust, unreasonable or contrary to the public interest, but declining to pass on legality of railroads' 1924 agreement reciting all conditions of the 1923 order and the activities of the parties thereunder), the court held that there was but one general issue before the Commission and that the Commission should have disposed of the entire matter and should have passed on validity of the 1924 agreement and the actions thereunder, all evidence and issues are considered as within the scope of the reopened proceeding, including those pertaining to condition (e) and §5(2) and those relating to the 1924 agreement and the parties' actions thereunder.—Central Pac. Ry. Co. Control, 328 I.C.C. 245 (346-7)*.

Protestant Strickland's petition to reopen this proceeding for further hearing in order to show that it has terminated the lease of its authority to Burks and has begun to institute operations over involved route denied. To warrant further hearing petitioner must show, among other things, that the new evidence presented is likely to produce a different result and satisfactorily explain its failure to produce such evidence at original hearing. And since no relevant new evidence would alter results in this proceeding, applicant is correct that under these circumstances termination of the lease does not have the effect of disproving applicant's showing of need for proposed service. In addition, should Strickland suffer any loss in connection with disputed lease, adequate legal remedies exist outside of Commission to resolve the equities now in litigation between it and Burks.—Red Line Transfer & Storage, Inc., Extension, 102 M.C.C. 486 (489-90).

20. Reversal, change or modification.—[Vols. 16, 17, 21].—On reconsideration, the Commission adjusted three cost items involved in divisions of joint interterritorial rates which were found deficient by the Supreme Court and prescribed new, just, reasonable, and equitable divisions of such rates.—Official—Southern Divisions, 337 I.C.C. 74 (85-96)*.

Section 17. (7) Reversal or modification after rehearing, etc.—[Unchanged. See vol. 11, p. 9304.]

Amendment, see footnote, vol. 11, p. 9304; historical notes, vol. 3, p. 2204, vol. 9, p. 7745.

Notes of Decisions

Volume 12—p. 10328; Volume 13—p. 11030; Volume 14—p. 11539; Volume 15—p. 12126; Volume 16—p. 12773; Volume 17—p. 13460; Volume 18—p. 14220; Volume 19—p. 15417; Volume 21—p. 16955.

10. Modification, reversal of orders by appellate division or full Commission.—[Vols. 12-19, 21].—See American Farm Lines v. Black Ball Freight Service, and Eazor Exp., Inc.—Purchase—Fleet Highway Freight, at §17(6), n. 10.

Section 17. (8) Stay of decisions, etc., not effective at time of application for rehearing, etc.—[Unchanged. See vol. 11, p. 9304.]

Amendment, see footnote, vol. 11, p. 9304; historical note, vol. 11, p. 9304.

Notes of Decisions

Volume 17—p. 13460; Volume 19—p. 15418; Volume 21—p. 16956.

2. Construction and interpretation.—[Vols. 17, 19, 21].—Plaintiffs allege the Commission acted arbitrarily, in violation of §17(8), when it did not stay order granting temporary authority to defendant carrier until after their petitions for reconsideration were acted on; however, provision in the Commission's temporary authority regulations, that filing a petition for reconsideration of order of the Temporary Authorities Board does not automatically have effect of staying such order, in effect carries out the mandate of §210a(a) and carves out an explicit exception to §17(8).—Superior Trucking Co. v. United States, 302 F. Supp. 257 (265-6)*.

Respondent's routing of traffic under the suspended tariffs on ground that filing of their petitions for reconsideration stayed the effectiveness of the suspension order is unlawful. An application for reconsideration stays an order of a board where that order has not yet become effective. The suspension order herein considered became effective on the date of its issuance and cannot be stayed under §17(8) except by a special order of the Commission, and no such special order has been issued.—Routing Via Oak Island Jct., New Jersey, 341 I.C.C. 129 (151-53).

Section 17. (9) Hearing and appellate procedure.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §303, 90 Stat. 48.]

(9)(a) Whenever the term 'hearing' is used in this part, such term shall be construed to include an opportunity for the submission of all evidence in written form, followed by an opportunity for briefs, written statements, or conferences of the parties, such conferences to be chaired by a division, an individual Commissioner, an administrative law judge, an employee board, or any other designated employee of the Commission.

(b) With respect to any matter involving a common carrier by railroad subject to this part, whenever the Commission assigns the initial disposition to any of such matter before the Commission to an administrative law judge, individual Commissioner, employee board, or division or panel of the Commission, such judge, Commissioner, board, division, or panel shall—

(i) complete all evidentiary proceedings with respect to such matter within 180 days after its assignment; and

(ii) with respect to any matter so assigned which involves written submissions or the taking of testimony at a public hearing, submit it in writing to the Commission, within 120 days after the completion of all evidentiary proceedings, an initial decision, report, or order containing—

(A) specific findings of fact;

(B) specific and separate conclusions of law;

(C) a recommended order; and

(D) any justification in support of such findings of fact, conclusions of law and order.

The Commission, or a duly designated division thereof, may, in its discretion, void any requirement for an initial decision, report, or order, and, in appropriate cases, may direct that any matter shall be considered forthwith by the Commission or such division, if it concludes that the matter involves a question of agency policy, a new or novel issue of law, or an issue of general transportation importance, or if the due and timely execution of its functions so requires. Whenever an initial decision, report, or order is submitted, copies thereof shall be served upon interested parties. Any such party may file an appeal with the Commission, with respect to such initial decision or report. If no such appeal is filed within 20 days after such service, or within such further period (not to exceed 20 days) as the Commission, or a duly designated division thereof, may authorize, the order set forth in such initial decision or report shall become the order of the Commission and shall become effective unless, within such period, the order shall have been stayed or postponed by the Commission pursuant to subdivision (d) or (e).

(c) The Commission, or a duly designated division thereof, may, upon its own initiative, and shall, in any case in which an appeal is filed under subdivision (b), review the matter upon the same record or upon the basis of a further hearing. Any such appeal shall be considered and acted upon by the Commission, or a duly designated division thereof, within 180 days after the date on which such appeal is filed. Any such decision, report, or order shall be stayed pending the determination of such appeal. Such a review shall be conducted in accordance with section 557 of title 5, United States Code, and such rules (limiting and defining the issues and pleadings upon review) as the Commission may adopt in conformance with section 557(b) of such title 5. The Commission may, in its discretion and on such terms and conditions as it may prescribe, authorize duly designated employee boards to perform functions under this paragraph of the same character as those which may be performed by a duly designated division of the Commission (other than the decision of any appeal under this paragraph which may be further appealed to the Commission).

(d) Any decision, order, or requirement of the Commission, or of a duly designated division thereof, shall become effective 30 days after it is served on the parties thereto, unless the Commission provides for such decision, order, or requirement, or any applicable rule, to become effective at an earlier date. Any interested party to a decision, order or requirement of a duly designated division of the Commission may petition the Commission for rehearing, reargument, or other reconsideration, subject to such rules and limitations as the Commission may establish. If the Commission finds that a decision, order, or requirement presents a matter of general transportation importance, or if it finds that clear and convincing new evidence has been presented or that changed circumstances exist which would materially affect such decision, order, or requirement, the Commission may reconsider such decision, order, or requirement, and it may, in its discretion, stay the effective date of such decision, order, or requirement. If the Commission reconsiders a decision, order, or requirement, it must complete the process and issue its final order not more than 120 days after the date on which it grants the application for reconsideration.

(e) The Commission may, in its discretion, extend any time period set forth in this section for a period of not more than 90 days, if a majority of the Commissioners, by public vote, agree to such extension. The Commission shall submit an annual report in writing to each House of Congress setting forth each extension granted pursuant to his subdivision (classified by the type of proceeding involved), and stating the reasons for each such extension and the duration thereof.

(f) In extraordinary situations in which an extension granted pursuant to subdivision (e) is not sufficient to allow for completion of necessary proceedings, the Commission may, in its discretion, grant a further extension if—

(i) not less than 7 of the Commissioners, by public vote, agree to such further extension; and

(ii) not less than 15 days prior to expiration of the extension granted pursuant to subdivision (e), the Commission reports in writing to the Congress that such further extension has been granted together, with—

(A) a full explanation of the reasons for such further extension;

(B) the anticipated duration of such further extension;

(C) the issues involved in the matter before the Commission; and

(D) the names of personnel of the Commission working on such matter.

(g) The Commission may, at any time upon its own initiative, on grounds of material error, new evidence, or substantially changed circumstances—

(i) reopen any proceeding;

(ii) grant rehearing, reargument, or reconsideration with respect to any decision, order, or requirement; and

(iii) reverse, modify, or change any decision, order, or requirement.

The Commission may establish rules allowing interested parties to petition for leave to request reopening and reconsideration based upon material error, new evidence, or substantially changed circumstances.

(h) Notwithstanding any other provision of this Act, any decision, order, or requirement of the Commission, or of a duly designated division thereof, shall be final on the date on which it is served. A civil action to enforce, enjoin, suspend, or set aside such a decision, order, or requirement, in whole or in part, may be brought after such date in a court of the United States pursuant to the provisions of law which are applicable to suits to enforce, enjoin, suspend, or set aside orders of the Commission.

(i) Notwithstanding the provisions of paragraphs (5), (6), (7), and (8), the provisions of this paragraph shall govern the disposition of, and shall apply only to, any matter before the Commission which involves a common carrier by railroad subject to this part, except that the provisions of other sections of this part pertaining to deadlines in Commission proceedings shall govern to the extent that they are inconsistent with the provisions pertaining to deadlines contained in this paragraph.

(j) Reports in writing and other written statement (including, but not limited to, any report, order, decision and order, vote, notice, letter, policy statement, rule, or regulation) of any official action of the Commission (whether such action is taken by the Commission, a division thereof, any other group of Commissioners, a single Commissioner, an employee board, an administrative law judge, or any other individual or group of individuals who are authorized to take any official action on behalf of the Commission) shall indicate (i) the official designation of the individual or group taking such action (ii) the name of each individual taking, or participating in taking, such action, and (iii) the vote or position of each such participating individual. If any individual who is officially designated as a member of a group which takes any such action does not participate in such action, the written statement of such action shall indicate that such individual did not participate. Each individual who participates in taking any such action shall have the right to express his individual views as part of the written statement of such action. The written statement of any such action shall be made available to the public in accordance with Federal law.

Section 17. (10) Judicial relief from decisions, etc., upon denial or other disposition of application for rehearing, etc.—[Unchanged; formerly paragraph (9) but redesignated (10) by the act of Feb. 5, 1976, Pub. L. 94-210, §303, 90 Stat. 48. See vol. 11, p. 9305.]

Historical note, see vol. 11, p. 9305.

Notes of Decisions

Volume 14—p. 11539; Volume 15—p. 12126; Volume 16—p. 12774; Volume 17—p. 13461; Volume 18—p. 14220; Volume 19—p. 15418; Volume 21—p. 16957.

2. Construction and interpretation.—[Vols. 14-19, 21].—While the 1964 amendments of the Judicial Code (28 USC §§1336 and 1398), relating to jurisdiction and venue of actions to enforce, enjoin, set aside or annul orders of the Commission in cases referred to it by a district court or the Court of Claims for preliminary determination, provided more streamlined procedure for judicial review of questions that involve the Commission's primary jurisdiction, those amendments made no changes in the substantive law other than fixing venue and jurisdiction in the referring court; therefore, the prerequisites of judicial review remain the same. Once an issue has been referred to the Commission, the matter must be prosecuted there until a final order is issued; and only after administrative remedies have been exhausted may the case proceed to judgment in the court.—McLean Trucking Co. v. United States, 387 F. 2d 657 (659-60)*.

The Commission's denial of petition of plaintiff (applicant in Commission case) for reconsideration of the decision and order in control proceeding, which found that proposed control was only a portion of a single §5(2) transaction involving acquisition of control of two carriers by applicant, and denied the application, disposed of that proceeding with administrative finality and exhausted plaintiff's administrative remedies before the Commission. And the Commission's holding that the denial was without prejudice to a later application for approval of acquisition of control of the two carriers in no way affects the finality of its action on the petition for reconsideration of its denial of the application for authority to acquire control of one of those carriers. Therefore, plaintiff has standing under the statute and the APA to bring action in the court to set aside the Commission's orders.—Smyth v. United States, 293 F. Supp. 387 (389)*.

In reviewing an order by the Commission, court must decide whether the Commission reached a rational conclusion, based on substantial evidence. The evidence herein, even detracting all contrary evidence, was substantial and the increases approved by Commission in demurrage charges were rational on the record before the Commission. Accordingly, the court affirms Commission's order approving said increases.—General Mills, Inc. v. United States, 364 F. Supp. 1278 (1282-84)*.

Section 17. (11) Reference of administrative matters to examiners.—[Unchanged; formerly paragraph (10) but redesignated (11) by the act of Feb. 5, 1976, Pub. L. 94-210, §303, 90 Stat. 48. See vol. 11, p. 9305.]

Section 17. (12) Intervention of representatives of employees.—[Unchanged; formerly paragraph (11) but redesignated (12) by the act of Feb. 5, 1976, Pub. L. 94-210, §303, 90 Stat. 48. See vol. 14, p. 11540.]

Notes of Decisions

Volume 11—p. 9306; Volume 12—p. 10329; Volume 14—p. 11541; Volume 16—p. 12776; Volume 17—p. 13642; Volume 19—p. 15419; Volume 21—p. 16962.

Section 17. (14) Time limit of proceedings.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §303, 90 Stat. 50.]

(14)(a) Any formal investigative proceeding with respect to a common carrier by railroad which is instituted by the Commission after the date of enactment of this subdivision shall be concluded by the Commission with administrative finality within 3 years after the date on which such proceeding is instituted. Any such proceeding which is not so concluded by such date shall automatically be dismissed.

(b) Within 1 year after the date of enactment of this subdivision, the Commission shall conclude or terminate, with administrative finality, any formal investigative proceeding with respect to a common carrier by railroad which was instituted by the Commission on its own initiative and which has been pending before the Commission for a period of 3 or more years following the date of the order which instituted such proceeding.

Section 17. (15) Access to information by Congressional committees.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §301, 90 Stat. 47.]

(15) Whenever the Committee on Interstate and Foreign Commerce of the House of Representatives or the Committee on Commerce of the Senate makes a written request for documents which are in the possession or under the control of the Commission and which relate to any matter involving a common carrier by railroad subject to this part, the Commission shall, within 10 days after the date of receipt of such request, submit such documents (or copies thereof) to such Committee, or submit a report in writing to such committee stating the reason why such documents have not been so submitted, and the anticipated date on which they will be submitted. If the Commission transfers any document in its possession or under its control to any other agency or to any person, it shall condition such transfer on the guaranteed return by the transferee of such document to the Commission for purposes of complying with the preceding sentence. This paragraph shall not apply to documents which have been obtained by the Commission from persons subject to regulation by the Commission, and which contain trade secrets or commercial or financial information of a privileged or condidential nature. This paragraph shall not be deemed to restrict any other authority of either House of Congress, or any committee or subcommittee thereof, to obtain documents. For purposes of this paragraph, the term 'document' means any book, paper, correspondence, memorandum, or other record, or any copy thereof.

Section 18. (1), (2). Employees; expenses, of commission.—[Unchanged. See vol. 9, p. 7756, p. 7757.]

Historical notes, see vol. 21, p. 16965.

Historical Notes

Reorganization Plan No. 1 of 1969, see Historical Note, §11, above.

By §311 of Pub. L. 94-210, 90 Stat. 60, §201 of the Budget and Accounting Act, 1921 (31 U.S.C. 11), is amended by the addition of a new subsection (j), which provides that whenever the Commission submits any budget estmate or request, other budget information (including manpower needs), legislative recommendation, prepared testimony for congressional hearings, or comments on legislation to the President or to the Office of Management and Budget, it shall concurrently transmit a copy of such estimate or request to Congress; and that no officer or agency shall have authority to impair the free communication by the Commission with Congress with respect to any budget estimate or request of the Commission.

Effective Dec. 16, 1967, compensation of members of the Commission is determined under Chapter 11, Title 2, USC, through the Commission on Executive, Legislative, and Judicial Salaries. Upon recommendation of the President of the United States, the annual rate of basic compensation of the Commissioners after Feb. 14, 1969, is $38,000, and that of the Chairman of the Commission is $40,000. See note following section 358 of Title 2, USC.

Executive Order 11598, dated June 16, 1971, To Provide for the Listing of Certain Job Vacancies by Federal Agencies and Government Contractors and Subcontractors; 36 FR 11711, June 18, 1971.

Notes of Decisions

Volume 13—p. 11033; Volume 15—p. 12130; Volume 16—p. 12777; Volume 17—p. 13465; Volume 21—p. 16967.

3.Periodical and special reports.—[Vol. 16].—Since data concerning piggyback service are essential to the proper discharge of the Commission's regulatory responsibilities, all class I railroads, other than switching and terminal companies, and all class I intercity motor carriers of property are required to file quarterly reports with respect to such traffic, in accordance with the forms and instructions set forth at 49 CFR §1252.—Piggyback Traffic Statistics, 340 I.C.C. 856 (859).

11. Annual reports; contents.—[Vols. 16, 17].—Railroads' suit to enjoin, annul and set aside Commission report and orders, to extent it attacks the formula adopted as a guide for assessing adequacy of each railroad's car ownership and the requirement that certain roads file annual reports (using the formula) concerning their respective ownership of general purpose freight cars, dismissed for lack of ripeness. Carriers now suffer no "immediate and practical impact" from the orders apart from being required to file reports within the scope of the Commission's statutory authority; and, it being admitted that formula changes may be required to meet carrier objections, present formula may never be the basis of a Commission order requiring actual purchase of freight cars. The court should not decide cases where Commission orders have no present impact on the carrier, or where further agency action might completely avoid the predicted dispute; therefore, since the agency action lacks the degree of finality prerequisite to judicial review, plaintiffs' action is dismissed, insofar as it relates to the car ownership formula, without prejudice to the right to seek relief in the court at such time as an actual controversy has ripened.—Florida East Coast Ry. Co. v. United States, 327 F. Supp. 1076 (1078-80, 1082-3)*.

Commission revised regulations governing annual reports of class I railroads (49 CFR §1241.11) to require submission of information relating to the relationship of respondent with affiliated companies and transactions with affiliates; a statement of changes in financial position; compensation of officers, directors, etc.; payment for services by other than employees and affiliates; contracts and agreements; pension plan funds; and income taxes. (But see dissents). —Annual Reports of Class I Railroad Companies, 341 I.C.C. 205 (212-15).

However, Commission will not require at this time a report from an independent accountant attesting to conformity of certain schedules in the annual report with Commission's accounting regulations because the benefits to be gained by such a requirement is outweighed by the additional financial burden of unknown proportions that such an attestation requirement would place on respondents.—Id., p. 215.

Regulations of the Commission

33 FR 16410, Nov. 8, 1968, Part 1241: Annual, Special or Periodic Reports; Carriers Subject to Part I of the Interstate Commerce Act, §1241.61 Annual report of carriers by pipe line, Annual Report Form P (Carriers by Pipeline) prescribed, effective on date of publication.

36 FR 24059, Dec. 18, 1971, Part 1241: Annual, Special or Periodic Reports; Carriers Subject to Part I of the Interstate Commerce Act, §1241.14 Report of Incentive per diem items—Railroads, Form IPD prescribed for use by railroads in reporting incentive per diem items commencing with reports for year ended Dec. 31, 1970.

36 FR 24117, Dec. 21, 1971, Part 1241: Annual, Special or Periodic Reports; Carriers Subject to Part I of the Interstate Commerce Act, §1241.14 Report of incentive per diem items—Railroads, order of Nov. 22, 1971 (36 FR 24059) corrected by addition of inadvertently omitted amendments to Part 1241.

37 FR 5502, March 16, 1972, Part 1243: Quarterly Operating Reports—Railroads, §1243.1 Revenues, expenses and income, and §1243.2 Condensed balance sheet, revised, effective with reports for quarter beginning Jan. 1, 1972.

37 FR 7328, Apr. 13, 1972, Part 1252: Piggyback Traffic Statistics, §1252.1 Rail carriers, Form PTR-R (Rev), and §1252.2 Motor Carriers, Form PTR-M (Rev.), prescribed for quarterly reports beginning with July 1, 1972.

38 FR 32919, Nov. 29, 1973, Part 1241: Annual, Special, or Periodic Reports Carriers Subject to Part I of the Interstate Commerce Act; Rules promulgated for annual reports of Class 1 Railroad Companies, effective Dec. 31, 1973.

39 FR 33533, Sept. 18, 1974, Part 1243: Quarterly Operating Reports—Railroads. Regulations promulgated as to quarterly report of freight loss and damage claims, effective with reports beginning Jan. 1, 1975.

Amendments, see footnotes, vol. 3, p. 2528; vol. 11, p. 9310; historical notes, vol. 3, p. 2529, vol. 9, p. 7781, vol. 12, p. 10330, vol. 21, p. 16968.

Notes of Decisions

Volume 3—p. 2529.

Section 20. (3) Uniform system of accounts.—[Amended to read as set forth below by the act of Feb. 5, 1976, Pub. L. 94-210, §307, 90 Stat. 55. See vol. 11, p. 9311.]

(a) The Commission shall, not later than June 30, 1977, issue regulations and procedures prescribing a uniform cost and revenue accounting and reporting system for all common carriers by railroad subject to this part. Such regulations and procedures shall become effective not later than January 1, 1978. Before promulgating such regulations and procedures, the Commission shall consult with and solicit the views of other agencies and departments of the Federal Government, representatives of carriers, shippers, and their employees, and the general public.

(b) In order to assure that the most accurate cost and revenue data can be obtained with respect to light density lines, main line operations, factors relevant in establishing fair and reasonable rates, and other regulatory areas of responsibility, the Commission shall identify and define the following items as they pertain to each facet of rail operations:

(i) operating and nonoperating revenue accounts;

(ii) direct cost accounts for determining fixed and variable cost for materials, labor, and overhead components of operating expenses and the assignment of such costs to various functions, services, or activities, including maintenance-of-way, maintenance of equipment (locomotive and car), transportation (train, yard and station, and accessorial services), and general and administrative expenses; and

(iii) indirect cost accounts for determining fixed, common, joint, and constant costs, including the cost of capital, and the method for the assignment of such costs to various functions, services, or activities.

(c) The accounting system established pursuant to this paragraph shall be in accordance with generally accepted accounting principles uniformly applied to all common carriers by railroad subject to this part, and all reports shall include any disclosure considered appropriate under generally accepted accounting principles or the requirements of the Commission or of the Securities and Exchange Commission. The Commission shall, notwithstanding any other provision of this section, to the extent possible, devise the system of accounts to be cost effective, nonduplicative, and compatible with the present and desired managerial and responsibility accounting requirements of the carriers, and to give due consideration to appropriate economic principles. The Commission should attempt, to the extent possible, to require that such data be reported or otherwise disclosed only for essential regulatory purposes, including rate change requests, abandonment of facilities requests, responsibility for peaks in demand, cost of service, and issuance of securities.

(d) In order that the accounting system established pursuant to this paragraph continue to conform to generally accepted accounting principles, compatible with the managerial responsibility accounting requirements of carriers, and in compliance with other objectives set forth in this section, the Commission shall periodically, but not less than once every 5 years, review such accounting system and revise it as necessary.

(e) There are authorized to be appropriated to the Commission for purposes of carrying out the provisions of this paragraph such sums as may be necessary, not to exceed $1,000,000, to be available for—

(i) procuring temporary and intermittent services as authorized by section 3109(b) of title 5, United States Code, but at rates for individuals not to exceed $250 per day plus expenses; and

(ii) entering into contracts or cooperative agreements with any public agency or instrumentality or with any person, firm, association, corporation, or institution, without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5).

Historical notes, vol. 21, p. 16968.

Notes of Decisions

Volume 3—p. 2512; Volume 7—p. 5793; Volume 9—p. 7777; Volume 11—p. 9311; Volume 12—p. 10331; Volume 13—p. 11033; Volume 14—p. 11543; Volume 15—p. 12131; Volume 16—p. 12778; Volume 17—p. 13465; Volume 18—p. 14223; Volume 19—p. 15422; Volume 21—p. 16968.

18. Adjustment of accounts.—[Vols. 3, 7, 15].—On further consideration of control proceeding the Commission found it necessary to revise the balance sheet of one of two carriers seeking to redeem part of their stock. In so doing it noted: (1) that its Account Regulations for Class I and II motor carriers (49 CFR 182.01-16) provide that amounts paid in excess of the redeemed stock's aggregate par value are to be debited primarily to earned surplus, since there is no unearned surplus; (2) that subscriptions receivable, arising from applicant's proposal to invest an additional $40,000 in this carrier, and the subscriptions accounts, since no securities have been issued, should neither be considered as a capitalizable asset nor capitalization; and (3) that the $65,000 paid for vendor stockholder's agreement not to compete should not be treated as an intangible asset. The Commission also noted with respect to the other carrier that since its unearned surplus was insufficient to cover amounts in excess of the aggregate par value of its redeemed stock, these accounts also were to be debited primarily to earned surplus.—LaCasse-Control—Interstate Exp., Inc., 101 M.C.C. 567 (572)*.

Although liquidating carrier's book values prior to the write-down by surviving carrier under the control transaction exceeded actual cost and were in violation of provisions of the Uniform System of Accounts for Motor Carriers of Property, the write-down to appraised value was not proper under the circumstances. While adjustments of book values of operating equipment at fair market value on the basis of independent appraisals is permitted in a merger or purchase transaction under §5 of the Act, there is no such provision in the Commission's accounting rules pertaining to a control transactions.—Yellow Transit, Inv.—Merger—Wilson, Inc., 104 M.C.C. 737 (757).

24. Depreciation accounting.—[Vols. 3, 7, 11, 13-15].—On reconsideration, Commission concludes that, for depreciation purposes, the purchaser of a pipeline system or facility should be permitted to record in its carrier property accounts the cost of property acquired to the extent that it represents fair market value at the date of acquisition.—Uniform System of Accounts for Pipeline Companies, 337 I.C.C. 518 (522-3)*.

Regulations of the Commission

34 FR 15483, Oct. 4, 1969, Part 1204: Pipeline Companies; Uniform System of Accounts, miscellaneous amendments to regulations, effective Nov. 10, 1969.

34 FR 18307, Nov. 15, 1969, Part 1204: Pipeline Companies; Uniform System of Accounts, effective date of order of Oct. 30, 1969 (34 FR 15483) postponed until further order.

34 FR 19907, Dec. 19, 1969, Part 1203: Express Companies, regulations governing uniform system of accounts for express companies, waived and suspended for one year effective Jan. 1, 1970; and system of accounts submitted by REA in rulemaking proceeding under Doc. No. 35029 may be used by REA for one year, effective Jan. 1, 1970, with such permitted use not to be construed as formal adoption of REA's submitted system of accounts.

35 FR 13991, Sept. 3, 1970, Part 1204: Pipeline Companies; Uniform System of Accounts for Pipeline Companies, miscellaneous revisions and modifications, effective Oct. 15, 1970.

35 FR 16803, Oct. 30, 1970, Part 1203: Uniform System of Accounts for Express Companies, order of Nov. 28, 1969 (34 FR 19907) modified so as to waive and suspend regulations governing uniform system of accounts, and to permit REA to use the system it submitted in Doc. No. 35029, for an additional year, effective Jan. 1, 1971.

36 FR 64, Jan. 5, 1971, Part 1201: Uniform System of Accounts for Railroad Companies, miscellaneous amendments pertraining to accounting treatment of terminals and highway equipment used in piggyback service, effective Jan. 1, 1971.

36 FR 17847, Sept. 4, 1971, Part 1201: Uniform System of Accounts for Railroad Companies, regulations amended by addition, under the caption "General Instructions," of general instruction 1-10 *Transactions with affiliated companies*, effective Jan. 1, 1971.

37 FR 866, Jan. 20, 1972, Part 1203: Uniform System of Accounts for Express Companies, order of Nov. 28, 1969 (34 FR 19907), as modified (35 FR 16803), further modified so as to waive and suspend regulations, and to permit REA to use system it submitted in Doc. No. 35029, for an additional year, effective Jan. 1, 1972.

37 FR 17713, Aug. 31, 1972, Part 1204: Pipeline Companies; Uniform System of Accounts, miscellaneous amendments to regulations, effective upon publication in Federal Register.

37 FR 20695, Oct. 3, 1972, Part 1201—Railroad Companies; Part 1202—Electric Railways; Part 1204—Pipeline Companies; and Part 1208—Maritime Carriers, accounting regulations, insofar as they apply to the investment tax credit, amended to bring them into compliance with the Revenue Act of 1971 (Pub. Law 92-178), effective on publication in the Federal Register.

37 FR 25845, Dec. 5, 1972, Part 1201: Railroad Companies, Uniform System of Accounts, miscellaneous amendments of accounting regulations, effective Jan. 1, 1972.

37 FR 25919, Dec. 6, 1972, Part 1201—Railroad Companies; Part 1202—Electric Railways; Part 1204—Pipeline Companies; and Part 1208—Maritime Carriers, accounting regulations. Order of Sept. 12, 1972 (37 FR 20695) amending regulations to comply with Revenue Act of 1971, corrected effective on date of order.

38 FR 2761, Jan. 30, 1973, Part 1201: Railroad Companies, Uniform System of Accounts; in Instructions for Property Accounts, instruction 2-2 *Minimum rule applicable to additions to property*, and instruction 2-9 *Additions and retirements of other than units of property*, amended to read as set forth, effective Jan. 1, 1973.

38 FR 21746, Aug. 13, 1973, Part 1203: Express Companies, Uniform System of Accounts; sets forth revised system of accounts including General Instructions, Balance Sheet Accounts; Property Accounts; Income Accounts; Operating Expense Accounts; and Balance Sheet Classification; effective Sept. 25, 1973.

Section 20. (4) Depreciation charges.—[Unchanged. See vol. 11, p. 9313.]

Amendments, see footnotes, p. 9313.

Notes of Decisions

Volume 3—p. 2534; Volume 7—p. 5807; Volume 9—p. 7786; Volume 11—p. 9314; Volume 13—p. 11035; Volume 15—p. 12132; Volume 16—p. 12779; Volume 18—p. 14224; Volume 19—p. 15423.

Section 20. (5) Forms of accounts, records, and memoranda; access to records, etc., by commission or agents.—[Unchanged. See vol. 11, p. 9315, vol. 15, p. 12133.]

Amendments, see footnotes, vol. 3, p. 2533, vol. 11, pp. 9315-9316; historical note, vol. 3, p. 2534.

Historical Note

On August 9, 1973, the Commission submitted a draft bill to Congress to amend §20(5) of the Interstate Commerce Act to clarify the power of the Commission to inspect and copy records of carriers regulated by it, including such items as carriers' financial forecasts. (S. 2459). Annual Report, 1974, p. 83.

Notes of Decisions

Volume 3—p. 2541.

Access to Accounts, Records, and Memoranda

31. In general.—[Vol. 3).—In view of interpretation of §20, as it then stood, in 236 US 318, legislative history surrounding subsequent amendments thereto, and general context of the section, the court concludes that amendment of §20(5) did not expand the Commission's inspection powers to categories of documents not related to prescribed or authorized accounting and corporate records of a carrier, and that "other documents" therein means other documents which would assist an auditor to understand an entry on records prescribed by the Commission. Therefore, since rail carrier's budget forecast materials sought to be inspected clearly are not accounts, books, records, etc., and cannot be deemed "other documents" within meaning of §20(5), the statute does not authorize the Commission to inspect the budget forecast materials described in its Formal Demand For Examination of Records. Plaintiff's motion for summary judgment granted.—Burlington Northern, Inc. v. I.C.C., 323 F. Supp. 273 (277-9).

33. Accounts, records, and other papers subject to inspection.—[Vol. 3].—To bring budget forecast materials described in "Formal Demand for Examination of Records," which was served on plaintiff railroad by auditors acting for the Commission, within the scope of amended §20(5), they would have to be deemed "other documents" within the meaning thereof, such materials clearly not being "accounts, books, records, memoranda [or] correspondence." However, since the amendment of §20(5) did not expand the Commission's inspection powers to categories of documents not related to the prescribed or authorized accounting and corporate records of a carrier, and the term "other documents" therein means other documents providing background material which would assist an auditor to understand an entry on records prescribed by the Commission, the budget forecast materials

in issue are not subject to inspection by the Commission under §20(5). Plaintiff's motion for summary judgment granted.—Burlington Northern, Inc. v. I.C.C., 323 F. Supp. 273 (277-9).

Section 20. (6) Persons furnishing cars or protection against elements; access to and forms of records, etc.; reports.—[Unchanged. See vol. 11, p. 9317.]

Historical notes, vol. 12, p. 10332, vol. 14, p. 11545, vol. 15, p. 12133, vol. 16, p. 12780, vol. 17, p. 13466.

Regulations of the Commission

34 FR 3568, Feb. 27, 1969: Record Retention Guide, XXIV Interstate Commerce Commission [Revised] 1.7 Persons furnishing cars to railroads, 49 CFR Part 1225.

36 FR 3772, Feb. 26, 1971: Record Retention Guide, XXIV Interstate Commerce Commission; 1.7 Persons furnishing cars to railroads, 49 CFR Part 1225.

37 FR 4671, March 3, 1972: Record Retention Guide, XXX Interstate Commerce Commission; 1.7 Persons furnishing cars to railroads, 49 CFR Part 1225.

37 FR 20695, Oct. 3, 1972, Part 1205: Refrigerator Car Lines, accounting regulations, insofar as they apply to the investment tax credit, amended to bring them into compliance with the Revenue Act of 1971 (Pub. Law 92-178), effective on publication in the Federal Register.

37 FR 25919, Dec. 6, 1972, Part 1205: Refrigerator Car Lines, accounting regulations. Order of Sept. 12, 1972 (37 FR 20695) amending regulations to comply with Revenue Act of 1971, effective on date of order.

38 FR 1870, Jan. 18, 1973: Record Retention Guide, XXX Interstate Commerce Commission; 1.7 Persons furnishing cars to railroads, 49 CFR Part 1225.

Section 20. (7)-(10) Penalties; false entries; Persons furnishing cars, etc.—[Unchanged.]

Notes of Decisions

§20(9): Volume 3—p. 2548; Volume 21—p. 16971.

Regulations of the Commission

§20(7): 34 FR 3568, Feb. 27, 1969: Record Retention Guide, XXIV Interstate Commerce Commission [Revised] 1.1 Refrigerator car lines, and 1.2 Railroad companies, 49 CFR Part 1222; 1.5 Express companies, 49 CFR Part 1223; and 1.6 Pipeline companies, 49 CFR Part 1224.

34 FR 16873, Oct. 18, 1969, Part 1222: Sleeping Car Companies, Destruction of Records, due to Pullman's cessation of operations, Part 1222 is deleted, effective Oct. 3, 1969.

35 FR 3620, Feb. 21, 1970: Record Retention Guide, XXIV Interstate Commerce Commission; 1.1 Refrigerator car lines, and 1.2 Railroad companies, 49 CFR Part 1220; 1.3 Electric railway companies, 49 CFR Part 1221; 1.4 [Deleted]; 1.5 Express companies, 49 CFR Part 1223; and 1.6 Pipeline companies, 49 CFR Part 1224.

36 FR 3772, Feb. 26, 1971: Record Retention Guide, XXIV Interstate Commerce Commission; 1.1 Refrigerator car lines, and 1.2 Railroad companies, 49 CFR Part 1220; 1.3 Electric railway companies, 49 CFR Part 1221; 1.4 [Reserved]; 1.5 Express companies, 49 CFR Part 1223; and 1.6 Pipeline companies, 49 CFR 1224.

37 FR 4671, March 3, 1972: Record Retention Guide, XXX Interstate Commerce Commission; 1.1 Refrigerator car lines, and 1.2 Railroad companies, 49 CFR Part 1220; 1.3 Electric railway companies, 49 CFR Part 1221; 1.4 [Reserved]; 1.5 Express companies, 49 CFR Part 1223; and 1.6 Pipeline companies, 49 CFR Part 1224.

38 FR 1870, Jan. 18, 1973: Record Retention Guide, XXX Interstate Commerce Commission; 1.1 Refrigerator car lines, and 1.2 Railroad companies, 49 CFR Part 1220; 1.3 Electric railway companies, 49 CFR Part 1221; 1.4 [Reserved]; 1.5 Express companies, 49 CFR Part 1223; and 1.6 Pipeline companies, 49 CFR Part 1224.

Section 20. (11) Liability of initial and delivering carrier for loss; limitation of liability; notice and filing of claim.—[Unchanged. See vol. 9, p. 7794, and vol. 11, p. 9322.]

Amendments see footnotes, vol. 3, p. 2552; historical note, p. 2555.

Historical Notes

On July 10, 1973, the Commission recommended to Congress legislation (S. 2250) which would amend the Interstate Commerce Act and the Harter Act to authorize the Commission to adjudicate unresolved loss and damage claims. Annual Report, 1974, p. 83.

The Commission notes that its recommendations (340 ICC 515) that the Commission be given jurisdiction to adjudicate loss and damage claims on their merits have not been accorded favorable action in Congress. Annual Report, 1975, p. 42.

Notes of Decisions

Volume 3—p. 2559; Volume 7—p. 5818; Volume 9—p. 7796; Volume 11—p. 9323; Volume 12—p. 10333; Volume 13—p. 11036; Volume 14—p.11546; Volume 15—p. 12134; Volume 16—p. 12780; Volume 17—p. 13467; Volume 18—p. 14225; Volume 19—p. 15424; Volume 21—p. 16971.

3. Purpose.—[Vols. 3, 21].—In shipper's suit in Colorado against a rail and a motor carrier for damage to its fresh meat shipments, there is no merit in railroad's contention that it was not subject to the court's jurisdiction because the Carmack Amendment has preempted other substantive law in the field and, under provisions thereof, it is not subject to process in Colorado since it does not operate a line of railroad in that state. By its very terms, §20(11) did not intend to preempt every cause of action by a shipper against a carrier for damage to its interstate shipment; rather, it sets forth the rights of a legal holder of a receipt or bill of lading issued by a carrier and the responsibilities of a carrier to such holder. Moreover, as held in 333 F. 2d 488, the Carmack Amendment does not change, but continues in effect, the common law applicable to the liability of carriers.—Litvak Meat Co. v. Baker, 446 F. 2d 329 (334-6).

In addition to codifying the common-law rule of carrier liability, the statute was enacted to eliminate from shipper's burden of proof the difficult problem of showing damage at the hands of a specific carrier; thus, it permits a shipper to bring suit against a carrier for damages to goods shipped whether such damages occurred while shipment was in possession of defendant or connecting carriers. However, shipper is not compelled to avail himself of provisions of the Carmack Amendment; he may also bring a common-law action in negligence. Therefore, since defendant railroad met appropriate tests of "doing business" in Colorado to make it there amenable to service of process in a diversity action based on negligence, order of the district court dismissing claims against that carrier is reversed.—Id., pp. 331-2, 336-7.

4. Effect.—[Vols. 3, 21].—Effect of the Carmack amendment is that, despite any contrary stipulation, a receiving carrier, when it receives property in one State to be transported to a point in another involving the use of a connecting carrier for some part of the way, is deemed to have adopted such other carrier as its agent, and to incur carrier liability throughout the entire route, with a right to reimbursement for a loss not due to its own negligence. [Citing 219 US 186.] Thus, though defendant railroad claims it is not doing business in Massachusetts, when it received shipment of tomatoes in Florida for movement to Boston on a straight bill of lading covered by the Carmack amendment, it had contracted to supply services in destination State; and damage to the goods of which shipper complains presents a cause of action arising from that contract. Railroad's motion to dismiss denied.—Sarno v. Florida East Coast Ry. Co., 327 F. Supp. 506 (507).

6.—State laws superseded.—[Vols. 3, 15, 17].—General character of the Carmack Amendment clearly shows that Congress intended to take control of the subject of a carrier's liability under a bill of lading which it must issue, and to supersede all state regulation with reference thereto; and when Congress acted in such a way as to manifest a purpose to exercise its conceded authority, the regulating power of the state ceased to exist. [226 US 491.] Thus, in shipper's suit against railroads (filed in State court and removed to U.S. court) alleging liability for loss of cotton shipment, destroyed by fire, in two counts—the first a common law count and the second a statutory count under the Carmack Amendment—the federal law had preempted common-law suits of the nature stated in the first count. Accordingly, since both counts in plaintiff's suit state a cause of action for damages for violation of railroads' contract for interstate carriage of goods, the lower court should have dismissed the common law count as to both railroads.—W. D. Lawson & Co. v. Penn Central Co., 456 F. 2d 419 (421-4).

Application of Paragraph

8. Carriers, transportation, subject to paragraph.—[Vols. 3, 7, 9, 16-18, 21].—Before the absolute liability of a common carrier attaches, shipper must have delivered the goods into carrier's exclusive possession, for immediate transportation, and must have given carrier shipping instructions. However, all necessary elements to comply with the law and effect delivery are absent in shipper's suit against railroad to recover damages, due to spoilage, on TOFC shipment of fresh meat. Facts show that plaintiff loaded and sealed trailer furnished by carrier and moved it to packing plant lot on Saturday—knowing defendant could not pick it up until following Monday—and that carrier had no connection with or knowledge of such loading operations; trailer remained in shipper's exclusive possession without shipping instructions being issued, bill of lading being delivered to carrier, or notice being given that the trailer had been loaded. Therefore, contrary to plaintiff's contention, there was no delivery of the goods to carrier, and no liability can attach to defendant on that ground.—Dugdale Packing Co. v. Atchison, T. & S. F. Ry. Co., 347 F. Supp. 1276 (1280-1).

Case also presents a question of precedent carrier liability for furnishing what shipper claims was a defective trailer, which resulted in damage to the shipment still in shipper's possession. The carrier must provide cars or other vehicles suitable for transporting any goods which it holds itself out to carry; defendant knew the type of equipment necessary to protect plaintiff's products from spoilage in transit; and a carrier is liable to the shipper for loss of perishable goods, where the loss is attributable to unsafe or unfit conditions of vehicle furnished. Railroad furnished a refrigerated trailer suitable for carrying fresh meat; shipper loaded and placed it on the plant lot, with refrigerator unit set for desired temperature; and the next day, shipper's mechanic found it to be running in good order, maintaining proper temperature, and to have an adequate supply of fuel. Thus, it is reasonable to assume that trailer was suitable and not defective when delivered to plaintiff. Accordingly, burden is on plaintiff to show that trailer was unsuitable for its intended purpose; plaintiff did not meet that burden. Judgment for defendant.—Id., pp. 1281-2.

Bills of Lading

16. Duty of carrier to issue.—[Vols. 3, 7, 9].—Issuance of the bill of lading is carrier's responsibility, not shipper's, and to regard inclusion of specific information on that document as an indispensable condition to shipper's recovery of any excess charges is improper, as it would render form superior to substance.—United States v. Southern Pac. Co., 325 I.C.C. 200 (209).

Liability of Carriers

30. In general.—[Vols, 3, 7, 9, 13-19, 21].—See also Condakes v. Southern Pac. Co., at n. 115 below, and Johnson v. Chicago, M., St. P. & P. R. Co., at §1(4), n. 1.

Railroads which delivered carloads of steers, shipped on order bills of lading stating that there was no right of inspection prior to surrender, to consignee without surrender of the order bills and which instead accepted consignee's blanket indemnity bond (pursuant to Uniform Freight Classification 6, §3) did not breach a carrier duty; thus, carriers are not liable to plaintiff (shipper) for damages which consignee collected from it because the steers were unsatisfactory. Under the statute, a carrier issuing an order bill of lading does not assume a risk of liability for all possible losses from failure to demand surrender thereof; as held in 226 US 491, carrier's liability is limited to "any loss, injury, or damage caused by it or a succeeding carrier to whom the property may be delivered," which plainly implies liability for some default in its common law duty as a common carrier. Defendants violated no common law duty by delivering considered shipments prior to surrender of bills of lading; therefore, plaintiff does not have a cause of action under §20(11).—Iowa Beef Packers, Inc. v. Chicago G. W. Ry. Co., 402 F. 2d 930 (933-5).

In suit against railroad for damages for delivering car to wrong destination, defendant is liable to shipper for breach of contract by virtue of its misdelivery. Railroad employee re-routed carload of "air-entrained" cement, which move on shipper's bill of lading directing shipment to consignee's Concrete Pipe Div. plant at correc address (but showing incorrect routing), and directed it to consignee's ready-mix concrete plant where the cement was processed and delivered to customers for work for which that cement was unsuitable, thereby causing heavy expenditures for testing, and replacing, unsuitable concrete delivered; thus, railroad is liable for breach of its duty to deliver under the contract of carriage. Damages claimed are composed of (1) value of the cement, (2) freight charges, and (3) expenses for testing and replacing the unsuitable concrete; however, since latter expenses were special damages not within contemplation of the parties when shipment was made, railroad is not liable therefor. Shipper is entitled to damages in amount of value of shipment plus freight charges.—Marquette Cement Mfg. Co. v. Louisville & N. R. Co., 406 F. 2d 731 (732)*.

Interstate carrier, although not an absolute insurer, is liable for loss and damage to goods transported by it unless it can show that the damage was due to an act of God, the public enemy, act of shipper, public authority, or the inherent vice or nature of the goods shipped. However, in consignor's action to recover damages on rail shipments of grapes from California to New Jersey for transportation by water to South America, defendant railroad had no legal duty to separate undamaged boxes of grapes in the shipments from damaged boxes thereof; rather, duty was on the water-carrier consignee in New Jersey to accept tender of partially damaged shipments and thereafter to mitigate the damages.—F. J. McCarty Co. v. Southern Pac. Co., 289 F. Supp. 875 (881)*.

Inasmuch as the duty to transport goods with reasonable dispatch is an integral part of a railroad's normal undertaking, a party injured by such carrier's breach of that duty is entitled to recover damages not only under the well-settled common law rule, but also under the Carmack Amendment. Additionally, the court, in an action to recover damages allegedly caused by railroad's late delivery of shipments, should look at the particular segment of transportation involved, not the entire trip as a whole, in determining whether railroad failed to discharge its duty to transport the cars with reasonable dispatch; and, in absence of more persuasive evidence to the contrary, railroad's own schedules are sufficient evidence of what length of time constitutes reasonable dispatch.—Condakes v. Southern Pac. Co., 295 F. Supp. 121 (123-4).

Plaintiff consignee established a prima facie case that initial-carrier railroad breached its duty to transport c.l. shipments of lettuce from Salinas, Calif., to Boston with reasonable dispatch by showing that the cars (which reached Chicago ahead of schedule) took 16-1/4 hours longer than the 35-1/2 hours scheduled by connecting line to travel from Chicago to Boston. Burden then shifted to defendant to come foward with evidence tending to show that the delay was justified or reasonable under the circumstances; however, defendant presented no such evidence. And fact that the unjustified and unreasonable delay, which resulted in the damages claimed, occurred while shipments were being transported by a connecting line does not absolve defendant of its liability under the statute. Plaintiff is entitled to recover damages in the amount stipulated.—Id., pp. 124-5.

However, in another action by consignee to recover damages because of alleged late delivery of a carload of peaches from Sanger, Calif., to Boston Market Terminal, evidence showed that the delay occurred in moving the car from railroad's yard to the market after it arrived at Boston; moreover, the actual delay was only about three hours and was due solely to the difficulty of handling on that date a larger number of cars of perishable commodities than the normal capacity of the railroad yards. Accordingly, the court finds that considered car was transported with reasonable dispatch, and that there was no unreasonable delay which would entitle plaintiff to recover the damages claimed. Judgment for defendant.—Id., 295 F. Supp. 119 (120-1).

In suit against a railroad to recover for loss or damage to shipment, a shipper makes out a prima facie case of negligence against the carrier when it shows that the goods were delivered to carrier in good condition and that they were delivered by carrier to consignee in damaged condition. Carrier is ordinarily not liable, however, for acts or default of shipper in loading the car in an improper manner; therefore, when evidence shows that flat car (on which shipment was being moved) was derailed when heavy marine engine part fell from the front end and that the car had been negligently loaded by plaintiff shipper's agent, carrier cannot be held liable for act of shipper in improperly loading the car in the absence of evidence that the defect was patent and apparent by ordinary observation. Even though carrier's local agent knew of shipper's negligent loading of the car, and cursory inspection was made by railroad employees during the trip, responsibility for negligence in loading was not thereby transferred to carrier.—Association of Maryland Pilots v. Baltimore & O. R. Co., 304 F. Supp. 548 (551-3).

However, a common carrier's liability does not cease until delivery of the shipment to consignee; and, in view of showing that, except for a missing cylinder head and a few other minor parts, shipment of marine engine parts loaded on the flat car was undamaged in car derailment, was in carrier's possession at that time, and was delivered to consignee (about a month later in a gondola car) in a damaged and dirty condition, shipper made out its prima facie case of negligence and burden was then on carrier to prove that it was not negligent. That burden was not met by carrier's generalized evidence as to the reloading, reason for the delayed delivery, or why cylinder head that fell along railroad track was not picked up and delivered. Therefore, since defendant carrier failed to prove its freedom from negligence, it is liable to plaintiff shipper for damage and other loss to considered shipment even though shipper's negligence in loading the goods was cause of the derailment.—Id., pp. 554-5.

In meat packer's action to recover for damage to fresh hams shipped under a rail bill of lading containing notation that goods were received in "apparent good order," such recital in the bill of lading establishes a prima facie case that the goods were delivered to carrier in good condition when, upon delivery to carrier, contents of the shipment are open to visible inspection; however, where merchandise is sealed in a trailer, and the contents are not open and visible, plaintiff must establish by direct evidence that its goods were delivered to the carrier in good order. Therefore, when plaintiff loaded the loose hams on racks on top of each other, about five or six layers high, inside a "piggyback" trailer which was delivered sealed to the railroad, and contents of trailer were not open and visible to the carrier. the "apparent good order" bill of lading notation did not meet shipper's burden of showing that the hams were delivered to the railroad in good condition. Judgment for defendant.—Blue Bird Food Products Co. v. Baltimore & O. R. Co., 329 F. Supp. 1116 (1117-8).

Plan I TOFC operations are valid through-route and joint-rate arrangements between connecting carriers and it necessarily follows that the respective liabilities of the participating carriers are to be governed by §§20(11) and 20(12). Under §20(11), the initial carrier is liable to the shipper for all damage or loss, whether caused by it or not, on the theory that in accepting the shipment under the through joint rate it becomes a principal and all its connecting carriers agents for the transportation; and §20(12) provides a "right over" in order to insure that the ultimate burden falls upon the carrier responsible for the loss. Nor can the Commission accept as seriously made the contentions of the freight forwarders to the effect that a railroad cannot assume responsibility to an unknown shipper. Prior to enactment of part IV, shippers by freight forwarder had for many years been allowed to sue the underlying carriers for loss or damage occasioned by the latter.—Substituted Service—Piggyback, 322 I.C.C. 301 (346)*.

The specific concealed loss and damage claim rules, as set forth in appendix C hereto, are unlawful inasmuch as they attempt to limit carrier liability for loss and damage to 50 percent of the net monetary loss in violation of §20(11).—Loss and Damage Claims, 340 I.C.C. 515 (536).

Proposed rule providing for a constructive schedule arrived at on the basis of published times (the actual operating schedules) plus 24 hours held inconsistent with present law of carrier liability, and therefore contrary to §20(11), since the actual operating schedules reflect the time usually required for the transportation in question (and not the constructive schedule), and courts have disallowed such a "grace period".—Provisions on Vegetables & Melons, Transcontinental, 340 I.C.C. 807 (815).

31. Initial carrier.—[Vols, 3, 7, 9, 11, 14, 15, 17, 19, 21].—In suit by consignee's insurer, as subrogee, against initiating railroad for loss of 165 cases of liquor which disappeared from trailer-load shipment from Louisville, Ky., to Minneapolis, Minn., moved in plan II piggyback service under a through bill of lading, defendant was liable for loss sustained anywhere en route without consignee being required to prove that the loss occurred while shipment was in initial carrier's possession. Special arrangements between shipper and railroad concerning rates, routings, or charges do not bar shipper or consignee from relying on the Carmack Amendment for proof of claim against initial carrier; that statute reconciled carrier's interest in use of varied and connecting forms of transshipment and shipper's resulting inability to determine exactly where his freight was lost or damaged by placing liability for loss or damage to cargo on the initiating or delivering carrier.—Phoenix Insurance Co. v. Monon Railroad, 438 F. 2d 1403 (1406).

Bill of lading executed by initial-railroad defendant provided for piggyback movement of shipper's loaded trailer, partly by rail and partly by motor carrier, from Louisville to the consignee at the destination designated therein; therefore, it was a "through bill of lading" covering a through shipment even though motor transportation requested by shipper necessitated interchange of cargo between initial and delivering railroads at Chicago. The railroads provided one continuous shipment from origin to destination, although using truck transportation pursuant to instructions of Illinois Trailer on Flatcar Association in the Chicago area; moreover, defendant railroad was well aware of the nature of ITOFCA's services. Accordingly, initial rail carrier is liable for loss sustained anywhere en route and the lower court's judgment in favor of plaintiff is affirmed. —Id., pp. 1406-7.

33. Delivering carrier.—[Vols. 3, 16, 19, 21].—Under provisions of §20(11), a suit to recover for loss and damage to rail shipment may be brought against the delivering carrier by a shipper suffering loss which occurs during an interstate shipment.—Association of Maryland Pilots v. Baltimore & O. R. Co., 304 F. Supp. 548 (550).

35. Lawful holder of bill of lading.—[Vols. 3, 9, 13, 18].—See Litvak Meat Co. v. Baker, n. 3, above.

38. [Negligence]—Other causes.—Carriers have a common-law obligation to transport goods with reasonable diligence and to make delivery thereof within a reasonable time; and commensurate with such obligation is the right of action by shipper for delay, though delays due to causes that could not reasonably have been anticipated are excusable. It follows that, when goods are tendered for shipment, a carrier is bound to advise shipper as to any cause likely to delay the transportation which is within its knowledge, or its fair and reasonable means of knowledge, and not within shipper's knowledge. Defendant knew the date plaintiff wanted its shipment of meat to reach the destination, and knew when it received the shipment that it was tendered too late for loading on fast train that would arrive on that date; therefore, railroad had a duty to advise shipper that its desired shipping schedule (noted on bill of lading) could not be met and, having failed to so advise shipper, carrier was liable for loss sustained by shipper as a result of delayed arrival of the shipment.—Gold Star Meat Co. v. Union Pac. R. Co., 438 F. 2d 1270 (1271-3).

40. Measure of damages.—[Vols. 15-19, 21].—The measure of damages in delay cases is actual damages, and the market value rule has been adopted as a proper method to ascertain actual damages. On the facts of record, defendant railroad defaulted on its duty to advise shipper of impending delay in transportation of its goods and, consequently, was liable for the resulting loss. Accordingly, there being no merit in railroad's argument that it should not be held liable for special damages when it did not know any special damages were incurred, the proper measure of damages was the difference in market value of the goods on the date and in the condition they were contracted to arrive at their destination and the market value after the delayed arrival. Trial court's judgment affirmed.—Gold Star Meat Co. v. Union Pac. R. Co., 438 F. 2d 1270 (1273).

Since Hinsch's Mileage Tariff applies only to the authorized use of rail cars, it is not an appropriate measure of the damages to which the Government is entitled as compensation for railroad's unauthorized use of government-owned flatcar which was tendered to carrier for shipment to an army depot and, instead of being delivered as provided in the bill of lading, was used in an entirely unauthorized manner. [Citing 271 Fed. 668.]—Burlington Northern, Inc. v. United States, 462 F. 2d 526 (529).

In action against railroad for damages arising from delivery of carload of cement to wrong plant of consignee, there is no doubt that defendant is liable for breach of contract by virtue of its misdelivery. As to measure of damages for such breach of contract, the rule is that damages recoverable are (1) such as may fairly and reasonably be considered as arising in usual course of events from the breach itself or (2) such as may reasonably be supposed to have been in contemplation of the parties when the contract was made. Thus, since consignee's heavy expenses for testing and replacing unsuitable concrete, which was processed from considered cement shipment and delivered to customers, constituted special damages not within the parties' contemplation when the shipment was made, railroad is not liable therefor. However, since defendant breached its duty to deliver under the contract of carriage, shipper is entitled to recover damages in the amount of value of the cement plus the freight charges.—Marquette Cement Mfg. Co. v. Louisville & N. R. Co., 281 F. Supp. 944 (947-51)*.

In a suit against interstate carrier to recover for damage to part of goods shipped, general rule for measure of damages is the market value of undamaged goods at destination point less the market value of the damaged goods; however, if another standard better measures the actual loss, market value test should be discarded and the standard which best measures the damages should be adopted. Thus, where plaintiff-consignor had contracted to sell California grapes in South America, and first part of rail shipment was damaged when it arrived in New Jersey (for transshipment by water) so that the grapes could not be shipped to South America and plaintiff was required to have them sold at auction at a loss, plaintiff was entitled to damages in the amount it would have received under its contract for grapes in South America, less the amount received at the auction and less the amount it would have had to pay for water transportation of the goods from New Jersey to South America.—F. J. McCarty Co. v. Southern Pac. Co., 289 F. Supp. 875 (883-4)*.

In shipper's suit against railroad to recover for damage to shipment of engine parts, damages claimed for repairs or replacements may not exceed fair value of the goods before injury, unless the property has some special value to the owner greater than its value to others; further, plaintiff claiming damages must present sufficient evidence from which the damage can be ascertained on some rational basis other than by speculation or conjecture. Evidence shows that plaintiff purchased a used marine engine (for dismantling in order to obtain engine parts) for $8,500, parts shipped 3 months later were insured for $12,000 and were to be used in a vessel nearing the end of its useful life, and that other parts were readily available for replacements when those shipped sustained loss and damage in transit. Therefore, the court finds that market value of the shipment was the price paid for the engine; and shipper is entitled to recover that amount from the carrier but, as it failed to show any "special value" of the engine parts, it is not entitled to recover damages in excess of market value on the ground of special value to it.—Association of Maryland Pilots v. Baltimore & O. R. Co., 304 F. Supp. 548 (557-8)*.

Measure of damages under §20(11), which was applicable on question of defendant forwarder's liability, if any, for damages to plaintiff's shipment of electric fans and stands, is the actual loss, damage or injury caused by carrier to the goods in its possession and being transported. Generally, such damages are to be computed at the difference between sound market value of the goods at destination and the value as damaged, and that rule is a proper measure where, as in instant case, consignee buys the goods for resale. The evidence shows that shipment left shipper's loading platform in good condition; moved under straight bill of lading, which had a "shippers load and count" notation, by rail TOFC plan; and was damaged in transit by leakage of water through plastic-lined canvas top of trailer furnished by defendant when an enclosed trailer was not available; therefore, all damage to the cargo is attributable to defendant. Plaintiff found entitled to recover the difference between value of its shipment, if delivered in good condition on schedule, and the salvage value thereof; amount of damages computed accordingly.—Federated Department Stores, Inc. v. Brinke, 316 F. Supp. 1402 (1404-5).

Actions

115. In general; time for.—[Vols. 3, 9, 13-19, 21].—In suit against railroad to recover damages which occurred when it delivered to terminal line (that served plaintiff's plant) a car of ethylene oxide, instead of carload of butadiene it should have delivered, damages complained of occurred in March 1966; and record shows that railroad officials visited plaintiff's plant less than a month later, were then made aware that damages were being claimed but extent thereof had not been ascertained, and examined two business-records documents concerning the railroad's misdelivery, which they then returned to plaintiff's representative. While §2(b) of the bill of lading requires that written claim of damage be filed with the carrier within 9 months, the documents need not be in a particular form; the courts have held such requirement to be satisfied where carrier had actual knowledge of the damage. Though plaintiff's "Memorandum of Facts," outlining the extent of damages, was not submitted to defendant until Jan. 20, 1967, documents presented to its officials, viewed in light of all the circumstances, constitute an adequate statement of claim within bill of lading requirements. Trial court erred in ruling that appellants' notice of claim was insufficient; affirmed in part and reversed in part.—American Synthetic Rubber Corp. v. Louisville & N.R. Co., 422 F. 2d 462 (464, 468-9)*.

While shipper alluded to §20(11) in its complaint for recovery of damages to large and expensive electron tube transported by defendant motor carrier, no party objected to failure of the trial judge to instruct the jury on the Carmack Amendment, though requested by plaintiff to do so; moreover, on appeal from lower court judgment for carrier notwithstanding the jury's verdict awarding damages, both parties rely solely on Texas authorities on the issue of plaintiff's damages. Under such circumstances, and in the absence of any authorities to the contrary, the Court of Appeals would give effect to Texas tort law on the particular issue of damages.—Continental Electronics Mfg. Co. v. Navajo Freight Lines, Inc., 447 F. 2d 1174 (1176, Note).

On appeal from district court judgment against the two defendants in shipper's suit against initial and delivering railroads, originally brought in Tennessee court, alleging liability for loss of cotton shipment (destroyed by a fire in Ohio) in two counts—the first a common law count and the second a statutory count under the Carmack Amendment—service of process upon both defendants was valid under Tennessee statute providing for service on foreign corporations and associations which have offices and agents within the state. Although neither corporate defendant operates a line of railroad in Tennessee, both have offices and agents available for service in Memphis, as does corporate shipper; and under the state law, shipper could validly sue nonresident defendant railroads in Tennessee court for damages to considerd shipment which occurred outside the state boundaries.—W. D. Lawson & Co. v. Penn Central Co., 456 F. 2d 419 (420-1).

As the Supreme Court held in 226 US 491, however, the Carmack Amendment preempted the field of law relating to carriers' bill-of-lading liability for interstate shipments. Thus, since the common law count in shipper's original state court complaint is a suit for damages for violation of railroads' contract for interstate carriage of goods—there being no apparent distinction between nature of that count, or relief sought thereunder, and that stated or sought under the federal statute—the Carmack Amendment preempted the common-law action; and the district court erred in not dismissing the common law count as to both defendants. Accordingly, since the court properly dismissed the statutory count against delivering railroad on ground that a receiving carrier could not be sued under §20(11) in a state where it did not operate a line of railroad, the complaint should be dismissed as to that carrier.—Id., pp. 421-4.

District court had jurisdiction, however, in shipper's action under §20(11) against initial railroad who issued its bill of lading for the interstate shipment; and in view of the practical identity of the two counts, its error in submitting the common-law count to the jury was harmless. Furthermore, contrary to railroads' argument, maintenance of the suit in Tennessee did not impose an unreasonable burden on interstate commerce; all the parties had offices in the state and county where suit was filed and, under the Carmack Amendment, suit could have been brought in many jurisdictions where convenience of the parties would be no better served than they were in Tennessee. Lower court's judgment vacated as to delivering carrier and affirmed as to defendant initial railroad.—Id., p. 424.

In shipper's suit against railroad to recover for damage to returned shipment of cherries in barrels which was received by plaintiff in damaged condition, defendant's theory that some of the cherries were damaged when loaded, and plaintiff's consignee failed to properly load returned shipment, is not supported by conclusive evidence; also, there is substantial evidence by plaintiff that the cherry barrels were in good condition when originally loaded and that the loading method used was adequate to prevent any damage in normal transit. Therefore, under the principles set forth in 377 US 134, the Court of Appeals finds that the evidence is conflicting on the essential issues and that decision of the trier of fact should not be disturbed. The trial court properly instructed the jury; and obviously, the jury rejected defendant's theory of the case. Judgment in favor of plaintiff, affirmed.—Schuler Chocolates, Inc. v. Chicago & N. W. Ry. Co., 468 F. 2d 119.

In action against railroad for damage to goods transported by it, defendant had no legal duty to separate the undamaged from damaged boxes of grapes in shipments from California to New Jersey (for water transportation to South America) and, since water carrier-consignee's wrongful refusal to accept delivery of first partially damaged shipment and thereafter mitigate the damages, standing alone, does not prohibit consignor's recovery of damages from the railroad, consignor can recover only if a different reasonable action by its agents or by consignee could have mitigated the damages. However, defendant railroad must show how plaintiff-consignor or consignee might have mitigated losses claimed to be due to railroad's delivery of the partially damaged shipment.—F. J. McCarty Co. v. Southern Pac. Co., 289 F. Supp. 875 (881)*.

Therefore, defendant is liable for consignor's damages on the first shipment when 10 to 15 percent thereof was damaged upon arrival in New Jersey and, since neither consignor nor consignee (that was to provide water movement therefrom) had space, facilities, time, or personnel to separate the damaged from the undamaged boxes, consignor had to sell the grapes at auction at a loss. However, when only a small portion of the second shipment was damaged upon arrival, consignee refused to accept delivery of partially damaged shipment, and consignor had the goods sold at auction at a loss, consignor could not recover damages from the railroad because consignee's refusal to accept delivery was not reasonable.—Id., pp. 882-3.

In wholesale/distributor's suit against railroad to recover loss allegedly resulting from damage to carload of peaches, plaintiff sustains his burden of proof when he shows (1) delivery of goods to carrier in good condition, (2) arrival in damaged condition, and (3) the amount of damages; burden is then upon carrier to show both (1) it was free from negligence and (2) damage to cargo was due to one of the excepted causes relieving it from liability. Fact that the peaches were given a lower grade at destination than at origin does not show they were damaged en route, particularly since difference between the two grades relates only to color which stops developing after fruit is picked. Therefore, as the crucial evidence was the inspection certificate issued (pursuant to the Agricultural Marketing Act) at origin of shipment, and there is no evidence that condition of the fruit was different at destination than it was at origin, plaintiff has not made out a *prima facie* case in that he has failed to show any damage to the goods while in transit. Judgment for defendant, with costs.—Condakes v. Southern Pac. Co., 303 F. Supp. 369 (371-3).

Defendant railroad, as a common carrier, owed a duty to plaintiff to exercise reasonable care in handling considered shipment of grapes and to perform all required transportation services without negligence. Under §20(11), a carrier, although not an absolute insurer, is liable for full actual loss, damage or injury to goods it transports unless it can show its freedom from negligence and that damage was caused by one of the excepted causes relieving it from liability. Therefore, when plaintiff consignee established a *prima facie* case by showing delivery of shipment to carrier in good condition, arrival in damaged condition (shown by the record to have been caused by rough handling during transit), and the actual amount of its damages, and defendant railroad failed to show by a preponderance of credible evidence either its freedom from negligence or that the damage was due to one of the excepted causes relieving it from liability, plaintiff is entitled to recover its actual damages in the amount specified.—Condakes v. Southern Pac. Co., 303 F. Supp. 1158 (1159-60, 1161-2).

Defendant railroad was not liable to shipper for damage to shipment of canned goods which occurred when train was derailed and car containing plaintiff's goods was overturned, when the derailment was caused by sudden heavy rain and flooding that undermined the roadbed and tracks over which defendant's employees were operating the train in a careful and prudent manner. The Uniform Bill of Lading, under which the shipment moved, provided that carriers were not liable for loss or damage caused by an act of God; and record showed that the rainfall of five or more inches in a 4-hour period was extraordinary, unusual, and had not happened for 20 years prior to that time. The cause of the derailment and consequent damage to plaintiff's goods was an act of God, which was unforeseeable, i.e., the unusual and unprecedented rainfall; therefore, under the bill of lading, defendant carrier was absolved from liability for the damages claimed by plaintiff. Action dismissed.—Marriott Corporation v. Norfolk & W. Ry. Co., 319 F. Supp. 646 (647-8).

To establish a *prima facie* case in suit to recover from the carrier for damages to its shipment, the shipper must show delivery of goods to carrier in good condition, arrival in damaged condition, and amount of the damages. Plaintiff did not show delivery of cantaloupes in good condition by placing in evidence a certificate of inspection issued by Department of Agriculture 27 hours before the car was delivered to carrier. The inspection certificate in itself is not conclusive proof that commodity was in good condition on delivery; it is only prima facie evidence of truth of statements therein; and, while it may warrant, it does not compel a finding of good condition at the time of shipment, particularly when other evidence permits a different conclusion to be drawn. Other evidence of record shows that the cantaloupes were not sufficiently cooled at time of delivery to prevent natural development of soft fungus rot, and hence, when shipped, were not in a condition to assure against deterioration under normal transportation conditions. Delivery to carrier in good condition not proved; judgment for defendant.—S. Strock & Co. v. Southern Pac. Co., 326 F. Supp. 695 (696-7).

In suit by meat packer against railroad to recover damages on TOFC shipment of meat, found to be badly spoiled after shipper had loaded it into carrier-furnished refrigerated trailer but before railroad could pick trailer up, plaintiff bases its right to recover on two theories: (1) that delivery of shipment into carrier's possession had been completed when the loss occurred, and (2) that the trailer furnished was defective and, thus, carrier breached its legal duty to provide suitable equipment for carriage of the particular goods. However, based on stipulated facts relating to customs and arrangements of the parties for delivering trailers to packing plant, shipper's loading and placing them on the plant lot, and pickup of shipments therefrom by carrier, there was no delivery of considered shipment into railroad's exclusive possession for immediate transportation prior to the time it was discovered that the meat was spoiled; therefore, no liability for loss can attach to defendant on that ground.—Dugdale Packing Co. v. Atchison, T. & S.F. Ry. Co., 347 F. Supp. 1276 (1280-1).

As to plaintiff's further contention that defendant failed to furnish a safe and suitable trailer for carriage of the product to be shipped, a common carrier is liable to the shipper for loss of perishable goods when the loss is attributable to unsafe or unfit condition of vehicle furnished. Defendant furnished shipper a refrigerated trailer suitable for transportation of fresh meats; and based on undisputed facts of record, it is reasonable to assume that the trailer was not defective when delivered to plaintiff. Accordingly, burden is on plaintiff to show that trailer furnished was not suitable for the intended purpose, and it failed to sustain that burden. Judgment for defendant.—Id., pp. 1281-2.

116. Venue.—[Vols. 3, 18, 21].—While neither of nonresident defendants operates a line of railroad in Tennessee, both have offices and agents in Memphis, as does plaintiff shipper; and under Tennessee law providing for service of process on foreign corporations and associations which have offices in the State, shipper could bring a valid action in state court against initial and delivering railroads to recover damages for loss of cotton shipment that was destroyed by fire outside that State. Therefore, defendants having removed the case to federal court in Tennessee, while reserving their objections to venue, shipper's Carmack Amendment could be maintained there against initial carrier who issued the bill of lading; however, the district court properly dismissed the statutory count against delivering railroad on the ground that, under specific language of the Carmack Amendment, a receiving carrier could not be sued in a state where it did not operate a line of railroad.—W. D. Lawson & Co. v. Penn Central Co., 456 F. 2d 419 (420-1, 423).

117. Jurisdiction.—[Vols. 3, 7, 11, 15, 18, 19, 21].—Federal court, to which defendant railroad had removed suit originally brought in a state court, had jurisdiction of shipper's action to recover damages that occurred when defendant received carload of butadiene from another railroad for delivery to Kentucky & I. Term. R. which served plaintiff's plant and delivered to K&I a carload of ethylene oxide which was mixed with other raw materials in manufacturing process at the plant, resulting in considerable damage. Though the complaint does not rely on any federal law, facts stated therein clearly show that gravamen of the action is within scope of the Carmack Amendment. Defendant was attempting to fulfill terms of uniform bill of lading contract for delivery when it transferred the wrong car to K&I; it intended to deliver a car of butadiene and its mistaken delivery of another chemical constituted a breach of a duty incurred by contract with shipper. Since the action is one for breach of the bill of lading contract, and is removable to federal court, it must be governed by terms of the Carmack Amendment.—American Synthetic Rubber Corp. v. Louisville & N. R. Co., 291 F. Supp. 723 (725-6)*.

In shipper's action against railroad for damage to goods while in transit from Florida to Boston, defendant claims it is not subject to jurisdiction of the Massachusetts court because it is not doing business in the State, has no agent for service of process there, and does not fall within provisions of the state long-arm statute. However, the transportation involved is covered by the Carmack amendment; and under that law, when carrier receives goods in one State for movement to a point in another that involves use of a connecting carrier for any part of the way, receiving carrier is deemed to have adopted such other carrier as its agent, and to incur carrier liability over the entire route. Inasmuch as carrier received in Florida a shipment to be transported to Boston on a straight bill of lading, it follows that defendant had contracted to supply services in the commonwealth; damage complained of presents a cause of action arising from that contract; thus, the Massachusetts "Long-Arm" statute is applicable. Defendant's motion to dismiss for lack of jurisdiction, denied.—Sarno v. Florida East Coast Ry. Co., 327 F. Supp. 506 (507).

Regulations of the Commission

37 FR 4257, March 1, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, new Part 1005, §§1005.1 - 1005.6, added to become effective April 20, 1972.

37 FR 9027, May 4, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, effective date of prescribed regulations postponed until July 1, 1972, effective on date of order.

37 FR 20943, Oct. 5, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, §1005.3(b) and §1005.4(c) modified, effective Oct. 16, 1972.

37 FR 23908, Nov. 10, 1972, Part 1005: Principles and Practices for the Investigation and Voluntary Disposition of Loss and Damage Claims and Processing Salvage, second paragraph of §1005.3 and §1005.4(c) revised, effective Oct. 16, 1972.

Section 20. (12) Recovery by initial or delivering carrier from connecting carrier.—[Unchanged. See vol. 14, p. 11548.]

Amendments, see footnotes, vol. 3, p. 2614, vol. 14, p. 11548; historical note, p. 2614.

Notes of Decisions

Volume 3—p. 2614; Volume 11—p. 9324; Volume 12—p. 10333; Volume 15—p. 12138; Volume 19—p. 15431; Volume 21—p. 16983.

1. Recovery over by initial carrier.—[Vols. 3, 7, 11, 15, 18, 19, 21].—Plan I TOFC operations are valid through-route and joint-rate arrangements between connecting carriers and it necessarily follows that the respective liabilities of the participating carriers are to be governed by §§20(11) and 20(12). Under §20(11), the initial carrier is liable to the shipper for all damage or loss, whether caused by it or not, on the theory that in accepting the shipment under the through joint rate it becomes a principal and all its connecting carriers agents for the transportation; and §20(12) provides a "right over" in order to insure that the ultimate burden falls upon the carrier responsible for the loss. Nor can the Commission accept as seriously made the contentions of the freight forwarders to the effect that a railroad cannot assume responsibility to an unknown shipper. Prior to enactment of part IV, shippers by freight forwarder had for many years been allowed to sue the underlying carriers for loss or damage occasioned by the latter.—Substituted Service—Piggyback, 322 I.C.C. 301 (346)*.

To the extent that an agreement between carriers assigns portions of loss and damage claims on interline shipments to carriers not responsible for such claims, such agreement violates the spirit and the letter of §20 (12).—Loss and Damage Claims, 340 I.C.C. 515 (538).

Section 20a. Securities of carriers; issuance, etc.—(1) Carrier defined.—[Unchanged. See vol. 15, p. 12138.]

Amendments, see footnotes, vol. 15, p. 12138; historical notes, vol. 4, p. 2615, vol. 9, p. 7800, vol. 12, pp. 10218, 10330, vol. 13, pp. 10937, 11032, vol. 14, p. 11423, vol. 21, p. 16983.

Cross Reference

Section 13 of the Emergency Rail Facilities Restoration Act, Pub. Law 92-591, Oct. 27, 1972, 86 Stat. 1304, provides that a railroad qualifying for a loan or loans under that act "shall not be required to comply with the provisions of section 20a of the Interstate Commerce Act (49 U.S.C. 20a) with respect to such loan or loans."

1. Carriers subject to section.—[Vols. 4, 7, 9, 15, 19, 21].—See also Missouri Pac. R. Co.—Control—Chicago & E. I. R. Co., at §5(2), n. 45 conditions.

A common law business trust formed for the purpose of reorganization and acquisition of a nonoperating rail carrier is a common carrier within the meaning of §1(3)(a) of the Act; and, as such will be subject to §20a for the issue and assumption of obligation of any securities issued or guaranteed.—Pittsburgh & W. Va. R.—Pur.—Pittsburgh & W. Va. Ry. Co., 330 I.C.C. 593 (596).

Section 20a. (2) Issuance of securities; assumption of obligations; authorization.—[Unchanged. See vol. 9, p. 7801, vol. 21, p. 16985.

Historical notes, see vol. 4, p. 2615, vol. 9, p. 7801, vol. 12, p. 10330, vol. 14, p. 11549, vol. 16, p. 12784, vol. 17, p. 13472; cross reference, vol. 21, p. 16985.

Notes of Decisions

Volume 4—p. 2621; Volume 7—p. 5826; Volume 9—p. 7802; Volume 11—p. 9325; Volume 12—p. 10334; Volume 13—p. 11038; Volume 14—p. 11549; Volume 15—p. 12139; Volume 16—p. 12784; Volume 17—p. 13472; Volume 18—p. 14299; Volume 19—p. 15433; Volume 21—p. 16985.

Constitutionality; Purpose

2. Purpose.—[Vols. 4, 21].—Dominant purpose of Congress in enacting §20a was to protect investors in securities of railroads and other carriers from the all too frequent abuses of financial manipulations, watered stock, and over-extended capital structures; thus, it required that carriers obtain the Commission's approval before issuing securities or assuming liabilities or other obligations. Also, the requirement of prior Commission approval has been held to apply to any transaction by which carrier changes or affects terms of its outstanding securities. However, that established body of law does not compel the conclusion that deposit receipts, used as a mechanism for maintaining the status quo pending application for Commission approval, are securities as that term is used in §20a; and record is convincing that considered deposit receipts are not securities which require approval prior to issuance. Further, the court notes that, while plaintiff argues that alleged violation of §20a voids the control transactions under consideration, §20a(11) provides the remedy for a §20a violation.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (386, 387-8)*.

3.—Safeguarding investors.—[Vols. 4, 7, 9, 14-17].—Commission required, as condition of its approval of transaction herein, publication of a prospectus conforming to Securities Exchange Commission Form S-2 which would detail the terms and risks involved to a prospective investor.—North Western Employees—Pur.—Chicago & N. W. Ry. Co., 342 I.C.C. 58 (77).

Construction

10. Construction, generally.—[Vols. 4, 7, 9, 11, 19, 21].—See also Federal Barge Lines, Inc., Assumption of Obligation, at n. 175 below.

Action by purchasers of railroad bonds against issuer, its officers, and underwriters for damages, claimed to result from their reliance on defendants' allegedly false and misleading offering circular, fails to state a claim under §§8, 20a and 20b on two grounds. First, §8 provides relief only for a carrier's violations of the Act and the complaint does not allege that any defendant is a carrier; second, it establishes liability only for a violation of the Act and, in instant case, such a violation can only be found if defendants failed to comply with applicable provisions of §20a concerning the issuance of securities. Therefore, since complaint alleges that the railroad bonds in question were approved by the Commission, even if it could be amended to allege that certain defendants are carriers, no possible violation of §20a is or could be alleged. Complaint dismissed for failure to state a claim under §§8, 20a and 20b of the Act.—Dorfman v. First Boston Corp., 336 F. Supp. 1089 (1098).

However, it is important to emphasize that the court's decision does not leave investors in securities issued under the Interstate Commerce Act without any remedy for misstatements or fraud as suggested by plaintiffs. Although §20a only affords limited protection concerning the registration of securities, an investor in a security issued thereunder is protected against misleading or fraudulent statements under §§12(2) and 17 of the Securities Act. And, in addition, the Exchange Act does not exempt §20a securities from its coverage.—Id., pp. 1098-9.

While §20a does not empower the Commission to grant immunity from the antitrust laws, when securities are issued in conjunction with carrier activity which has been approved under §5 of the Act and the Commission specifically finds the issuance necessary to carry out that activity, issuance of the securities will share the activity's antitrust immunization. Thus, when Commission order granted REA authority to issue considered notes to named owning railroads without competitive bidding and, in addition, the Commission expressly found that the notes were to be evidence of non-negotiable debt which REA owed the railroads and held that to be a necessary and appropriate purpose in performance of its carrier services pursuant to approved joint venture agreement, antitrust exemption for the notes was thereby granted. However, approval of issuance of the notes as evidence of the non-negotiable debt does not amount to a finding under §20a that the debt was necessary and appropriate to the railroads' joint venture agreement, previously approved under §5, and thus immune from the antitrust laws.—REA Express, Inc. v. Alabama G. S. R. Co., 343 F. Supp. 851 (858-9).

12. "Security".—[Vols. 4, 7, 11, 17-19].—Although under prior Commission decisions a mortgage, *per se*, is not a "security" within the meaning of the Act, the execution and delivery of a mortgage may constitute an assumption of obligation in respect of securities of others, regardless of whether assumption is formal or informal and undertaken in one instrument or at the time the debt is incurred; therefore, the Commission must look to the substance of the entire transaction.—Federal Barge Lines, Inc., Assumption of Obligation, 320 I.C.C. 600 (604).

The language of §20a and the history of its application give the Commission some latitude in defining what constitutes a "security" within reasonable limits, where a new situation arises or ambiguity exists. Such clarification is desirable in the case of loan agreements some of which are essentially notes and differ in substance from standby credit arrangements. The Commission affirmed its view that loan agreements which are definite as to their terms and certain as to their purposes constitute "securities" within the meaning of §20a.—Expanded Definition of Term "Securities", 340 I.C.C. 817 (824).

In addition, it is apparent from the history of the Act, and in essence admitted by opposing parties, that a primary purpose of §20a was to prevent carriers from becoming overcapitalized by requiring them at the time of filing a §20a application to lay the full facts of their financial situation before the Commission, enabling it to consider such facts in making the requisite statutory findings. Although other financing has become increasingly important to carriers, virtually all major carriers must periodically resort, nonetheless, to issuing securities under §20a (or 214). It is incumbent on the Commission at the time of passing on §20a (or 214) applications to give major consideration to the use which the carriers have made of their credit arrangements which did not involve the issuance of securities, to determine whether such credit was used prudently and therefore is not inimical to the purposes of §20a (or 214) applications.—Id., p. 824.

The Commission found that all carriers shall include in any application under §20a or 214 of the Act a list of the amounts, terms, and purposes of all nonsecurity financing for the current year when the application is filed and 2 previous calendar years, by separate categories, including, but not limited to, conditional sale contracts, chattel mortgages, security agreements, mortgages, deeds of trust, loan agreements in the nature of standby credit agreements, credit agreements, and advances, effective with all applications filed 60 days after publication in the Federal Register. The terms of each category of nonsecurity financing shall include the interest rate payable, terms of repayment, collateral pledged as security therefor, material restrictions of such instruments, as well as a detailed breakdown as to the use of the proceeds or credit thus obtained, specifically identifying uses for noncarrier purposes.—Id., p. 825.

13. "Issue" of securities.—[Vols. 4, 7, 9, 11-13, 15, 18, 19, 21].—It is incumbent on the Commission at the time of passing on §20a (or 214) applications to give major consideration to the use which the carriers have made of their credit arrangements which did not involve the issuance of securities, to determine whether such credit was used prudently and therefore is not inimical to the purposes of §20a (or 214) applications.—Expanded Definition of Term "Securities". 340 I.C.C. 817 (824).

Assets and Expenditures Capitalizable

25. Assets capitalizable, generally.—[Vols. 4, 7, 9, 11, 12, 15, 17].—In this §20a proceeding the traditional tests for determining capitalizable assets of operating carriers are not applicable where applicant, a nonoperating carrier, had leased all of its carrier operating properties to others and continued as a real estate investment trust whose present function was solely rent collection.—Pittsburgh & W. Va. R. Trust Certificate, 336 I.C.C. 530 (533-35).

General Considerations

48. Kind of securities proposed.—[Vol. 4].—In approved acquisition of nonoperating carrier's rail line, property and franchises and substitution as lessor under an outstanding lease agreement, issuance by acquiring common law trust of 1,510,000 certificates of beneficial interest of no par value to be exchanged for an equal number of shares of capital stock of acquired carrier and assumption of obligation and liability in respect of principal and interest of bonds and notes not exceeding the principal amount of $7,183,000 is for lawful objects within the purposes of the trust and compatible with the public interest.—Pittsburgh & W. Va. R.—Pur.—Pittsburgh & W. Va. Ry. Co., 330 I.C.C. 593 (594, 597).

Stock

100. In general.—[Vols. 4, 7, 9, 13, 15, 17-19].—Issuance by new Pittsburgh & L. E. R. Co. of Delaware of 20 shares of capital stock of $50 par value each to old P. &

L.E.R. Co. of Pennsylvania and Ohio, in order that former may have a stockholder which can assent to proposed merger of latter, also issuance after merger of shares of stock necessary to provide for employee stock purchase and stock option plans, and employee and officer incentive bonus plan, of old P. & L.E. in effect at time of merger, authorized.—Pittsburgh & L.E. R. Co. Merger, 320 I.C.C. 198 (199, 200, 205).

Proposed issuance of shares of beneficial interest approved. Applicant has leased all properties to Norfolk & W. Ry. Co. and now operates solely as a real estate investment trust and the transaction will enhance applicant's ability to perform its duties under the lease or in the event of termination of the lease.—Pittsburgh & W. Va. R. Trust Certificate, 336 I.C.C. 530 (535).

Purpose of Issuance

103. Exchange for other stock.—[Vols. 4, 7, 9, 11, 18, 19, 21].—Incidental to merger approved herein, the Commission authorized Seaboard to issue 336, 495 shares of common stock, par value $20 per share, for conversion and exchange at an exchange ratio of 1.5 to 1.—Seaboard Coast Line R. Co.—Merger—Piedmont, 334 I.C.C. 378 (394-95).

104. Payment for equipment or additions and betterments.—[Vols. 4, 7, 9, 12].—Applicant's plan for issuance of stock to finance modernization of its lines to enable it to handle high-speed trains in the future is compatible with public interest, and appropriate to its performance as common carrier because an overhaul of applicant's physical plant will benefit both shipping public and applicant and its shareholders by avoiding necessity of routing Chicago-bound traffic through St. Louis, Mo.—Chicago & E. I. R. Co. Stock, 338 I.C.C. 282 (288).

106. Payment for railroad properties, rights and franchises.—[Vols. 4, 7, 9, 11-14, 17-19, 21].—Issuance by new Pittsburgh & L.E. R. Co. of sufficient shares of $50-par-value capital stock to provide for exchange for a like number of shares of old P & LE stock outstanding or in its treasury immediately prior to approved merger, also, after consummation of merger, issuance of 31,620 shares of capital stock in exchange for 39,596 shares of capital stock of Pittsburgh, McK. & Y. R. Co owned by New York Central (the other 50 percent of P McK & Y's stock being acquired through merger of old P & LE), authorized.—Pittsburgh & L.E. R. Co. Merger, 320 I.C.C. 198 (199-200, 205).

Commission approved issuance of common stock and other securities by the Pennsylvania R. Co. in order to effect the merger proposed and approved herein.—Pennsylvania R. Co.—Merger—New York Central R. Co., 327 I.C.C. 475 (548).

Issuance by newly created railroad subsidiary, authorized to purchase small switching and terminal line, of 250 shares of its capital stock without par value to Norfolk and Western and 250 shares of such stock to New York Central, its parent railroads, for cash consideration of $4,000 per share to be used to finance the transaction, approved.—Norfolk & W. Ry. Co.—Control—FP&E Co.—Purchase, 330 I.C.C. 672 (683).

Authority sought in embraced proceeding to issue stock to be used for the purchase and operation of railroad property under consideration is denied in view of the fact that authority is concurrently granted to the railroad to abandon its entire line and also in view of the existing contracts providing for rail carrier's sale of its right-of-way to State authority and public utility upon approval of proposed abandonment.—Washington & Old Dominion R. Abandonment—Virginia, 331 I.C.C..587 (603)*.

Issuance of 27,141,336 shares of common stock, without par value, by applicant in transaction of merger proposed herein, approved.—Southern Pacific Transportation Co.—Merger, 334 I.C.C. 866 (872).

Assumption of Obligation or Liability

175. Assumption of obligations, generally.—[Vols. 4, 7, 9, 11, 17-19, 21].—Applicant's contention that Congress never intended to subject a mortgagor to that portion of §20a(2) dealing with assumption of obligation and liability is without merit; and the Commission's finding in 233 ICC 359 (interpreting the first clause of §20a(2)) that the word "other" will generally be read as "other similar", so that things therein may be read as *ejusdem generis* with, and not of a quality different from, those specifically enumerated, affords no support therefor. The doctrine *ejusdem generis* is not applicable to that portion of §20a(2) dealing with assumption of obligation, since a number of the specified terms are of widely different character in general and not all of them are of equal quality or import or typical of each other; moreover, by the use of the word "otherwise", the intent is clear that the terms preceding "otherwise" are not all-inclusive of the methods by which an obligation may be assumed. —Federal Barge Lines, Inc., Assumption of Obligation, 320 I.C.C. 600 (603, 604-5).

Under the proposed mortgage the applicant would subject its entire property to liability for the notes of its noncarrier parent company just as completely as if it were to specifically agree "to pay or assume" the notes; thus, fact that the mortgage does not specifically contain provisions for applicant's repayment is not controlling. Although the applicant's obligation is contingent, the liability of a party as endorser, guarantor, surety, or otherwise is also ordinarily contingent; therefore, the result intended or the substance of the transaction, rather than the form, controls. Motion to dismiss, on ground that issuance of the mortgage is not an assumption of liability subject to the Commission's jurisdiction, denied.—Id., p. 605.

176. Subsidiaries' or affiliated companies' obligations.—[Vols. 4, 7, 9, 11-15, 19, 21].—Transaction whereby applicant subsidiary would execute and deliver a mortgage on its barges and towboats as security for installment promissory notes to be issued by its noncarrier parent is found to fall within the purview of §20a as an assumption of obligation and liability in respect of the securities to be issued by the parent company; issuance of considered mortgage authorized as compatible with the public interest.—Federal Barge Lines, Inc., Assumption of Obligation, 320 I.C.C. 600 (605-6).

Regulations of the Commission

37 FR 7160, Apr. 11, 1972, Part 1115: Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports, §1115.1 Application form, Form BF-6 referred to amended, effective 60 days after publication in the Federal Register.

37 FR 9119, May 5, 1972, Part 1115: Issuance of Securities, Assumption of Obligations and Filing of Certificates and Reports, effective date of order of March 22, 1972 (37 FR 7160) postponed to July 17, 1972, effective on date of order.

38 FR 23953, Sept. 5, 1973, Part 1115: Issuance of Securities, Assumption of Obligations and Filing of Certificates and Reports, expands the interpretation of the term "securities".

38 FR 24903, Sept. 11, 1973, Part 1115: Issuance of Securities, Assumption of Obligations and Filing of Certificates and Reports, Correction of regulations published at 38 FR 23953.

38 FR 25686, Sept. 14, 1973, Part 1115: issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports, Regulations prescribing the form for offering circulars for public sale of securities, effective Nov. 13, 1973.

38 FR 25686, Sept. 14, 1973, Issuance of Securities, Assumptions of Obligations, and Filing of Certificates and Reports; Correction of Expanded Definition of Securities published at 38 FR 23953.

38 FR 26608, Sept. 24, 1973: Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports; correcting effective date of order published at 38 FR 25686 to Nov. 12, 1973.

39 FR 30135, Aug. 21, 1974: Issuance of Securities, Assumption of Obligations, and Filing of Certificates and Reports. Regulations promulgated as to definitions and form of public offering, effective Nov. 19, 1974.

Section 20a. (3) Scope of Commission's authority.—[Unchanged. See vol. 9, p. 7826.]

Historical note, see vol. 4, p. 2615.

Notes of Decisions

Volume 4—p. 2673; Volume 7—p. 5864; Volume 14—p. 11550; Volume 18—p. 14233.

Section 20a. (4) Form and contents of applications; oath and signature.—[Unchanged. See vol. 9, p. 7826.]

Historical note, see vol. 21, p. 16989.

Notes of Decisions

Volume 4—p. 2680; Volume 7—p. 5866; Volume 12—p. 10339; Volume 14—p. 11551; Volume 16—p. 12785; Volume 17—p. 13476.

Section 20a. (5) Disposition of securities described in application, etc.—[Unchanged. See vol. 9, p. 7827.]

Section 20a. (6) Notice of application to governors of States; intervention; hearings.—[Unchanged. See vol. 9, p. 7827.]

Notes of Decisions

Volume 4—p. 2685; Volume 16—p. 12786; Volume 18—p. 14233; Volume 19—p. 15437; Volume 21—p. 16989.

Section 20a. (7) Jurisdiction of Commission as exclusive and plenary.—[Unchanged. See vol. 9, p. 7828.]

Notes of Decisions

Volume 4—p. 2686; Volume 7—p. 5867; Volume 17—p. 13476; Volume 19—p. 15438; Volume 21—p. 16989.

2. Jurisdiction under this section.—[Vols. 4, 7, 17, 19, 21].—The Commission's function is to regulate rather than operate the railroad industry and therefore it has no authority to substitute its business judgment for that of applicant's management. Applicant's plan to modernize its facilities is prudent and the choice of means used to finance such plan lies within the discretion of management in spite of Commission's powers under §20a(3) to grant or deny such applications or to grant them with appropriate modifications.—Chicago & E.I. R. Co. Stock, 338 I.C.C. 282 (288-9).

Section 20a. (8) Guaranty of securities.—[Unchanged. See vol. 9, p. 7828.]

Notes of Decisions

Volume 4—p. 2688.

Section 20a. (9) Issue of short-term notes; certificate of notification; proviso.—[Unchanged. See vol. 9, p. 7829.]

Notes of Decisions

Volume 4—p. 2689; Volume 7—p. 5868; Volume 9—p. 7829; Volume 17—p. 13476.

Section 20a. (10) Reports by carriers as to securities or proceeds.—[Unchanged. See vol. 9, p. 7830.]

Section 20a. (11) Securities issued contrary to law void; effect; penalty.—[Unchanged. See vol. 9, p. 7831].

Notes of Decisions

Volume 4—p. 2692; Volume 7—p. 5869; Volume 9—p. 7832; Volume 14—p. 11551; Volume 16—p. 12786; Volume 17—p. 13476; Volume 19—p. 15438; Volume 21—p. 16991.

1. Effect of failure to obtain authority for issue.—[Vols. 4, 7, 9, 14, 16, 17, 19].—Commission has consistently held that by virtue of the language in §20a(11), a void security cannot be made lawful and Commission will not retroactively legalize any void securities, unless such securities were issued inadvertently (see 70 ICC 827). Record herein, especially the communications between this Commission and applicant's counsel, shows that subject notes were not issued inadvertently and accordingly, application herein is not approved.—Atlas Van Lines, Inc.—Notes, 338 I.C.C. 291 (294-6).

2. Remedies of holders of unauthorized securities.—[Vol. 4].—Section 20a(11) provides the remedy for violation of §20a, i.e., that securities issued without prior approval shall be void, and also provides that any holder of a void security may sue for damages or (if acquired directly from issuing carrier) may elect to rescind. However, plaintiff (protestant in Commission control proceeding) could not take advantage of such remedies even if deposit receipts in question were void or voidable because they were issued without prior Commission approval, as it alleges, when its only connection with proposed control transactions was its claimed agreement to purchase stock of one of the local bus lines that national bus line (applicant) sought authority to control; it certainly has no such remedy in its suit to set aside Commission order approving the control. Moreover, in approving applicant's issuance of stock necessary for agreed stock exchange, in connection with proposed transactions, the Commission necessarily considered the propriety of the deposit receipts and recognized their validity. Order of the Commission sustained.—Interstate Investors, Inc. v. United States, 287 F. Supp. 374 (379, 386-8, 391-2)*.

Section 20a. (12) Restrictions on actions of officers and directors; penalty.—[Unchanged. See vol. 9, p. 7832.]

Historical note, see vol. 21, p. 16991.

Notes of Decisions

Volume 4—p. 2693; Volume 7—p. 7832; Volume 11—p. 9332; Volume 12—p. 10340; Volume 13—p. 11041; Volume 15—p. 12141; Volume 17—p. 13477.

Regulations of the Commission

35 FR 7651, May 16, 1970, Part 1112: Interlocking Officers, new §1112.9 Common control, and §1112.10 Jointly used terminal properties, added, effective on date of service of order.

Section 20b. Modification of railroad financial structures.—(1)-(13).—[Unchanged. See vol. 14, p. 11551, vol. 18, p. 14233.]

Volume 15—p. 12142; Volume 16—p. 12787; Volume 17—p. 13478; Volume 18—p. 14235; Volume 19—p. 15439.

Alteration and Modification; Findings

30. Plan of alteration, modification. —[Vols. 15, 16, 19].—Modification of bonds due Sept. 1, 1971, authorized under §20b, along with modification of terms of Part V loan, as part of an overall package to avoid financial squeeze, which otherwise could have resulted in the bankruptcy of the railroad. Although involving two essentially different transactions, each was contingent on the consummation of the other.—Erie Lackawanna Ry. Co. Bonds Modification, 342 I.C.C. 403 (404-05)*.

Section 20c. Recordation of railroad equipment trust agreements and other evidences of equipment indebtedness.—[Unchanged. See vol. 16, p. 12788.]

Historical note, vol. 17, p. 13481.

Regulations of the Commission

31 FR 16318, Dec. 21, 1966, Part 57: Recordation of Documents, §57.3(b) amended; §57.4(d) and (e) redesignated as §57.4(e) and (f), respectively, and a new §57.4(d) added; and new §57.5(e) added, effective 30 days date of order.

Section 21. Annual reports of Commission.—[Unchanged. See vol. 9, p. 7833.]

Amendments, see footnotes, vol. 4, p. 2695, vol. 9, p. 7833.

Section 22. Restrictions; quotations of rates for United States Government.—[Unchanged. See vol. 11, p. 9333, vol. 12, p. 10340, vol. 17, p. 13482, vol. 18, p. 14236.]

Historical note, see vol. 21, p. 16992.

CONSULT THE TABLE OF CASES WHENEVER A CITATION IS FOLLOWED BY AN ASTERISK

Historical Note

On July 10, 1973, The Commission submitted to the Congress a draft bill to amend §22 of the Interstate Commerce Act to eliminate free or reduced rates for Government traffic, except in time of war or other national emergency and except in the transportation of commodities exempt from economic regulation under parts II or III of the Act. S. 2251 was introduced to implement the Commission's recommendation, and was included in H.R. 5385 and H.R. 12891 upon which hearings were held in March 1974. Annual Report, 1974, p. 83.

Notes of Decisions

Volume 4—p. 2700; Volume 7—p. 5875; Volume 9—p. 7836; Volume 11—p. 9336; Volume 12—p. 10341; Volume 13—p. 11042; Volume 14—p. 11560; Volume 15—p. 12153; Volume 16—p. 12790; Volume 17—p. 13482; Volume 18—p. 14237; Volume 19—p. 15441; Volume 21—p. 16992.

Purpose and Construction

2. Interpretation, in general.—[Vols. 4, 7, 9, 11, 17, 19, 21].—Railroad serving the Denver Federal Center (within Denver switching limits) is estopped from recovering additional demurrage charges claimed to be due under its tariffs, when uncontroverted evidence shows that the Government relied to its detriment on oral agreement with plaintiff's representative for release of empty cars at the Depot, instead of interchange track, on days railroad did not switch cars at the Center. Defendant's reliance is not unjustified, as a carrier need not abide by its published rates when dealing with the Government; government's request for a §22 agreement waiving collection of the demurrage charges had not been approved, but §22(2) permits retroactive confirmation in writing of a variation from published tariff rate; thus, carrier's arguments that the demurrage charges are not a matter of contract and may not be modified by either party and that, since prerequisites of a valid §22 agreement were not met, claimed tarrif charges must be collected, are not persuasive. On facts of record, the defense of estoppel may be invoked; defendant's motion for summary judgment granted.—Chicago, B. & Q. R. Co. v. United States, 439 F. 2d 1224 (1226-8).

The Commission's position regarding §22 rates has been a matter of public record for at least a decade. We have consistently proposed (see our Annual Reports for 1961 at page 184 and 1967 at page 94) that §22 be amended to eliminate free or reduced rates for government traffic except in time of war or other national emergency, and except as to commodities exempt as to other carriers and we have supported legislation which would implement such a provision. Since we have attempted to remedy the §22 situation by legislation, no benefit would accrue from an investigation in this area and we will not, therefore, consider §22 rates in this proceeding.—Investigation of Railroad Freight Rate Structure, 340 I.C.C. 868 (875-76).

Authorized Reductions

5. Governmental bodies; United States.—[Vols. 4, 7, 9, 11-19].—In suit to recover additional charges on four shipments of troops and military impedimenta from Fort Hood, Tex., to Fort Stewart, Ga., during Cuban Missile Crisis, which moved under a §22 Agreement over routes over which a higher combination rate applied because alternate routes (over which lower single factor through rate applied) were congested by movement of 10 other such government shipments, railroad is entitled to judgment on its claim. Time was of the essence during the military emergency and, even if railroad could be charged with failure to select cheapest available route for "unrouted" shipments because it submitted routing suggestions, as §22 agreement authorized, military authorities accepted suggested routing and prepared bills of lading—specifying that routing—to cover the movement. Responsible military authorities were charged with the knowledge that suggested routing was not the least costly and,

having failed to reject the routing suggestions, they are bound to pay charges based on combination rate applicable over route of movement.—Seaboard Coast Line R. Co. v. United States, 412 F. 2d 1274 (1275-7).

In motor carrier's action to recover amounts allegedly due for transportation, under Government bills of lading, of household goods belonging to military personnel between points overseas and United States points, failure of carrier to bill the Government for additional compensation for diversion of shipments did not indicate a contemporaneous interpretation of the contracts so as to be binding, particularly when the original bills were later corrected by audit and by supplemental bills submitted. Thus, where shipment was diverted to a new destination without storage-in-transit, under applicable tariff and regulation, carrier was entitled to compensation in addition to its long-haul transportation charge. And when transportation officer directed placement of a shipment in storage at destination and subsequently directed plaintiff to deliver it to the property owner shown on bill of lading, though charge for delivering shipment to storage-in-transit was improper, carrier was entitled to additional compensation for the delivery from storage to the owner.—Global Van Lines, Inc. v. United States, 456 F. 2d 717 (722-31)*.

However, in instances where plaintiff, in order to meet carrier competition, submitted to Department of Defense special quotations offering lower rates on military household goods than rates in tariffs and tenders filed by the carrier bureau that represented it and other carriers, it indicated a willingness to handle under such quotation any shipments originating within jurisdiction of the military transportation officer, and within designated geographical areas surrounding named military installations. And contrary to plaintiff's contention, its special quotations were effective and applicable as to shipments originating within transportation officer's territorial jurisdiction; therefore, after obtaining that business by inducing defendant to rely on its special quotations, plaintiff is estopped from denying the validity of such special rate quotations.—Id., pp. 742-6.

On the other hand, equitable doctrines of estoppel and laches should not bar any of carrier's other valid claims. Most of claims sued on were not embraced in initial bills submitted in connection with the respective shipments, and which defendant paid on presentation, but plaintiff later submitted supplemental bills, after engaging two firms to audit its accounts with Department of Defense, asking for charges not included in original bills, or for additional amounts in connection with previous charges; and there is no sound basis for permitting defendant, on ground of estoppel, to withhold from plaintiff proper amounts for the transportation services. As to asserted laches, fact that processing of the vast number of separate claims against the Government would involve a great deal of trouble and expense affords no basis for rejecting just claims; nor is defendant's practice of destroying documents relating to household goods shipments after 4 years a proper basis for disallowing a just claim, especially when the claim is not time-barred until 6 years after accrual of the cause of action. Plaintiff is entitled to recover on its claims found to be meritorious.—Id., pp. 749-51.

Complainant United States availed itself of the §22 transit tender and accepted and paid a commodity rate based upon transit at Lathrop, Calif. Such rate quotation under §22 resulted in charges lower than those applicable to the public generally and the Government was bound thereby unless and until relief in the form of lower charges under §1 could be secured through Commission actions.—United States v. Central of Georgia R. Co., 332 I.C.C. 33 (36).

Regulations of the Commission

36 FR 8351, May 4, 1971: Drought Order No. 66, Transportation of Hay to Designated Disaster Area at Reduced Rates, railroads authorized to transport hay to the counties in Texas listed; and also to named counties in Oklahoma, at reduced rates until June 30, 1971, effective on date of order.

6 FR 12340, June 30, 1971: Drought Order No. 67, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to the counties in Arizona listed, effective on date of order.

36 FR 12340, June 30, 1971: Drought Order No. 68, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to the counties in New Mexico listed, effective on date of order.

36 FR 12341, June 30, 1971: Drought Order No. 66; Sub. No. 3, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to additional counties in Texas listed, effective on date of order.

36 FR 12342, June 30, 1971: Drought Order 66; Sub. No. 4, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to additional counties in Texas listed, effective on date of order.

36 FR 13958, July 28, 1971; Drought Order No. 66; Sub. N0. 7, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to counties in Texas listed, effective on date of order.

36 FR 13958, July 28, 1971: Drought Order No. 68; Sub. No. 2, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to counties in New Mexico listed, effective on date of order.

36 FR 16538, Aug. 21, 1971: Drought Order No. 66; Sub. No. 10, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to counties in Texas listed, effective on date of order.

36 FR 16151, Aug. 19, 1971: Drought Order No. 68; Sub. No. 3, Transportation of Hay at Reduced Rates in certain areas in New Mexico, extends expiration date of Drought Order 68 and Subs Nos. 1 and 2 thereunder, effective on date of order.

36 FR 16151, Aug. 19, 1971: Drought Order No. 66; Sub. No. 8, Transportation of Hay at Reduced Rates in certain areas in Oklahoma and Texas, extends expiration date of Drought Order 66 and Subs Nos. 1 through 7, effective on date of order.

36 FR 16151, Aug. 19, 1971: Drought Order No. 66; Sub. No. 9, Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to the counties in Texas listed, effective on date of order.

36 FR 18351, Sept. 11, 1971: Drought Order No. 66 (Sub No. 11), Transportation of Hay at Reduced Rates, railroads authorized to participate in such transportation to four Oklahoma counties, and three Texas counties, listed, effective on date of order.

Section 23. Mandamus to obtain equal facilities for shippers.—[Unchanged. See vol. 4, p. 2821, vol. 11, p. 9336.]

Historical note, see vol. 4, p. 2821; for amendments, see footnotes, vol. 4, p. 2821, vol. 11, p. 9336.

Notes of Decisions

Volume 4—p. 2822; Volume 7—p. 5898; Volume 10—p. 8264; Volume 11—p. 9336; Volume 14—p. 11560; Volume 15—p. 12154; Volume 19—p. 15444; Volume 21—p. 17000.

Section 24.—[Restated in §11 and §18. See vol. 4, p. 2723.]

Historical Note

Note.—Effective Dec. 16, 1967, compensation of members of the Commission is determined under Chapter 11, Title 2, USC, through the Commission on Executive, Legislative, and Judicial Salaries. Upon recommendation of the President of the United States, the annual rate of basic compensation of the Commissioners after Feb. 14, 1969, is $38,000, and that of the Chairman of the Commission is $40,000. See note following Section 358 of Title 2, USC.

Section 25. Safety appliances, methods, and systems.—[Unchanged. See vol. 9, p. 7843, vol. 11, p. 9337.]

Amendments, see footnotes, vol. 9, p. 7843, vol. 11, p. 9337; historical notes, vol. 4, p. 2737, vol. 13, p. 11042, vol. 14, p. 11560, vol. 15, p. 12155, vol. 16, p. 12791, vol. 17, p. 13486.

Notes of Decisions

Volume 4—p. 2738; Volume 7—p. 5884; Volume 9—p. 7847; Volume 11—p. 9337; Volume 12—p. 10342; Volume 14—p. 11561; Volume 15—p. 12155; Volume 16—p. 12791; Volume 17—p. 13486; Volume 18—p. 14239; Volume 19—p. 15444; Volume 21—p. 17001.

2. Construction and purpose of section.—[Vols. 4, 7, 9, 11, 14, 16-19, 21].—Although the Commission found that the petitioners for amendment of §132.12 of the Rules for Inspection, Testing and Maintenance of Air Brake Equipment failed to submit adequate proof to justify the proposed amendment, a new construction was placed on the proviso of the rule which permits changes in the rules, standards and instructions prescribed only when such changes are promulgated "solely for the purpose of achieving safety." Interpreted in terms of the national transportation policy of promoting economy and efficiency as well as safety, the word "achieve" may be construed as "maintain" with regard to a level of safety previously attained; thus proof that safety would be maintained by a proposed amendment which furthers economy and efficiency would be valid.—Rules for Inspection of Power or Train Brakes, 329 I.C.C. 442 (444-445)*.

The statutory criterion for rule revision in §25 is in marked contrast with the standard established by the Congress in §9 of the Safety Appliance Acts which provides that changes in the rules, standards, and instructions for the installation, inspection, maintenance, and repair of power or train brakes may be promulgated "***solely for the purpose of achieving safety." This sharply restrictive language does not apply to a proceeding for revision of rules under §25. In light of the relevant statutory criteria, the Commission concluded that the standard to be followed in considering the proposed rule revisions in the instant proceeding is whether a proposed change will impair safety giving due consideration to efficient and economical service.—Rules, Standards, and Instruction for Signal Systems, 329 I.C.C. 717 (719)*.

6. Automatic stops.—[Vols. 4, 7, 14-19, 21].—Discontinuance of automatic trainstop system as proposed by applicant will remove the protection afforded thereby, namely the automatic stopping of a train when an engineman, because of physical disability, human failure, or any other cause fails to observe or does not respond to a restrictive or stop signal. Notwithstanding improved operating conditions since installation of considered system, none of the improvements are capable of performing the safety function of an ATS system; and safety is the primary consideration. While approval of proposed changes would effectuate financial savings for applicant, §25 under which safety appliances, methods, or systems are administered has no provision for the consideration of financial advantages or savings. Terrain in the area is mountainous with steep grades and curves and the territory is subject to heavy snowfall; train movements are fairly heavy and train speeds have been increased. Adequate protection and safety will not be provided for train movements if considered ATS system is discontinued; denied.—Southern Pac. Co. Modifications of Systems, 325 I.C.C. 168 (172-4).

On numerous occasions the Commission has stressed the importance to safety of automatic train-stop systems in proceedings in which railroads have sought to discontinue existing automatic train-stop systems and operate under systems involving observation of automatic wayside signals from the locomotive cab. Such permission was denied even where territorial operating conditions had improved. Such permission was denied where the petitioner's line was completely dieselized, the diesels were equipped with electric windshield wipers, defrosters, emergency control valves which automatically stopped the train if the engineer failed to depress the so-called dead man's pedal and all wayside signals were so located as to be clearly visible from the cab.—Appliances and Systems to Promote Safety of Operation, 329 I.C.C. 266 (274).

While permission has sometimes been granted to discontinue automatic train-stop systems, such permission did not involve operation at speeds in excess of 79 miles per hour. Petitioner's evidence of favorable topography, improvements in track, rolling equipment and other physical features, is of little probative value in showing that there will be no dimunition of safety if operations at 80 miles per hour or more are permitted without the installation of the qualifying systems. Therefore, petition to operate passenger trains over main line track in Florida at speeds of 79 or more miles per hour without the installation of an automatic train-stop, train-control or cab-signal system, denied.—Id., pp. 274, 280.

14. Particular installations of devices required; tests; approval.—[Vols. 4, 7, 9, 15-19, 21].—Application seeking individual relief from the requirements of §136.21 of the Commission's Rules, Standards and Instructions, approved to the extent that applicant was permitted to install signals to the left, instead of over or to the right of the tracks, since after certain changes most of the line between the involved points will be single track, for which this change would be adequate; and over the remainder of the route which is double track the applicant is increasingly mechanizing its installations, consisting mainly of centralized track control and dual-directional signals.—Rules, Standards and Instructions for Signal Systems, 329 I.C.C. 438 (441).

18. Signal and interlocking systems. —[Vols. 9, 11, 12, 15-19, 21].—Pursuant to the provisions §25, the Commission adopted 26 proposed revisions of various rules governing railway signal systems. The revisions were necessary due to technological improvements and developments which have occurred since the rules were established in 1950.—Rules, Standards, and Instructions for Signal Systems, 329 I.C.C. 717 (735)*.

Section 26. [December 23, 1970] ***[49 U.S.C. §26a]*** **Exemption of Certain Compensation of Employees From Withholding For Income Tax Purposes.**— [Added by P. L. 91-569, 84 Stat. 1500.] (a) No part of the compensation paid by any railroad, express company, or sleeping car company, subject to the provisions of this part, to an employee (1) who performs his regularly assigned duties as such an employee on a locomotive, car, or other track-borne vehicle in more than one State, or (2) who is engaged principally in maintaining roadways, signals, communications, and structures or in operating motor trucks out of railroad terminals in more than one State, shall be withheld for income tax purposes pursuant to the laws of any State or subdivision thereof other than the State or subdivision wherein more than 50 per centum of the compensation paid by the carrier to such employee is earned: *Provided, however,* That if the employee did not earn more than 50 per centum of his compensation from said carrier in any one State or any subdivision thereof during the preceding calendar year, then withholding shall be required only for the State or subdivision of the employee's residence, as shown on the employment records of any such carrier; nor shall any such carrier file any information return or other report for income tax purposes with respect to such compensation with any State or subdivision thereof other than such State or subdivision of residence and the State or subdivision for which the withholding of such tax has been required under this subsection.

(b)(1) For the purposes of subsection (a)(1), an employee shall be deemed to have earned more than 50 per centum of his compensation in any State or subdivision thereof in which the mileage traveled by him in such State or subdivision is more than 50 per centum of the total mileage traveled by him in the calendar year while so employed.

(2) For the purposes of subsection (a)(2), an employee shall be deemed to have earned more than 50 per centum of his compensation in any State or subdivision thereof in which the time worked by him in such State or subdivision is more than 50 per centum of the total time worked by him in the calendar year while so employed.

(c) For the purposes of this section the term 'State' also means the District of Columbia; and the term 'compensation' shall mean all moneys received for service rendered by an employee, as defined in subsection (a) in the performance of his duties and shall include wages and salary. (Act of Dec. 23, 1970, Public Law 91-569, §1, 84 Stat. 1500.)

Section 27 ***[49 U.S.C. 26b].*** **(1) Office of rail public counsel; establishment.**—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 51.]

Sec. 27. (1) There shall be established, within 60 days after the date of enactment of this section, a new independent office affiliated with the Commission to be known as the Office of Rail Public Counsel. The Office of Rail Public Counsel shall function continuously pursuant to this section and other applicable Federal laws.

Section 27. (2) Director, appointment and term.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 51.]

(2)(a) The Office of Rail Public Counsel shall be administered by a Director. The Director shall be appointed by the President, by and with the advice and consent of the Senate.

(b) The term of office of the Director shall be 4 years. He shall be responsible for the discharge of the functions and duties of the Office of Rail Public Counsel. He shall be appointed and compensated, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, classification, and General Schedule pay rates, at a rate not in excess of the maximum rate for GS-18 of the General Schedule under section 5332 of such title.

Section 27. (3) Employees; reports.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 51.]

(3) The Director is authorized to appoint, fix the compensation, and assign the duties of employees of such Office and to procure temporary and intermitten services to the same extent as is authorized under section 3109 of title 5, United States Code. Each bureau, office, or other entity of the Commission and each department, agency, and instrumentality of the

executive branch of the Federal Government and each independent regulatory agency of the United States is authorized to provide the Office of Rail Public Counsel with such information and data as it requests. The Director is authorized to enter into, without regard to section 3709 of the Revised Statutes of the United States (41 U.S.C. 5), such contracts, leases, cooperative agreements, or other transactions as may be necessary in the conduct of his functions and duties. The Director shall submit a monthly report on the activities of the Office of Rail Public Counsel to the Chairman of the Commission, and the Commission, in its annual report to the Congress, shall evaluate and make recommendations with respect to such Office and its activities, accomplishments, and shortcomings.

Section 27. (4) Duties of office.—[Added by the act of Feb 5, 1976, Pub. L. 94-210, §304, 90 Stat. 51.]

(4) In addition to any other duties and responsibilities prescribed by law, the Office of Rail Public Counsel—

(a) shall have standing to become a party to any proceeding, formal or informal, which is pending or initiated before the Commission and which involves a common carrier by railroad subject to this part;

(b) may petition the Commission for the initiation of proceedings on any matter within the jurisdiction of the Commission which involves a common carrier by railroad subject to this part;

(c) may seek judicial review of any Commission action on any matter involving a common carrier by railroad subject to this part, to the extent such review is authorized by law for any person and on the same basis;

(d) shall solicit, study, evaluate, and present before the Commission, in any proceeding, formal or informal, the views of those communities and users of rail service affected by proceedings initiated by or pending before the Commission, whenever the Director determines, for whatever reason (such as size or location), that such community or user of rail service might not otherwise be adequately represented before the Commission in the course of such proceedings; and

(e) shall evaluate and represent, before the Commission and before other Federal agencies when their policies and activities significantly affect rail transportation matters subject to the jurisdiction of the Commission, and shall by other means assist the constructive representation of, the public interest in safe, efficient, reliable, and economical rail transportation services.

In the performance of its duties under this paragraph, the Office of Rail Public Counsel shall assist the Commission in the development of a public interest record in proceedings before the Commission.

Section 27. (5) Budget requests.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 52.]

(5) The budget requests and budget estimates of the Office of Rail Public Counsel shall be submitted concurrently to the Congress and to the President.

Section 27. (6) Appropriations.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §304, 90 Stat. 52.]

(6) There are authorized to be appropriated to the Office of Rail Public Counsel for the purpose of carrying out the provisions of this section not to exceed $500,000 for the fiscal year ending June 30, 1976, not to exceed $500,000 for the fiscal year transition period ending September 30, 1976, and not to exceed $2,000,000 for the fiscal year ending September 30, 1977.

Section 28 *[49 U.S.C. 26c].* (1) discriminatory tax treatment of transportation property; prohibited acts.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §306, 90 Stat. 54.]

Sec. 28. (1) Notwithstanding the provisions of section 202(b), any action described in this subsection is declared to constitute an unreasonable and unjust discrimination against, and an undue burden on, interstate commerce. It is unlawful for a State, a political subdivision of a State, or a governmental entity or person acting on behalf of such State or subdivision to commit any of the following prohibited acts:

(a) The assessment (but only to the extent of any portion based on excessive values as hereinafter described), for purposes of a property tax levied by any taxing district, of transportation property at a value which bears a higher ratio to the true market value of such transportation property than the ratio which the assessed value of all other commercial and industrial property in the same assessment jurisdiction bears to the true market value of all such other commercial and industrial property.

(b) The levy or collection of any tax on an assessment which is unlawful under subdivision (a).

(c) The levy or collection of any ad valorem property tax on transportation property at a tax rate higher than the Tax rate generally applicable to commercial and industrial property in the same assessment jurisdiction.

(d) The imposition of any other tax which results in discriminatory treatment of a common carrier by railroad subject to this part.

Section 28. (2) District court's jurisdiction to enforce; exceptions. —[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §306, 90 Stat. 54.]

(2) Notwithstanding any provision of section 1341 of title 28, United States Code, or of the constitution or laws of any State, the district courts of the United States shall have jurisdiction, without regard to amount in controversy or citizenship of the parties, to grant such mandatory or prohibitive injunctive relief, interim equitable relief, and declaratory judgments as may be necessary to prevent, restrain, or terminate any acts in violation of this section, except that—

(a) such jurisdiction shall not be exclusive of the jurisdiction which any Federal or State court may have in the absence of this subsection;

(b) the provisions of this section shall not become effective until 3 years after the date of enactment of this section;

(c) no relief may be granted under this section unless the ratio of assessed value to true market value, with respect to transportation property, exceeds by at least 5 per centum the ratio of assessed value to true market value, with respect to all other commercial and industrial property in the same assessment jurisdiction;

(d) the burden of proof with respect to the determination of assessed value and true market value shall be that declared by the applicable State law; and

(e) in the event that the ratio of the assessed value of all other commercial and industrial property in the assessment jurisdiction to the true market value of all such other commercial and industrial property cannot be established through the random-sampling method known as a sales assessment ratio study (conducted in accordance with statistical principles applicable to such studies) to the satisfaction of the court hearing the complaint that transportation property has been or is being assessed or taxed in contravention of the provisions of this section, then the court shall hold unlawful an assessment of such transportation property at a value which bears a higher ratio to the true market value of such transportation property than the assessed value of all other property in the assessment jurisdiction in which is included such taxing district and subject to a property tax levy bears to the true market value of all such other property, and the collection of any ad valorem property tax on such transportation property at a tax rate higher than the tax rate generally applicable to taxable property in the taxing district.

Section 28. (3) Definitions.—[Added by the act of Feb. 5, 1976, Pub. L. 94-210, §306, 90 Stat. 55.]

(3) As used in this section, the term—

(a) 'assessment' means valuation for purposes of a property tax levied by any taxing district;

(b) 'assessment jurisdiction' means a geographical area, such as a State or a county, city, township, or special purpose district within such State which is a unit for purposes of determining the assessed value of property for ad valorem taxation;

(c) 'commercial and industrial property' or 'all other commercial and industrial property' means all property, real or personal, other than transportation property and land used primarily for agricultural purposes or primarily for the purpose of growing timber, which is devoted to a commercial or industrial use and which is subject to a property tax levy; and

(d) 'transportation property' means transportation property, as defined in regulations of the Commission, which is owned or used by a common carrier by railroad subject to this part or which is owned by the National Railroad Passenger Corporation.

Section 29. [49 U.S.C. §29].—Short Title.—[Unchanged; Formerly section 26 but was redesignated as section 27 by Public Law 91-569, Dec. 23, 1970, 84 Stat. 1499; subsequently redesignated as section 29 by Public Law 94-210, Feb. 5, 1976, §304, 90 Stat. 51. See vol. 11, p. 9339]

PART II

INTERSTATE COMMERCE ACT; MOTOR CARRIERS

Chapter 8, Title 49, U.S. Code

Section 201. [§*301 U.S.C.*] Short Title.—[Unchanged. See vol. 11, p. 9339.]

Section 202. (a) [§*302 U.S.C.]* Application of provisions.—[Unchanged. See vol. 11, p. 9339.]

Notes of Decisions

Volume 15—p. 12158; Volume 16—p. 12795; Volume 17—p. 13489; Volume 19—p. 15453; Volume 21—p. 17005.

2. Construction and interpretation.—[Vols. 15, 16, 19, 21].—Rocks, debris, and other commodities obtained from excavations and demolition of buildings, for which common carrier authority is sought, is held not to be "property" for purposes of Commission jurisdiction. Contractors, who are obligated to dispose of such debris, claim no beneficial ownership thereof, do not select destination to which it is moved, and apparently relinquish any nominal ownership thereof at the time it is loaded and removed from the demolition or excavation site; thus, considered commodity does not have the attributes commonly associated with the word property. Authority is not required; application dismissed.—Joray Trucking Corp. Common Carrier Application, 99 M.C.C. 109 (110).

Section 202. (b) [§*302(b) U.S.C.*] State regulation of intrastate commerce.—(1) Unchanged except by insertion of a comma and "except as provided in section 226A," immediately after "Nothing in this part" by act of Dec. 23, 1970, Public Law 91-569, 84 Stat. 1500. [See vol. 11, p. 9340, vol. 21, p. 17006.]

(2) * * * As so certified, such standards, or amendments thereto, shall be promulgated forthwith by the Commission and shall become effective five years from the date of such promulgation: *Provided,* That (1) any amendments of such standards, which are determined by the national organization of the State commissions and promulgated by the Commission prior to the initial effective date of such standards shall become effective on such initial effective date; and (2) after such standards become effective initially, any amendments of such standards, which are subsequently determined by the national organization of the State commissions, shall become effective at the time of promulgation or at such other time, subsequent to promulgation by the Commission, as may be determined by such organization. * * * [The second sentence was amended beginning with "Provided" by Pub. Law 93-496, 88 Stat. 1532, October 28, 1974. See vol. 21, p. 17006.]

Notes of Decisions

Volume 9—p. 7862; par.(c)]; Volume 11—p. 9340; Volume 2—p. 10343; Volume 13—p. 11043; Volume 14—p. 11562; Volume 15—p. 12159; Volume 16—p. 12797; Volume 17—p. 13490; Volume 18—p. 14242; Volume 19—p. 15453; Volume 21—p. 17007.

5. State regulation and taxation.—[Vols. 9, 11-19, 21].—In action to enjoin State Commission and officials from interfering with plaintiff's shipments of grain from Kansas origins to Kansas City, Kans., where the grain is stored until sold and shipped to out-of-State points, when the Motor Carrier Act was enacted Congress intended federal regulation and the specific exceptions to applicability of that Act to occupy the entire field. Thus, since trucks hauling nonmanufactured agricultural products are exempt by §203(b6) from regulation, except as to safety of operation and equipment, that statutory exception must prevail against the Kansas commission's attempt to regulate interstate grain shipments. Plaintiffs' grain shipments are exempt from State tariff regulations by reason of federal pre-emption of the field; defendants are permanently enjoined from enforcing any State tariff regulation against hauling by truck, between Kansas points, shipments of unprocessed grain that are moving in interstate commerce.—Farmers Union Coop. Marketing Ass'n v. State Corp. Commission of Kans., 302 F. Supp. 778 (783-5).

Approval of minimum gallonage requirements, including intrastate as well as interstate quantities, for application of respondents' weekly rates on gasoline and fuel oils transported in one vehicle for one shipper from Sparks, Nev., to points within 200 miles thereof does not involve regulation of intrastate commerce. The reduced rates could not be justified without full utilization of the vehicle, and not enough interstate gallonage is available for round-the-clock operation; although there is only one weekly tender, it is made up of numerous prospective single shipments, and tariff provisions for multiple deliveries do not cover commingling of interstate and intrastate shipments. Consideration of intrastate gallonage in determining the minimum required for application of the interstate rates could not possibly impinge on the State's power to regulate intrastate commerce, even if the State should prohibit volume rates.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (546-7).

While respondents' revenues and expenses might be affected if Nevada chose to regulate intrastate rates, the power of a State to prescribe a level of rates or minima on intrastate traffic different from that applicable to interstate traffic is always present, and its existence does not preclude the Commission from approving interstate rates on the same level as intrastate rates; nor does such approval open the door to possible discrimination as results of any changes in the intrastate rates.— Id., p. 547.

20. Operation in intrastate commerce.—[Vols. 9, 11, 19, 21].—See also Anchorage Transit System, Inc. case, §203(b), n. 40; Morgan Drive-Away v. Mid-States Trailer Transport case, §203(a)(10), n. 5 *Intrastate.*

Evidence of record overwhelmingly supports the Commission's conclusion that plaintiff's operations from Pittsburgh to Philadelphia, Pa., areas over authorized interstate routes tacked at points in New Jersey are not logical and normal interstate operations, but artificial, contrived arrangements employed by it to avoid the rightful jurisdiction of the Pennsylvania commission over considered traffic. [218 F. Supp. 133, aff'd 377 US 217, distinguished.] The Commission's authority is predicated on the recognized federal power over interstate commerce; and where there is no such commerce, there can be no legitimate use of federal rights granted for that purpose. Accordingly, the Commission was warranted in concluding that to permit such operations as plaintiff was openly conducting would illegally impinge upon Pennsylvania's exclusive jurisdiction over intrastate shipments. Complaint dismissed.—Leonard Express, Inc. v. United States, 298 F. Supp. 556 (558-60)*.

Regardless of the intention of any passenger to continue or complete an interstate journey, defendant passenger carrier operating wholly within a single state, selling no through tickets, and having no common arrangements with connecting out-of-state carriers, is not engaged in transportation in interstate or foreign commerce; and the out-of-state casinos' chartering defendant's buses is of no particular significance since only intrastate transportation was requested and engaged in.—Greyhound Lines, Inc. v. Allen, 99 M.C.C. 1 (4).

Defendant's transportation of cash letters from a bank at Marlboro, Mass., to the United States Post Office at Boston, Mass., for ultimate delivery by the Post Office Department to a bank at New York, N.Y., is not interstate transportation subject to Part II of the Act. The transportation of mail is a government monopoly and those performing service for the Post Office Department are governmental instrumentalities engaged in the performance of a public function. This decision is predicated on the unique status enjoyed by the Post Office and in no way conflicts with other Commission decisions dealing with operations within a single state in connection with pipelines, aircraft, or ocean liners. The distinction is clear; in those cases connecting movement was performed by a fore-hire carrier; however, to the extent conclusions and findings of 51 MCC 263 are inconsistent with decision herein, they are overruled.—Armored Carrier Corp. v. Security Dispatch, Linc., 102 M.C.C. 246 (247-9).

Where traffic originating at and destined to points in the same State is transported over routes partly in the State, and partly in another State, such routing not being circuitous, and is required to permit processing of essentially less-than-truckload traffic through a principal terminal, and where such traffic represents only a small portion of the total, defendant is found not to have been engaged in unlawful operation.—Pennsylvania P.U.C. v. Arrow Carrier Corp., 113 M.C.C. 213 (220)

Regulations of the Commission

33 FR 19250, Dec. 25, 1968, Part 1023; Standards for Registration of Certificates and Permits with States, §1023.34 Execution for application for cab card, revised; §1023.36 Form of cab card, amended; and §1023.101 Reproduction of form, revised; all effective concurrently with original standards promulgated which is 5 years from Dec. 14. 1966.

35 FR 2524, Feb. 4, 1970, Part 1023: Standards for Registration of Certificates and Permits with States, §1023.13 Filing of application, and §1023.33 Forms and execution of application for identification stamps or number, last sentence in each section revised, effectively concurrently with original standards promulgated which is 5 years from Dec. 14, 1966.

36 FR 3417, Feb. 24, 1971, Part 1023: Standards for Registration of Certificates and Permits with States, §1023.32, §1023.33, §1023.35, and §1023.40 amended in accordance with resolution of the National Association of Regulatory Utility Commissioners, as certified to the Commission, effective concurrently with original standards promulgated which is 5 years from Dec. 14, 1966.

38 FR 33772, Dec. 7, 1963, Part 1023: Standards for Registration of Certificates and Permits with States, §§1023.32, 1023.33, 1023.40, 1023.105, and 1023.106 amended in accordance with resolution of the NARUC, as certified to the Commission, effective Dec. 27, 1973.

Section 202. (c) [§*302 (c) U.S.C.*] Incidental transportation exempt under part II.—[Unchanged. See vol. 11, p. 9342.]

Notes of Decisions

Volume 11—p. 9343; Volume 12—p. 10344; Volume 13—p. 11043; Volume 14—p. 11562; Volume 15—p. 12159; Volume 16—p. 12798; Volume 17—p. 13491; Volume 18—p. 14244; Volume 19—p. 15455; Volume 21—p. 17011.

5. In general.—[Vols. 11-19, 21].—The scope of rule 4 of Ex Parte No. MC-19, 17 MCC 467, 505-506 [49 CFR 176.4], which requires motor common carriers to publish separate charges for each accessorial service rendered in connection with household goods movements where the line-haul transportation is performed by a motor carrier, is limited to areas over which the Commission has requisite jurisdiction within the purview of the exemptions prescribed under sections 202(c) (1) and (2) and 203(b) (8) of the Act. Considered within the context of the instant situation involving local services performed for exempt freight forwarders, such local operations would not be exempt under these sections of the Act.—United Van Lines, Inc., v. Calif. Household Goods, 329 I.C.C. 742 (748).

For motor carriage of articles to be mailed see Armored Carrier Corp. v. Security Dispatch, Inc. case, §202(b), n. 20.

See also Bartz Cartage Co., Inc.—Common Carrier Application case, §203(b), n. 55; Behnken Truck Service, Inc., Ext.—Exbarge Traffic case, §203(a) (10), n. 5.

Express Agency: [Vols. 11, 13, 16, 19, 21].—See Barton Truck Line, Inc. v. Railway Exp. Agency, Inc., case, §1(6), n. 663.

Foreign commerce: [Vol. 18].—Although the Commission in its 69th annual report urged Congress to amend §202(c) to make the terminal area exemption available for pickup and delivery at international boundary municipalities such as Detroit, Mich., and Windsor, Ontario, Congress took no action on that recommendation, and it appeared settled that performance of such service between United States border points and contiguous or adjacent foreign municipalities was nonexempt, until decision in 154 F. Supp. 431 made the contiguous-municipalities exemption of §203(b8) available to the U.S. segment of transportation between a U.S. municipality and a contiguous municipality in a foreign country. However, the §202(c) exemption has no effect on Detroit-Windsor traffic because the Commission has generally limited a line-haul carrier's terminal area at a given service point to the commercial zone thereof, and Windsor is not within a carrier's terminal area at Detroit, because of its exclusion from definition of the Detroit commercial zone in 48 MCC 95; and the Commission has no power to determine the commercial zone of a foreign municipality such as Windsor or the terminal areas of carriers serving such a point.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (716)*.

Forwarders: [Vols. 11, 12, 19, 21].—While partial exemption of §202(c)(2) exempts motor carrier operations conducted for a regulated freight forwarded within its terminal area, that exemption clearly is not available to motor carriers rendering local transfer, collection, or delivery service for forwarders of used household goods operating under the §402(b)(2) exemption, because those forwarders are not subject to part IV of the Act.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (340)*.

Under the statute, pickup and delivery service for a freight forwarder is exempt only if the forwarder is subject to part IV of the Act; thus, local carriers and warehousemen must hold authority for pickup and delivery service for exempt forwarders of used household goods because, whether such motor carrier operations are within or outside a commercial zone, the §202(c)(2) terminal area exemption is not available to carriers serving a forwarder—who holds no part IV authority—in the movement of through shipments in interstate or foreign commerce.—District Moving and Storage, Inc., Common Carrier Application, 107 M.C.C. 896 (899).

See also New Orleans Shippers Assn. case, §203(b), n. 55.

Jurisdiction of the Commission: [Vol. 16].—Protestant's contention that radioactive waste is without the attributes of term "property" as used in the Act and is thus exempt from Commission's regulation is predicated on the finding in 99 MCC 109. However, as "property" is not defined in the Act and is used therein in its broadest sense, Commission cannot exclude from its economic regulation the transportation of such dangerous materials, although destined for burial.—Long Island Nuclear Service Corp. Com. Car. Applic., 110 M.C.C. 398 (403-4)*.

Issues raised by protestant City of Chicago as to whether the vehicular ramps and roadways within O'Hare International Airport are public or private and the nature and extent of Chicago's proprietary rights relative to O'Hare arise under State law and are beyond the scope of the Commission's jurisdiction.—Tri-State Coach Lines, Com. Car. Applic., 110 M.C.C. 601 (609).

Passenger carriers: [Vol. 16, 19, 21].—See Salem Transp. Co. v. United States, §208(a), n. 30.

Terminal areas: [Vols. 12, 13, 16-19, 21].—Applicant's driveaway automobile service is not within the "terminal area" exemption, which exempts from economic regulation only motor carrier collection, deliver and transfer services performed for, and within the terminal area of, motor carriers, railroads, and freight forwarders subject to the Act. Applicant's operations, regardless of their limited scope, are not performed for line-haul carriers subject to the Act, and, therefore, are not exempt.—Drive Away Transport, Inc., Com. Car. Application, 99 M.C.C. 75 (79).

A motor carrier holding authority to serve a point in connection with line-haul operations is not authorized to conduct terminal operations within such city or its commercial zone. In 74 MCC 593, the Commission concluded that applicant required specific authority to serve Seattle and points within the commercial zone thereof even though that carrier was authorized to serve Seattle as a terminal and intermediate point pursuant to various certificates.—Service Transfer, Inc., Contract Carrier Application, 115 M.C.C. 29 (34).

Water Carriers: [Vols. 11, 12, 15, 19, 21].—Section 202(c) partially exempts from regulation motor-vehicle operations performed for a water carrier in the performance within terminal area of bona fide transfer, collection, or delivery services, as distinguished from line-haul transportation. While, in some instances, the scope of a water carrier's terminal area may be properly identified by the naming of particular points, an accompanying description of outer limits of the entire terminal area is necessary when numerous points are involved. Moreover, as stated in 82 MCC 395, any service that goes beyond a single homogenous community identifiable as such by the factors of commercial and industrial integrity, population and business density, and some reasonably compact limit to geographical scope of community affairs and influence, is intercommunity in character and cannot be considered as a bona fide terminal-area transfer, collection, and delivery service.—Atchison, T. & S.F. Ry. Co. v. Sea-Land Service, Inc., 103 M.C.C. 184 (191-2).

In light thereof, evidence affords no basis for finding that Los Angeles terminal area points served by defendant are located beyond permissive limits of the terminal area which it may claim as incidental to its water-carrier operations at Los Angeles Harbor. As to the San Francisco/Oakland Bay area, however, while evidence shows that entire San Francisco Bay area is tending to become integrated commercially, industrially, and culturally with the two port cities, the entire surrounding land area does not now qualify as a single water-carrier terminal area within the rationale in 82 MCC 395. Accordingly, defendant's current San Francisco Bay terminal area is described as bounded generally by San Rafael, San Pablo, Hayward, and San Mateo and, also, as including all points within commercial zones of Oakland, San Francisco, Alameda, and Richmond, in addition to those points located on the west side of the Bay between Redwood City and San Francisco commercial zone.—Id., pp. 192-3.

Section 203. (a)(1)-(9). [§*303 U.S.C.*].—[Unchanged. See vol. 9, p. 7867; vol. 15, p. 12161.]

Amendments, see footnotes, vol. 14, p. 12161.

Notes of Decisions

§203(a) (9): Volume 9—p. 7867; Volume 11—p. 9345; Volume 13—p. 11044; Volume 21—p. 17016.

5. In general.—[Vols. 9, 11, 13].—Commission reiterated its findings in 93 MCC 579, that State agencies may be admitted to the status of carrier. Protestants' contention that such agencies are not "persons" within the meaning of the Act is refuted by the inclusionary purpose of §203(a)(1).—Mercer County Improvement Authority, Transferee, 109 M.C.C. 795 (798)*.

Section 203. (a)(10) [§*303(a)(10) U.S.C.*] Interstate commerce.—[Unchanged. See vol. 9, p. 7869; vol. 19, p. 15459.]

Notes of Decisions

Volume 9—p. 7869; Volume 11—p. 9346; Volume 12—p. 10346; Volume 13—p. 11044; Volume 14—p. 11564; Volume 15—p. 12161; Volume 16—p. 12802; Volume 17—p. 13493; Volume 18—p. 14247; Volume 19—p. 15459; Volume 21—p. 17017.

5. Interstate commerce defined.—Vols. 9, 11-19, 21].—Since the statutory definition of interstate commerce does not specifically enumerate shipments partly by motor carrier and partly by pipeline, it might be argued that the use by Congress of words "partly by motor vehicle and partly by rail, express, or water" means that such combination shipments are limited to those enumerated and, thus, do not include pipeline. However, the restrictive doctrine of the "last antecedent" is not without limitation; and one such limitation, stated in 277 US 189, is that where a statute contains a grant of power enumerating certain things that may be done and also a general grant which, standing alone, includes those things and more, the general grant may be given full effect if the context shows that the enumeration was not intended to be exclusive.—Galbreath v. Gulf Oil Corp., 294 F. Supp. 817 (823-4).

In the "by rail, express, or water" enumeration, Congress may have intended not to limit its grant of jurisdiction over interstate commerce, but rather to illustrate its breadth, particularly since it is preceded by the word "whether"; the cases hold, without exception, that words following "whether" do not restrict the meaning to any following terms but, rather, they enlarge it. Therefore (in action seeking overtime compensation pursuant to Fair Labor Standards Act), the court concludes that interstate commerce as defined in the Motor Carrier Act includes all combination motor carrier shipments as long as they continue their interstate movement, whether partly by rail, express, water, or pipline.—Id., p. 824.

And when petroleum products moved from oil company's Texas refinery, through its pipeline and Atlanta terminal, to its service stations in Georgia whose requirements were known to (or controlled by) the oil company before shipment was ever made, there was a "practical continuity of movement", within 317 US 564, so that the goods were moving in "commerce" not merely to the terminal but all the way to ultimate retail outlets. "Commerce" is not a technical legal conception, but a practical one, drawn from the course of business; and since the halt of movement at the Atlanta terminal was merely a convenient intermediate stop in the process of delivery at ultimate destinations, the goods continued to move in interstate commerce until they were delivered at the final destination. Action dismissed.—Id., pp. 822-3, 825.

When grain was shipped by local cooperatives from Kansas origins to agricultural marketing cooperative at Kansas City, Kans., which local cooperatives owned, where it was stored in elevators until sold and shipped to points outside the State, the truck movement between Kansas points was "interstate commerce" notwithstanding fact that local cooperatives remained owners of, and could divert, the shipments until the grain was graded and purchased by the marketing cooperative. Goods ultimately destined for shipment to another State acquire the character of interstate commerce when the journey begins, even though there is a temporary break in transit in the State of origin; accordingly, considered truck shipment to marketing association's elevators was the commencement of movement to ultimate destinations outside Kansas and the halt in transit at Kansas City was an incident to the interstate movement.—Farmers Union Coop. Marketing Ass'n v. State Corp. Commission of Kans., 302 F. Supp. 778 (783-4). .

When evidence in Commission proceeding under review showed that motion picture film is shipped from out-state points to Indianapolis with the understanding and intent that it would not remain there, but would be sent on to exhibitors in Indiana "in a movement as continuous as practicable," the Commission properly concluded that plaintiff's transportation of the film beyond Indianapolis is a part of the continuous movement for which appropriate authority is required. Apply the principle used in determining whether a shipment is one in interstate commerce, as stated by the court in 195 F. 2d 252, it is clear from the facts of record that, notwithstanding temporary stoppages at distributor's exchange in Indianapolis, the producer intends its film prints to move beyond that point to contracting exhibitors in Indiana, and that the transportation from the exchange to the exhibitors, and thereafter between exhibitors, is part of a continuous movement in interstate commerce. Therefore, the Commission decision is affirmed.—Feature Film Service, Inc. v. United States, 349 F. Supp. 191 (196-7)*.

Less-than-truckload shipments between points in the same state but which traverse roads in an adjoining state are in interstate commerce, irregardless of shipper's intent that shipment should be of an intrastate character only.—Applicable Rates on Intrastate Shipments, 335 I.C.C. 472 (475)*.

Applicant's proposed service of transporting freight between Chicago, Ill., and Milwaukee, Wis., without any motor operation on its part outside the commercial zone of Chicago, is not in interstate commerce, even though an employee of applicant would travel as a train passenger carrying the involved freight as baggage in same-day round trip messenger service for shippers in the cities, because applicant's proposal neither entrails interstate motor movements nor arrangements with other carriers for continuous transportation.—Cannonball, Inc., Common Carrier Application, 99 M.C.C. 326 (328, 329).

Proposed transportation of ex-barge bulk shipments of dry fertilizers and fertilizer materials from river ports in Illinois to other points in Illinois is not shown to be transportation in interstate or foreign commerce subject to regulation. Citing 298 US 170, the Commission said that although concerned traffic had been moved by barge to these ports from points outside Illinois, it had moved under the exemption of §303(b) of the Act and, therefore, proposed intrastate movement is not subject to Commission regulation. In addition, the Commission cites from 94 MCC 541, "that not all commerce is transportation; that transportation begins only when merchandise has been placed in the possession of a carrier subject to economic regulation; * * * ".—Behnken Truck Service, Inc., Ext.—Ext.—Exbarge Traffic, 103 M.C.C. 787 (792-7).

See also Greyhound Lines, Inc., v. Allen case, §202(b), n. 20.

Between State points: [Vols. 11, 19, 21].—The transportation of pipe from defendant carrier's storage-in-transit yards in Texas,. to an interior point in Texas, the movement into Texas being performed by a for-hire rail or water carrier or by a defendant, is in interstate commerce. The pipe is transported by defendants pursuant to the terms of the storage-in-transit arrangement provided in the tariff duly filed with the Commission; all the pipe does in fact move beyond the transit point, and it is the intent of the shipper that the movement from origin to ultimate destination constitutes one continuous movement. Merely because the exact identity of a particular consumer is unknown is of no moment, nor does the fact that the pipe may be sold by the shipper while in the possession of a defendant carrier change its interstate characteristics.—Railroad Comm. of Texas v. Oil Field Haulers Assn., 325 I.C.C. 697 (704-06).

Although considered movement of household goods is solely between intrastate points, it is part of an interstate movement. Applicant packs outbound shipments and moves them to one of its warehouses for weighing where they are held for dispatch instructions from household goods forwarders, who arrange for futher motor and water transportation; inbound shipments arrive at applicant's warehouse or nearest railhead and, after arranging a delivery date (which sometimes requires temporary storage) applicant delivers and unpacks the shipments. The pause at applicant's warehouse is, at best, temporary; it does not break the continuity, and therefore does not change character of the commerce. Considered movements are in interstate commerce.—Nilson Extension—South Carolina, 95 M.C.C. 326 (327, 329).

Changing traffic patterns and shifting methods of distribution of cement often require coordinated rail-motor service composed of rail movement to storage silos or facilities at locations convenient to marketing areas, e.g., construction sites of dams, highways, air fields or missle facilities, and distribution therefrom by motor carriers. At the time of initial rail movement, shipments, for the most part, are not allocated to any particular consignee; the cement comes to rest at the storage point and a separate motor movement then delivers it to the ultimate consignee. In other instances, there are times when a separate shipment moving by rail is transferred directly to motor vehicles; that type service lends itself best to coordinated rail-motor movement. In considering applications for authority to provide such motor service, it is unnecessary to determine which types of motor carriage are in interstate and which are in intrastate commerce.

However, since §303(b) is an exemption providing generally that transportation by a water carrier of a commodity in bulk is not subject to the Act, it follows that when bulk cement is transported by water to a storage point within a state and later moved from that point to a market area within same state by motor carrier, the cement is not placed in the possession of a carrier subject to economic regulation until the start of the motor movement; thus, the motor transportation, considered separately, would be intrastate commerce within a single State. Therefore, application for interstate authority for the motor segment of such a water-motor operation is denied.—Transport, Inc., Extension—Ex-Rail Cement, 96 M.C.C. 671 (676-7).

Defendant's routing and handling of traffic originating at and destined to points in Missouri through Kansas appears operationally reasonable, and absent evidence of bad faith on defendant's part, defendant cannot be found to have misused its interstate operating authority to mask an essentially intrastate operation. Fact that defendant holds no intrastate authority for certain of these movements should not of itself condemn what appears, as a result of out-of-state routing, to be ostensibly interstate movements, and lead to characterization of the traffic as intrastate.—Missouri Pub. Ser. Comm. v. Missouri Arkansas Transp. Co., 103 M.C.C. 641 (646-7).

Intent: [Vols. 11, 12, 21].—Whether nature of a shipment of goods is interstate, or otherwise, is to be determined by essential character of the movement, not by particular intention of the parties. From time of truck shipment of grain by local cooperatives from Kansas origins to marketing cooperative's elevators at Kansas City, Kans., until it was sold and shipped to out-of-State buyers, all activities in connection therewith were performed in furtherance of a clear intent that the grain would ultimately be delivered outside Kansas. Properly considered, question of intent of initiating shippers is not concerned with personal motivation of those shippers, but with their intent as respects movement of the grain in commerce; since original intent was to move the grain in interstate commerce, its storage and handling at Kansas City did not change interstate character of the truck movement to that point.—Farmers Union Coop. Marketing Ass'n v. State Corp. Commission of Kans., 302 F. Supp. 778 (784-5).

Essential character of interstate commerce is not affected by temporary storage in a warehouse pending intrastate delivery, if shipper's original intent is to make continuous through shipments from out-of-state origins to in-state destinations.—Petroleum Transit Co., Inc., Extension— Wilmington, N.C., 102 M.C.C. 380 (385).

Intrastate: [Vols. 11-13, 19, 21].—When oil company shipped petroleum products to its Muskegon, Mich., terminal on the basis of sophisticated estimates of customer needs and knew each customer who would be served by that shipment but, at time it moved from out-of-State origin, had not determined the specific quantity to be shipped to a given ultimate destination, tank truck movement thereof from the terminal to destinations in Michigan was not part of a continuous movement in "interstate commerce" as defined in the statute. While not used as a retail outlet, the terminal may be classified as a local marketing facility; the goods at the terminal were inventory-in-store for actual future orders from shipper's customers, and no final transportation arrangements were made until after they were inventoried at Muskegon; therefore, considered truck movement from the terminal to ultimate destinations was wholly intrastate in character. And appellant's contention that its mere possession of interstate authority to transport petroleum products (that had not been used for several years) exempts its drivers from maximum hours provisions of the Fair Labor Standards Act, is without merit.—Baird v. Wagoner Transp. Co., 425 F. 2d 407 (411-13). [Not arising hereunder.]

Movement by defendants from or to Hammond, Ind. (in the Chicago, Ill., commercial zone), of mobile-home trailers, which moved from or to a point in Illinois beyond the limits of the Chicago commercial zone, is movement in interstate commerce, and since such movement is not within the partial exemption under §203(b8), it requires appropriate authority from the Commission. However, following decision in *Motor Transportation of Property Within a Single State* [94 MCC 541], defendants' transportation of mobile home trailers, brought by private carriage across the Illinois-Wisconsin State line and tendered to defendants for delivery within Illinois, is not transportation in interstate commerce subject to economic regulation under part II of the Act.—Morgan Drive-Away v. Mid-States Trailer Transport, 105 M.C.C. 896 (899-900).

For motor carriage of articles to be mailed see Armored Carrier Corp. v. Security Dispatch, Inc. case, §202(b), n. 20.

For interstate routing to evade state regulation, see Pennsylvania Public Utility Comm. case, §202(b), n. 20.

Section 203. (a)(11) [*§303(a)(11) U.S.C.*] Foreign commerce defined.—[Unchanged. See vol. 17, p. 13494.]

Amendments, see footnotes, vol. 15, p. 12162-3; vol. 17, p. 13494.

Notes of Decisions

Volume 11—p. 9348; Volume 12—p. 10347; Volume 13—p. 11045; Volume 14—p. 11564; Volume 17—p. 13494; Volume 18—p. 14251; Volume 19—p. 15461; Volume 21—p. 17021.

5. Foreign Commerce, in general.—[Vols. 11-19, 17-19, 21].—The essential character of the commerce determines whether a shipment is interstate (foreign) or intrastate in nature, and the question of when or to whom title passes is not controlling. One of the most important factors in determining the essential character is the fixed and persisting transportation intent of the shipper, or the one for whose benefit the shipment is made; and while there must be continuity of movement before the transportation of imported articles from the port to interior destinations in the same State is part of the movement in foreign commerce, such continuity is not interrupted by a temporary pause in the carriage of the goods. The mere fact that the goods are placed in a warehouse for a short period preceding the final movement does not change the character of the commerce from foreign to intrastate. —Iron and Steel Articles, Wilmington to Points in N.C., 323 I.C.C. 740 (742)*.

Respondent's transportation of imported iron and steel articles from Wilmington, N.C., to interior North Carolina points for shipper operating a chain of hardware stores is in foreign commerce subject to the Act.

After the articles ordered by shipper from foreign suppliers are unloaded at the port and stacked in transit sheds of the State Ports Authority, shipper pays the sight draft, receives title to the goods, and allots the merchandise to its stores according to their needs. Pursuant to shipper's instructions, respondent then transports the shipments to destinations, the shipments from the port being almost invariably made within the 5 days' free time allowed by the ports authority. Under the tests set forth by the courts and the Commission there is thus an essential continuity of movement between the shipments to Wilmington and the subsequent movements to the interior points.

Shipper's whole plan is to stock its stores with the articles it orders from overseas; the ultimate destinations are known when it places its purchase orders, in fact having been ascertained prior to arrival of the goods at Wilmington. That a particular article ordered for one store may be diverted to another does not affect the character of the commerce; no single step in the operation is an end in itself, but each is undertaken as a means to accomplishment of the controlling purpose. According to shipper's original intention, Wilmington is but an intermediate stopping point; and though, until shipper pays the sight draft and takes title, the supplier could dispose of the goods otherwise, such action is not contemplated by the parties and is no more than a bare possibility which does not determine the essential nature of the movements.—Id., p. 742-4.

The definition of "foreign commerce" is as broad under part II of the Act as it is under part I (§1(1), as amended by the Transportation Act of 1920) and it plainly embraces nonadjacent as well as adjacent foreign countries.—International Joint Rates and Through Routes, 337 I.C.C. 625 (630).

Automobiles moving in applicant's driveaway service between points in the New York City commercial zone are usually the subject of a prior or subsequent movement by water from or to a United States territory or possession or a foreign country. And, as the driveaway transportation is clearly part of a continuous movement, part of which is in foreign commerce, to or from a point beyone the commercial zone, the driveaway transportation itself is in foreign commerce and subject to the Commission's regulatory jurisdiction.—Drive Away Auto Transport, Inc., Com. Car. Application, 99 M.C.C. 75 (78).

Traffic moving under fixed and persisting intent of shipper to engage in commerce from United States origins to Canadian destinations, or vice versa, is in foreign commerce pursuant to part II of the Act and any portion thereof which traverses the United States is subject to full economic regulation by the Commission. Therefore, carrier applicant, who utilized United States highways in transporting traffic originating at or destined to points in the United States, is subject to Commission regulation, although it transported the traffic only between points in Canada and had no joint or through arrangements with any United States carrier.—D.S. Scott Transport Ltd. Extension—General Commodities, 100 M.C.C. 1 (3, 6).

Since supporting shipper imports sufficient urea to meet monthly contract quotas plus needs of its fertilizer plant, and since except for one account it selects motor carrier and pays transportation charges, it has the fixed intent to make continuous through shipments from Trinidad to specific North Carolina consignees. The only uncertain element is the ultimate delivery date for each account; thus, essential character of concerned commerce is not affected by temporary warehouse storage, which is entirely "within concept of continuity of movement in shipper's urea importing business". Therefore, shipments of imported urea from Wilmington to other points in N.C. are part of continuing movement in foreign commerce for which appropriate authority is required.—Petroleum Transit Co., Inc., Extension—Wilmington, N.C., 102 M.C.C. 380 (385-6).

Respondents' operations between California and Mexico are obviously operations in foreign commerce and authority to conduct such service must be obtained from the Commission; these operations are not authorized by respondents' state certificates registered under §206(a)(7) of the Act since operations in interstate or foreign commerce at any point outside of a single state or the United States may not be conducted by motor carriers operating under this section. —Imperial Truck Lines, Inc.—Common

Carrier Application, 106 M.C.C. 741 (750-51).

It has long been established that before a motor carrier certificate or permit be issued by this Commission to a Canadian-domiciled applicant authorizing operation in foreign commerce, between points in the International Boundary line between the United States and Canada, on the one hand, and, on the other, points in the United States, which operation is in fact a portion of the carrier's proposed through operation extending from and to points in Canada, the applicant shall first submit a sworn statement that it has obtained appropriate complimentary authority from the proper Canadian authorities. Nevertheless, at the time this Commission makes its initial determination as to whether the application to it for authority to operate within the United States should be granted, a Canadian-domicile applicant need only show that it is diligently seeking complimentary authority from the proper Canadian authorities, if such be required for that part of the proposed operation to be conducted over Canadian soil, and that an appropriate application is then pending. Denial of applicant's first application for Canadian authority complementary to that sought from this Commission, is of no moment so long as there exists a (second) pending application for such authority since insincerity of prosecution of the pending application cannot be presumed.—Yelle Contract Carrier Application, 115 M.C.C. 408 (413)*.

Section 203. (a)(12) [*§303(a)(12) U.S.C.*] Highway defined.—[Unchanged. See vol. 9, p. 7871.]

Notes of Decisions

Volume 17—p. 13495; Volume 19—p. 15461.

3. Highway, "way," defined.—[Vols. 17, 19].—A "highway" is defined in the statute to mean "the roads, highways, streets, and ways in any State". "Way" is defined in *Webster's International Dictionary* (1961) as a "thoroughfare used or designed for traveling or transportation from place to place"; and the same authority defines a "waterway" as a "way or route for traffic by water". Therefore, there being no other means of surface travel in the southeastern Alaska panhandle, it is concluded that the water route of the Alaska State Ferry System is a "way" and a "route" within the meaning of the statute.—Alaska Motor Coaches, Inc., Extension Southeast Alaska, 98 M.C.C. 642 (645).

Section 203. (a)(13) [*§303(a)(13) U.S.C.*] Motor vehicle defined.—[Unchanged. See vol. 11, p. 9349.]

Amendments, see footnotes, vol. 9, p. 7871, vol. 11, p. 9349.

Notes of Decisions

Volume 13—p. 11045; Volume 15—p. 12163; Volume 17—p. 13495; Volume 19—p. 15462; Volume 21—p. 17022.

Section 203. (a)(14) [*§303(a)(14) U.S.C.*] Common carrier defined.—[Unchanged. See vol. 11, p. 9349.]

Notes of Decision

Volume 9—p. 7871; Volume 11—p. 9349; Volume 12—p. 10347; Volume 13—p. 11046; Volume 14—p. 11564; Volume 15—p. 12163; Volume 16—p. 12803; Volume 17—p. 13495; Volume 18—p. 14252; Volume 19—p. 15462; Volume 21—p. 17023.

1. Common carrier defined.—[Vols. 9, 11-19, 21].—Proposed transportation of cash letters between banks is common carriage when applicant will offer service to more than a limited number of shippers, and when the commodity it seeks to transport is not of such intrinsic value that it need be guarded or transported in special vehicles.—Continental Dispatch, Inc., Common Carrier Application, 95 M.C.C. 483 (488-9).

Common carriers can legally dedicate equipment to the exclusive use of shippers they are serving, so long as they are willing to provide a similar service to their other shippers.—Kerr Contract Carriage, Inc., Contr. Car. Applic., 115 M.C.C. 862 (870).

See also National Trailer Convoy, Inc. v. United States case, §203(a)(19), n. 2.

Dealers in commodities: [Vols. 9, 11, 12].—See T & T Supply, Inc.—Investigation of Operations case, §203(c), n. 5.

Furnishing vehicles and drivers: [Vol. 12].—The fact that applicant does furnish drivers along with its leased equipment, and is engaged in motor common carriage rather than a simple leasing arrangement, is borne out by the following illustrations: before a vehicle is furnished to a group, applicant pre-determines that there are a sufficient number of persons in the group who are licensed and who are willing to drive the vehicle. Each potential driver (not a single driver in each group) must be acceptable to applicant's insurance carrier. If a vacancy occurs in a group, it is applicant (not the members of a specific group) which furnishes a replacement who incidentally may be or must be willing to drive the vehicle. In the initial trip or trips, applicant's representative drives the vehicle for demonstration purposes.—Monarch Associates, Inc., Common Carrier Application, 107 M.C.C. 277 (282)*.

Holding out: [Vols. 11, 12, 21].—In defining motor carriers for regulatory purposes, the Act distinguishes between common and contract carriers. Statutory definition of a common carrier stresses not what a person does but what he holds himself out to do; holding out is important because, even if performance does not match the promise it may have an adverse effect on "existing carriers upon whom the bulk of shippers must depend for access to market" which underlines the requirements for a certificate or permit. [340 F. 2d 820.] Plaintiff in action to recover undercharges does not fit within statutory definition of a contract carrier because it holds itself out to the public as a common carrier operating under its interstate certificate; and even if it were acting as a contract carrier, claimed undercharges are based on its common carrier tariff rate and, since it holds no permit, it would not be entitled to recover undercharges for illegal carriage.—Mars Express, Inc. v. David Masnik, Inc., 401 F. 2d 891 (893).

Number of shippers served: [Vols. 11, 19, 21].— See E. A. Gallagher & Sons v. Cleveland General Transport case, and Gray Line Scenic Tours, Inc. case §203(a) (15), n. 1.

Pickup and delivery: [Vols. 9, 11, 12, 14].—Normal pickup and delivery service encompasses any and all loading and unloading functions, including the performance of all types of related extra services without regard to the nature or type of freight involved or to which particular carrier handles same in line-haul movement, which one carrier employee (usually the driver) can perform in accordance with directions from the consignor or consignee, as the case may be, during the allotted free time.

The preceding definition governs those situations in which the carriers are obligated by a tariff-imposed duty to load and unload. Except where otherwise provided in a tariff, shippers and receivers of freight in truckload lots shall have free use of a carrier employee during the published free-time period, and the applicable line-haul rates properly should include compensation for such use as described in the preceding definition.—Segregation of Freight, New Eng. & Mid. Atl. States, 340 I.C.C. 306 (321-2)*.

Special service: [Vols. 11, 12, 19, 21].—Publication of weekly rates on gasoline and fuel oils, applicable when stated minimum gallonages are tendered for transportation by one carrier in one vehicle in 7 consecutive days, is not repugnant to the common-carrier definition in §203(a)(14) merely because it contemplates a highly personalized and specialized service, with dedication of equipment over a 7-day period to exclusive use of a particular shipper. The only limitation by definition on transportation which common carriers may provide is that it be held out to the public generally, and there is no statutory restriction on the manner in which a common carrier may perform its physical operations, provided the same service is made available to all who may desire to use it. Considered operations are not beyond scope of respondents' operating authority as common carriers.—Weekly Rates on Petroleum Products—from Sparks, Nev., 322 I.C.C. 541 (548).

A rail passenger with baggage, consisting entirely of the involved freight, performing messenger service between Chicago, Ill., and Milwaukee, Wis., is not operating as a common carrier by motor vehicle so as to require a certificate under §206, because such service involves neither interstate motor movements nor arrangements with other carriers for continuous transportation.—Cannonball, Inc., Common Carrier Application, 99 M.C.C. 326 (329).

Ib. —Operation by lease or other arrangement.—[Vols. 9, 11-19, 21].—Applicant's operations in assembling groups of commuters and furnishing vehicles to such groups constitutes for-hire, common carriage transportation rather than a genuine lease of equipment since applicant controls the transportation and assumes the characteristic burdens thereof. By its lease applicant controls where the vehicles are garaged, the persons, and the number of persons who will occupy the automobile; the use of the equipment; the number of days it will be used; and, to a lesser degree, the number of miles the equipment will be operated. Control is further asserted by applicant in its approval of the available drivers. The multiple drivers rather than a single driver assist rather than hamper applicant's control of the equipment. Lastly, the right to cancel the lease during its term compels acquiescence to applicant's control by the "recipients".—Monarch Associates, Inc., Common Carrier Application, 107 M.C.C. 277 (281-82)*.

Section 203. (a)(15) [§*303(a)(15) U.S.C.*] Contract carrier defined.—[Unchanged. See vol. 11, p. 9360; vol. 18, p. 14254.]

Notes of Decisions

Volume 9—p. 7882; Volume 11—p. 9360; Volume 12—p. 10350; Volume 13—p. 11047; Volume 14—p. 11566; Volume 15—p. 12165; Volume 16—p. 12804; Volume 17—p. 13496; Volume 18—p. 14254; Volume 19—p. 15467; Volume 21—p. 17027.

1. Contract carrier defined.—[Vols. 9, 11-19, 21].—See also Continental Contract Carrier Corp. v. United States case, §209(a)(1), n. 25; H. Prang Trucking Co., Inc.—Purchase—Hyer Trucking case, §5(2), n. 48 *Discontinued operations;* Gypsum Haulage, Inc., Extension case, §209(a)(1), n. 5; Luper Transportation Co.—Petition for Amendment case, §209(a)(1), n. 5; Mars Express, Inc. v. David Masnik, Inc. case §203(a)(14), n. 1 *Holding out;* National Trailer Convoy, Inc., v. United States case §203(a)(19), n. 1; T.I. McCormack Trucking Co., Inc., Ext. case, §209(a)(1), n. 25.

When plaintiff (applicant in Commission proceeding) proposed to serve 1 shipper under a continuing contract, and to assign motor vehicles to shipper's exclusive use, Commission's finding that plaintiff proposed to operate as a contract carrier was a proper determination under §203(a)(15).—Transportation Unlimited of California, Inc. v. United States, 300 F. Supp. 474 (475)*.

In ruling on applications for contract carrier permits, Commission must first determine whether applicant satisfies definition of a contract carrier under §203(a)(15) and then determine whether applicant satisfies the five criteria of §209(b) for determining consistency of an application with public interest and the national transportation policy. In denying plaintiff's application, Commission failed to consider, or failed to rule upon, question whether plaintiff satisfied §203(a)(15) by virtue of having entered into a continuing contract with one person for transportation of property. District court, therefore, reverses Commission's denial of plaintiff's application and remands the application to the Commission for further consideration.—Keller Trucking, Inc. v. United States, 374 F. Supp. 848 (849)*.

The finding of the joint board that proposed service would enable applicant to serve more than a limited number of shippers, thus resulting in his operations becoming those of a motor common carrier is affirmed. While applicant excepted to this finding, it offered at the same time to accept a grant of common carrier authority, and filed an application to convert all his outstanding permits to certificates. Apparently, he has by these actions conceded the appropriateness of the joint board's recommendation in this regard. The type of service applicant provides, the number of shippers he serves, and his obvious intention to expand the scope of his operations still further make it clear that the joint board reached the correct conclusion.—Gorski Extension, 95 M.C.C. 514 (517).

Service proposed is that of a contract carrier when applicant will serve only a single shipper through assignment of equipment, obtained from owner-operators under long-term leases, for continuing period of time to shipper's exclusive use. Applicant holds contract carrier authority to transport commodities not related to those being considered for another shipper and, if its pending applications were granted, it would be authorized to serve four shippers; and that applicant would use its equipment to transport exempt commodities as a backhaul does not affect exclusiveness of assignment of vehicles to supporting shipper for the outbound movement.—Continental Contract Carrier Extension, 96 M.C.C. 321 (326-7); Owens Contract Carrier Application, 95 M.C.C. 586 (587, 589)*.

Inasmuch as applicant proposes to serve only the one supporting shipper and will dedicate its equipment exclusively to shipper's service, proposed service is that of a contract carrier as defined by the Act.—Minnesota Trucking, Inc., 96 M.C.C. 330 (332); Jamerson Contract Carrier Application, 110 M.C.C. 469 (474); James Enterprises, Inc., Contract Carrier Application, 115 M.C.C. 44 (46)*.

It is clear that applicant contract carrier's present management had changed its operations from those of a contract carrier to those of a common carrier when, although its operations had previously been found to be within §203(a)(15, as amended, and it had only one active contract at time of change in management, within a year thereafter its activities had increased so that it was providing service under 16 active contracts, 8 of which had been in effect less than 6 months; also, applicant no longer assigned equipment to shippers' exclusive use, some of its contracts involved only a single shipment, and others were for periods as short as 2 weeks or 1 month. While there is no arbitrary number of contracts at which services of a contract carrier necessarily become common carriage, the abrupt and aggressive manner in which it so radically expanded its operations leaves no doubt that it had abandoned its contract carriage and has been operating unlawfully as a common carrier.—Contractors Cargo Co.—Extension, 96 M.C.C. 306 (315-7)*.

Applicant's return movements, after performing proposed service, would consist of shipments for supporting shipper's account, exempt commodities and occasional movements, as a contract carrier, for another shipper. Latter movements for another shipper, representing less than 1 percent of the total return movements, preclude a finding that applicant assigns vehicles to its contract shipper's exclusive use with meaning of §203(a)(15); however, since applicant's service is designed to meet shipper's "distinct need", the alternative criteria of the statute are met. Proposed service is that of a contract carrier.—Western Lines, Inc., Extension—Kansas City, Kans., 96 M.C.C. 657 (661, 665-6).

Applicant's proposed operations fall within the statutory meaning of contract carrier, in as much as its operations are specifically designed to serve a limited number of shippers, which have a "distinct need" for a service, unique and specialized in nature.—Eddlemen Bros. Contract Carrier Application, 98 M.C.C. 681 (690)*.

In exercising its right to select the shippers whom it will serve, a motor contract carrier, if it is not to breach the line of demarcation between contract and common carriage, must affirmatively stand aloof from the lure of a public calling by restricting its service to one or a limited number of persons. While a "limited number of persons" is, of course, a relative term to which significance is imparted only when carrier's overall operations are considered, it cannot be stretched so far as to embrace all of defendant's 49 custcmers. By adding to the number of shippers served and by making its services available to virtually any shipper willing to contract with it, defendant has exceeded the scope of contract carriage contemplated by statute and has been operating unlawfully as a motor common carrier.—E. A. Gallagher & Sons v. Cleveland General Transport, 98 M.C.C. 356 (359).

Trip-leasing of the same vehicles to other carriers for a return movement would not necessarily affect applicant's "exclusive assignment of vehicles"; statutory standard requires only that shipper be given exclusive use of sufficent vehicles to handle its shipments without admixture with shipments of others. Requirement that vehicles be exclusively assigned to shipper for a "continuing period of time" relates to that period covered by the contract with shipper; it does not preclude trip-leasing on return movements; nor does such trip-leasing preclude a carrier from meeting the statutory standard. Contract carrier's ability to transport "exempt" commodities in backhaul movements without necessarily impairing an assignment of equipment has heretofore been recognized; and, under the circumstances, the distinction previously made between backhauls conducted under motor-carrier authority (common or contract) and backhauls of exempt commodities should no longer be followed. In the future, when such matters arise they will be considered on a case-by-case basis in accordance with evidence submitted.—Owens Contract Carrier Application, 100 M.C.C. 34 (41-3)*' Aubrey Extension—Milwaukee and New York City, 100 M.C.C. 652 (656-7).

Although at original proceeding applicant had continuing contracts with 27 individual shippers, it now has such contracts with only 7 shippers and therefore, the primary issue is whether or not applicant is serving a "limited number" of shippers within the statutory meaning. The term "limited number" is a relative term without any particular significance until compared to overall operation of applicant; and in such light applicant's present service is restricted to a "limited number" of shippers because its service is devoted to one industry, it operates under one permit in the northeastern section of the United States, and it provides a similar kind of service to all its customers. And while prior proceeding relied on 91 MCC 691 (from which instant proceeding is distinguishable) in determining that applicant's operations did not possess high degree of specialization generally required of contract carriers, the above circumstances counterbalance that decision. Granted.—Cardinale Trucking Corp. Extension—Centreville, N.J., 100 M.C.C. 126 (129-31)*.

Protestants' contention that applicant's operations are not within the statutory definition of contract carriage is incorrect; a class of shippers, such as the farmer employers herein, constitutes a limited number of shippers as contemplated by the terms of §203(a)(15) and considered transportation of migrant workers, proceeding to or returning from employment in agriculture, is contract carriage.—Bracero Transp. Co., Inc., Extension—Migrant Workers, 100 M.C.C. 359 (364).

Applicant's proposal to transport house trailers by assigning motor vehicles for a continuing period of time to the exclusive use of five supporting shippers is within the purview of contract carriage. Furthermore, its proposals to condition used trailers for over-the-road movement, connect electrical and plumbing facilities, and expand and set up "expando" home trailers at their destination are part of the proposed transportation service; these specialized services are "incidental" to the movement of house trailers from one place to another and as such must be considered in disposition of the application.—Griffin Mobile Home Transporting Co. Contract Carrier Application, 103 M.C.C. 482 (500-1)*.

After resolving the status of supporting shipper, applicant's proposal to assign its vehicles for a continuing period of time to the exclusive use of this shipper is found to be that of contract carriage within meaning of §203(a)(15). Shipper is a market support distribution facility which maintains an inventory of general merchandise for 49 manufacturers at its warehouse facilities and daily distributes about 300,000 pounds of this merchandise to customers of these manufacturers; citing 96 MCC 87, the Commission found that shipper is a bailee of the goods it distributes for the manufacturers thereof and that it is a shipper qualified to enter into a bona fide contract with applicant.—Commerce Consultants Corp. Contract Car. Application, 103 M.C.C. 725 (727-8). [But see dissent].

Applying the "limited number of persons" test which (the same as in contract carriage of freight) requires determination of the persons that actually would be served. Applicant's proposed transportation of passengers, on individual or group bases, over regular and irregular routes between certain California points and Nevada locations of the six supporting "contracting" casinos, is not within the scope of contract carriage as defined in the statute. While the casinos might benefit from the proposed service through increased business, the prospective patrons apparently represent true users to which service would be held out because, ultimately, they would pay the transportation charges. Also, an indeterminate and changing number of patrons would be solicited for each trip from the general public. In the factual situation presented, substance of applicant's proposal is in the nature of a motor common, rather than contract, carrier service.—Gray Line Scenic Tours, Inc., Contract Carrier Application, 103 M.C.C. 807 (810-13)*.

While there is no question that applicant proposes to enter into a contract with North Central and will assign at least one vehicle to North Central's exclusive use, the problem is whether North Central, a common carrier by air operating under authority issued by the Civil Aeronautics Board (C.A.B.), qualifies as a person within the meaning of §203(a)(15) with whom applicant may contract. Citing 96 MCC 87 and 103 MCC 725, the Commission concludes that when North Central takes into its possession the goods tendered to it for transportation, it becomes a bailee for hire of such goods and, therefore, qualifies as a shipper. No decision, however, was reached as to whether an airline may be a "shipper" as to applicant and a "carrier" as to the shipping public; this decision was left to the legal and policy discretion of the C.A.B.—Howard Contract Carrier Application, 105 M.C.C. 354 (357).

Applicant's proposed service fails to qualify as that of a contract carrier under §203(a)(15); although the matter of rates is one factor considered, albeit an important factor, the desire by shipper for and ability of applicant to provide service at a lower cost cannot form the sole basis for a finding of "distinct need." Additionally, even if applicant could meet the "distinct need" requirement, the application would have to be denied, because applicant has active contracts with 11 shippers; this number exceeds the "limited number of persons" contract carriers may generally serve.—Liberty Transfer Co., Inc., Extension—Specified Points, 105 M.C.C. 437 (441-2)*.

In light of the criteria of 100 MCC 34, applicant's proposal for the "assignment" of vehicles to two shippers for the northbound movement of roofing materials and grocery items and for the assignment of the same vehicles to two other shippers for the southbound movement of wood shingles, shakes and ridges, can properly be considered as that of a contract carrier within the "exclusive use" alternative requirement of §203(a)(15), because applicant's proposal is adequate to meet each shipper's "present and reasonably foreseeable needs". The proposed movement neither materially affects the quality of applicant's service nor the necessary assignment of vehicles; additionally, it is significant that each shipper acknowledges fact that vehicles are to be assigned for one-way movement only.—Smack, Inc., Contract Carrier Application Segundo, 105 M.C.C. 524 (525-8)*.

On remand the Commission decides that applicant's proposal to assign nine tractor trailer combinations to the exclusive use of supporting shipper satisfies the "exclusive use" statutory contract carrier definition; that applicant might also use these vehicles for transportation of exempt commodities does not defeat this exclusive assignment. In addition, since applicant's proposal comes within the first alternative definition of contract carriage, it is not necessary to discuss whether the proposed service is also designed to meet supporting shipper's distinct need.—Mid-West Truck Lines, Ltd., Contract Carrier Application, 105 M.C.C. 822 (824)*.

Proposed operations do not meet the statutory definition of contract carriage; applicant does not propose to assign any specific vehicles to the exclusive use of supporting shipper, since the availability of equipment would be dependent upon the regulated movement of dairy products and fresh and frozen meats from St. Paul and points in Wisconsin to points near the proposed origin points. Although the assignment of vehicles to the exclusive use of a shipper does not necessarily preclude a regulated movement on a backhaul, applicant's mere permitting shipper to use those unassigned vehicles which may be available in the area does not amount to "assignment of equipment to the exclusive use of a shipper." Moreover, proposed irregular-route operations featuring only multiple pickups and deliveries is nondistinctive and, standing alone, fails to qualify as contract carriage under the alternative definition thereof.—Frigid Food Express, Inc., Ext.—Floor Covering, 106 M.C.C. 259 (262).

After considering cases involving exempt backhauls and intrastate operations by regulated contract carriers, the Commission concluded that, inasmuch as applicant seeks only to obtain permanent authority with respect to service for one shipper, its exempt operations under §203(b)(8) of the act (for 40 contract shippers solely within the New York commercial zone) do not preclude consideration of the proposed operation relative to the "limited number of persons" provision of §203(a)(15).—J & J Trucking Co., Inc., Contract Carrier Application, 106 M.C.C. 345 (347)*.

The term "limited number" is a relative term without any particular significance unless compared to the overall operations of an applicant. Factors to be considered are: different types of commodities transported, number of permits under which carrier operates, territory in which operation is conducted, similarity in services that carrier performs under its effective continuing contracts, and degree of specialization required by nature of shippers' business. These applicable standards are not such that they will always yield a definite maximum (or minimum) number of shippers that must be constant and unchanging. Such governing criteria recognize that, as a practical matter, there must be some flexibility in the number of shippers that may be served at a given time by a contract carrier, and that it is often the pattern of a carrier's operations and holding out of services that is determinative of its status. Therefore, Commission must decide what constitutes a "limited number" of persons to be served based on facts of the case.—Frost Trucking Co., Inc., Ext.—Phila., Pa., 110 M.C.C. 203 (207-8)*.

Applicant is a motor common carrier providing transportation of cash letters for banks and banking institutions. It seeks a permit authorizing the same operations it is now performing under its common carrier authority. In 102 MCC 411 Commission found that cash letter transportation was contract carriage because it provides for a limited number of shippers, is highly specialized and held out only to a defined class of shippers, and is designed to meet the distinct needs of each individual customer. Applicant's proposed operations meet the second test of §203(a)(15) and therefore fall within the definition of a contract carrier by motor vehicle.—Bankers Dispatch Corp. Conversion Application, 100 M.C.C. 294 (304-5).

Section 203(a)(15) defines a contract carrier by motor vehicle as one which transports passengers or property in interstate or foreign commerce, for compensation, under continuing contracts with one person or a limited number of persons for the furnishing or transportation services either (a) through assignment of motor vehicles for a continuing period of time to exclusive use of each person served or (b) designed to meet the distinct need of each individual customer. It is well established that compliance with either of these two tests will establish applicant's proposal as one for contract carriage. Commission disagrees with the examiner's conclusion that applicant's tariff restriction against circuity will render dedication of equipment remote as some transportation will be permitted even under the most severe interpretation of said restriction. Applicant's proposed service is that of a contract carrier.—Art Quiring Contract Carrier Application, 110 M.C.C. 480 (484).

Precedent-making decisions over the last several years have firmly established the previously unstated but tacitly acknowledged principle that the designation of a property carrier service as a bona fide regular-route operation as opposed to an irregular- route operation (see 47 MCC 23) should ordinarily apply only to those instances where the involved carrier is or will be authorized to transport general commodities with or without exceptions, or a large number of diverse commodities rather than a limited range of specified commodities. Vast majority of contract carriers carry specified commodities and provide specialized service which, like carriage of specified commodities, tend definitely to negative any regular-route operations.—Motor Service on Interstate Highways—Passengers, 110 M.C.C. 514 (544-45).

Since transporters of specified commodities and contract carriers cannot today ordinarily be classified appropriately as bona fide regular-route operators, the property carrier superhighway rules, which relate only to regular-route operators, should not be made applicable to such carriers. Consistent with the foregoing, the property carrier deviation rules adopted herein are limited in like manner so as to exclude consideration of contract carriers and transporters of specified commodities under the provisions therein which pertain exclusively to regular-route operations.—Id., p. 545.

Proposed operations found to be contract carriage as applicant has reduced the number of shippers it serves from 14 to 6 thus adhering to the criterion of "limited number" of shippers required for contract carrier status. Applicant serves only shippers of certain indicated commodities in the Middle Atlantic area and provides all shippers a typical "house carrier" service. Application granted but applicant is admonished that inclusion of an additional shipper will be carefully scrutinized.—C & R Trucking Co., Ext.—Winslow, N.J., 112 M.C.C. 336 (338-9).

Proposed operations by applicant found to be contract carriage as applicant proposes to provide a service peculiarly tailored to supporting shippers' demonstrated needs. Although this is the seventh shipper served by applicant, which number approaches the maximum permitted (see 91 MCC 691), such fact does not alter applicant's contract carrier status. However, applicant is hereby admonished that the inclusion of an additional shipper may result in a finding that applicant holds itself out to serve the general public.—P-N-J Kornacker, Inc., Extension—Malt Beverages, 112 M.C.C. 580 (586)*.

The special dimensions of applicant's equipment, as well as the recessed rollers in each vehicle, meet shippers' distinct needs for efficient and economical loading and unloading as well as relatively damage-free transportation and therefore represent service of a motor contract carrier.—Fairchild General Freight, Ext.—Fiberboard Containers, 113 M.C.C. 598 (600)*.

Applicant's proposed operation was held to be one of contract carriage within purview of §203(a)(15) of the Act, and unregulated oceancarrier engaged in foreign commerce was found to be a person qualified to enter into a bona fide contract with applicant.—Service Transfer, Inc., Contract Carrier Application, 115 M.C.C. 29 (33).

Proposed operations for exempt shippers association with over 600 members found not to be transportation for "one person or a limited number of persons" and therefore, is held to be common carriage of general commodities rather than contract carriage. —C-Line, Inc., Extension—Precious Jewelry, 114 M.C.C. 226 (232).

Application for extended authority brought into question carrier's conformity to restriction of operation as contract carrier to a limited number of persons. In addition to standard criteria for defining this restriction, the historical manner in which the carrier's business has grown and developed was held to be a factor. The extension sought was granted, though it expands applicant's contracts to include 7 shippers; applicant admonished that attempts to enter into further contracts could result in reconsideration of its status as a contract carrier.—Prang Trucking Co., Inc., Ext.—New Brunswick, N.J., 117 M.C.C. 38 (44-45)*.

Refusal of authority in a prior application was based on applicant's failure to supply statements affirmatively establishing complete and conclusive divestiture of common control with other carriers, including those aspects of control related to ownership and common representation by the same counsel or association of counsel, in a manner consistent with the discussion and conclusions in the prior report. On supplying evidence of divestiture of controls and a statement of willingness to terminate its relationship with cocounsels, the Commission was satisfied that applicant was shown to be a separate entity which will be operated as a contract carrier serving a limited number of shippers independent of any affiliation with other carriers. Granted.—Interstate Contr. Car. Corp. Ext.—Confectionaries, 117 M.C.C. 396 (396-397, 399)*.

The mere movement of traffic from or to a person does not qualify him as the shipper controlling the movement. Any other interpretation would render meaningless the definition of contract carriage and place all existing contract carriers in competition with motor common carriers for any traffic that could be handled from or to a shipper's facilities. See also, §209(a)(1), n. 1.—Administrative Ruling No. 76, 117 M.C.C. 433 (442).

Citing 113 MCC 205, it was found that since (1) applicant's supporting shipper's only interest in the involved traffic was in providing connecting water service subject to FMC jurisdiction, and (2) the supporting shipper is engaged in serving the general public, it does not qualify as a supporting shipper under §203(a)(15) of the Act other than to transport the containers or trailers it supplies for the considered movement. The proposed motor transportation of loaded containers or trailers was found to be that of a common carrier as defined in the Act.—Service Transfer, Inc., Contract Carrier Application, 117 M.C.C. 506 (511-512).

The Commission is obliged to consider the total number of shippers served under contract, not only by applicant, but also by applicant's affiliated contract carriers, for the purpose of determining whether applicant meets the "limited number of persons" criterion of §203(a)(15) of the Act. Also, a pattern of rapid expansion of a contract carrier's operation must be viewed as a holding out of service inconsistent with the §203(a)(15) criteria.—Crete Car. Corp.—Maremount Contr.—Auto Parts, 117 M.C.C. 634 (637)*.

Applicant, a contract carrier, applied for extension of its authority to serve a broader geographical area serving 11 shippers; the services it now provides and proposed to provide are not unique and do not require a high degree of specialization. Considering applicant's rapid expansion of its operations since it first received its permit and its willingness to offer transportation to any shipper who would contract with it, its activities constitute a holding out of service to the public generally as might be expected from a common carrier. Therefore, even though devoted to only one industry, since applicant's service does not possess a high degree of specialization, the proposed expansion to 11 shippers places applicant in clear contravention of the terms of the Act, and places it in a position of serving more than a "limited number of persons"; consequently, it does not meet the statutory definition of a contract carrier by motor vehicle; permit denied.—Id., pp. 209-10; Genova Transport, Inc., Ext.—Plastic Articles, 118 M.C.C. 160 (166-7)*.

Section 203. (a)(16) [*§303(a)(16) U.S.C.*] Motor carrier defined.—[Unchanged. See vol. 9, p. 7885.]

Notes of Decisions

Volume 11—p. 9363; Volume 12—p. 10352; Volume 13—p. 11048; Volume 14—p. 11566; Volume 15—p. 12166; Volume 16—p. 12805; Volume 19—p. 15473; Volume 21—p. 17037.

Section 203. (a)(17) [*§303(a)(17 U.S.C.*] Private carrier defined.—[Unchanged. See vol. 9, p. 7885.]

Notes of Decisions

Volume 9—p. 7885; Volume 11—p. 9363; Volume 12—p. 10352; Volume 13—p. 11049; Volume 14—p. 11567; Volume 15—p. 12166; Volume 16—p. 12085; Volume 17—p. 13497; Volume 18—p. 14258; Volume 19—p. 15473; Volume 21—p. 17038.

5. Private carrier defined.—[Vols. 9, 11-19, 21].—See also §203(c), notes.

The Commission may properly look to substance of the arrangements underlying purported private carriage in determining whether for-hire transportation is actually performed under the guise of an equipment leasing plan; and such determination may be made by looking to who has the right to control the transportation or by looking to other factors. While respondent corporation's basic equipment rental agreement stipulates that shipper-lessee has complete direction and control of the leased equipment, and not all the drivers on respondent driver-registry's list are used in those leased vehicles, those considerations are not material in determining the issue in instant case. Record is clear that equipment lessor and the driver registry regularly cooperate to provide both vehicles and drivers to a substantial number of shippers and that, in addition to transferring the ordinary burdens of transportation to those respondents, the shippers also allow the transportation to be controlled by them; resultant transportation constitutes for-hire, not private, carriage. —Empire Truck U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (41).

Even if considered rock, debris and rubble (held not to be "property" for purposes of Commission jurisdiction) could be regarded as property, proposed transportation thereof from excavation and building demolition sites is not subject to Commission regulation under part II of the Act. Such debris has a negative value to, and is not purchased from, contractors who desire its removal; they are not concerned with any beneficial ownership thereof and, apparently, relinquish any nominal ownership when it is loaded and removed. Under facts presented, beneficial ownership in the debris, if there is such, rests in applicant and applicant would be transporting it in its behalf in the performance of a disposal service. Authority is not required for proposed operations; application dismissed.—Joray Trucking Corp. Common Carrier Application, 99 M.C.C. 109 (110-11).

Applicant's transportation of radioactive waste materials meets the definition of private carriage since applicant appears to have the beneficial ownership of the materials; in addition, applicant arranges for the storage and actual burial of the material, and since applicant's primary business is the rendition of a disposal service, its transportation of the radioactive contaminated waste is merely an incident of that service.—Long Island Nuclear Service Corp.—Common Carrier Application, 107 M.C.C. 885 (888-89).

Respondent shippers' transportation operations considered herein are determined to be bona fide private carriage exempt from economic regulation as they conform to the 2 criteria set forth in 368 US 370 (repeated herein) which require shippers to have the exclusive right and privilege of directing and controlling the transportation service and also assume in significant measure the characteristic burdens of the transportation business. Shippers' control of considered operations is established by the nature of agreements between all parties, manner in which they were entered into, and actual conduct of the challenged operations. Respondent shippers obtained suitable equipment and drivers by separate, unrelated arrangements to transport goods directly connected with respondents' primary nontransportation business. Such showing meets one criterion for considering involved operations to be private carriage. Respondent shippers established their assumption of characteristic burdens of transportation by application of a "test of substance" (see 92 MCC 728). Evidence of relationship between all parties, and shippers' responsibility for variable cost items, driver wages and dismissal, and use and maintenance of equipment show that respondents have assumed such burdens, which meets second criterion for considering involved operations to be bona fide private carriage.—Personnel Service, Inc.—Investigation, 110 M.C.C. 695 (704-11). (704-11).

Application of the "primary business" test as defined in §203(c) plainly shows that petitioner Church is a legitimate nontransportation enterprise. The nature of its functions makes it impossible for Church to avail itself of the options, herein stated, enabling business corporations to conform to part II of the Act. Having thus pierced the corporate veil, transportation activities of the Church are shown to be in furtherance of the Church mission and not for-hire service subject to regulation by this Commission. Because of the nature of petitioner's functions, the eleemosynary nature of the considered operation, and the probable economic consequences of a contrary finding, Commission holds that situation portrayed on this record may be treated as sui generis and that abundant justification is shown for treating involved Church affiliates as a single entity and operations on their behalf as private carriage in furtherance of a nontransportation enterprise.—Status of Certain Church Transportation, 112 M.C.C. 59 (62-3).

Transportation of antifreeze and related commodities by individual petitioners found to be private carriage as record shows that petitioners meet the two criteria for defining such carriage stated in 368 US 270, inasmuch as shipper exericses direct operational control over the involved transportation and also assumes the characteristic burdens of transportation, especially the financial risks of such operations. Fact that the shipper obtains both drivers and equipment from one source under one lease is not determinative of for-hire transportation and is effectively rebutted by a showing of shippers's control.—Ontario Company—Declaratory Order, 112 M.C.C. 211 (212-17).

See also Behnken Truck Service, Inc., Est.—Exbarge Traffic case, §203(a)(10), n. 5; Keller Industries, Inc.— Declaratory Order case, §203(c), n. 3.

Section 203. (a)(18) [§*303(a)(18) U.S.C.*] Broker defined.— [Unchanged. See vol. 9, p. 7887.]

Notes of Decisions

Volume 9—p. 7887; Volume 11—p. 9365; Volume 12—p. 10354; Volume 13—p. 11050; Volume 14—p. 11567; Volume 15—p. 12167; Volume 16—p. 12806; Volume 17—p. 13498; Volume 18—p. 14259; Volume 19—p. 15478; Volume 21—p. 17043.

1. **Broker defined.**—[Vols. 9, 11-19, 21].—The term "for compensation" must be read into the definition of broker; a broker provides its services "for compensation." Applicant's intent here is consistently to produce sufficient revenue from its brokerage activities to defray its total office expenses, to support its other nonrevenue produc-

ing activities, and to insure that it does not lose money; therefore, regardless of applicant's corporate status it proposes to conduct its brokerage operations within meaning of "for compensation" and must be licensed by the commission.—Automobile Club of R.I., Inc.—AAA Broker Application, 98 M.C.C. 540 (543).

Operations by defendant as a broker in arranging for the transportation of passengers at New York, N. Y., pursuant to a license limited territorially to that point, and as a purported "agent-employee" of affiliated motor carriers at points beyond the scope of the license, is found to be inconsistent. "Agent-employee of a carrier" within the meaning of the exclusion in §203(a)(18) of the Act is construed as virtually synonymous with "employee", and as requiring a continuity and character of service such that individual claiming status as such is part of the individual normal organization of the carrier served. When a carrier makes use of the facilities or personnel of a broker as its agent to promote, advance, or intercede in its arranging for charter tours, it would be an unusual situation where it could be claimed, with substantiation, that the broker is not engaged in brokerage operations by such intervention.—Manhattan Transit Co. v. Inter-City Tours, Inc., 113 M.C.C. 102 (108).

2. Construction and interpretation.—[Vols. 9, 11, 15].—See Passengers Transportalion in Special Operations case, §211(b), n. 30, for various types of brokers. See also Kerrville Tours, Inc., Broker Application case and T.N.M. & O. Tours, Inc. case, §211(b), n. 3.

Section 203. (a)(19) [§*303(a)(19) U.S.C.*] "Services" and "Transportation."—[Unchanged. See vol. 9, p. 7890.]

Notes of Decision

Volume 9—p. 7890; Volume 11—p. 9368; Volume 12—p. 10355; Volume 13—p. 11050; Volume 16—p. 12807; Volume 17—p. 13498; Volume 18—p. 14260; Volume 19—p. 15479; Volume 21—p. 17044.

1. Services and operations distinguished.—[Vols. 9, 11, 12, 19, 21].—The Commission, not the reviewing court, is charged with administration of the Act; and the delineation of what are transportation services is particularly within its competence and expertise. "Services" and "transportation" are defined by statute as including all vehicles and other facilities used in providing transportation or "in the performance of any service in connection therewith"; also, one of the prime purposes of the contract-carrier provisions is to provide services designed to meet distinct need of each individual customer, although the statute does not require that such services be necessary but rather that they be designed to meet individualized transportation needs. Services—in addition to over-the-road transportation of mobile homes—offered by applicant for a contract carrier permit meet all those tests in that, as a whole, they were designed with specific transportation needs of supporting shippers in mind; therefore, the Commission's finding that those services are transportation services within meaning of the statute is sustained.—National Trailer Convoy Inc. v. United States, 293 F. Supp. 630 (633-4)*.

2. Transportation defined.—[Vols. 9, 11-13, 16-19, 21].—In suit to set aside order granting authority in common carrier application proceeding, Commission finding that two services—in addition to line-haul movement of mobile homes—offered by applicant were "transportation services" within the Act and proper subjects for consideration, cannot be sustained when its sole rationale therefore was its decision in 103 MCC 482, a contract carrier application proceeding wherein transportation and nontransportation services were distinguished. In view of statutory distinction between common and contract carriers, i.e., proposed services of common carrier applicant must be "required by" public convenience and necessity whereas such services of contract carriers need not be "required," the Commission's reliance on 103 MCC 482 seems misplaced. Since the Commission failed to recognize statutory distinction between the two classes of carriers in determining that "transportation services" were involved, the order is set aside and the case remanded for further action consistent with the court's opinion.—National Trailer Convoy, Inc. v. United States, 293 F. Supp. 634 (636-7)*.

On reconsideration of application for contract carrier authority to transport house trailers, following remand in 227 F. Supp. 730, with instructions to distinguish between transportation and nontransportation services, an "incidental" to transportation standard is adopted, incidental meaning a minor adjunct to the prime matter, of lesser significance, but related and necessary to the complete effectuation of the transportation service. Thus, applicant's proposals to condition used trailers for over-the-road movement, connect electrical and plumbing facilities, and expand and set up "expando" home trailers at destination, are transportation services incidental to the movement of house trailers from one place to another; such services are, therefore, part of the total transportation service proposed and must be considered in disposition of the application.—Griffin Mobile Home Transporting Co. Contract Carrier Application, 103 M.C.C. 482 (498, 500-1)*.

On reconsideration, Commission found that applicant's provisions for winch service, air compressors to inflate flat tires, and repair or replacement of damaged trailer tires as needed, are necessary and incidental to line-haul transportation and are thus transportation services entitled to consideration in deciding if operating authority to transport housetrailers, in secondary movements, in truckaway service, should be granted.—Martin Trailer Toters, Inc., Common Carrier Application, 111 M.C.C. 841 (856-7)*.

Applicant seeks authority to transport liquid gilsonite sealer and its proposed service includes a spreading service performed from the same vehicle which performs the line-haul movement. Protestants contend that we cannot consider the spreading service, in passing upon the application, because it is a nontransportation service unrelated to the over-the-road transportation. Under §203(a)(19) of the Act the term transportation has a broader meaning than the mere carriage of persons and goods from place to place, since it embraces a variety of connected services as well. Thus, it includes services performed at origin points while a line-haul movement is in progress; and services performed at destination points, after a line-haul movement has been completed. Services which are necessary and incidental to the line-haul transportation come within the definition of transportation and services contemplated by §203(a)(19) of the Act. It is clear on this record that spreading the sealer on the surface is the most feasible means of accomplishing the delivery of this commodity. We see no reason to force shipper to make private arrangements for any other methods of delivery when applicant seeks to fulfill shipper's requirements by expeditiously providing the complete service shown to be needed.—W.S. Hatch Co. Extension—11 States 108 M.C.C. 853 (860, 862). (But see dissent).

The fact that protestants have chosen not to perform this spreading service does not prevent it from being a transportation service, for under the Act it is clear that transportation services can include those services which carriers are not legally obligated to perform as part of the line-haul movement. This does not mean, however, that we will certificate every applicant who proposes to render any additional service beyond the line-haul movement, for we are aware that some applicants might devise schemes to offer novel and unneeded services as a means of gaining entry into the business of for-hire motor transportation. Accordingly, before we will certificate an applicant proposing extra services beyond the line-haul transportation, we will satisfy ourselves that those services are necessary and incidental to the line-haul operation. The determination of what is a necessary and incidental service can vary with the facts of each particular case, so that we will be obliged to scrutinize each application on its own merits.—Id., p. 861.

Carrier's provision of mobile storage bins to shippers or receivers of cement is an "extra" or "accessorial" service requiring specific tariff or schedule provision therefor, and not an ordinary or normal incident of line-haul service.—Chemical Leaman, Matlack, and M. & M.—Investigation, 118 M.C.C. 238 (243).

Section 203. (a)(20)-(21) [§*303(a)(20)-(21) U.S.C.*] Interstate operation; Foreign operation.—[Unchanged. See vol. 9, p. 7893.]

Section 203. (a)(22), (23) [*§303(a)(22, 23) U.S.C.*] Migrant farm workers.— [Unchnaged. See vol. 17, p. 13499.]

Section 203. (b) [§*303(b) U.S.C.*] Vehicles excepted from operation of law.—[Unchanged. See vol. 21, p. 17046.]

Notes of Decisions

Volume 9—p. 7894; Volume 11—p. 9371; Volume 12—p. 10356; Volume 13—p. 11051; Volume 14—p. 11567; Volume 15—p. 12169; Volume 16—p. 12807; Volume 17—p. 13499; Volume 18—p. 14263; Volume 19—p. 15480; Volume 21—p. 17046.

2. Construction and interpretation.—[Vols. 12, 13, 15-19, 21].—In suit to enjoin and set aside Commission order holding that carriers of certain pre-cooked or cooked poultry commodities are not within the partial exemption of §203(b6), the legislative history of 1958 amendment thereto is convincing that Congress intended for cooked poultry to be an exempt commodity under the statute, as amended, and the court so holds. In reaching a conclusion contrary to the Commission, the court is not unmindful of deference due the agency's construction of a statute which it is charged with administering. But as the Commission admitted, the question of a statute's construction in light of its legislative history is one of law; and a reviewing court is not obliged to stand aside and rubber stamp its affirmance of an administrative interpretation that it finds is contrary to Congress' intent. Since material facts in instant case are undisputed, and the application of §203(b6) to them is conceptually a matter of law, remand to the Commission for further consideration is not necessary. The Commission's order is enjoined and set aside.—Gold Kist, Inc. v. United States, 339 F. Supp. 1249 (1254-5, 1256)*.

Commission found that railroads may substiture motor-for-rail service for transportation of commodities exempt from economic regulation under §203(b)(6) without obtaining special permission or relief from other rules and regulations. This applies where motor service is substituted for a part of the rail service; charges are based on published all-rail rates for the entire movement; commodities move on rail bills of lading between rail-served points and have prior or subsequent to the rail movement; railroads accept responsibility for lading; and schedules show the exact nature of service to be performed.—Substitution of Motor for Rail Serv. & Publ. of Rates, 341 I.C.C. 88 (96-102).

The language of §203(b)(5) is not so clear and unambiguous that it should not be subject to interpretation by the Commission. —Cache Valley Dairy Assn. Investigation of Operation, 96 M.C.C. 616 (619).

In enacting P.L. 90-433 referring to §203(b)(5) of part II of the Act dealing with the exemption from economic regulation accorded motor vehicles controlled and operated by agricultural cooperative associations or federations, although the Congressional amendment does not confer specific authority on the Commission to prescribe rules and regulations to implement the amendment, Congress recognized that proper administration of the amendment would require promulgation by the Commission of implementing rules and regulations. Thus the legislative history of P.L. 90-433 obligates the Commission to establish reasonable and necessary rules and regulations designed to implement its requirements.—Implementation of Public Law 90-433—Agricultural Cooperative Transportation Exemption, 108 M.C.C. 799 (804).

See also I.C.C. v. Milk Producers Marketing Co. case, §203(b), n. 45; United States v. Chartered Bus Service, Inc. case, §203(b), n. 32.

20. Casual, occasional, reciprocal transportation.—[Vols. 9, 11, 12, 15, 17-19, 21].—As held in 33 MCC 69, casual, occasional, or reciprocal transportation of passengers when sold, offered for sale, provided, furnished, or arranged for by a third party intermediary for compensation or as a regular occupation or business, is not within the §203(b9) exemption. Therefore, since applicant (engaged in assembling groups of passengers and leasing a vehicle to each group for the purpose of commuting to and from their place of employment) as a third party intermediary brings together the driver and the passengers for compensation, the §203(b9) exemption does not apply to those who drive its vehicles. Furthermore, as "repeat" drivers, it is doubtful that the drivers involved can otherwise qualify as casual or occasional transporters of passengers.—Monarch Associates, Inc., Common Carrier Application, 107 M.C.C. 277 (283)*.

25. Carriage of newspapers—[Vols. 9, 11, 12, 14, 15, 17].—Rolls of newspaper inserts printed in continuous lengths on one side only, which are to be printed on other side and cut for insertion in newspapers, found not to be "newspapers" and not embraced by exemption of §203(b) since they are not in a form ready to be brought into the hands of the public (see 71 F. Supp. 991).—Southern Express, Inc., Investigation of Operations, 113 M.C.C. 628 (631).

32. Transportation of school children.—[Vols. 9, 19, 21].—Issue presented in civil suit against bus company which transported college students through several states without having a certificate or permit to do so, and which contends all that transportation is exempt under §203(b)(1), is the statutory construction of "school children" and whether or not Congress intended that term to include college students; yet, legislative history of the Act and amendments provides no clue to Congress' intent, and a search into judicial interpretations of §203(b) reveals no statutory construction of the term "school children" by district or appellate courts. However, contemporaneous construction of the Act by the Commission is entitled to great weight and respect and should not be overturned by the courts unless it is arbitrary or clearly erroneous; and the Commission's construction of term "school children" in §203(b1), i.e., that it does not include persons attending a college or university, was not arbitrary or clearly erroneous. Thus, the transportation of college students not being within the exemption, the bus company was subject to civil forfeiture proceeding under §222(h); Commission motion for summary judgment, granted.—United States v. Chartered Bus Service, Inc., 329 F. Supp. 1073 (1074, 1076-7).

Only operations, which involve schoolbuses used regularly and exclusively for transportation of schoolchildren and their teachers in school-related activities, sponsored and supervised by school authorities, are exempt under this provision of the Act. And in deciding whether a trip is directly connected with school-related activities, the determinative factor should be the primary purpose of the trip itself; and neither practice of having parents underwrite the cost of such trip, nor presence of a reasonable number of parents on the bus, acting as chaperones, should defeat this exemption. However, to extent applicant uses vehicles which are not utilized exclusively as school buses, such operations are not exempt; fact

State of New Jersey prescribes different physical specifications for charter buses than for schoolbuses does not operate to change scope of this exemption. Furthermore, essentially sightseeing trips, which are not directly related to school functions and are not supervised or sponsored by school authorities, do not fall within the scope of this exemption, although they may be composed of school children.—Pat & Gordon, Inc.—Charter, 102 M.C.C. 553 (556-8).

Regulation (49 CFR 1047.2) adopted providing that "§203(b)(1) of the Act shall not be construed as being inapplicable to motor vehicles being used at the time of operation in the transportation of school children and teachers to or from school, even though such motor vehicles are employed at other times in transportation beyond the scope of the exemption".—Schoolbus Exemption, 113 M.C.C. 258 (288, 293).

Commission found that college students are not embraced in the phrase "schoolchildren" as employed in §203(b)(1) as previously stated in 110 MCC 423, and transportation of such students herein is unauthorized interstate for-hire transportation. Respondent was ordered to cease and desist from such operations.—Dorsey Bus Co., Inc.—Investigation of Operations, 113 M.C.C. 574 (576-8).

Dual use of buses as both schoolbuses and commercial buses does not void the applicability of schoolbus exemption in §203(b) of the Act. Commission's decision interpreting applicability of schoolbus exemption does not affect the power of the Department of Transportation to regulate for-hire schoolbus operations.—Schoolbus Exemption, 114 M.C.C. 531 (533-4)*.

35. Taxicab operation.—[Vols. 9, 11, 12, 14-18].—The essential characteristic of a bona fide taxicab service, as distinguished from special or charter operations, is its inherently local nature; it is ordinarily conducted within a municipality or township and immediate environs thereof. However, establishment of a rigid mileage limit beyond which an operation will not be considered a bona fide taxicab service is neither necessary nor desirable; in each case consideration must be given to, among other factors, the size and population of the base city or town, the extent of development of suburban or nearby communities, and the distances involved.—D & M Taxi Co., Inc., Common Carrier Application, 96 M.C.C. 439 (445).

Even under the most liberal application of those standards, transportation between Fort Dix, N.J., or McGuire Air Force Base and New York City cannot be considered a local service; operations to the Borough of Manhattan involve a cross-country haul of at least 50 miles, and those to Brooklyn and La Guardia and Kennedy airports even greater distances. Moreover, the substantial volume of service provided by protestant buslines indicates that taxi service is not the primary mode of transportation between those points. And while distances to Philadelphia are only some 28 miles to the city center and somewhat further to the airport, development of the intermediate communities is not such as to constitute Dix and McGuire points within the immediate environs of Philadelphia; also, again, a large number of persons apparently travel in vehicles other than taxicabs. Therefore, entire proposed operation between those military bases and surrounding area, on one hand, and the New York and Philadelphia airports, on the other, falls outside scope of the §203(b2) exemption.—Id., pp. 445-6.

The essential characteristic of a bona fide taxicab service as distinguished from special or charter operations is its inherently local nature; taxicab service is ordinarily conducted within a coporate municipality or commercial environ. Limousine service between Hartford, Conn., and points in eight states is not encompassed by the exclusion in §203(b2) of the Act.—Cotter Garage Corp. Common Carrier Application, 113 M.C.C. 589 (594); Airfield Service Co. Ext.—Charter Operations, 117 M.C.C. 165 (169)*.

40. Transportation incidental to aircraft transportation.—[Vols. 11, 14, 15, 17-19, 21].—Partial exemption of motor carriage of persons or property when incidental to air transportation, provided in §203(b)(7a), merely exempts pickups and deliveries within "terminal area" of an airport for the purpose of servicing air carriers at that airport;

and such terminal area is generally defined as the area within a 25-mile radius of the airport. Therefore, when one defendant carrier has no interstate operating authority and the other holds general-commodity authority between named Michigan airports and two airports at Chicago, Ill., they may legally transport between Michigan airport and points within 25 miles thereof goods which are moved by air, but they must have express authority to transport goods picked up locally at Michigan points all the way to a Chicago airport. Mere ultimate relationship to air transportation does not alone suffice to bring defendants' motor carrier operations to and from the Chicago airports to and from points in Michigan within the incidental-to-air exemption.—I.C.C. v. Howard, 342 F. Supp. 1112 (1115-6).

Motor carrier transportation of passengers having a prior or subsequent air movement is exempt under §203(b)(7a) of the Act when performed within a 25-mile radius of the pertinent airport or within a muncipality any part of whose commercial zone, as defined by the Commission, falls within such radius (95 MCC 526); also, in the absence of through routes or common arrangements between participating carriers such intrastate transportation is exempt (98 MCC 362). Thus, although applicant may intend to handle some passenger transportation on through tickets or under common arrangements with air carriers for movements beyond a 25-mile radius of the International Airport at Anchorage, Alaska, the evidence does not reflect or support such a conclusion. Authority for proposed service is not needed on this record and application denied.—Anchorage Transit System, Com. Car. Application, 98 M.C.C. 775 (776-7).

Transportation to qualify as transportation incidental to transportation by aircraft within meaning of §203(b)(7a) "shall be performed on a through air bill of lading covering, in addition to the line-haul movement by air, the collection, delivery, or transfer service performed by the motor carrier". Fact defendant issued no bill of lading, but marked his transportation charges on air bill, does not mean that shipments moved on air bill from point of pickup; on the contrary, since the air bill was only executed after air carrier received physical custody of goods, there was no bill of lading for defendant's operations, and his collection service was not covered by air bill of lading. Therefore, although defendant transported shipments for subsequent movement by air to Stapleton Airport at Denver from Golden, Colo., within 25 miles of airport, such transportation is not exempt from Commission regulation.—Colorado Cartage Co., Inc. v. Murphy, 100 M.C.C. 745 (748-9).

The unique characteristics of air cargo transportation and the essential idea of related trucking within and beyond the air terminal areas suggests a need for authorization of motor carriers which specialize in air-truck traffic. In instant application both the rapid population growth and increased air-truck operations indicate need for applicant's proposed operations within present New York City terminal area and to Calverton, N.Y., in order to provide supporting shippers and receivers with a continuing and complete service. Proposed service is not incidental to transportation by aircraft, since bulk of applicant's service is performed on behalf of shippers and consignees, rather than on behalf of air carriers and since most shipments move pursuant to arrangements between applicant and shippers instead of between applicant and air carriers; furthermore, there is no air bill of lading covering applicant's operations on outgoing traffic since the air bill is only executed when air carrier receives physical custody of the shipments. Authority granted, restricted to shipments with prior or subsequent movement by air.—Commodity Haulage Corp. Common Carrier Application, 106 M.C.C. 135 (139-41).

Applicant performs collection, delivery and transfer services within the Philadelphia air terminal on behalf of an air freight forwarder. Approximately 5 percent of the traffic collected by applicant which is indeterminable at the time of collection and which is turned over to the forwarder does not move from the Philadelphia Airport by air, but is transshipped by motor vehicle in applicant's service pursuant to its certified authority. This application was filed for operating authority for this small portion of traffic handled by applicant with an accompanying motion to dismiss on the ground that the proposed operation is exempt from economic regulation pursuant to §203(b)(7a) of the Act. The Commission found that as long as applicant believed in good faith that the motor segment of the total service involved is but a part of continuous motor-air movement, then the cover of the partial exemption is maintained. Application dismissed.—Airline Freight, Inc., Extension—Philadelphia Air Terminal Area, 108 M.C.C. 197 (199, 201).

§203(b)(7a) permits substitution of motor-for-air transportation only in situations resulting from emergency conditions. Thus, only emergency situations or conditions resulting from causes beyond the control of the direct air carrier, and not those stemming from causes beyond the control of the air forwarder or motor carrier can bring substituted motor-for-air service within the ambit of the partial exemption. Therefore, overlooking of space by the direct or indirect air carrier does not create the type of "emergency" situation contemplated by the regulations. To determine otherwise would open the door to practices whereby an air freight forwarder might knowingly tender to an air carrier traffic in excess of the latter's space capacity, and then claim the benefits of the partial exemption to have the traffic move in unregulated surface transportation. This situation would be virtually unpoliceable, and the possibility of abuse far outweighs any benefit to be gained from a contrary construction.—Id., pp. 202, 203.

This proceeding embraces two others; all applicants seek permits to perform contract carriage on behalf of direct and indirect (air freight forwarders) air carriers. The threshold question to be determined by the Commission is the extent to which air carriers, serving the general public both directly and indirectly, may utilize for-hire motor carrier transportation services without subjecting themselves to the regulatory provisions of the Act. It was found that the proposed use of applicants' for-hire motor transportation services by the direct and indirect air carriers extends to points beyond the terminal area of the air freight forwarder, and therefore, such service cannot be construed as being incidental to air within the meaning of §203(b)(7a) and is thus not exempt from economic regulation by the Commission. Applicants' proposed service on behalf of and beyone the terminal area of the air freight forwarder constitutes a line-haul operation clearly requiring specific authorization for its lawful performance pursuant to part II of the Act.—Theodore Savage Contract Carrier Application, 108 M.C.C. 205 (209, 210)*.

To clarify the relationship between air freight forwarders and motor carriers, regulation 49 CFR 1082.1 was promulgated whereby an air freight forwarder could receive from, or turn over to, authorized motor carriers shipments the motor transportation of which does not come within the partial exemption of §203(b)(7a). This regulation provides that air freight forwarders and motor carriers may perform connecting-line service from or to points outside the air carrier's air terminal area, provided there is an attendant separation of responsibility as between the air and surface carriers. Since the rule permits only independent service, participation in such air-motor movements by motor contract carriers under contract with the air freight forwarders (and hence under such forwarders' continuing responsibility) clearly would be inappropriate.—Id., pp. 211, 212.

On reconsideration, both applications for authority to transport ex-air shipments of general commodities between numerous Kentucky Counties, on the one hand, and, on the other, three airports, were handled under consolidated proceedings. Because of unique characteristics of air cargo transportation and the essential idea of related trucking within and beyond air terminal areas, there exists a need for authorization of motor carriers which specialize in air-truck traffic; both applicants specialize in air-truck traffic, while only one of three protestants specializes in such traffic, and only a minor portion of all three protestants' total revenue is derived from ex-air traffic transportation. Because existing motor common carriers fail to expedite movements of ex-air shipments causing costly delays and because no specialize for-hire service is available for transportation of ex-air shipments, shippers have been forced to use private carriage. The present difficulties experienced by shippers indicate that the issuance of authorities in this specialized field of motor carriage in the involved counties has lagged behind demand; authority granted to both applicants.—Turner Expediting Service Extension—Montgomery County, Ky., 110 M.C.C. 342 (344, 348, 349)*.

Petition to remove all points in indicated counties from exempt air-passenger zone denied. Petitioners present no evidence to prove the distances traveled within present zone are not subordinate to prior or subsequent air travel and a grant of authority on grounds other than this would lead to confusion and uncertainty as to present rule. There is not a sufficient showing of change in circumstances since adoption of these regulations to warrant narrowing of limits of present zone.—Exempt Zone—LaGuardia and Kennedy Airports, 111 M.C.C. 284 (288)*.

Motor vehicle transportation of property having prior or subsequent movement by air and consisting of collection and distribution and performed within limits of a terminal area is found to be bona fide pickup and delivery service incidental to aircraft transportation and exempt from economic regulation by this Commission pursuant to §203(b)(7a). Such service is line-haul or peddle service subject to regulation when performed beyond such terminal area limits. Airport terminal area limits are to be delineated by the 25-mile "rule of thumb" radius unless considerations of community homogeneity, as herein defined, require extension. In instant case, terminal areas for Weir Cook Municipal Airport, Indianapolis, Ind., and Atlanta Muncipal Airport, Atlanta, Ga., are hereby prescribed in accordance with such guidelines. 49 CFR 1047.40 is modified to reflect these findings.—Motor Transp. of Property Incidental to Air, 112 M.C.C. 1 (15, 17-23). Terminal area of Bradley Field, Conn., includes points within a 25-mile radial area, including points in Massachusetts.—Key Trans-port Service, Inc., 98 M.C.C. 628 (630); exempt zone of Savannah, Ga., airport redefined to include all portions of Hilton Head Island, S.C.—Exempt Zone (Passengers)—Savannah, Ga., Airport, 114 M.C.C. 804 (805).

Common carrier operations performed on carrier's own bill of lading from consignor to a consolidator found not to have been within the incidental-to-aircraft exemption of §203(b)(7a) of the Act. Cease and Desist order entered.—Buck's Express Service, Inc.—Investigation, 115 M.C.C. 353 (356).

Regulations governing the motor transportation of passengers incidental to transportation by aircraft is within the exemption of §203(b)(7a) provided it is confined to the transportation of passengers that have had or will have an immediately prior or subsequent movement by air and is performed within an area 25 miles of the boundary of the airport, including all of any commercial zone, any part of which falls within that area. However, where passengers operations from and to an airport are entirely within a single state, the transportation being performed for and paid for by the passenger and not the airline, and there are no through tickets or other through arrangements with the airline or with interstate motor carriers, the operations are in intrastate commerce and not subject to regulation under the Act. This is true even if it is known that the passengers have come from or are destined to points beyond the state.—Portland Airport—Petition for Declaratory Order, 118 M.C.C. 45 (47).

Motor carriers will qualify for the substituted motor-for-air exemption (an incidental transportation) when they transport air passengers that have been grounded and if (1) the air carrier bears the expense of the substitute transportation, and (2) there exists an emergency situation (adverse weather conditions, equipment failure, or other causes beyond the control of the air carrier) as specified in 49 CFR 1047.45(b). Baggage intended to accompany air passengers but which is misplaced, delayed, or misrouted en route, may be transported from the destination airport under the exemption to the same extent as passengers. Baggage not intended to accompany passengers is subject to the same interpretations and regulations as the transportation of property.—Id., p. 48; carriage of general commodities between indicated cities when restricted to "emergency" situations in which airline shipper is prevented from delivering such traffic to airport destinations by conditions beyond its control constitutes exempt substitution of motor-for-air service.—Hill Trucking Co., Ext.—Jumbo Jets, 111 M.C.C. 742 (744);

Murphy Surf-Air Trucking Co., Inc., Ext.—Kentucky, 111 M.C.C. 570 (573)*.

See also Howard Contract Carrier Application case, §209(a)(1), n. 25.

45. Operation by or for agriculture cooperative associations.—[Vols. 19, 21].—Activities of coopjative association's transportation division, in extensive for-hire transportation of general commodities for nonmembers throughout the United States, are not exempt from regulation by §203(b)(5), as contended; such activities are not incidental to the milk and dairy business operated by the cooperative within a comparatively small area in Kansas and Missouri, and are not shown to be necessary to effective performance of its primary activity as a "cooperative association as defined in the Agricultural Marketing Act". Transportation performed by exempt agricultural cooperative must be incidental to its primary statutory activity and necessary to effective performance thereof; and, since the only claim of necessity is that profitable interstate truck operations are needed to sustain cooperative's money-losing primary activity, motor carrier operations in issue do not meet that incidental and necessary test. A cooperative cannot engage in interstate transportation, without authority, for the reason that its primary activities are unprofitable.—I.C.C. v. Milk Producers Marketing Co., 405 F. 2d 639 (640-42)*.

Furthermore, 1968 amendment to §203(b)(5) codified the incidental and necessary rule which the courts had applied theretofore and limited an agricultural cooperative's transportation for nonmembers to 15 percent of its total annual interstate transportation, measured in tonnage. That amendment, enacted after filing of instant complaint but before the trial, did not unconstitutionally deprive appellant-defendant of its property without due process of law, as it argues; the Commission did not seek, and the three-judge district court did not enter, considered injunction under or in reliance on the 1968 amendment. Issue before the trial court was whether questioned activities of defendant's transportation division were exempt from Commission regulation under the law as it existed when suit was filed; the court correctly held that no constitutional question was presented and that it had authority to grant the injunction; affirmed.—Id., pp: 640-2.

In suit to enjoin association from conducting motor carrier operations that it claims are within "agricultural cooperative exemption," evidence shows that defendant is not a bona fide agricultural cooperative association as defined in the Agricultural Marketing Act and, thus, is not entitled to benefits of the exemption accorded such cooperative associations or federations thereof by §203(b)(5). In addition to fact that defendant was not substantially controlled by its members, record shows that it engaged in for-hire carriage for nonmembers that was not necessary and incidental to that performed for members, and has consistently hauled nonmember tonnage in excess of 15 percent of its total interstate tonnage. While defendant argues that the Commission only recently implemented the 15-percent requirement with regulations, a statute which does not specifically require implementation through regulation is effective even though there are no regulations; hence, defendant has been in violation of the requirement since its general manager took control. Defendant association, and the manager, permanently enjoined from continuing such unauthorized motor carriage.—I.C.C. v. Southwest Marketing Association, 315 F. Supp. 805 (808-12, 813-4).

In view of all the circumstances and the doctrine of primary jurisdiction, the court will stay its hand on motion to modify its order enjoining agricultural cooperative from engaging in unlawful for-hire carrier operations. As required by applicable law, defendant cooperative applied to the Commission for authority, as transferee, to acquire motor carrier certificate and, pending Commission decision on its application, holds temporary authority to lease the certificate; thus, administrative agency should determine whether agricultural cooperative may hold temporary authority to lease certificate that it has contracted to purchase and, conversely, whether the Commission can issue or approve transfer of a certificate to a qualified cooperative, either on temporary or permanent basis. The court will not advise the agency, but it must observe that no statute or controlling court decision prohibits an agricultural cooperative association from acquiring a motor carrier certificate, if otherwise qualified. Court proceedings stayed pending Commission decision or further order.—I.C.C. v. Milk Producers Marketing Co., 320 F. Supp. 738 (742)*.

Under the §203(b5) exemption, an agricultural cooperative's transportation for "nonmembers who are neither farmers, cooperatives nor associations thereof" is limited in two ways: (1) to 15 percent of its total annual interstate tonnage and (2) to the "incidental and necessary" standard of the statute. Therefore, since the United States is specified as a nonmember, and since it is not included in description "farmers, cooperatives nor associations thereof," defendant cooperative's transportation for the government is subject to the 15 percent limitation; and defendants concede that, if the 15 percent limitation is applicable, then the statutory "incidental and necessary" limitation also applies to such transportation. Furthermore, as applied to defendants in instant injunction proceeding, §203(b5) does not violate their constitutional protections of due process and equal protection of the laws.—I.C.C. v. Big Sky Farmers & Ranch. Mkg. Coop. of Montana, 321 F. Supp. 79 (82-3)*.

In enacting the aricultural cooperative exemption, Congress did not intend to allow agriculture cooperative associations to engage indiscriminately and without restriction in the general trucking business at expense of regulated motor carriers. Though transportation supplied by such associations need not originate or end at a farm in every case, but may include transportation to market of farm products delivered by farmers to a cooperative and return transportation of farm supplies to member cooperatives for resale, to meet the statutory definition of an agricultural cooperative and thus qualify for the exemption an association (1) must be composed of member farmers acting together for their mutual benefit as producers of farm products in processing, preparing for market, handling, or marketing the farm products of persons so engaged, or of farmers acting together in purchasing, testing, grading, distributing, or furnishing farm supplies or farm business services, and (2) must not deal in farm products, supplies, and business services for nonmembers in an amount greater in value than the total amount of such business transacted with or for members.—Agricultural Transp. Assn. of Tex., Investigation, 96 M.C.C. 293 (297)*.

While "farmers" includes not only individuals but also corporations, partnerships, and other business entities engaged in farming operations, and their participation in farming operations may be either as actual producers of agricultural products or as owners of farms, persons not engaged in farming and having no agricultural activities whatever clearly are not eligible for membership in an agricultural cooperative, even though they may use farm products as raw materials in their manufacturing processes. And while inclusion of a minority of nonfarmers in a farm cooperative does not automatically cause it to lose its status as a bona fide agricultural cooperative, provided it is substantially owned and controlled by farmers, it is noteworthy that the Farm Credit Administration, in administering its responsibilities under the Agricultural Marketing Act, looks to whether 90 percent of the voting media of a cooperative is held by either farmers or agricultural cooperative associations.—Id., pp. 297-8.

There must be a functional relationship between the farmer and the traffic transported for him, since the services contemplated by the Marketing Act are farm services and must by their very nature be functionally related to the farming activities of a cooperative's members; to hold otherwise would ignore the purpose of that act, which is to assist cooperatives in providing farm services for farmers. But if the cooperative is performing transportation functionally unrelated to farmer members' farming activities, the revenues derived therefrom must be treated as nonmember business for purpose of determining compliance with the third proviso of §1141j of the Marketing Act, under FCA's ruling that in determining eligibility for loans under that act all business transacted with members that are neither producers not cooperative associations shall be deemed to be nonmember business.—Id., p. 299.

Whether a farm cooperative association does or does not conduct nonmember business no greater in value than that handled as agent for its own members can be determined only by examination of its total business activities over a long enough period to establish the normal and usual ratio between its member and nonmember business. Of three surveys of respondent's business offered in evidence, the third, which includes several months between institution of investigation and opening of the hearing, covers the longest time and may be considered the best available for that purpose, even though respondent was apparently spurred by commencement of the investigation to show a more favorable ratio of member to nonmember business than had theretofore persisted. As that survey shows that 55 percent of respondent's revenues are derived fom its members, the members' status must be examined to determine whether their traffic can validly be considered members' traffic within meaning of the Agricultural Marketing Act.—Id., pp. 300-1.

While there is no question as to validity of member status of five agricultural cooperatives which because of their close association with farming can be considered "farmers" within meaning of the Marketing Act, or of six members who operate farms or feed lots and have tendered only unprocessed agricultural commodities for transportation, the volume of traffic tendered by those members has been comparatively small. By far the largest part of respondent's traffic is transported for members whose feed lots and farms provide a part, but not all, of the livestock or produce which is processed by them and subsequently tendered to it. At time of hearing, 22 of respondent's 47 members were engaged in packing or fabricating meats and meat products, and though part of their livestock requirements was obtained from proprietary feed lots, in most instances they purchased the majority of their livestock from outside sources; and at least one such packer cannot be considered an eligible member because its livestock was procured from feed lots operated by its stockholders rather than from ones which it owned or operated itself.—Id., pp. 301, 303.

Thus, while respondent was organized in form of a lawful cooperative association, since most of its members own or operate farms, its adherence to matters of form has not extended to matters of substance, since the transportation provided its members has seldom been functionally related to their farming activities. As only an inconsequential part of its revenues has been derived from transportation performed on behalf of its members as legitimate member business, it is not lawfully constituted as an agricultural cooperative pursuant to requirements of the Agricultural Marketing Act. Cease and desist order entered.—Id., pp. 303, 304.

On reconsideration, however, majority of respondent's membership found to consist of persons engaged in business as packing houses and food processors or canners who either separately or as an incident of or in combination with such business, participate in varying degree, directly or indirectly, in farming or ranching functions, many of which are governed by so-called grower contracts under which crops are grown for member-processor by someone else. While mere existence of grower contract does not alone confer "farmer" status upon processor, it does not preclude finding member-processor a "farmer". Grower contracts vary widely according to terms thereof covering kind and number of processes shifted from one party to the other, allocation of responsibility, assumption of risk or loss, furnishing of raw materials, financing arrangements, and degree of supervision exercised; and although general guide lines are set forth for use analyzing such contracts in the future, precise nature of contracts involved are not set forth and Commission assumes (for purposes of this case only) that all members whose relationship to farming is derived through grower contracts are "farmers."—Id., 102 M.C.C. 527 (543).

Apart from any percentage imbalance between member and nonmember business, there is no basis for finding that transportation performed for nonmember meat packers and food processors is lawfully performed in furtherance of primary statutory activity of respondent under "incidental and necessary" standard adopted in 350 F. Supp. 252; the rationale of that case is that an association's transportation of products not qualifying as membership traffic, must, as a matter of fact, be shown to be incidental and necessary to performance of the association's primary activity before it properly can be undertaken under partial exemption of §203(b)(5). In instant proceeding, respondent has not shown that its transportation of nonmember traffic is incidental and necessary to its transportation of member traffic.—Id., p. 546.

On reconsideration entire Commission found that where a member's farm and his nonfarm related products are commingled so that the two classes of traffic cannot be identified or separated, the revenue derived therefrom must be pro-rated and considered as resulting from member business to extent that the transportation of member's products are proportionately related to his farming activities. However, such a pro-rata approach is adopted only when items involved are being carried for member in his capacity as a farmer; a member who is both a farmer and a processor cannot fairly rely upon an exemption for a "farmers" cooperative association, when he ceases to act as a farmer and functions instead as a processor. Thus, when items have been so extensively commingled and processed as to lose their identity as farm products, then as to those items, the member is no longer a farmer and their transportation is no longer a "farm business service."—Id., p. 548.

Upon reconsideration the entire Commission found that respondent's transportation of nonfarm-related traffic for nonmembers was "incidental and necessary" to its farm-related business and thus, exempt from economic regulation. Respondent is a farmer-owned and farmer-controlled cooperative association within meaning of Agricultural Marketing Act; its members, each having one vote, are all producers of dairy products; its officers and directors are dairy farmers; the products marketed by it are for its members who receive all proceeds after payment of costs; in addition, the amount of business transacted with nonmembers accounts for only 2.3 percent of its total revenue. Citing 350 F 2d 252, cert. denied, 382 US 1011, the Commission states that "a cooperative which otherwise meets in all respects the requirements of the Marketing Act definition lawfully may transport nonfarm related traffic on a for-hire basis for nonmembers to the extent*** 'incidental and necessary' to the performance of its primary farm related functions specifically authorized by that act".—Cache Valley Dairy Assn. Investigation of Operation, 103 M.C.C. 798 (799, 803-4)*.

Transportation performed for independent retail gasoline service stations, not as part of a return movement, but as a separate direct movement related to the activities of the cooperative only by the fact that the necessary equipment of the cooperative would otherwise be idle, is not exempt from Commission regulation. Although respondent is a cooperative association within the meaning of the Agricultural Marketing Act, it is performing direct transportation for nonmembers and is refunding excess revenues to these nonmembers; in addition, there is no incidental relationship between nonmember transportation and respondent's exempt transportation nor is there any indication that this transportation is necessary for the continued operation of motor vehicles by respondent. Accordingly, to the extent respondent is transporting such nonmember traffic in the manner described, its operations are not exempt.—Edgerton Coop. Oil Assn.—Investigation, 105 M.C.C. 100 (106, 8).

Pursuant to the enactment of P.L. 90-433 amending §203(b)(5) of the Act dealing with the exemption from economic regulation accorded motor vehicles controlled and operated by an agricultural cooperative association or federation of such associations, this Commission promulgated the following regulations to implement the Congressional enactment: §220 of the Act was amended by the addition of subsection (g) which specifically authorizes the Commission to inspect the books and records pertaining to motor vehicle transportation of certain cooperatives and federations; computation of tonnage in nonfarm-nonmember transportation allowed to be transported in any fiscal year by a cooperative association or federation of cooperative associations; overall limitation of nonmember transportation for compensation in any fiscal year; notice to the Commission of intent to perform nonmember transportation; time for filing and information required; from BOp 102 prescribed for use by those filing such notice.—Implementation of P.L. 90-433—Agric. Coop. Exemption, 108 MCC 799 (803).

This proceeding was instituted to prescribe regulations that will provide useful guidelines for those who seek in good faith to operate pursuant to the exemption from economic regulation which §203(b)(5) of the Act, as amended by P.L. 90-433, effective July 26, 1968, accords to motor vehicles controlled and operated by an agricultural cooperative association or by a federation of such associations. These regulations are not all-inclusive and are not intended to displace established administrative and judicial precedent respecting pseudo-cooperatives or the meaning of the statutory phrase "motor vehicles controlled and operated by" appearing in §203(b)(5). These are matters which may in the future properly be made the subject of supplemental rulemaking processes the need therefore later appear.—Id., p. 826.

Commission found that neither the Act nor the national transportation policy precludes the issuance of a certificate of public convenience and necessity authorizing operations as a common carrier by motor vehicle to an agricultural cooperative performing exempt transportation under section 203(b)(5) of the Act. Based on this finding, and a demonstrated need of the proposed service, the Commission granted American Farm Lines certain common carrier authority, concluded that AFL and other respondents had not been operating unlawfully, and reopened the United Agricultural Transportation Association of American Marketing Co-Op proceeding for further hearing. The Commission has determined that this proceeding involved an issue of general transportation importance.—American Farm Lines Common Carrier Application, 114 M.C.C. 30 (41-42)*.

See also Munitions Carriers Conference, Inc. v. American Farm Lines case, §222(b), n. 11.

50. Carriage of livestock, fish, agricultural commodities.—[Vols. 9, 11-19, 21].—While purpose of the 1958 amendment to §203(b)(6), which incorporated with modifications Administrative Ruling No. 107 of the Bureau of Motor Carriers, was to narrow the class of commodities due exempt status, it was expressly expanded to include cooked fish; and though cooked poultry is not specifically mentioned therein, explanatory floor remarks by member of the Senate committee and sub-committee that studied legislation to narrow the agricultural exemption, who was manager of bill to amend that amendment during its consideration by the Senate, are sufficient to establish Congress' intent to also include cooked poultry as an exempt commodity. Therefore, in suit to set aside the Commission's decision to the contrary, the court holds that Congress intended for cooked poultry to be exempt under §203(b)(6), as amended. It is also concluded, however, that all cooked poultry was not intended to be exempt; poultry items which would be nonexempt, if uncooked, do not automatically become exempt merely by cooking; thus, exempt status of precooked or cooked poultry items in dispute depends on whether they would be exempt if they were uncooked.—Gold Kist, Inc. v. United States, 339 F. Supp. 1249 (1252-5)*.

Since neither cut-up uncooked poultry, nor breaded or battered poultry, nor cut-up, uncooked poultry that is either breaded or battered, or marinated breaded and/or battered are mentioned in §203(b6) or Administrative Ruling No. 107, whether they are exempt "agricultural commodities" depends necessarily on the "continuing substantial identity" test promulgated by the Supreme Court in 351 US 49. Every change in a commodity does not require that it be nonexempt; a "manufacturing" change must produce a new and different product, and an article must emerge having a distinctive name, character or use. Dressed poultry is exempt under the statute, and, while considered poultry items are processed further than the dressed poultry, the changes they undergo are not so drastic as to change their substantial identity as poultry; therefore, poultry items in question are agricultural commodities within the §203(b)(6) exemption. Consequently, because it is concluded that each of the poultry items involved in instant case would be exempt if uncooked, and because Congress intended for cooked poultry to be an exempt commodity if it would be exempt if uncooked, the court holds that considered cooked or precooked, frozen or refrigerated poultry is within the agricultural exemption of §203(b); and that, therefore, motor carriers who transport those specific poultry items are exempt from economic regulation by the Commission. Order of the Commission, to the contrary, is enjoined and set aside.—Id., p. 1255-6.

In determining whether lactose and Culturemate (produced from milk) are exempt agricultural commodities under the "continuing substantial identity" test set forth in 351 US 49, incidental or preliminary processing does not result in a loss of the §203(b6) exemption; but a "manufacturing" deprives the commodity of its exempt status. Lactose is composed of milk sugar plus minute traces of protein and ash, and is produced by a process in which the milk sugar undergoes a change; however, while manufacture implies a change, every change is not a manufacture. The conversion of milk sugar into lactose, without adding any substantial amount of extraneous materials, involves a processing, but not any manufacturing; therefore, notwithstanding the processing changes, lactose retains its substantial identity as an exempt agricultural commodity.—I.C.C. v. Schaetzel, 339 F. Supp. 1345 (1346-7).

Culturemate, on the other hand, consisting of non-fat dry milk powder which comprises between 85 and 90 percent by weight of the product and the remaining 10 or 15 percent consisting of dry phosphate salts, dry pancreas extract, and small amounts of other products, has lost its original characteristics and has been manufactured into a new product. The addition of such a substantial amount of new materials to the dry milk powder produces a different article with its own distinctive name, character and use; thus, Culturemate is a new, manufactured product which is not exempt under the statute.—Id., p. 1347.

Act of 1958: [Vols. 19, 21].—Reevaluation of the whole record, including evidence concerning certain additional shipments introduced at further hearing, warrants finding that (in addition to "grandfather" rights under §7(c) of Transportation Act of 1958 which applicant was found entitled to in 84 MCC 637, on and since May 1, 1958, applicant has engaged in bona fide operation as a common carrier of (1) frozen fruits and vegetables from Portland and Hillsboro, Oreg., to Indianapolis and Southbend, Ind., and Reno, Nev.; and (2) frozen vegetables from Los Angeles, Calif., and Idaho Falls, Idaho, to Chicago; authority for continuance of such operation granted.—Consolidated Freightways Corp. of Del. "Grandfather" Application, 95 M.C.C. 220 (222-4, 228)*.

Applications under the "interim" provisions of §7(c) of Transportation Act of 1958 must be determined on basis of public convenience and necessity, but they differ from typical §207 applications in that operations during pendency thereof are authorized by law. While there is no doubt that applicant transported shipments of frozen fruits, frozen vegetables, and tea during the interim period, he was unable to produce shipper support for transportation of the frozen commodities; and, since the shipper of tea had moved from origin point of shipments during the interim period, need for continuance of that transportation is not shown, and present origin is outside the scope of the "interim" application. In addition, since record contains no evidence that applicant was engaged in transportation of bananas during the interim period, no authority can be granted therefor notwithstanding shipper support for proposed service. Applicant has failed to establish the right to authority sought under §7(c) of the 1958 Act.—Midwest Emery Freight System, Inc., Interim Application, 95 M.C.C. 642 (646-8).

Fish, including shellfish: [Vols. 16, 19, 21].—Upon petition, the Commission (Division 1) found that for-hire motor transportation of ground oyster shells is not within the partial exemption from economic regulation stated in §203(b)(6) of the Act. Although "oysters, with or without shells" are covered by this partial exemption, the shells at issue herein have ceased to be oysters as the living tissue in them has decomposed through the passage of time (in this case up to 3,000 years) and their only reasonable link to oysters is as possible fossils or relics. Therefore, questions as to whether these shells are "manufactured of" or "processed from" oysters, or their intended use are irrelevant and immaterial. In support the Commission cited 66 MCC at 123, wherein it is stated that once the oyster has been removed,"the shell alone cannot be considered as any longer a variety of shell fish".—Grant's Trucking Co.—Petition—Oyster Shells, 118 M.C.C. 892 (894-5).

Fruits, juices and vegetables: [Vols. 18, 19, 21].—The transportation of cherries in brine is exempt from economic regulation within the purview of §203(b)(6), even though "cherries in brine" is not specifically mentioned in administrative Ruling No. 107, 49 CFR 210.25 (now incorporated in §203(b)(6)), which lists as "exempt" fruits and berries shipped in brine to retain freshness; in addition the "continuing substantial identity" test, used by the Supreme Court in 351 US 49, in deciding when an exempt agricultural product is subject to economic regulation, favors position that transportation of cherries in brine is within exemption and, therefore, not subject to regulation.—Maxwell Co. Extension—Cherries in Brine, 100 M.C.C. 10 (12).

Grains: [Vols. 18, 19].—Petitioner seeks declaratory finding that a commodity described as "wild birdseed bell" is exempt from economic regulation under §203(b6) of Act as amended by Transportation Act of 1958. Bell is made up of various grains (seeds) which in a loose state are exempt from economic regulation. However, to make bell, corn sirup, which is not an exempt commodity and which is used solely for its adhesive properties, is added to mixture of these seeds and the product is poured into a mold resembling a bell. A wire is placed inside bell to allow bell to be hung on inside of birdcage. Protestant claims that adhesive additive and wire placed inside mold results in a product that has acquired new form, qualities, properties, value and combinations which takes this commodity out of exempt commodity status of §203(b6) of Act. Relying on substantial identity test enunciated in 351 US 49 Commission concluded that essential use of seeds does not change; both before and after processing, it is birdseed. Only the form changes. Consequently, there is a continuing substantial identity between loose birdseed and the birdseed mixed with an adhesive to form a bell; therefore, "wild birdseed bell" is an exempt commodity within purview of §203(b6) of Act.—Petition for Declaratory Order—Wild Birdseed, 110 M.C.C. 406 (407).

See also Farmers Union Coop. Marketing Ass'n v. State Corp. Commission of Kans. case, §202(b), n. 5.

Livestock; poultry; products thereof: [Vols. 16, 19].—Transportation of considered poultry commodities is not exempt under §203(b6) of the Act. These commodities are not merely cleaned, dressed or cooked, but are further processed by the complete grinding of all solid, edible portions; in addition, the liquid part is spray-dried to form a powder and fatty portions are otherwise rendered or spray-dried. Futhermore, under these processes the poultry undergoes a drastic physical change and is transformed into several new and different articles with characteristics unlike those of poultry. Thus, the resulting poultry products or byproducts do not retain a continuing substantial identity with the initial agricultural commodity and are, in fact, so thoroughly processed that they must be treated as "manufactured" products, which are not exempt under §203(b6).—Henningsen Foods, Inc., Petition for Declaratory Order, 106 M.C.C. 286 (290).

Nuts: [Vols. 18].—The transportation of ground pecan shells in motor vehicles is exempt from Commission regulation provided that the concerned motor vehicles are not at the same time transporting any other property in interstate or foreign commerce subject to regulation. In order to fall within the scope of this exemption the considered commodity must not emerge from the processing state a new and different commodity with a distinctive name, character and use. Herein the grinding process to which the pecan shells are subjected is nothing more than a pulverizing operation designed to obtain fragments of desired sizes; under these circumstances the end product, ground pecan shells, is still, in effect, the original base agricultural product and cannot be characterized as a byproduct of any manufacturing process possessing a new identity and new properties.—Kinner Common Carrier Application, 99 M.C.C. 748 (750-753).

55. Transportation under common control, management, etc.—[Vols. 9, 11-15, 21].—See also Archambault Common Carrier Application case, §206(b), n. 22; Illinois-Calif. Express—Purchase—Ariz.—Utah Express case, §5(2), n. 45; Kingpak, Inc., Investigation of Operations case, §203(b), n. 60.

Motor carrier operations of partnership performing break-bulk and distributing service at New Orleans for purported shippers' association are conducted under a common control, management, or arrangement for a continuous carriage of freight from points outside the New Orleans commercial zone and therefore are not within exemption of §203(b8). And since the association and its consolidating agents are found to be unlawfully conducting a common-carrier forwarder service without a permit issued under part IV, the partnership's operations are not within exemption of 2(c)(2) and are likewise unlawful. New Orleans Shippers Assn., Inc., Investigation, 323 I.C.C. 619 (638-9).

Proposed interstate movement of packages by applicant's messengers traveling between Chicago, Ill., and Milwaukee, Wis., as rail passengers with baggage is not a new service under common control, management or arrangement with other carriers and therefore, does not alter applicant's status as an exempt motor carrier in the Chicago commercial zone. Said messengers are applicant's employees, retain either custody or control of packages in their charge as baggage, pay the same fares, and travel under the same conditions as other rail passengers; furthermore, any charges for actual motor transportation in the Milwaukee area as well as charges for transportation, other than those of applicant, in the Chicago area are to be paid by shipper or consignees to the carrier performing the service. Thus, since proposed service does not require authority from this Commission, application dismissed.—Cannonball, Inc., Common Carrier Application 99 M.C.C. 326 (328-9).

The "so-called commercial-zone exemption" does not include applicant's driveaway automobile service between points in the New York City commercial zone and the New York City piers, because the automobiles are handled under continuous carriage arrangements and normally have prior or subsequent movement outside the New York commercial zone.—Drive Away Auto Transport, Inc., Com. Car. Application, 99 M.C.C. 75 (78-9).

Common arrangement, as set out in §203(b)(8), has been held to require an arrangement between carriers. However, considered customs brokers, agents for Mexican Government and Mexican consignees, hold themselves out to perform services necessary to facilitate movement of shipments through United States and Mexican customs at Laredo and Nuevo Laredo. Therefore, since these brokers realize no profit on transportation aspect of their service, issue no bills of lading, and assume only responsibility for proper classification of shipments, payment of required duties, and for loss or damage resulting from their own negligence, they are considered as shippers, not carriers, for purposes of movement from Laredo to Mexican destination. In addition, evidence mitigates against finding that there is a concrete or practical working arrangement between local American motor carriers and Mexican line-haul carriers which would void the statutory exemption.—G. Arredondo Transfer Co., Inc.—Petition, 106 M.C.C. 557 (575-8)*.

Applicant's operations, consisting of collection and delivery services under contractual or agency relationships with line haul carriers is not exempt from economic regulation under §203(b)(8) because it is performed under an arrangement with line haul carriers; however, such transportation is exempt under §202(c)(2) of the Act since it is performed within the "terminal areas" of the line-haul carriers.—Bartz Cartage Co., Inc.—Common Carrier Application, 107 M.C.C. 378 (382).

56. Wrecked vehicles, emergency towage.—[Vol. 21].—Applicant would tow wrecked or disabled vehicles to California for storage and then subsequently to Oregon for repair and would also tow repossessed vehicles, and although §203(b)(10) excludes from economic regulation the emergency transportation of any accidently wrecked and disabled motor vehicles in interstate commerce, the proposed operation does not entail the towing of any wrecked and disabled vehicles in emergency situations and therefore does not qualify under the exemption.—Skyline Diesel Sales & Service, Inc., Com. Car. Applic., 96 M.C.C. 430 (431).

In application proceedings wherein it must be determined whether the proposed towing of accidentally wrecked or disabled motor vehicles is within the exemption of §203(b)(10) of the Act, inferences in the evidence that the transportation would originate at points other than the actual scenes of accidents may be found sufficient to establish that the proposed operations are not within the purview of the statutory exemption.—Ford Common Carrier Application, 113 M.C.C. 193 (197)*.

Transportation of accidentally wrecked or disabled motor vehicles in interstate commerce by towing found not to be exempt emergency transportation, as defined in §203(b)(10) of the Act, if those motor vehicles are transported from points other than the actual scene of an accident, even if the same motor carrier performs the service from the accident scene to the point from which the second movement originates. —Fairall Common Carrier Application, 113 M.C.C. 238 (245)*.

Applicants in proceedings wherein authority to transport wrecked or disabled motor vehicles is sought cannot be strictly held to proving each of the elements of proof set forth in *Novak Contract Carrier Application*, 103 M.C.C. 555, 557, inasmuch as the sites and frequency of accidents as well as the locations to which these vehicles are thereafter brought, are not susceptible of proof with any high degree of certainty.—Little Extension—Youngstown, Ohio, 113 M.C.C. 300 (303)*.

60. Commercial zones.—[Vols. 9, 11-19, 21].—See also Cannonball, Inc., Common Carrier Application case, §203(b), n. 55; Morgan Drive-Away v. Mid-States Trailer Transport case, §203(a)(10), n. 5 *Intrastate*.

In determining the limits of a commercial zone, matters of trade practices, use to which the area is put, and relevant political, geographical, and social factors are considered, but not the effect such a determination might have on the parties; a need for additional service, for example, must be established in a proper application proceeding. It would be an inversion of established principles to attempt to foster development of an area by revising its commercial zone; a commercial zone exists about a municipality as an economic fact, and the Commission's function is merely to recognize the boundaries which already exist. However, manifestations of extraordinary industrial growth can render former descriptions obsolete, and the Commission has not hesitated to revise a description that does not reflect the existing trade area.—Commercial Zones and Terminal Areas, 96 M.C.C. 538 (539-40)*; Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (714)*.

Authority to serve Owensboro, Ky., includes authority to serve all points within commercial zone thereof, even though some of those points are in Indiana. Therefore, amendment at the hearing of application for authority from two Kentucky counties to points in 12 States, which substituted Owensboro as the origin points, actually enlarged applicant's origin territory to include Indiana points in Owensboro commercial zone and thereby permitted tacking of its outstanding Florida-to-Indiana authority to that granted from Owensboro at a common point in Indiana within commercial zone of Owensboro.—Carl Subler Trucking, Inc., Modification of Certificate, 99 M.C.C. 193 (196-8)*.

Operations of local truckers who provide transfer, collection, and delivery service for forwarders of used household goods (purportedly operating under the §402(b)(2) exemption) are not within partial exemption of §203(b8), even though such operations usually consist of transporting shipments for relatively short distances to and from a household at origin or destination point and often are conducted wholly within commercial zone of such point. The shipments move under a through forwarder bill of lading and local carriers' services are performed solely for, in concert with, and as an incident to, the through forwarder transportation service; moreover, all parties concerned know that the local motor services are not isolated or performed separately and apart from the overall forwarder transportation. Therefore, considered local transportation, being actually a part of a common arrangement for continuous carriage beyond a commercial zone, clearly falls within the exception to the commercial zone exemption and is, thus, subject to regulation.—Kingpak, Inc., Investigation of Operations, 103 M.C.C. 318 (336-7, 340-41)*.

Petition to enlarge the zone limits of Atlanta, Ga., to include all points within a line drawn 10 miles beyond the corporate limits of Atlanta and all of any municipality any part of which is within 10 miles of the corporate limits of Atlanta, and additionally a

United States government warehouse 12.4 miles from the corporate limits of Atlanta, denied. The application lacks sufficient information regarding the geographic, political, economic, and commercial factors of the area sought to be included. Even assuming that the entirety of the industrial districts that exist on rail and highway corridors extending from Atlanta are located within the 5-10 mile band, the districts represent less than 8 percent of the land contained therein, and only one-third of that has been developed.—Commercial Zones and Terminal Areas—Atlanta, Ga., 107 M.C.C. 690 (695).

In accordance with 103 MCC 318, which was sustained by the courts, local motor carriers and warehousemen are required to hold interstate authority for pickup and delivery service performed for exempt forwarders of used household goods because, whether such motor carrier operations are conducted within or outside a commercial zone, the §203(b8) commercial zone exemption is not available to carriers serving a forwarder (who holds no part IV authority) in the movement of through shipments in interstate or foreign commerce.—District Moving and Storage, Inc., Common Carrier Application, 107 M.C.C. 896 (899).

Removal of the partial exemption of §203(b)(8) of the act found not warranted on interstate or foreign movements within Hawaii.—Motor Carrier Operation in the State of Hawaii, 115 M.C.C. 228 (251).

Boundaries: [Vols. 15, 18, 22].—Defendant supports its contention by decision of New York commission in *Stevens* case decided March 16, 1968, that authority to serve a named county should include points within commercial zone of any city within that county, including points outside named county. *Stevens* case relied upon by defendant involved commercial zone rights across county lines for territorian descriptions of named counties. These commercial zone extensions apply to interstate and foreign commerce conducted under certificates of registration. Tacking of separate authorities to provide a through service is a permissive right grounded on the existence of a common service point; *Stevens* decision merely states that authority to serve a named county includes right to serve entire commercial zone of a city within the authorized county even if commercial zone extends beyond the boundary of the county. In absence of any evidence to the contrary, Commission cannot assume that N.Y. Commission intended to allow the tacking operations advocated by defendant. Otherwise, authorities could be tacked depending on the happenstance of whether or not there was a large city straddling boundary of 2 adjacent counties named in separate territorial grants.—Flying Freight v. Van's Auto Express, Inc., 110 M.C.C. 358 (359-61).

Extension of corporate limits of Compton, Calif., to include petitioner's industrial center does not remove such center from the Los Angeles Harbor commercial zone, as the Commission previously held in 54 MCC 288 that zone limits having been specifically fixed are not automatically changed by subsequent changes in a city's corporate limits.—Los Angeles, Calif., Commercial Zone, 114 M.C.C. 86 (88)*.

Carriers affected: [Vols. 14, 21].—Because the availability of existing motor common carrier service is not a proper issue for consideration in commercial zone proceedings, it was deemed unnecessary to discuss the various operations of carriers serving an area for which a petition was filed to incorporate it into a nearby commercial zone.—Kansas City, Mo.—Kansas City, Kans., Commercial Zone, 118 M.C.C. 462 (465)*.

Construction generally: [Vols. 16-19, 21].—See also Hayes Lines, Inc. v. Gateway Transportation Co., Inc. case, §204(c), n. 251.

Motor carrier authority to serve a particular municipality may be construed as including all points within commercial zone thereof; however, authority which is limited to a particular territory cannot be construed as implied authority for any service at any point that is, in fact, beyond the described limits even though such point is within commercial zone of a municipality in the authorized area. [Citing 54 MCC 21.] Thus, while plaintiff may serve Mycock, N.C., under its regular-route certificate authorizing service at "all points in... North Carolina" as off-route points, it cannot serve Chesapeake, Va., a point within commercial zone of Mycock but beyond the area authorized in its territorially limited certificate. Therefore, since Mycock is not a specifically authorized service point, and the authority to serve "all points in...North Carolina" precludes plaintiff from that plaintiff discontinue its service at Chesapeake, Va., is upheld. Suit dismissed, with prejudice.—R-C Motor Lines, Inc. v. United States, 350 F. Supp. 1169 (1170, 1173-4)*.

The partial and conditional exemption from regulation contained in §203(b8) embraces three categories of transportation, namely, that conducted wholly (1) within a municipality, (2) between contiguous municipalities, and (3) within a zone adjacent to and commercially a part of any such municipality. In defining commercial zones generally in 46 MCC 665, the Commission interpreted the statutory language, in view of its limited jurisdiction over foreign commerce, as referring only to municipalities in the United States, and accordingly limited the commercial zone of each municipality to (1) the base municipality itself, (2) contiguous U.S. municipalities, and (3) such other U.S. municipalities and unincorporated areas as are within a radius of the base municipality fixed by the population-mileage formula therein prescribed. Though the court in 154 F. Supp. 431 held that interpretation of no effect as to transportation in foreign commerce between the contiguous cities of Detroit, Mich., and Windsor, Ontario, which it held to be within the second category of the exemption, it did not hold that Windsor, which the Commission excluded from its definition of the Detroit zone in 48 MCC 95, was within that zone.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (712-3)*.

However, the exemption by its terms is not applicable to transportation performed within a commercial zone or between contiguous municipalities under a common control, management, or arrangement for continuous carriage to or from a point beyond the municipalities or zone. Therefore, as to traffic moving to or from Canadian points beyond Windsor or U.S. points beyond Detroit, the U.S. portion thereof must be performed by an authorized carrier even though it is entirely within the commercial zone of the border point (Detroit) or between Detroit and Windsor. Furthermore, by participating in a joint rate with a U.S. carrier a foreign operator subjects itself to the Commission's jurisdiction and, to the extent of the joint rate, to the terms of the Act. But a common arrangement for continuous carriage means an arrangement between carriers, not between a carrier and a shipper; hence, separate arrangements made by a shipper with two carriers, one a local carter operating under the exemption, do not void the exemption provided by the Act.—Id., p. 715.

The present limits of the commercial zone of Louisville, Ky., was determined by the population-mileage formula established in 46 MCC 665 which prescribed a population-mileage formula by which to determine the limits of commercial zones of each municipality in the United States. Petitioner seeks to have the Louisville commercial zone revised to include an area known as L & N Industrial Park and its immediate environs. The park is zoned for industrial use and is located approximately 450 feet from the existing commercial zone. The utilities, such as phone, gas, and water, presently serving Louisville also serve the park. Other services such as postal delivery, news distribution and banking are performed by agencies located within the existing zone. A commercial zone exists as a economical fact by reason of trade practices, the use to which the land is put, and geographical and political considerations. The park will depend on necessary commercial services which are provided by Louisville agencies and which link the park to the economical life of Louisville. Hence, the L & N Industrial Park should be annexed to and defined as commercially a part of the Louisville commercial zone. However, the entire area encompassed by the description by petitioner should not be included in the redefinition of the commercial zone because we have no information concerning almost one-half of the territory within the proposed description; commercial zone redefined in certain respects.—Louisville, Ky., Commercial Zone, 108 M.C.C. 494 (495-7).

Petition to combine and expand now separate commercial zones of Seattle and Tacoma, Wash., into a single, enlarged zone with boundaries as indicated is denied. The record demonstrates that Tacoma maintains separate governmental facilities, separate port facilities, and draws its labor force from its present zone and is thus not interdependent on and not economically, politically, or commercially a part of the same unit as Seattle.—Seattle—Tacoma, Wash., Commercial zone, 111 M.C.C. 718 (721)*.

A commercial zone is not "established" or "created" by the Commission but already exists by reason of trade practices, the uses to which a proposed area is put, and geographic and political considerations.—Kansas City, Mo.—Kansas City, Kans., Commercial Zone, 118 M.C.C. 462 (462)*.

Contiguous municipalities: [Vols. 14, 18, 19, 21].—In holding in 154 F. Supp. 431 that transportation in foreign commerce between Detroit, Mich., and Windsor, Ontario, is within the contiguous- municipalities exemption of §203(b8), the court did not hold that Windsor is within the Detroit commercial zone, and redefinition of that zone specifically to exclude Windsor would have no effect on whether Windsor and Detroit are contiguous municipalities. To be contiguous within meaning of the statute, communities must at some place have a common border, and there must be direct communication between them by motor vehicle. Windsor and Detroit, though separated by the Detroit River, are connected by a vehicular tunnel and bridge, and thus meet both criteria. Redefinition of the commercial zone would therefore be an exercise in futility.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (713-4)*.

Although commercial zone exemption of §203(b)(8) applies to local motor operations conducted solely between contiguous municipalities lying across the international U.S.-Canadian boundary, a New England-type town such as Massena, N.Y., is not a municipality having a commercial zone within the meaning of §203(b)(8) and the exemption will not apply to allow carriers to engage in transportation between the town and points in Canada without appropriate authority.—W. T. Byrns Motor Exp., Inc., Extension—Rooseveltown, 96 M.C.C. 765 (769).

Exemption provisions of §203(b)(8), on which petition relating to motorbus operations between Reynosa, Mexico, and Hidalgo, Tex., is premised, can be applicable only if it is shown that Reynosa and Hidalgo are contiguous municipalities; and to be contiguous within meaning of §203(b8), communities must at some place have a common border, and there must be direct communication between them by motor vehicle. Fact that there appears to be direct communication between Hidalgo and Reynosa via the international bridge does not establish requisite continuity, and petitioner did not submit any conclusive evidence showing that they have a common border; on the other hand, testimony of protestant's expert witness suggests that the Mexican government's ownership of part of the Rio Grande and a strip of land along that river would preclude any possibility that those cities could be contiguous. Thus, the transportation involved cannot be found exempt under §203(b8); and, despite limited nature of operations between international boundary and border control station, Commission authority is required.—Rio Grande Bridge System—Petition for Exemption, 103 M.C.C. 174 (180).

For local transportation between contiguous municipalities to be exempt under §203(b)(8), it must not be performed under common control, management or arrangement for continuous carriage to or from a point within such municipality, municipalities, or zones; and it must take place wholly within a municipality or between contiguous municipalities. However, said exemption is not void simply because shipment had a prior movement in interstate or foreign commerce, before moving between Laredo, Texas, and Nuevo Laredo, Mexico.—G. Arredondo Transfer Co., Inc.—Investigation, 103 M.C.C. 210 (220, 223-5)*.

Furthermore, in order for concerned municipalities to be contiguous within statutory meaning they must have a common border and there must be direct communication between them by motor vehicle. Fact that there appears to be direct surface communications between Laredo and Nuevo Laredo by means of international bridge does not establish requisite contiguity.

However, since considered exemption is clearly directed to relieving Commission of burdensome and highly expensive task of regulating purely local cartage operations and since there are many similar situations along the Mexican border (Rio Grande River), the better and more comprehensive approach is to consider in a separate rulemaking proceeding to be instituted: (1) the character of the 20-meter strip of land and portion of Rio Grande River owned by the Mexican Government, and (2) the possibility of amending or modifying the commercial zone regulations, so that transportation within considered international boundary municipalities is exempt. Accordingly, since the rulemaking proceeding will determine outcome of present proceeding, entry or order is withheld pending determination in that proceeding.—Id., 106 M.C.C. 557 (573-4, 578-9)*.

The Commission is confronted with the unique question of determining whether contiguity, in the sense of common boundaries, exists between the involved United States municipalities and the Mexican municipalities abutting the 20-meter strip of land along the south bank of the Rio Grande River. Although it appears that municipalities in Mexico abutting the strip have certain powers, responsibilities, and duties with respect to this narrow strip of land, the relationship of this 20-meter strip to such municipalities does not seem capable of precise translation into recognizable American legal terminology; and the concept of this strip of land appears to defy application in the framework of United States transportation regulation. In these circumstances and as presently informed, we cannot find that either contiguity or lack of contiguity exists between the United States and Mexican border municipalities along the Rio Grande.—Rio Grande Border—Comm. Zones & Term. Areas, 110 M.C.C. 51 (58-9).

Expansion and enlargement of limits: [Vols. 16, 21].—Petition to expand the commercial zone of Seattle, Wash., northward and southward, as indicated herein, granted as the areas involved have changed from a basically agricultural character to such a state of industrial expansion and development that they now appear to be economically and commercially a part of Seattle. But the petition to expand the commercial zone of Tacoma, Wash., denied. Those areas commercially part of Tacoma are within the present 5-mile commercial zone and land outside this zone is primarily residential and agricultural.—Seattle—Tacoma, Wash., Commercial Zone, 111 M.C.C. 718 (721-22)*.

Foreign or international boundary: [Vols. 14-19].—Provisions of the Treaty of Guadalupe-Hidalgo are inapplicable to the matter of whether petitoner can conduct motor bus operations in interstate or foreign commerce from Reynosa, Mexico, to the United States Border Control Station located in Hidalgo, Texas. The treaty provides, *inter alia,* that that part of the Rio Grande River which forms the boundary between the United States and Mexico shall be free and common to vessels and citizens of both countries. However, navigaition of the river is not involved in motor-carrier operating rights proceeding, and any relief based on that treaty must be denied. Furthermore, despite limited nature of operations between the international boundary and the border control station, which petitioner seeks to conduct, Commission authority therefore is required.—Rio Grande Bridge System—Petition for Exemption, 103 M.C.C. 174 (175, 180).

Fact that there appears to be direct surface communications between Laredo, Texas, and Nuevo Laredo, Mexico, by means of international bridge across the boundary does not establish requisite contiguity of municipalities within commercial-zone exemption. However, since that exemption is clearly directed to relieving Commission of burdensome and highly expensive task of regulating purely local cartage operations and since there are many similar situations along the Mexican border (Rio Grande River), the better and more comprehensive approach is to consider in a separate rulemaking proceeding (1) the character of the 20-meter strip of land and portion of Rio Grande River owned by Mexican Government, and (2) the possibility of amending or modifying the commercial zone regulations, so that all transportation, similar to that herein involved, within international boundary municipalities would be exempt. Rulemaking proceeding instituted for consideration of these matters.—G. Arrendondo

Transfer Co., Inc.—Petition, 106 M.C.C. 557 (573-4, 578-9)*.

This rulemaking proceeding was instituted on the Commission's own motion to determine the feasibility of amending or modifying the commercial zone regulations as they relate to municipalities situated along the international boundary between the United States and Mexico, and to determine the character ofthe 20-meter strip of land along the south bank of the Rio Grande River owned by the Federal Government of Mexico. In 54 MCC 21 it was held that the commercial zones of municipalities located at international boundary points do not extend beyond the limits of the United States. Subsequently, in 154 F. Supp. 431, the court held that the §203(b)(8) exemption is applicable to the transportation of property between contiguous municipalities even though one such municipaiity is in a foreign country. Following this case, local transportation between contiguous municipalities bordering the United States and foreign countries has been considered exempt from economic regulation under §203(b)(8), and the Commission has not since then asserted jurisdiction over such transportation.—Rio Grande Border—Comm. Zones & Term. Areas, 110 M.C.C. 51 (54-6).

Contention that motor carrier operations of the type involved herein are not subject to economic regulation by this Commission found not valid. A thorough analysis of the Act shows that Congress specifically exempted from economic regulation certain transportation activities and, having chosen specifically to exempt these activities, it must be assumed that these are the only regulatory exemptions intended.—Traf. at or near U.S.—Can. Boundary Lines, 110 M.C.C. 730 (742-3).

See also Commercial Zones and Terminal Areas—Detroit case; and W. T. Byrns Motor Exp., Inc., Extension case, §203(b), n. 60 *Contiguous municipalities.*

Intrastate transportation: [Vols. 15, 19].—In order for a passenger carrier to come within purview of the §203(b)(8) exemption insofar as interstate transportation is involved, it must show that it is also "lawfully engaged in the intrastate transportation of passengers over the entire length of such interstate route or routes in accordance with the laws of each State having jurisdiction", Texas corporation seeking exemption under §203(b8) has made no such showing; in fact, certified statement of the secretary of Railroad Commission of Texas indicates that petitioner has never held any motor carrier authority in Texas. Therefore, petitioner clearly has failed to show itself entitled to operate between McAllen and Hildago, Tex., under the §203(b8) exemption insofar as interstate operations might be involved.—Rio Grande Bridge System—Petition for Exemption, 103 M.C.C. 174 (181).

Military establishment or reservation: [Vols. 17, 19].—A military reservation partly within the commercial zone of an authorized point may be served if the entrance used is within that commercial zone. However, authority to use one entrance is not authority to use another entrance outside the commercial zone.—Navajo Freight Lines, Inc., Ext.—Cannon Airforce Base, 98 M.C.C. 330 (331-333).

Municipality: [Vols. 14, 17-19, 21].—The scope of rule 4 of Ex Parte No. MC-19, 17 MCC 467, 505-506 [49 CFR 176.4], which requires motor common carriers to publish separate charges for each accessorial service rendered in connection with household goods movements where the line-haul transportation is performed by a motor carrier, is limited to areas over which the Commission has requisite jurisdiction within the purview of the exemptions prescribed under §202(c)(1) and (2) and §203(b)(8) of the Act. Considered within the context of the instant situation involving local services performed for exempt freight forwarders, such local operations would not be exempt under these sections of the Act.—United Van Lines, Inc., v. Calif. Household Goods, 329 I.C.C. 742 (748).

Applicant seeks a determination by the Commission that the Tri-City Regional Port District, Madison County, Ill., either constitutes a municipality which has a commercial zone, or is an unincorporated urban community such that carriers authorized to serve the District may also serve adjacent territory or establish a terminal area including points outside of and adjacent to the District, i.e., St. Louis, Mo.-East St. Louis, Ill., commercial zone as defined by the

Commission. The District was created by the General Assembly of the State of Illinois, and it was designated as a political subdivision, body politic, and municipal corporation for the purpose of promoting industrial, commercial, and transportation activities and has powers commensurate with these goals. However, the District does not have the usual powers or privileges normally attributable to local government of a bona-fide municipality. Therefore, the District is not a municipality of the character contemplated by §203(b)(8) of the Act and, accordingly, does not have an adjacent commercial zone.—Truck Transport, Inc., Petition for Declaratory order, 108 M.C.C. 183 (185, 187).

The District is controlled by a corporate entity, but is not self-governed like the usual unincorporated urban communities. Therefore, the Tri-City Regional Port District is not a "municipality" or an "unincorporated urban community", and authority to provide service from said District cannot be construed as authority to provide service from an area surrounding the District either as a commercial zone or as a terminal area. The authority to provide service from the District is territorial, encompassing all points within the District, but such authority cannot be construed to serve points which are beyond the defined limits of the District, even though such points are so adjacent to a municipality located in the District as to be within the commercial zone of such municipality.—Id., pp. 188, 189.

An unincorporated urban community has been construed by the Commission to mean those settlements or aggregations of homes and businesses which, although unincorporated and without local governments or definite corporate limits, nevertheless are similar from a transportation standpoint to the cities, towns, villages, and boroughs which are contemplated by the term "municipality". Within such communities and within the adjacent "terminal areas" contemplated by §202(e) transportation by motor vehicle in bona fide collection, delivery, and transfer service incidental to line-haul transportation is performed.—Id., p. 188.

As defined by the Commission, the term "municipality" refers to "any city, town, village, and borough which has been created by special legislative act or which has been, otherwise, individually incorporated or chartered pursuant to general State laws, or which is recognized as such, under the Constitution or by the laws of the State in which located, and which has a local government. It does not include a town of the township or New England type".—Adams Trucking, Inc.—Revocation of Certificates, 118 M.C.C. 567 (571).

New England-type towns: [Vols. 17-19, 21].—A town need not be located in New England to be considered a "New England-type town"; and, since Massena, N.Y., is both a New England-type town and a village within that town, authority to serve Massena includes authority to serve the entire town and not just the village and, therefore, includes Rooseveltown-Cornwall Bridge, the international boundary port of entry at the St. Lawrence River near Rooseveltown which is also in Massena. Therefore, while applicants do not need authority to operate between the village of Massena and Rooseveltown, since New England type town are not municipalities having a commercial zone within meaning of §203(b)(8), authority is required for operations between Massena and Cornwall, Ontario. Granted accordingly.—W.T. Byrns Motor Exp., Inc., Extension—Rooseveltown, 96 M.C.C. 765 (767-770).

The governmental unit known as a "town" in New England is a minor subdivision of a county and is more commonly known as a "township" elsewhere in the county. That which is known as a "town" or "village" elsewhere is commonly called a "borough" or possibly a "city" in New England. Hence, the Commission has consistently held that townships in New England (i.e., "New England-type towns") or anywhere in the country are not municipalities within the meaning of §203(b)(8) of the Act.—Adams Trucking, Inc.—Revocation of Certificates, 118 M.C.C. 567 (571).

Passenger carriers: [Vols. 16, 19, 21].—Applicant for authority to transport passengers and their baggage, in a special operation, between Chicago and Laredo, Tex., required to confine its passenger pick-up and delivery service to points within the city limits of Chicago, since authority to serve all points within a commercial zone applies only to carriers of property.—Transportes Hispanos, Inc., Com. Car. Applic., 117 M.C.C. 894 (897)*.

Population basis: [Vols. 18, 21].—A decrease in population of Wilmington, Del., to under 100,000 brought into question the continued authority of carrier to provide service within the established Wilmington commercial zone, since the population-mileage formula marks a population of 100,000 the dividing line between a commercial zone (and hence implied authority) measured 4 miles from a municipality's corporate limits and that measured 5 miles from such limits. It was held that the automatic expansion provision of the formula (in 54 MCC 21, 1952), is sufficiently broad to include contraction of a commercial zone. Therefore, 49 CFR 1048.102(b) was amended to the effect that the population of a municipality is the highest census figure since, and including, that of 1940.—Commercial Zones and Terminal Areas, 115 M.C.C. 882 (884, 889); this rulemaking proceeding instituted.—Mercer Motor Freight, Inc.—Investigation, 114 M.C.C. 447 (450).

Territorial operating authorities: [Vols. 16-19, 21].—Defendant's authority to transport general commodities between named Michigan airports, on one hand, and, on the other, O'Hare Field and Midway Airport, Chicago, Ill., is specific and unambiguous, and authorizes nothing more than freight hauling between the airports specified; it does not authorize service at nonairfield origin or destination points. Moreover, despite fact that the airfields are located within municipalities, such authority may not be implicitly read to authorize transportation to and from all points within "commercial zones" of those cities. Therefore, since defendant holds no authority to serve any municipality, its transportation of goods moving from nonairfield points in Michigan to a Chicago airport does not come within the §203(b) commercial zone exemption provision.—I.C.C. v. Howard, 342 F. Supp. 1112 (1114-5).

Unincorporated urban communities: [Vols. 14, 19, 21].—The mere presence of places of business, and a finding that they have transportation requirements, are insufficient to establish the existence of an unincorporated community. Therefore, we must conclude that Hopsons, Miss., is not an unincorporated community. Rather, it consists of a highway crossroads with 10 or 12 residences and 3 businesses and its residents depend upon Clarksdale, Miss., for all services including mail service. There is nothing in this record to indicate that Hopsons has achieved community status and thus defendant's authority to service Hopsons cannot be construed as conferring the implied right to serve Clarksdale as a point within Hopsons' "terminal area". Cease and desist order entered.—F & W Express, Inc., v. Taylor Truck Line, 118 M.C.C. 898 (901-3).

See also Truck Transport, Inc., Petition for Declaratory Order, §203(b), n. 60 *Municipality.*

Particular Zones, by Name

Albuquerque, N.M.: On reconsideration, redefinition of present zone to include proposed area, as indicated, found warranted as industrial establishments in proposed area look to Albuquerque for business needs and public utilities and residents look to Albuquerque for cultural, educational, and social needs. Proposed area is being utilized for industrial development economically and is commercially related to Albuquerque due to proximity and availability of highways and transportation facilities. Prior report 111 M.C.C. 135—Commercial Zones and Terminal Areas, 111 M.C.C. 672 (673-75)*.

Alexandria-Pineville, La.: Extension northward of boundaries of present commercial zones of the contiguous municipalities of Alexandria and Pineville for approximately 7 miles from their municipal limits is not warranted. Industrial growth relied on does not involve establishment of new industrial plants in the extended area, nor substantial increase in population and employment beyond that common to areas surrounding cities and towns generally, but concerns only the enlargement of a single manufacturing plant which has apparently existed in that area for some time; and there is no showing of any industrial, commercial, or political continuity between the existing zone and the area sought to be included.—Commercial Zones and Terminal Areas, 96 M.C.C. 538 (539, 540)*.

Atlanta, Ga.: Petition for enlargement of present zone denied. A large proportion of the proposed area was not specifically described. Evidence in support of petition is insufficient for a rational determination of the matters involved. Proposed area found to be suburbs of the main industrial and commercial area and not a part thereof.—Commercial Zones and Terminal Areas (Atlanta), 111 M.C.C. 364 (370)*.

Petitioners sought to add an approximately 8.18 square mile area located entirely within DeKalb County, Ga., to the present Atlanta commercial zone. Review Board No. 3 found (1) that a large proportion of the proposed area is not specifically described, but is alleged to be undeveloped commercially, and (2) that the evidence does not establish that the commercial enterprises in the proposed area were economically dependent upon Atlanta, and the petition was accordingly denied.—Commerical Zones and Terminal Areas, 113 M.C.C. 522 (525-26)*.

Baltimore, Md.: Present commercial zone redefined so as to include the specified area found to be economically and commercially a part of Baltimore, Md.—Commercial Zones and Terminal Areas, 113 M.C.C. 773 (775)*; Id., 111 M.C.C. 240 (242-43)*.

Beaumont, Tex.: Petition for redefinition of present zone to include the proposed area, as specified, found warranted as the proposed area is shown to be economically and commercially a part of the present zone because of the integration of geographic, demographic, and government factors; common use of public utilities; industrial interdependence; and the sharing of service and consumer industries and a common labor pool.—Commercial Zones and Terminal Areas, 110 M.C.C. 852 (854-58)*.

Chicago, Ill.: Redefinition of Chicago commercial zone to include petitioner's facilities at Burr Ridge, Du Page County, Ill. Development of petitioner's facilities tied to development of Chicago.—Chicago, Ill., Commercial Zone, 115 M.C.C. 71(73)*.

Cincinnati, Ohio: Present commercial zone extended northward to encompass a site now under development as an industrial park immediately north of and adjacent to current zone boundary; considered area is economically and commercially part of Cincinnati and its present zone. Public utilities serving Cincinnati also serve considered area; a well-developed highway system provides ready access between this area and Cincinnati and points in the present zone. Furthermore, while considered industrial site has not yet been developed, lack of total development, of itself, should not militate against an otherwise warranted extension of present zone.—Cincinnati, Ohio, Commercial Zone, 106 M.C.C. 267 (268-70)*.

Present commercial zone redefined so as to include the indicated area, and a future plant site of petitioner as record shows that such area is economically and commercially a part of Cincinnati, O. However, petitioner's request to withdraw its expansion petition was granted in all other respects, and order entered.—Id., 112 M.C.C. 112 (113)*.

Petitioner sought inclusion of certain specified areas in Ohio and Kentucky adjacent to the limits of the Cincinnati, Ohio, commercial zone. Review Board Number 3 found (1) that the proposed areas in Ohio were not economically and commercially a part of Cincinnati, (2) that the area surrounding the Greater Cincinnati Airport in Boone County, Ky., and Cold Spring, Ky., are economically and commercially related to Cincinnati, (3) that past Commission interpretations required the construction that the entire city of Covington, Ky., including the area it recently annexed by expansion of its municipal boundaries, is within the zone, and (4) that the remaining areas in Kentucky received no evidentiary support and will not be included within the zone.—Id., 113 M.C.C. 430 (434)*.

Present commercial zone of Cincinnati, Ohio redefined so as to include the specified areas of Boone County and Florence, Ky.—Id., 113 M.C.C. 760 (760-1)*.

Cleveland, Ohio: Present commercial zone of Cleveland, Ohio redefined so as to include (a) all points in Cuyahoga County, Ohio, and (b) all points in Wickliffe, Willoughby Hills, Waite Hill, Willoughby, Willowick, Eastlake, Lakeline, Timberlake, and

Mentor, Lake County, Ohio.—Cleveland, Ohio, Commercial zone, 118 M.C.C. 524 (529-30)*.

Detroit, Mich.: Redefinition of the commercial zone either to include or specifically exclude Windsor, Ontario, Canada, is not warranted when neither action would affect the exemption of Detroit-Windsor traffic as flowing between contiguous municipalities within the meaning of §203(b8). Though the number of shipments moving to and from United States and Canadian points, whether Windsor and Detroit or points beyond has increased over the past 10 years, neither the volume thereof nor other considerations justify removal of exemption of the Detroit-Windsor movement in whole or in part.—Commercial Zones and Terminal Areas—Detroit, 96 M.C.C. 709 (714, 716-17)*.

Petition for redefinition of present Detroit, Mich., commercial zone so as to include specified section of Farmington, Mich., denied. Evidence lacks specific information as to such necessary elements for redefinition as geography, labor markets, public utilities, and other such commercial and economic factors. Need for additional carrier service is not determinative in these proceedings but should be established in a proper application proceeding.—Commercial Zones and Terminal Areas—Detroit, 111 M.C.C. 119 (121-22).

Indianapolis, Ind.: The city of Indianapolis, which was abolished by the Legislature of Indiana on Jan. 1, 1970, in favor of the Consolidated City of Indianapolis (to include, with certain exceptions, all of Marion County, Ind.), was redefined to include the Consolidated City of Indianapolis, Ind., itself, and all of any municipality wholly surrounded, or so surrounded except for a water boundary, by the Consolidated City of Indianapolis. 49 CFR 1048.41 amended effective Oct. 1, 1972.—Indianapolis, Ind., Commercial Zone, 115 M.C.C. 893 (895).

Kansas City, Mo.-Kansas City, Kans.: Commercial zones adjacent to and commercially a part of the city, contemplated by §203(b8), redefined.—Kansas City, Mo.—Kansas City, Kans., Commercial Zone, 110 M.C.C. 136 (136)*.

Upon unopposed petition, present zone redefined to include Bonner Springs, Kans., and Loring, Kans., and areas adjacent to the latter point as specified as such areas are shown, in fact, to be economically and commercially part of Kansas City, Kans., by the testimony of the supporting witnesses.—Id., 111 M.C.C. 131 (131-32)*.

Inclusions of portions of Olathe, Kans., and specified areas adjacent to Olathe within present zone found justified. Olathe and Kansas City, Kans., are connected by highway and use same utilities, police service, and street numbering system. Olathe is within Kansas City Metropolitan Planning Region and relies on Kansas City for labor, purchase of material, professional services and organizations. Olathe is shown economically and commercially a part of Kansas City. However, inclusion of Olathe Naval Air Base within the expanded zone was found not justified as it is beyond that portion of Olathe not sought for inclusion herein due to lack of industrial development.—Id., 112 M.C.C. 103 (106-07)*.

The commercial zone of Kansas City, Mo.—Kansas City, Kans., was extended to include Blue Springs, Mo., and specified areas adjacent thereto.—Id., 118 M.C.C. 462 (465)*.

Memphis, Tenn.: Petition to extend the present commercial zone of Memphis, Tenn., to include the proposed area denied for lack of specific evidence. A significant area between the petitioner's industrial development and the existing zone is industrially undeveloped and appears, from available evidence, to be farmland and not part of the Memphis Commercial zone. Thus, the entire area does not warrant inclusion within the Memphis commercial zone.—Commercial Zones and Terminal Areas, 110 M.C.C. 863 (866)*.

Minneapolis-St. Paul, Minn.: Present zone redefined to include the city of Bloomington and the southeatern quadrant of the village of Plymouth.—Commercial Zones and Terminal Areas, 107 M.C.C. 473 (476)*.

Limits of present commercial zone redefined so as to include those areas specified herein, which are found to be so economically and commercially related to the Twin Cities area as to be factually part of the present zone. Those areas not found to be part of the zone are rejected as they are basically agricultural or residential and are suburbs of the present zone.—Commercial Zones and Terminal Areas, 110 M.C.C. 872 (876-77)*.

New Orleans, La.: Petition to extend the limits of the present New Orleans, La., commercial zone to include Slidell, La., and specified adjacent areas denied. The Commission concluded that Slidell is an independent municipality near a larger city which location results in a flow of goods and services between them but is not an integrated part of the New Orleans commercial sphere.—Commercial Zones and Terminal Areas, 110 M.C.C. 887 (889-90)*.

New York, N.Y.: Commission redefined commercial zone of New York, N.Y. to include the TOFC terminals of petitioner railroad. Petitioner is only major rail line serving this area whose TOFC terminals are outside present exempt zone which places it at a competitive disadvantage and restoration of such exemption is found necessary for establishing an adequate rail transportation system in accord with the national transportation policy. Petitioner's commercial relation to New York City is manifest by our fifth supplemental report in Ex Parte No. MC-37.—New York, N.Y., Commercial Zone., 111 M.C.C. 123 (128)*.

Present commercial zone redefined to include petitioner railroad's TOFC terminal at Port Reading, N.J. as petitioner is the only major rail line serving New York City whose terminal facilities fall outside the exempt zone which fact places petitioner at a competitive disadvantage that adversely affects the public interest.—Id., 112 M.C.C. 203 (207)*.

Petitioner railroad sought inclusion of its TOFC terminal within the New York City "exempt zone". The Commission found that petitioner was the only major rail line serving New York whose terminal was outside such zone which fact placed petitioner at a competitive disadvantage. Zone redefined to include said terminal—Id., 113 M.C.C. 891 (893-94)*.

St. Louis, Mo.-East St. Louis, Ill.: Present commercial zone redefined.—St. Louis, Mo.-East St. Louis, Ill., Commercial Zone, 106 M.C.C. 844 (845)*.

Present zone not found to include the proposed specified area, findings in 106 MCC 844 unchanged.—Id., 107 M.C.C. 696 (701)*.

Petition to extend present zone to include specified area west of the present zone limits denied. Only about one-quarter of the proposed area is under industrial development and no clear indication is given as to the uses to which the remaining area will be put. Commission, therefore, cannot conclude that the proposed area, considered as a whole, is part of the existing commercial zone.—Id., 110 M.C.C. 868 (871)*.

Upon joint petition, present zone redefined as indicated. Although no representations were filed in this hearing, statements contained in said petition are sufficient to warrant such redefinition.—Id., 111 M.C.C. 88 (89)*.

Present zone redefined to include proposed area herein specified. All petitioners have or are planning new plants in proposed area, proposed area is served by same utilities as St. Louis at no additional cost, and petitioners conduct large volume of business in St. Louis. Proposed area shown economically and commercially part of St. Louis commercial zone.—Id., 111 M.C.C. 325 (326)*.

Petition of redefinition and enlargement of the present zone denied. Petitioner railroad sought redefinition in order to utilize the services of unregulated carriers operating between the proposed area and the present zone. The record is so lacking in substance as to geographic, political, economic, and commercial factors as to not warrant consideration.—Id., 111 M.C.C. 415 (417)*.

Sioux City, Iowa: Present commercial zone redefined to include the Port Neal Industrial District. The resultant zone will more accurately reflect the economic reality of the area.—Sioux City, Iowa, Commercial Zone, 110 M.C.C. 448 (450)*.

Syracuse, N.Y.: The commercial zone of Syracuse, N.Y., was redefined to include those points in Lysander, N.Y., not within 5 miles of the corporate limits of Syracuse, in addition to previously specified points.—Syracuse, N.Y., Commercial Zone, 117 M.C.C. 393 (394)*.

Warren, Ohio: Since it appears that such portion of Lordstown Township, Trumbull County, Ohio, as is not already within the

Warren commercial zone as determined under the population-mileage formula is in fact economically and commercially a part of Warren, the Warren zone is redefined to include the entire Township of Lordstown.—Commercial Zones and Terminal Areas. 96 M.C.C. 799*.

Washington, D.C.: Extension of present zone to include specified area of State of Virginia approved. Portion of proposed area lies within present zone. Proposed area provides Washington with labor, equipment, and supplies for governmental and nongovernmental entities. Proposed area relies on Washington for professional services, labor, supplies, equipment, and market outlets. Both areas share public utilities and are economically interdependent. Inclusion of Dulles International Airport in expanded zone is approved. Federal Aviation Administration states that said airport has no independent commercial existence apart from present zone, which testimony is supported by Washington origin of most passengers and airport concessionaires.—Washington, D.C., Commercial Zone, 111 M.C.C. 400 (402-4)*.

Wilmington, Del.: See §203(b), n. 60 population.

61. Interstate transportation by carriers also engaged in intrastate transportation. —[Vol. 9].—See J & J Trucking Co., Inc., §203(a)(15), m. 1.

Regulations of the Commission

33 FR 9661, July 3, 1968, Part 1048: Commercial Zones, §1048.26 Minneapolis- St. Paul, Minn., commercial zone limits redefined, effective July 18, 1968.

34 FR 4892, March 6, 1969, Part 1048: Commercial Zones, §1048.37 Louisville, Ky., new paragraph describing Louisville commercial zone, added, effective March 31, 1969.

34 FR 8117, May 23, 1969, Part 1047: Exemptions, §1047.20 through §1047.23 Transportation and Notice Thereof by Agricultural Cooperative Associations, added, effective July 7, 1969.

34 FR 9870, June 26, 1969, Part 1048: Commercial Zones (Rio Grande Border Municipalities), §1048.101 Commercial zones determined generally, with exceptions, amended by deleting therefrom the words "within the United States" in paragraphs (b) and (c), and the words "United States" in paragraph (c), effective July 12, 1969.

34 FR 12041, July 17, 1969, Part 1048: Commercial Zones, §1048.101 Commercial zones determined generally, with exceptions, effective date of order of May 7, 1969 (34 FR 9870) postponed to Sept. 8, 1969, effective July 10, 1969.

34 FR 12221, July 24, 1969, Part 1048: Commercial Zones, §1048.8 Kansas City, Mo.—Kansas City, Kans., commercial zone redefined to include an area not now within limits thereof, effective Aug. 22, 1969.

34 FR 14174, Sept. 9, 1969, Part 1048: Commercial Zones, §1048.101 *Commercial zones determined generally, with exceptions*, (Rio Grande Border Municipalities), effective date of order of May 7, 1969 (34 FR 9870) further postponed to Oct. 8, 1969.

34 FR 15482, Oct. 4, 1969, Part 1048; Commercial Zones, §1048.101 (Rio Grande Border Municipalities), effective date of order of May 7, 1969 (34 FR 9870) further extended to Nov. 10, 1969.

34 FR 16623, Oct. 17, 1969, Part 1048: Commercial Zones, §1048.3 St. Louis, Mo.-East St. Louis, Ill., commercial zone redefined, effective Nov. 17, 1969.

34 FR 17063, Oct. 21, 1969, Part 1048: Commercial Zones, §1048.38 Sioux City, Iowa, commercial zone redefined, effective Nov. 24, 1969.

34 FR 600, Jan 16, 1970, Part 1048: Commercial Zones, §1048.26 Minneapolis-St. Paul, Minn., description of commercial zone revised, effective Feb. 9, 1970.

35 FR 2727, Feb. 7, 1970, Part 1048: Commercial Zones, §1048.3 St. Louis, Mo.- East St. Louis, Ill., commercial zone redefined, effective March 12, 1970.

35 FR 2992, Feb. 13, 1970, Part 1048: Commercial Zones, §1048.39 Beaumont, Tex., specifically defining Beaumont commercial zone limits, added, effective Feb. 6, 1970.

35 FR 2995, Feb. 13, 1970, Part 1048: Commercial Zones, §1048.39 Beaumont, Tex., effective date of order (35 FR 2992) fixed as March 3, 1970.

35 FR 3290, Feb. 21, 1970, Part 1048: Commercial Zones, §1048.1 New York, N.Y., commercial zone limits redescribed, effective March 23, 1970.

35 FR 3290, Feb. 21, 1970, Part 1048: Commercial Zones, §1048.8 Kansas City, Mo.-Kansas City, Kans., commercial zone limits revised, effective March 23, 1970.

35 FR 4963, Mar. 21, 1970, Part 1048: Commercial Zones, §1048.21 Baltimore, Md., commercial zone limits revised, effective April 22, 1970.

35 FR 6004, Apr. 11, 1970, Part 1048: Commercial Zones, §1048.3 St. Louis, Mo.-East St. Louis, Ill., commercial zone limits revised, effective May 13, 1970.

35 FR 6651, Apr. 25, 1970, Part 1048: Commercial Zones, §1048.4 Washington, D.C., commercial zone limits revised, effective May 22, 1970.

35 FR 7701, May 19, 1970, Part 1048: Commercial Zones, §1048.3 St. Louis, Mo.-East St. Louis, Ill. commercial zone limits redescribed, effective May 13, 1970.

35 FR 9213, June 12, 1970, Part 1048: Commercial Zones, §1048.14 Albuquerque, N. Mex., commercial zone limits revised and redescribed, effective July 27, 1970.

35 FR 10662, July 1, 1970, Part 1048: Commercial Zones, §1048.24 Seattle, Wash., commercial zone expanded and limits redefined, effective Aug. 10, 1970.

35 FR 12764, Aug. 12, 1970, Part 1048: Commercial Zones, §1048.24 Seattle, Wash., inadvertent errors in paragraph (c) of redefined commercial zone (35 FR 10662) corrected.

35 Fr 13368, Aug. 21, 1970, Part 1047: Exemptions, §1047.40 Motor transportation of property incidental to transportation by aircraft, paragraph (d) Exempt zones and operations—(a) Weir Cook Municipal Airport and (b) Atlanta Municipal Airport, added, effective Sept. 28, 1970.

35 FR 14552, Sept. 17, 1970, Part 1048: Commercial Zones, §1048.8 Kansas City, Mo.-Kansas City, Kans., commercial zone limits revised, effective Oct. 16, 1970.

35 FR 14553, Sept. 17, 1970, Part 1048: Commercial Zones, §1048.26 Minneapolis-St. Paul, Minn., effective date of order of Dec. 24, 1969 revising commercial zone limits (35 Fr 600) fixed as Sept. 30, 1970.

35 FR 14931, Sept. 25, 1970, Part 1048: Commercial Zones, §1048.7 Cincinnati, Ohio, commercial zone limits revised and redescribed, effective Oct. 26, 1970.

35 FR 16406, Oct. 21, 1970, Part 1048: Commercial Zones, §1048.1 New York, N.Y., amended so as to restore commercial zone exemption as to defined New Jersey areas, effective Nov. 6, 1970.

36 FR 3515, Feb. 26, 1971, Part 1048: Commercial Zones, §1048.39 Metropolitan Government of Nashville and Davidson County, Tenn., commercial zone, added, effective April 8, 1971.

36 FR 4505, Mar. 6, 1971, Part 1048: Commercial Zones, §1048.39 (36 FR 3515) having been incorrectly designated, is redesignated §1048.40 Metropolitan Government of Nashville and Davidson County, Tenn.

36 FR 7011, Apr. 13, 1971, Part 1048: Commercial Zones, §1048.40 Metropolitan Government of Nashville and Davidson County, Tenn., commercial zone, effective date of order (36 FR 3515) postponed to May 25, 1971, effective on date of order.

36 FR 9022, May 18, 1971, Part 1047: Exemptions, §1047.2 Motor vehicles employed solely in transporting school children and teachers to or from school, added, effective July 2, 1971.

36 FR 13997, July 29, 1971, Part 1048: Commercial Zones, §1048.7 Cincinnati, Ohio, commercial zone limits redefined, effective Sept. 1, 1971.

36 Fr 18735, Sept. 21, 1971, Part 1048: Commercial Zones, §1048.7 Cincinnati, Ohio, commercial zone limits redefined, effective Nov. 1, 1971.

36 FR 18736, Sept. 21, 1971, Part 1048: Commercial Zones, §1048.21 Baltimore, Md., commercial zone limits redefined, effective Nov. 1, 1971.

36 FR 19909, Oct. 13, 1971, Part 1048: Commercial Zones, §1048.1 New York, N.Y., commercial zone limits redefined, effective Nov. 10, 1971.

36 FR 20878, Oct. 30, 1971, Part 1048: Commercial Zones, §1048.5 Los Angeles, Calif., and contiguous and adjacent municipalities, commercial zone limits redescribed, effective Dec. 3, 1971.

36 FR 21452, Nov. 10, 1971, Part 1048: Commercial Zones, §1048.20 Syracuse, N.Y., commercial zone limits redescribed, effective Dec. 31, 1971.

37 FR 5252, March 11, 1972, Part 1047: Exemptions, §1047.45 Motor transportation of passengers incidental to transportation by aircraft, paragrahh (d) amended by addition of subparagraph (2) Savannah, Ga., Airport, effective Feb. 14, 1972.

37 FR 5953, March 23, 1972, Part 1048: Commercial Zones, §1048.2 Chicago, Ill., commercial zone description revised, effective May 29, 1972.

37 FR 5953, March 23, 1972, Part 1048: Commercial Zones, §1048.2 Chicago, Ill., commercial zone description revised, effective May 29, 1972.

37 FR 9420, May 10, 1972: Administrative Ruling No. 119; Supplements Ruling Nos. 107 and 110. Provides a list showing the status of various commodities under the §203(b6) exemption of agricultural commodities entitled Composite Commodity List.

37 FR 15701, Aug. 4, 1972, Part 1048: Commercial Zones, §1048.102 Controlling distances and population data, paragraph (b) amended, effective Sept. 11, 1972.

37 FR 15995, Aug. 9, 1972, Part 1048: Commercial Zones, §1048.41 Consolidated City of Indianapolis, Inc., defining commercial zone limits of the recently created Consolidated City, added, effective Oct. 1, 1972.

37 FR 25023, Nov. 25, 1972, Part 1048: Commercial Zones, §1048.21 Baltimore, Md., commercial zone redefined and extended to include an area not now within limits thereof,effective Nov. 1, 1972.

38 FR 7809, March 26, 1973, Part 1048: Commercial Zones, §1048.27 New Orleans, La., commercial zone limits redefined and extended, effective May 11, 1973.

38 FR 15963, June 19, 1973, Part 1048: Commercial Zones, §1048.22 Cleveland, O., commercial zone description revised, effective Aug. 1, 1973.

38 FR 19046, July 17, 1973, Part 1048: Commercial Zones, §1048.8, Kansas City, No.-Kansas City, Kans., Commercial zone revised, effective Aug. 1, 1973.

38 FR 24368, Sept. 7, 1973, Part 1048: Commercial Zones, §1048.8, Kansas City, Mo.-Kansas City, Kans., commercial zone revised, effective Aug. 1, 1973.

38 FR 9831, Mar. 14, 1974, Part 1048: Commercial Zones. Miscellaneous corrections in §§1048.1(b)(1) at 36 FR 19909 and 1048.2 at 37 FR 5963.

39 FR 18768, May 30, 1974, Part 1048: Commercial Zones. Defining the zone adjacent to and commercially a part of Lexington-Fayette Urban County, Ky., at §1048.42, effective July 1, 1974.

Section 203. (c) [§*303(c) U.S.C.*] Certificate or permit.—[Unchanged. See vol. 18, p. 14274.]

Notes of Decisions

Volume 19—p. 15506; Volume 21—p. 17084.

2. Construction and interpretation.—[Vols. 19, 21].—Complainants sought intervention of Commission based on alleged violation of §203(c) of the Act. Defendant had substituted water for motor transportation when it was no longer possible to utilize ferry service. Complaint dismissed.—Wold Storage & Transfer, Inc. v. Alaska Transfer, Inc., 115 M.C.C. 288 (293).

3. For-hire transportation business.—[Vols. 19, 21].—See also Personnel Service, Inc.—Investigation, at §203(a)(17), n. 5; United States v. Chartered Bus Service, Inc., at §222(h), n. 5; United States v. Webb, at §222(c), n. 5; and Uxbridge Motor Lines, Inc.—Investigation of Operations, at §212(a), n. 35.

Where an individual orally leased drivers and equipment to shipper, and individual retained control over equipment and hired drivers who were responsible to him, operation found to constitute unauthorized for-hire transportation. Cease and desist order entered.—Snyder's Wholesale Liquors, Inc., Petition, 113 M.C.C. 528 (529-30).

Since corporate respondents, who are commonly owned, customarily transport their goods in the same vehicle at the same time, the venture results in for-hire carriage performed by each for the other; mutual reimbursement of expense constitutes the element of compensation, and the simultaneous carriage of more than one participant's freight precludes the company who is in nominal control of the vehicle from meeting the "primary business" concept embodied in section 203(c). Further, the Commission is not required to disregard the separate corporate entities because of their common ownership for the purpose of exempting such transportation from regulation.—Leitchfield Mfg. Co., Inc.—Investigation, 106 M.C.C. 648 (652, 653)*.

On further hearing, following remand, instant proceeding does not present the factual grounds which caused the courts to hold that operations considered in 81 MCC 337 were not for-hire carriage. Unlike situation in that case, wherein respondents dealt in bulk commodities and were transporting "in bulk" sugar as part of their overall activities, respondent is a cookie distributor and has no connection with or overall knowledge of the sugar distribution business; it does not warehouse sugar nor assume any warehousing risk or cost, and it has never sustained a loss in its sale of sugar. While it is the nominal owner of sugar being transported, it buys sugar only in response to preexisting orders in conjunction with use of its own equipment to pickup cookies at bakeries which supply it and which buy the sugar at prices including the equivalent of a transportation charge. Respondent's sugar transportation is not part of its primary business as a distributor of cookies nor within scope of and in furtherance of a primary sugar business; thus, it constitutes unlawful for-hire carriage.—Shelby Biscuit Co. Investigation of Operations, 106 M.C.C. 79 (83-5)*.

Operations of shipper-petitioners, under their "joint venture" agreement (involving joint leasing of vehicles, joint hiring of drivers, and an equitable division of costs thereof) found to constitute for-hire carriage subject to regulation, rather than *bona fide* private transportation, when, in substance, they are providing motor carrier service for each other with the reimbursement of expenses constituting "compensation" within statutory definition of both common and contract carriers. Also, while the disputed operations have many of the hallmarks of genuine equipment-leasing and employment arrangements, the evidence is convincing that petitioners have so far divested themselves of the characteristic transportation burden as to render considered transportation, in substance, that which the court said in 368 US 370, constitutes "a departure from the statutory design."—Keller Industries, Inc.—Declaratory Order, 103 M.C.C. 520 (527-9)*.

Under the plan involved, petitioners have been free from the burden of large capital investments in vehicles, the risk of premature depreciation or catastrophic loss, and the risk of nonutilization of high-priced equipment; and those factors alone, and on balance with other considerations, might not be sufficient to establish their operations as other than *bona fide* private carriage. However, the presence of one additional factor, i.e., the failure of any participant therein to shoulder the burden of a nonproductive backhaul, tips the scales conclusively against lawfulness of disputed arrangement. Therefore, considered joint operations of petitioners, in performance of alleged private motor carrier operations, constitute for-hire carriage for which authority is required by the Act.—Id., pp. 529-31.

On reconsideration, upon determining an issue of general transportation importance to be involved, prior findings that petitioners' operations under a "joint venture" arrangement for interstate transportation of their goods constituted unlawful "for-hire" carriage, affirmed. While the prior decision of unlawfulness was premised, in part, on the failure of any participant to assume the characteristic transportation of a nonproductive backhaul, additional factors conclusively show that considered operations are not *bona fide* private carriage. Record is clear that dominant petitioner would not hesitate to solicit other shippers whose inbound shipments coordinated with its outbound movements; however, solicitation activities are irreconcilable with the concept of private carriage since the statute, while confirming a shipper's right to transport his own goods, denies him the right to solicit participation of others in joint activities which result, in fact, in their providing for-hire transportation for each other. Exemption from licensing requirements of the act must be strictly construed; and shippers' motivations must give way when they conflict with the clear purpose of regulation.—Id., 107 M.C.C. 75 (76-8)*.

Proposed operations are those of a for-hire motor carrier, since they are performed as a hauling service for compensation, notwithstanding the flat fee applicant levies for its complete storage and delivery service. In addition to warehousing proposal includes: (1) less-than-truckload shipments with multiple deliveries; (2) deliveries made upon instruction from shipper; (3) deliveries timed and scheduled so as to coordinate delivery with receiving departments of consignees; and (4) loading or delivery performed 7 days a week at odd hours, so that the delivery can be effected when needed or to meet any special emergency.—Parkway Expediters, Inc., 103 M.C.C. 441 (443-5).

Respondent found to be providing unlawful for-hire transportation of asphalt from Baltimore, Md., and Springdale, Pa., to points in West Virginia. Elements which distinguish these operations from his lawful operations as petroleum products distributor are that he transports only products for which he has preexisting orders; that supplier makes price concessions necessary for sale; that his mark-up depends primarily on distance traversed and is competitive with charges of authorized carriers; that he assumes no risk of price fluctuation when he takes title to asphalt, which moves from origin to destination without intermediate storage; that petroleum products distributor is not required in effecting sales and distribution; and that although he has a substantial investment in transportation equipment, storage facilities and inventory, he ordinarily uses only transportation oriented part of his investment in this service. In addition although considered transportation enables him to employ drivers and equipment on a year-round basis, economic benefit accruing to his noncarrier business is too remote to place such transportation within regulatory exemption accorded private carriage.—Garland—Investigation of Operations and Practices, 102 M.C.C. 437 (453-4).

It is well established, see 27 MCC 191 and 78 MCC 161, that the two significant instrumentalities of commerce with respect to motor carriage are (1) the equipment by which the transportation is accomplished, and (2) the driver of the equipment. A lease of equipment with drivers by a person (or persons acting in concert) to a shipper will establish a presumption that transportation is being furnished by such person (or persons) as a for-hire carrier.—Empire Truck

U-Drive-It, Inc., Investigation, 96 M.C.C. 29 (41).

To determine whether a particular leasing arrangement is private carriage or for-hire transportation, the status of each operation is a question of fact that must be determined in each individual proceeding, and, as was held in 368 US 370, the Commission may properly look to the substance of the arrangements underlying purported private carriage in determining whether for-hire transportation is actually being provided under the guise of an equipment leasing plan; and this determination may be made by looking to whom has the right to control the transportation provided in leased vehicles or by looking to other factors—Id., p. 41.

Considered transportation constitutes for-hire and not private carriage. Although respondents point to the fact that the rental agreement stipulates that the shipper is in exclusive control of equipment leased from it, and argue that consideration must be given to the fact that not all drivers furnished by respondent personnel registry are used in vehicles leased by respondent equipment lessor, in fact, latter frequently leases vehicles not driven by drivers supplied by the personnel registry; however, these considerations are not material. It is clear that respondents regularly cooperate to provide both vehicles and drivers to a substantial number of shippers. Furthermore, an examination of the entire leasing operation shows that a shipper can in advance arrive at a cost for the services provided by vehicle lessor and furnisher of drivers, and may divert its shipment to authorized carriers without having to give consideration, as businessmen engaged in legitimate private carriage must, to whether the use of such carriers will oblige them to bear the cost of having expensive motor carrier equipment stand idle.—Id., p. 41-3.

A bona fide lessor of equipment must always avoid, either directly or in combination with another, providing drivers along with the equipment leased by it; and, as far as long term leases are concerned, a realistic guaranteed minimum charge for the period of the lease should be imposed. Although such a provision is impractical with respect to trip leases, and the commission is unwilling to interfere with what might be established practices of legitimate equipment rental agencies solely on the basis of the instant record, it is evident that a lessor of trip-leased equipment does not consistently hire the same drivers for return trips that have been used by the shipper on the outbound movement. Additionally, other indicia of the bona fides of such arrangements will be considered, as for example, establishment by lessor of substantial maintenance facilities at branch offices, and the imposition of different levels of rentals where a vehicle does not move in a round trip.—Id., p. 44.

5. Primary business test.—[Vols. 19, 21].—Since respondent Johnson holds both interstate and intrastate motor carrier authority, since his employees, except a bookkeeper, primarily drive his vehicles, and since his motor vehicles constitute most of his assets, except for some land and buildings, which are also used in his trucking operations, considered interstate transportation of salt is conducted as part of his transportation business. Additional considerations include facts that Johnson purchases salt only after his bid is accepted, that he at no time pays out any money for the salt, and that predominant difference between his cost and his bid stems from the transportation costs involved. Favorable factors to Johnson's argument that he was in the business of selling salt, transportation being only incidental to his primary noncarrier business, are his apparent taking of title to the salt and his limited use of warehousing, in order to have a supply on hand when mine is closed on weekends. However, these factors are insufficient to conclude that considered operation is part of Johnson's noncarrier business. Cease and desist order entered.—Johnson and Independent Salt Co.—Investigation, 96 M.C.C. 164 (171-2).

It is unlawful for any person to transport property by motor vehicle in interstate or foreign commerce, unless such transportation is authorized by the Commission, or unless such transportation is within scope, and in furtherance, of a primary business enterprise other than transportation. And since the sole issue in this proceeding is whether challenged transportation is private or for-hire motor carriage, respondent's operations are given a detailed and comprehensive evaluation; and in light of past Commission and court decisions, considered transportation is a separate for-hire transportation business. Cease and desist order entered.—Garland-Investigation of Operations and Practices, 102 M.C.C. 437 (443, 455).

Evidence of record, viewed in light of 102 MCC 437, discloses that considered transportation services are not rendered in furtherance of respondent's primary business, but as related and secondary unauthorized enterprise. Respondent's customers are able to and do purchase considered products at the same price, f.o.b. the mine, as respondent pays; respondent's markup remains constant; respondent assumes no risk of price fluctuations when it takes title to the commodities; respondent provides no real service other than that of transportation; and the function of respondent as distributor, jobber, or dealer is not required either in effecting sales of products or for their intermediate storage and distribution. Thus, although it is prudent for a businessman engaged in *bona fide* distributing operations to use all legitimate means to enhance his profit and to minimize losses, when all risks are eliminated, combined with the rendition of a transportation service and the receipt of an assured return, the basic nature of the transportation service provided is that of a for-hire carrier rather than that of a bona fide distributor.—T & T Supply, Inc.—Investigation of Operations, 103 M.C.C. 946 (951, 954-5).

Respondent parent corporation found not in violation of the act, because considered transportation was conducted in furtherance of its primary business: the manufacture, sale and distribution of frozen foods. Parent transports supplies (retaining title) to its processing subsidiary corporations and, although parent bills and is paid by these processors for said transportation, it ultimately pays this cost, since it is included in cost of processing. These movements, therefore, are performed for neither compensation nor profit. In addition, evidence also establishes another subsidiary as parent's selling agent and parent as title holder of commodities consigned to this agent during transit; and, absent evidence to the contrary, the Commission must assume, that these commodities, although consigned to selling agent, are owned by parent who, in delivering them to its customers, is acting in furtherance of its primary business.—Winter Garden Freezer Co., Inc., Investigation, 103 M.C.C. 513 (517-9).

Simultaneous carriage of goods in the same vehicle by three commonly owned corporations precludes the participant having nominal control over the leased vehicle from meeting the primary business concept, since the Commission is not required to disregard the separate corporate entities to exempt from regulation transportation which would otherwise be subject to the Act.—Leithchfield Mfg. Co., Inc.—Investigation, 106 M.C.C. 648 (652-653)*.

On reconsideration, proposed transportation of radioactive waste found to be for-hire transportation as evidence of record shows that considered movements are not in furtherance of any primary business other than transportation. Fact that applicant assumes ownership of such waste during transportation, standing alone, is not probative evidence of authenic private carriage, as distinguished from 99 MCC 109, as relied upon by applicant.—Long Island Nuclear Service Corp. Com. Car. Applic., 110 M.C.C. 398 (402-3)*.

Transportation activities of petitioner church for itself and its church affiliates were found to be operations performed for a single entity whose "primary business" is furtherance of the church mission which is plainly a legitimate non-transportation enterprise and therefore all such activities constitute legitimate private carriage of property exempt from economic regulation under the statute.—Status of Certain Church Transportation, 112 M.C.C. 59, (62-3).

Respondents' transportation of lumber under so-called buy-and-sell arrangements found to be within the scope and in furtherance of their primary nontransportation enterprises.—Hansen—Investigation of Operations, 113 M.C.C. 362 (368).

Respondents' transportation of asphalt is neither "within the scope" nor "in furtherance" of a primary nontransportation enterprise, but is unauthorized for-hire carriage, when, among other things, they transport only that which is purchased under preexisting orders, have a substantial investment in transportation equipment, and the only identifiable service actually performed for the ultimate purchaser of the asphalt, and from which they derive profit, is transportation, for which they receive the difference between agreed price paid by them for the asphalt and the price agreed on for its sale at destination. Cease and desist order entered.—Whitehurst Paving Co.—Investigation of Operations, 113 M.C.C. 390 (394, 405)*.

See also Clearfield Cheese Company v. United States, at APA, 5 USC, judicial Review and Shelby Biscuit Co., Investigation of Operations, at n. 3 above.

Section 204. (a)(1) [§*304 (a)(1) U.S.C.*] Powers and duties of Commission—(a) Powers and duties generally.—[Unchanged. See vol. 9, p. 7905.]

Historical notes, see vol. 9, p. 7905; vol. 11, p. 9377; vol 12, p. 10360; vol. 13, p. 11054; vol. 14, p. 11572; vol. 15, p. 12174; vol. 16, p. 12814; vol. 17, p. 13505; vol. 19, p. 15514; vol. 21, p. 17102.

Notes of Decisions

Volume 9—p. 7905; Volume 11—p. 9378; Volume 12—p. 10360; Volume 13—p. 11054; Volume 14—p. 11572; Volume 15—p. 12174; Volume 16—p. 12814; Volume 17—p. 13505; Volume 18—p. 14275; Volume 19—p. 15514; Volume 21—p. 17102.

1. Construction and interpretation.—[Vols. 9, 11-16, 18, 19, 21].—Opponents of the proposed rule challenge the Commission's power to institute a rulemaking proceeding such as the one herein which involves the licensing of involved carriers without specific showings of need for service. Such arguments are not valid as they are based upon a misconstruction of the purpose of this proceeding which explicitly states that only a general finding of public convenience and necessity is considered and the involved operations must continue to be authorized by the "appropriate procedures" dictated by the Interstate Commerce Act.—Traf. at or near U.S.—Can. Boundary Lines, 110 M.C.C. 730 (739-40)*.

Commission must regulate various modes of transportation impartially but also in a manner recognizing and maintaining inherent advantages of each mode. Thus, rulemaking proceeding herein is limited to motor carriers as their inherent advantages, especially flexibility, renders them particularly suited to transport the rural-area, small-shipment traffic whose adequate transportation is the main target of this proceeding.—Restrictions on Service by Motor Common Carriers, 111 M.C.C. 151 (162-3).

Commission, pursuant to §204(a)(1), herein instituted a rulemaking proceeding to require motor carriers of property to publish tariffs which conform strictly to their operating authority and to nullify all self-imposed service restrictions on certain types of traffic. The Commission, in implementing the national transportation policy, has a duty to remedy troublesome situations through such reasonable regulations as the public convenience and necessity may require.—Id., p. 163-4.

Rulemaking proceedings are aimed at general situations, not at particular persons, and to approach the involved problem herein of self imposed service restrictions on a case basis would be time-consuming and ineffective in alleviating the general situation caused by wide-spread nature of such restrictions.— Id., p. 164-7.

Commission, citing 110 MCC 730, has jurisdiction to make a general finding of public convenience and necessity in an appropriate rulemaking proceeding, with interested persons thereafter taking advantage of such finding through individual applications and appropriate proof of fitness.—Motor Service on Shipments of New Furniture, 114 M.C.C. 144 (160).

5. State regulation.—[Vols. 9, 11, 16, 18, 21, 22].—In establishing its motor carrier safety regulations, the Commission did not intend or attempt to occupy the field either exclusively or in such detail as to supersede or duplicate local driving regulations; in lieu of detailed regulations, the Commission prescribed 49 CFR.3 which requires motor vehicles to be driven in accordance with laws, ordinances, and regulations of the jurisdiction in which they are being operated. Insofar as alleged violations by defendant of Wisconsin statutes and regulations relating to leases of equipment, registration of vehicles, and to reciprocity with other States as to such registration, are concerned, those state regulations are not within the scope of §192.3 of the Commission's safety regulations; they have no relation to the safe driving of vehicles, but are largely State revenue or tax measures, and therefore cannot be found to be embraced within the purview of §192.3.—Wisconsin Public Service Comm. v. Ace Doran, 96 M.C.C. 347, (354-5).

In considering the validity, scope and applicability of §192.3 of the safety regulations, the Commission has said, see 72 MCC 659, that it regards a State's weight regulations as they affect vehicles operating in interstate commerce, as an exercise of the police power of the State designed to protect their highways against unsafe and unreasonable use, having a clear and definite relationship to safety of operation upon its highways; furthermore, the Commission has concluded that §212(a) gives it the power to revoke or suspend an interstate carrier's certificate for violation of State size and weight regulations if the circumstances so dictates.—Id., p. 355.

10. Safety of operation and equipment.—[Vols. 9, 11-19, 21, 22].—Evidence that motor transportation of any explosive or blasting agent is constantly subject to fire hazards from several potential sources, including tires of the vehicle itself, justifies implementation of recommendations by Chief of the Section of Motor Carrier Safety that the Commission develop regulations concerning (1) the condition, size, inflation standards, and periodic inspection of tires used in transporting such commodities; (2) periodic inspection of vehicles, with specific reference to tires, by a competent official of the operating carrier; (3) initial instruction and periodic examination of drivers respecting their attitude toward laws and regulations, their knowledge of requirements for tire inflation and need for periodic inspections en route, and their knowledge of regulations that vehicles must not be left unattended and must constantly display signs indicating nature of the content; (4) certification by a responsible officer or agent of the carrier as to examination and satisfactory qualifications of such drivers; and (4) equipment of vehicles transporting explosives and other highly reactive commodities with devices enabling driver to remove tires when they become underinflated or overheated.—Accident Near Marshalls Creek, Pa., 96 M.C.C. 783 (793-4, 795).

20. Accidents and accidents reports.—[Vols. 9, 11, 16-19, 21, 22].—Accident involving a vehicle operated by a private carrier, which resulted in death of 6 persons and injury to 13 others, as well as some $600,000 property damage, was caused by explosion of heated or burning dynamite on a trailer laden with dynamite, nitro-carbo-nitrate, and electric blasting caps, which was left unattended adjacent to a public roadway. The fire resulted from heat generation in one of the two right tires, and the severe consequences of the detonation are directly traceable to fact that carrier's agent and driver, with full knowledge of explosive nature of the cargo, left the vehicle totally unattended and without display of "explosives" signs on its side and rear. As the vehicle was equipped with such signs when it left origin, and it is doubtful that they could have fallen off in transit, it is apparent that the driver willfully left the vehicle unattended and without identification, in violation of the Commission's regulations, compliance with which could have prevented or minimized the resulting injuries and deaths, since the firemen and bystanders would have been warned of the dangerous cargo.—Accident Near Marshalls Creek, Pa., 96 M.C.C. 783 (784, 794).

21. Reports, generally; contents; proof.—[Vols. 15, 16].—See also Annual Reports of Motor Carriers of Property, at §220(a), n. 5.

In granting the requested certificate the Commission requires applicant to report its success in meeting shipper's needs in a "Performance Report" at the close of each full year for a period of 3 years so that the Commission can be satisfied that the author-

ity granted is utilized to a reasonable degree. Each "Performance Report" should include sufficient and pertinent information concerning applicant's multiple delivery shipments and its actual performance under the certificate issued.—West Brothers Inc., Extension, 106 M.C.C. 792 (799-800).

30. Carriers otherwise exempted under the Act.—[Vols. 9, 19, 21].—See Refiners Transport & Term. Corp.—Purchase—Mitchell Case, §5(3), n. 10.

Regulations of the Commission

33 FR 14413, Sept. 25, 1968, Part 1003: List of Forms, §1003.1 Motor Carrier and Broker Forms (b) Insurance and Surety Bond Forms, B.M.C. 83 Motor common carrier cargo liability surety bond, revised, effective Jan. 1, 1969.

34 FR 8118, May 23, 1969, Part 1003: List of Forms, §1003.1 Motor Carrier and Broker Forms. (a) Application forms, BOp 102 Notice of intent to transport for certain nonmembers, to be used by §203(b5) cooperative associations or federations of such associations.

35 FR 4754, March 19, 1970, Part 1003: List of Forms, §1003.1(a) further amended by adding thereto form BOp 103 Summary of information for shippers of household goods, effective May 1, 1970.

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

36 FR 21596, Nov. 11, 1971, Part 1062: Special Regulations for For-Hire Motor Carriers Engaged in the Transportation for Recycling or Reuse of "Waste" Products in futherance of Recognized Pollution Control Programs, New Part 1062 setting forth special procedures, added, effective Dec. 15, 1971.

36 FR 22579, Nov. 25, 1971, Part 1061: Limitation of Smoking on Interstate Passenger Carrier Vehicles, new Part 1061 governing smoking on interstate buses added, effective Jan. 6, 1972.

36 FR 23391, Dec. 9, 1971, Part 1062: Special Regulations for For-Hire Motor Carriers Engaged in the Transportation for Recycling or Reuse of "Waste" Products in Furtherance of Recognized Pollution Programs, effective date of regulations indefinitely postponed by order of Nov. 30, 1971.

37 FR 5700, March 18, 1972, Part 1061: Limitation of Smoking on Interstate Passenger Carrier Vehicles, petitions for reconsideration having been denied, effective date of order of Nov. 8, 1971 (36 FR 22579) is fixed as Apr. 17, 1972.

37 FR 20695, Oct. 3, 1972, Part 1206: Common and Contract Motor Carriers of Passengers, accounting regulations, insofar as they apply to the investment tax credit, amended to bring them into compliance with the Revenue Act of 1971 (Pub. Law 92-178), effective on publication in the Federal Register.

37 FR 21999, Oct. 18, 1972, Part 1003: List of Forms, §1003.1 Motor Carrier and Broker Forms, BOC 101 revoked and new BOp 101 and BOp 106 added, effective Nov. 2, 1972.

37 FR 22621, Oct. 20, 1972, Part 1062: Special Regulations for For-Hire Carriers Engaged in Transportation for Recycling or Reuse of "Waste" Products in Furtherance of Recognized Pollution Control Programs, effective date of regulations fixed as March 20, 1972, by order dated Feb. 15, 1972.

38 FR 6828, March 13, 1973, Part 1003: List of Forms, §1003.1 Motor Carrier and Broker Forms, amended by revoking all references to forms B.M.C. 4 and B.M.C. 5, and replacing said matters with OP-OR 11, effective Apr. 2, 1973.

38 FR 10445, Apr. 27, 1973, Part 1003: List of Forms, §1003.1 Motor carrier and broker forms, subhead OP-95 revised to read OP-MCB-95 (revised 1972), effective May 28, 1973.

38 FR 32451, Nov. 26, 1973, Part 1207: Uniform System of Accounts—Class I and Class II Common and Contract Carriers of Property, Commission promulgated rules for classification of revenue and expense accounts, effective Jan. 1, 1974.

39 FR 5766, Feb. 15, 1974, Parts 1240 & 1249: Classes of Carriers; and Reports of Motor Carriers. Revisions of Parts 1240 & 1249 of 49 CFR, as regards Quarterly Financial Report of Motor Carriers of Property.

39 FR 7301, Feb. 26, 1974, Part 1207: Class I and Class II Common and Contract Carriers of Property. Publication of the new Uniform System of Accounts for Motor Carriers of Property, effective Jan. 1, 1974.

Section 204. (a)(2) [§*304 (a)(2) U.S.C.*] Contract carriers.—[Unchanged. See vol. 9, p. 7919.]

Notes of Decisions

Volume 9—p. 7919; Volume 11—p. 9382; Volume 12—p. 10361; Volume 14—p. 11575; Volume 17—p. 13507; Volume 18—p. 14277; Volume 19—p. 15518; Volume 21—p. 17110.

Section 204. (a)(3) [*§304(a)(3) U.S.C.*] Private carriers.—[Unchanged. See vol. 11, p. 9382.]

Amendment, see footnote, vol. 11, p. 9383.

Notes of Decisions

Volume 9—p. 7921; Volume 11—p. 9383; Volume 12—p. 10362; Volume 13—p. 11056; Voluem 14—p. 11576; Volume 16—p. 12818; Volume 17—p. 13507; Volume 18—p. 14278; Volume 19—p. 15519; Volume 21—p. 17111.

1. Construction and interpretation.—[Vols. 8, 11-14, 16, 19, 21].—Commission found that while its authority under the Transportation Act is ample, §§204(a), 220(a), and 224 of the Interstate Commerce Act confer additional authority for the prescription of regulations requiring private motor carriers transporting explosives and dangerous articles to file reports and bear identification markings as herein specified.—Transportation of Explosives—Private Motor Carriers, 329 I.C.C. 411 (412-13)*.

10. Safety of operation and equipment.—[Vols. 19, 21].—See also Accident Near Marshall Creek, at §204(a)(1), n. 20.

On reconsideration, Commission herein modified orders prescribed in 329 ICC 376 as to identification requirements for private motor carriers of explosives and dangerous articles to prevent misinterpretation when vehicles are used for other purposes and also to define the proper forum for prosecution of violations of such orders.—Transportation of Explosives—Private Motor Carriers, 329 I.C.C. 411 (413-4)*.

Section 204. (a)(3a) [*§304(a)(3a) U.S.C.*] Migrant farm workers.—[Unchanged. See vol. 17, p. 13507.]

10. Safety of operation and equipment.—[Vols. 18, 21].—See Bracero Transp. Co., Inc., Extension, at §203(a)(15), n. 1.

Section 204. (a)(4) [§*304(a)(4) U.S.C.*] Regulation of brokers.—State; exemption. —[Unchanged. See vol. 9, p. 7924.]

Notes of Decisions

Volume 9—p. 7924; Volume 11—p. 9384; Volume 12—p. 10363; Volume 13—p. 11056; Volume 15—p. 12176; Volume 16—p. 12819.

10. Practice of brokers.—[Vols. 9, 11-13, 15].—See Gray Line National Tours Corp. Broker Application, at §211(b), n. 3 fitness.

Section 204. (a)(4a) [§*304(a)(4a) U.S.C.*] Operation within a single State; exemption.—[Unchanged. See vol. 11, p. 9386.]

Notes of Decisions

Volume 11—p. 9388; Volume 12—p. 10363; Volume 13—p. 11056; Volume 14—p. 11576; Volume 15—p. 12178; Volume 17—p. 13507; Volume 19—p. 15520.

1. Construction and interpretation.—[Vols. 11-15, 17, 19].—Although the Commission exercises a stringent policy of control over the transportation of explosives, operation by applicant (a small intrastate contract motor carrier of electric blasting caps) is of such nature, character or quantity that granting certificate of exemption under §204(a)(4a) would not substantially affect or impair uniform Commission regulation of motor carriers engaged in interstate or foreign commerce.—Explosives Supply Co., Inc., Exemption Application, 98 M.C.C. 443 (445-446).

Generally the Commission grants certificates of exemption only when the operations are relatively small from the standpoint of both territory and operating revenue and hence of little consequence to other carriers fully subject to regulation. In the instant proceeding, although the New York City area involved is physically small, it is one of the most important economic areas in the country. In addition, 30 trucks would be used, a number higher than that of many regulated carriers; the traffic involved immediately would be of substantial volume and it would move on a fairly regular basis; and finally the operations would produce estimated annual, gross revenue of $100,000, far too large an amount to be considered as having an insignificant effect on transportation in the area. Denied.—Knickerbocker Warehousing Corp., 99 M.C.C. 293 (295-298).

5. Hawaiian carriers.—[Vol. 19].—There is no legal basis for concluding that the exemption under §204(a)(4a) of motor carriers operating solely within the State of Hawaii, 84 MCC 5, embraces or should be extended to include either Hawaiian operations of mainland applicants for household-goods authority or those of Hawaii-based carriers who conduct operations beyond the State, either directly or through commonly controlled affiliates; thus, Hawaiian-based applicants who conduct operations beyond the State, either directly or through affiliates, or who participate in joint-rate arrangements with mainland carriers, clearly are not within that exemption. However, two Hawaii-based applicants operating under the exemption, and not affiliated with any multi-State carrier, may continue household-goods operations they currently conduct in their own right or under agency contracts with mainland carriers without a grant of interstate authority; as the Commission has held with respect to carriers exempt under the former §206(a)(1) second proviso, applicants' elegibility under the §204 (a)(4a) exemption is not destroyed by their agency relationships with various mainland carriers.—Burham Van Service, Inc., Extension, 103 M.C.C. 372 (388-91*.

Transportation of household goods as defined by the Commission by motor carriers in interstate or foreign commerce solely within the State of Hawaii found to be of such nature, character, or quantity that exemption of such carriers from regulation under part II of the Interstate Commerce Act would substantially affect or impair uniform regulation by the Commission in effectuating the national transportation policy. Modification of the regulation creating the exemption promulgated.—Motor Carrier Operation in the State of Hawaii, 115 M.C.C. 228 (255).

Regulations of the Commission

37 FR 10505, May 24, 1972, Part 1050: Motor Carrier Operation in the State of Hawaii, §1050.5 Motor carriers operating solely in Hawaii exempt, amended to read as set forth, effective May 30, 1972.

Section 204. (a)(5) [*§304(a)(5) U.S.C.*].—[Unchanged. See vol. 9, p. 7927, 7928; vol. 11, p. 9389.]

Section 204. (a)(6) [*§304(a)(b) U.S.C.*] Administration.—[Unchanged. See vol. 9, p. 7928.]

Historical Note

On August 9, 1973, the Commission recommended to Congress legislation to amend §§12 (1), 204(a)(6), 304(a), and 403(a) of the Interstate Commerce Act to enable the Commission to exempt certain transportation from regulation upon a finding that the regulation is not necessary in order to effectuate the National Transportation Policy and that regulation would serve no public purpose. (S. 2458). Annual Report, 1974, p. 84.

Notes of Decision

Volume 15—p. 12178; Volume 16—p. 12819; Volume 19—p. 15521; Volume 21—p. 17114.

2. Construction and interpretation.—[Vols. 15, 16, 19, 21].—See also Joray Trucking Corp., at §202(a), n. 2; Loss and Damage Claims, at §12(1), n. 40; Removal of Truckload Restrictions, at §208(a), n. 2; and Restrictions on Service by Motor Common Carriers at §204(a)(1), n. 1.

Commission herein instituted a rulemaking proceeding pursuant to its duty to prescribe rules and regulations for enforcement of part II of the Act, to determine whether public convenience and necessity, considered on a national level, require all motor common carriers of property involved in the considered operations to be authorized by the appropriate procedures to conduct such operations. Because of the general lack of interest in or support for the proposed rule by parties most affected, the Commission found the proposed rule not justified.—Traf. At or Near U.S.—Can. Boundary Lines, 110 M.C. 730 (740-2).

Since the Commission concluded that a general finding of public convenience and necessity for the considered operations has not been proven at the present time, the filing of individual applications for the necessary operating authority will continue to be required. Should present methods of certification appear in future to obstruct involved operations, further consideration will be given to proposals herein.—Id., p. 743.

Commission has authority to make a general finding of public convenience and necessity in appropriate rulemaking proceedings, with interested persons thereafter filing individual applications (see 110 MCC 730). The emergency transportation situation described herein necessitates such a finding and, as consideration of each carrier's situation is unduly burdensome and would create delay contrary to the public interest special procedures are hereby promulgated to enable affected carriers to operate under one special certificate on public convenience and necessity.—Special Relief for Motor Carriers, 112 M.C.C. 323 (326-9).

Commission instituted special regulations for motor carrier licensing insofar as they relate to for-hire transportation of "waste" products for reuse under authority granted in Act to regulate transportation of property. Such products, as defined herein, are considered property as they will become vital elements in the manufacturing process in which they are to be utilized, thus becoming subject to Commission's economic regulation.—Transportation of "Waste" Products for Reuse, 114 M.C.C. 92 (104-5)*.

Regulations of the Commission

35 FR 17264, Nov. 10, 1970, Part 1060: new Part 1060 Special Relief for Motor Carriers Affected by a Temporary Highway Closing, §1060.1 Special relief for motor carriers affected by temporary closing of West Virginia Highway 2, added, effective upon publication in the Federal Register.

36 FR 1337, Jan. 28, 1971, Part 1055: Discrimination in Operations of Interstate Motor Common Carriers of Passengers, regulations contained in Part 1055 [formerly Part 180a] restated in more concise form, without any substantive change,effective on date of order.

Section 204. (a)(7) [§*304(a)(7) U.S.C.*] Inquiry into management; recommendations.—[Unchanged. See vol. 11, p. 9389.]

Amendments, see footnotes, vol. 11, p. 9389.

Section 204 (b) [§*304(b) U.S.C.*] Classification of motor carriers.—[Unchanged. See vol. 11, p. 9390.]

Amendment, see footnote, p. 9390.

Notes of Decisions

Volume 9—p. 7929; Volume 11—p. 9390; Volume 12—p. 10365; Volume 13—p. 11057; Voluem 14—p. 11577; Volume 15—p. 12178; Volume 16—p. 12820; Volume 17—p. 13508; Volume 18—p. 14280; Volume 19—p. 15522; Volume 21—p. 17116.

1. Construction and interpretation.—[Vols. 9, 11, 13-18, 21].—See also §203(a) (15), n. 1.

In distinguishing "mixed-shipment" from "mixed-load" restrictions, it was held that a "mixed- shipments" restriction requires that both classes of commodities be tendered by the same shipper, on the same bill of lading, to the same consignee, but the "shipment" may consist of more than a single truckload. Under a "mixed-loads" restriction, however, each truckload transported by the carrier must contain two or more types of commodities, which may be tendered by the same shipper or by different shippers. This distinction may result in a substantial overlapping of terms.—East Express, Inc., Ext.—High Point, 117 M.C.C. 383 (387)*.

6. Types of property-carrier services.—[Vols. 9, 11-19, 21].—Commission found that true substituted rail-for-motor is provided under MLRC (multi-level rail car) open-tariff provisions, and joint intermodal service under MLRC joint-rate or negotiated rate tariffs. MLRC service is by nature substantially different from TOFC (trailer-on-flatcar) service so that criteria utilized in plan identifications of TOFC cannot be applied. Therefore, rules and regulations prescribed in Ex Parte No. 230 (322 ICC 301) are only partially applicable to MLRC service and partially inapplicable.—Substituted Service—Piggyback, 337 I.C.C. 5 (9-11).

The grant of general-commodity authority to a contract carrier does not contravene the provisions or spirit of the act; also, §204(b) specifically provides that the Commission may establish reasonable classifications for common or contract carriers as it deems necessary or desirable in the public interest. As shown by 2 MCC 703, it was determined very early that contract carriers may be licensed to transport general commodities; however, such a commodity description should be awarded to contract carriers only, in the most compelling circumstances. Such a situation is present where supporting contract shipper is a large and diversified company which presently manufactures and ships more than 500 different products, and receives a wide variety of commodities. Moreover, record indicates that shipper's research facilities are engaged constantly in the development of new products. It would be difficult and structurally awkward, if not impossible, to frame grants of authority that would encompass shipper's diverse products mix, and still permit applicants to provide it with a complete service; general-commodity authority granted.—Gypsum Haulage, Inc., Extension, 108 M.C.C. 314 (325-6, 328).

Initial movements, defined in Administrative Ruling 75, embrace transportation of new motor vehicles from place of manufacture or assembly, specifically authorized to be served as a point of origin by the originating carrier's certificate or permit, to any on such carrier's authorized route or within its authorized territory for delivery to consignees or connecting carriers. Any other transportation of a motor vehicle is a secondary movement. A chassis is a motor vehicle and, therefore, movement of a chassis from points of manufacture or assembly to shippers' facilities is an initial movement of a motor vehicle. Any further movement of a chassis is a secondary movement unless chassis undergoes a conversion process resulting in creation of an essentially new and different vehicle. Mounting of a motor home body on a chassis manufactured elsewhere does not result in a new motor vehicle, and outbound movement of completed motor home is a secondary movement.—American International Driveway, Ext.—Hawaii, 117 M.C.C. 63 (69).

Intermodal containerized movements require a greater flexibility than regular-route motor carriers are efficiently capable of providing. In the instant proceeding protestants lack the capacity to serve broad territorial areas and do not transport loaded containers from the involved ports of entry to inland break-bulk points and must interline to pickup or deliver shipments beyond the scope of their limited authorities and shippers have found such interline service unsatisfactory. It is the policy of the Commission to promote containerization and, therefore, authority was granted to transport general commodities, with exceptions, in containers, and empty containers on return, between ports of entry located in California, Oregon, and Washington, on the one hand, and, on the other, points in United States, except Hawaii, restricted to the transportation of traffic having a prior or subsequent movement by water.—IML Freight, Inc. Ext.—Containerized Freight, 118 M.C.C. 31 (32).

A chassis is a motor vehicle; and, therefore, the movement of chassis from points of manufacture or assembly to the facilities of the shipper is an initial movement of a motor vehicle. Any further movement of these chassis constitutes a secondary movement unless they undergo a conversion process which results in the creation of an essentially new and different vehicle within the meaning of administrative ruling No. 75.—Nationwide Petition for Declaratory Order, 118 M.C.C. 468 (475).

The mounting of a motor home body on a chassis manufactured elsewhere does not result in the manufacture or assembly of such a new or different motor vehicle as would make the outbound movement of the completed motor home an initial movement. This is true where the chassis, as modified to some degree short of such extensive changes to result in a new and radically different vehicle. To the extent that the chassis and the motor home itself are manufactured at the same point, motor carriers will require "initial movement" authority in order lawfully to transport such motor homes from that point.—Id. (476).

Heavy haulers: [Vol. 16].—See also Ace Doran Hauling & Rigging Co., Investigation, at n. 7 heavy hauler, below.

Resolution of the broader question as to heavy haulers' rights to transport explosives generally, raised for the first time in investigation involving narrow issue of whether 500 and 750-pound bombs are covered by "size and weight" authority, requires a balanced consideration of the type and sphere of service provided by motor carriers of explosives vis-a-vis that of carriers of size and weight commodities. And, considered in light of 103 MCC 91 and 79 MCC 335, the background of heavy-hauler service and its evolution from an operation described in terms of type of commodity transported to one described mainly by reference to the type of service performed, together with other historical factors outlined and discussed, although not sufficient to render the two areas of service mutually exclusive, are sufficient to create a presumption that a "class A or class B explosive" is beyond the purview of "size and weight" authority, and to place on a heavy hauler proposing to transport such commodity, shipped individually or palletized, the burden of showing a sound basis for a contrary conclusion.—International Transport, Inc.—Investigation, 108 M.C.C. 275 (283-6, 292-3)*.

7. Classification of carriers; commodity basis.—[Vols. 9, 11-19, 21].—

Acids: [Vol. 21].—Dry animal and poultry feeds are excluded from the acids and chemicals classification by common usage.—Stearns Common Carrier Application, 96 M.C.C. 627 (628).

Airplanes, parts, etc.: [Vols. 18, 19, 21].—In light of 86 MCC 327, authority to transport "aircraft and aircraft parts" does not authorize the transportation of missiles, spacecraft, and satellites.—U.S.A.C. Transport, Inc., Extension—Missiles, 103 M.C.C. 23(30).

Alcoholic and malt beverages: [Vols. 16-18, 21].—The description "beverages, carbonated or noncarbonated" is equivalent to one reading simply "beverages" inasmuch as the phrase "carbonated or noncarbonated" is all inclusive. Because all beverages, irrespective of how they are produced, fit into one of those two categories, the considered commodity description plainly authorizes the transportation of beverages without limitation. And since the Commission has frequently recognized that beer is a beverage, it was found that respondent was authorized to perform the initial out-bound movement of the involved commodity and in consequence to return the shipment upon its rejection by the consignee.—Hilt Truck Line, Inc.—Investigation of Operation, 117 M.C.C. 9 (22-3).

Automobiles, etc.; parts, accessories: [Vols. 9, 11, 12, 14-19, 21].—See also AAA Con Drivers Exchange Common Carrier Application case, §207(a), n. 6; and Morrison Application case, §207(a), n. 25 *Existing carriers*.

Authority to transport "trailers designed to be drawn by passenger automobiles" embraces the transportation of "house trailers designed to be drawn by passenger automobiles" as well as the transportation of "office" trailers, which are essentially nothing more than house trailers or mobile homes without any interior furnishings or fixtures. However, considered authority does not authorize the transportation of "double-wide" trailers, which can be best described as sectionalized prefabricated buildings because this type of structure does not retain its mobile characteristics after being emplaced.—National Trailer Convoy, Inc., Extension—Initial movements, 100 M.C.C. 101 (106).

The phrase "parts thereof" in protestant's authority does not include transportation of parts independently of the class commodity specified. Modifying adverb "thereof" connotes an idea of movement related to or in connection with transportation of some other commodity (see 51 MCC 363). Application granted for transportation of motortruck seat cabs.—Kenosha Transport Auto Corp. Ext.—Seat Cabs, 111 M.C.C. 52 (54-5)*.

Protestant's claim that its authority to transport automobiles and "parts thereof" authorizes transportation of parts independently of the basic commodity specified found not valid. The modification of protestant's certificate in 1968 by moving the phrase "parts thereof" was for the sole purpose of rendering the commodity descriptions therein more sensible and readable and had no effect on the meaning of the phrase at issue.—Kenosha Auto Transport Corp. Ext.—Seat Cabs, 112 M.C.C. 244 (247-9)*.

Applicant's authority to transport "farm" or "agricultural" tractors found to be subject to an "intended use" test as cited previously in 76 MCC 363, and applicant is authorized to transport tractors meeting criteria of such test, as detailed herein, in order to enable it to perform a complete service for the supporting shippers.—Diamond Transp. System, Inc., Ext.—Tractors, 113 M.C.C. 733 (740)*.

The commodity description "passenger automobiles" encompasses certain vehicles which conceivably could be used as buses or trucks, specifically, the Volkswagen Microbus, Ford Econoline, and Econovan. The term "automobiles," however, does not include buses, trucks, or other vehicles specifically excluded from that interpretation in various other Commission proceedings.—Aaacon Auto Transp.—Petition for Declaratory Order, 117 M.C.C. 402, (403-404).

Building materials, roofing: [Vols. 9, 17-19, 21].—Protestant's authority to transport "building materials" permits it only to transport cement intended for use in a building; accordingly, it can not meet shipper's needs for transportation of cement for dam and highway construction.—Transport, Inc., Extension—Ex-Rail Cement, 96 M.C.C. 671 (680).

Respondent's authority to transport "building materials utilized and for use only in logging, mining, and contracting operations" is patently ambiguous. The first portion, "building materials," is a generic classification construed to allow transportion only of those commodities which at time of movement are intended for use as building materials, while the second portion indicates that respondent may only transport building materials intended for use in connection with logging, mining, and contracting operations. Since the terms used in respondent's authority are ambiguous and do not reflect Commission's original intention, the authority is redescribed to avoid future interpretive difficulties to read "Logging, mining, and contractors' materials and supplies". In this light respondent is authorized to transport various metal articles consigned to a mechanical contractor who assembled component parts of heating systems, fencing consigned to a farm supply dealer, and blasting sand used by a painting contractor in preparing structural metal for painting at a construction site.—Zirbel Transport, Inc.—Investigation of Operations, 100 M.C.C. 307 (309-10, 313).

Authority to transport "building materials", an intended-use commodity description, generally includes any commodity which at the time of transportation is, without further processing or manufacture, in a form or condition to be used in the construction or repair of a building and, at the time of transportation, intended with reasonable certainty to be so used. The subject cooling towers, are building materials when affixed with reasonable permanence to buildings and when performing functions as a component part of a building. However, cooling towers which are installed as part of a dam, mine, tunnel, subway or a temporary structure, for example, are not used in construction or repair of a building, and, in these instances, are not building materials. Therefore, protestant may transport within the scope of its authority those cooling towers which actually will be used as building materials.—C & H Transportation Co., Inc., Extension—Stockton, Calif., 108 M.C.C. 395 (399-400)*.

Bulk commodities: [Vols 21].—Protestant's authority to transport "such bulk commodities as are susceptible of being transported in dump trucks between points in..." was interpreted to mean that under it pig iron in dump vehicles could not be carried because pig iron is not a bulk commodity.—Tajon Trucking Co. Extension—Specified Commodities, 96 M.C.C. 591 (594-5).

Canned goods: [Vols. 11, 14-19, 21].—See also *Preserved foodstuffs*, below.

"Canned goods" authority permits the transportation of canned nonalcoholic carbonated beverages placed in hermetically sealed containers for preservative purposes; that term has been used in operating authorities to describe foods or various potable liquids which have been so processed by the canning industry. Beverages in issue have nutritional and energy-giving value and are produced by a cannery engaged not only in the manufacture of such products, but also of canned fruits and vegetables, unlike those commodities such as canned beer or petroleum products in sealed cans produced by manufacturing companies not commonly considered to be members of the canning industry.—Stevens Truck Lines, Inc., Extension—New England, 95 M.C.C. 63 (68-9).

Cement, products: [Vol. 21].—"Cement" relates only to various dry. powdered compounds of calcium and does not embrace related cementing materials such as gypsum, lime, asphalt cement, or glues.—Transport, Inc., Extension—Ex-Rail Cement, 96 M.C.C. 671 (682).

Chemical: [Vols. 17-19, 21].—See also *Liquid chemicals*, below.

Dry animal and poultry feeds are excluded from the acids and chemicals classification by common usage.—Stearns Common Carrier Application, 96 M.C.C. 627 (628); and authority to transport chemicals in bulk does not include authority to transport salt, salt products, or mineral mixtures.—Schwerman Trucking Co. Extension—Dry Chemicals. 98 M.C.C. 350 (353-4).

The definition of "liquid chemicals" as "substances or materials resulting from chemical or physical change induced by processes employed in the chemical industry, including uniting, mixing, blending, and compounding" in 88 MCC 127, has been extended by analogy to include more general term "chemicals" as well, excepting those products excluded from such definitions by common usage. Osseine results from a physical change of animal bones by an acid treatment, falls within the generic description "chemicals," and has not been excluded by common usage. Protestant's dry chemical authority authorizes transportation of osseine. Despite its high moisture content, osseine is considered to be a "dry" chemical as the term "liquid chemical" has been restricted (see 63 MCC 677) to "those substances moving in liquid form, in bulk, in tank vehicles," and osseine, by nature of its physical characteristics, does not fit such description.—Bonded Freightways, Inc., Ext.—Osseine, 111 M.C.C. 137 (140-2, 142-3).

Lime found to be a chemical, as it meets the criteria for defining chemicals set forth in 88 MCC 127 and extended in 91 MCC 683.—Cobo, Inc., Common Carrier Application, 111 M.C.C. 200 (208-9)*; and printer's ink found to be a chemical, as it meets the definition of "liquid chemicals" set forth in 88 MCC 127.—Ecoff Trucking, Inc., Extension—Buffalo, N. Y., 111 M.C.C. 395 (397-8).

Dangerous articles: [Vols. 15, 18, 21].—See also International Transport, Inc.—Investigation case, §204(b), n. 7 *Heavy haulers*.

Authority to transport "explosives," "dangerous explosives," "high explosives," or "classes A and B explosives" includes authority to transport jet thrust units, as defined in the Safety Regulations Governing Motor Carrier Transportation of Explosives and Other Dangerous Articles.—Munitions Carriers Conference, Inc., Petition, 102 M.C.C. 174 (176).

In view of the industry's understanding, "blasting supplies" should be given the elasticity necessary to enable established carriers of explosives to continue in their traditional field of service, without additional grant of authority; thus, applicant's authority to transport "blasting supplies" includes transportation of oxidizing agents, such as considered nitro carbo nitrate.—H. Messick, Inc., Extension—Explosives, 102 M.C.C. 492 (508)*.

Feeds; ingredients: [Vol. 19].—Dry animal and poultry feeds are excluded from the acids and chemicals classification by common usage.—Stearns Common Carrier Application, 96 M.C.C. 627 (628).

Protestant's authority to transport "prepared animal and poultry feed" ingredients does not allow it to transport soybean meal, which shipper considers to be a feed ingredient rather than a feed, needing to be mixed with other ingredients before it can properly be considered a prepared food, although it is sometimes sold as feed. From the record it also appears that it is more suitable for use as, and generally is used as, a feed ingredient; therefore, "prepared animal and poultry feed" cannot be construed to include soybean meal.—Dahlsten Extension—Soybean Meal, 99 M.C.C. 553 (555).

Petitioner's present authority to transport "grain and animal feeds" does not include all of the commodities embraced in the term "animal and poultry feed and animal and poultry feed ingredients". The distinction between animal feeds and poultry feeds is long recognized, and, although grain is a prime ingredient of both types of feeds, it by no means embraces all ingredients used in animal and poultry feeds. Morevoer, there are some ingredients used in such feeds which have little or no nutritive value and which could not by themselves be used as a feed.—Strang Transp., Inc., Modification of Certificate, 99 M.C.C. 364 (366).

The term "feedstuffs" is, with respect to matter suitable for animal or livestock consumption, analogous to the commodity description "foodstuffs" which implies to edible matter (food or food ingredients) for human consumption.—Feed Transports, Inc., Extension-Three States, 113 M.C.C. 763 (767)*.

Foodstuffs: [Vols. 18, 19, 21].—Authority to transport "foodstuffs, raw and manufactured" authorizes transportation of canned soft drinks consisting of water which is flavored, sweetened, and charged with carbon dioxide to cause effervescence; the Commission had previously found "flavored or phosphated beverages" to be embraced within such commodity description. A similar conclusion is warranted with respect to canned soft drinks under consideration here.—Stevens Truck Lines, Inc., Extension—New England, 95 M.C.C. 63 (67, 68).

The examiner held that protestant's authority to transport "prepared and preserved foodstuffs" did not include the right to transport sugar. Protestant's authority includes the word "prepared" which refers to a process of manufacture, and a prepared food is one that has been converted from its natural state into a form that is ready to eat. The examiner's ruling is in error on this point, and protestant may transport sugar under its existing authority.—Bilyeu Refrigerated Transp. Corp. Ext.—Baltimore, 108 M.C.C. 238 (242)*.

Commodity description in petitioner's certificate authorizing carriage of "food products" found to include "processed meats," when fit for human consumption, but not to include "fresh meats," as these two commodities are defined in 74 MCC 667.—Hilt Truck Lines, Inc., Petition for Interpretation, 113 M.C.C. 784 (793-8).

So long as a commodity is fit for human consumption as a food, its actual use is immaterial to a determination that such commodity may be transported pursuant to "food products" authority. Therefore, despite fact that respondent knew that five challenged sugar shipments were destined for consumption by animals, the involved transportation was permissible under said authority since the sugar was fit for human consumption.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (19).

Frozen foods, vegetables: [Vols. 16, 18, 19, 21].—In light of 64 MCC 455, which held that orange juice is a manufactured product of the orange, applicant's authority to transport "frozen and processed fruits, berries, and vegetables" does not authorize it to transport frozen juices and concentrates. —Exley Exp., Inc., Extension—Storage in Transit, 100 M.C.C. 284 (287).

Gases, compressed, etc.: [Vols. 19, 21].—The transportation characteristics and requirements of liquefied petroleum gas are not the same as those of liquid ethylene; therefore the authority to transport the former does not include authority to transport the latter.—Matlack, Inc., Extension—Ethylene, 113 M.C.C. 201 (203)*.

General commodities; [Vols. 9-16, 18, 19, 21].—Motor common carrier applicants' authority to transport general commodities, restricted against the transportation of "articles of unusual value," permits the transportation of commodities of "high value" including certain aerospace parts and items, chemicals and dyes, communications equipment, drugs and pharmaceuticals, electric and electronic equipment and components, fabricated metal products, industrial control equipment, optical and photographic equipment and materials, radios and tape recorders, refractory metals, and scientific equipment and instruments. However, the transportation of silver bullion and the other commonly known "precious metals" (gold and platinum) is beyond the scope of such restricted operating authorities.—Garrett Freightlines, Inc.—Modification, 106 M.C.C. 390 (400).

In a decision of general transportation importance, and agricultural cooperative operating pursuant to provisions of 203(b)(5) of the Act was granted a certificate of convenience and necessity as a common carrier to transport general commodities, including explosives, for the Department of Defense.—American Farm Lines Common Carrier Application, 114 M.C.C. 30 (41-42)*.

See also C & H Transp. Co., Inc., Petition for Interpretation, §204(b), n. 7 *Heavy hauler;* Daily Exp., Extension—Cooling and Heating Equipment case, §207(a), n. 25 *Commodity.*

Groceries: [Vols. 11, 12, 14-19, 21].—See also *Canned Goods, Foodstuffs,* above.

"Groceries" authority limits all transportation to "articles for human consumption which are customarily served as food, or which are used in the preparation of food".—Interstate Grocery Distribution System Ext.—Paper, 98 M.C.C. 546 (548); and includes Coca Cola syrup, which is "a beverage preparation intended for human consumption," both in 1-gallon jugs and 54-gallon drums, despite fact that the syrup in larger than 1-gallon containers is not sold in grocery stores, since it would be administratively undesirable to find that 1-gallon containers are grocery while syrup in larger containers is not.—Bird Trucking Co., Inc., Extension—Darien, 110 M.C.C. 416 (419-20); and also includes wine, so, since the construction of "groceries" authority does not entail application of "intended use test," respondent's delivery of wine to an alcoholic beverage wholesaler was permissible.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (11, 13).

Heavy haulers: [Vols. 9, 11, 15, 17-19, 21].—Commission decision that under the *Dillner* rule, 79 MCC 35, plaintiff heavy hauler may not transport aluminum billets and ingots weighing 6 to 50 pounds each, bundled and wrapped on pallets weighing about 2,000 pounds, is based on a conclusion that those items are susceptible, if shipped individually, of being loaded or unloaded manually and nothing indicates they cannot be wrapped individually or in smaller lots so as not to require the use of special equipment for handling. The Commission's determination, after adopting examiner's factual findings of necessity for the aggregation on pallets, that it would be physically possible to handle the articles manually is entirely theoretical; evidence does not show that they are ever manually loaded or separately packaged. Moreover, *Dillner* was a refinement of a rule in 64 MCC 433, which rule was reaffirmed as a limited exception to be maintained. In instant case, however, there is no evidence to support the Commission's refusal to apply that exception to considered commodities, while evidence to support application of the 64 MCC 433 rule is substantial.—Aero Trucking, Inc. v. United States, 346 F. Supp. 826 (827-9)*.

Evidence shows that inherent nature of the commodities requires aggregation and palletization, i.e., the varying chemical compositions and alloys require separation; the soft, fragile and easily abraded quality of individual articles require palletizing; palletized packages must be wrapped for protection from corrosive atmospheric conditions; customers will not accept the ingots and billets loose; and separate packing of each individual article would be inconvenient, expensive, and not acceptable to the customer. In adopting a rule which uses the possibility that articles could be individually and manually loaded, in fact of all the evidence to the contrary, the Commission relied solely on a presumption and ignored uncontradicted evidence showing a sound basis for finding that inherent nature of considered commodities requires that they be aggregated, bundled on pallets, and wrapped so as to require special equipment for handling. Thus, the Commission's determination that those commodities are not within plaintiff's heavy-hauling authority is not based on substantial evidence to support its findings; order set aside and annulled.—Id., pp. 829-30.

The certificate in question was found to be clear and unambiguous on its face. The modifying clause "which because of size or weight require special equipment or specialized handling" applies solely to the last antecedent "boats". Such interpretation of the certificate is consistent with the usual rules of grammar and punctuation. A contrary interpretation requires a strained and illogical construction of the certificate and would necessitate resort to matters extrinsic to the certificate itself.—Road Paving Materials between Points in New England, 329 I.C.C. 199 (203)*.

In view of the decision in 214 F. Supp. 34 rejecting the 15,000 pound test, developed as an "interpretive rule" in order to permit heavy haulers to continue to compete for traffic historically transported by them, that test can have no further validity. Accordingly, the Commission is impelled to conclude that that test, as heretofore applied, must be rejected. Defendant's heavy-hauler authority does not permit transportation of considered military cargo trucks which, though weighing from 9 to 10 tons each, were loaded and unloaded under their own power and were transported on defendant's flat-bed trailers of ordinary design; transportation of those cargo trucks in manner described does not require special equipment for loading, unloading, or over-the-road movement.—United Transports, Inc., v. Gulf Southwestern Transportation Co., 95 M.C.C. 443 (446-9)*.

Individual oversize glass panes, known as lights, which require special handling for loading and unloading by their very nature can be transported under petitioner's heavy hauler authority as well as under a general commodities authority, provided that under the latter service is limited to over-the-road transportation. However, where the inherent nature of the individual lights does not require special handling they cannot be transported under petitioner's heavy hauling authority. The fact that certain states require special oversize permits to transport loads of aggregated lights is not in itself determinative of the authority required.—C & H Transp. Co., Inc., Petition for Interpretation, 99 M.C.C. 603 (612-614).

A commodity that requires special equipment or special services for loading or unloading, or both, and only ordinary equipment for over-the-road movement is within the authority of a heavy hauler irrespective of whether the carrier is required to provide such special equipment or service. And in determining whether such special equipment is required, the Commission must consider the individual commodity, as contrasted to a bundled, packaged, or otherwise aggregated shipment. But where it is essential to bundle items because of their "inherent nature" for protection or necessary handling, and not for economy or efficiency, then the minimum bundle required may be considered in deciding whether any necessity exists for the use of special equipment.—Aetna Freight Lines, Inc.—Investigation of Operations, 100 M.C.C. 88 (94)*; heavy-hauler authority held by petitioner does not authorize the transportation of palletized or bundled commodities, if such commodities considered individually do not require the use of special equipment.—W.J. Dillner Transfer Co.—Petition for Modification, 99 M.C.C. 485 (489).

On reconsideration following court review, any determination that a given commodity is susceptible of manual handling should be premised on record evidence that, in fact, it has been or as a practical matter could be handled in that way; an abstract possibility of manual handling will not suffice. Therefore, since record in embraced proceeding, in addition to the requirement of special equipment because of aggregation, does not conclusively establish the practicability of manual handling, respondent heavy hauler is not shown to have exceeded the scope of its authority in transporting considered 231-pound steel bars.—Moss Trucking Co., Inc., Investigation of Operations, 103 M.C.C. 91 (95-7, 110-11)*.

In addition, industry practice must be taken into account in deciding whether special equipment is required to transport a given commodity; the Commission must consider not whether manual handling is possible, but whether it is "reasonably practical". In that light, military cargo-type vehicles (loaded and unloaded by crane because of safety considerations) and 788-pound rolls of wire mesh, crated aluminum tanks, and steel bars (loaded by crane due to impracticability of manual loading) "require" the use of special equipment, and are within respondent's heavy-hauling authority. To assert that inherent nature of wire in question does not require rolls of such size would be an unwarranted intrusion into managerial prerogatives; and since a reel of wire is a single length, not an aggregation of individual units, the *Dillner* criteria as to palletization do not apply. However, transportation of considered farm tractors which, as a matter of fact, are pushed manually on flat-bed trailers from a loading platform, is not embraced in respondent heavy hauler's authority.—Id., pp. 108, 111-3.

This proceeding embraces two applications for authority to transport nuclear and by-product materials, radioactive materials and related reactor experiment equipment and component parts. Protestants all hold heavy-hauler authority. Protestants contend that the involved commodities may be handled under their heavy-hauler authority. A portion of the service entails the use of an entire truck to ship individual articles weighing from a few ounces to 150 pounds, and truckload lots comprised exclusively of non-size and weight articles. Although such shipments may be loaded with forklift trucks, the containerized shipments weighing 150 pounds are not within the purview of heavy-haulers authority. The use of such devices is clearly a matter of operating convenience, and the weight factor in and of itself is sufficient to indicate something more than an abstract possibility of manual handling.—Tri-State Motor Transit Co., Extension—Radioactive Materials, 108 M.C.C. 228 (234, 235).

Pleadings in, and events leading up to institution of, investigation to determine whether 500- and 750-pound bombs are covered by "size and weight" authority having raised broader implications regarding heavy haulers' rights to transport explosives generally—a question never presented before—resolution thereof requires consideration of historical and case precedents and, also, of type and sphere of service provided by heavy haulers and carriers of explosives.

Background of heavy-hauling service and, when considered in light of 103 MCC 91 and 79 MCC 335 the relevant and historic factors outlined and discussed, through not sufficient to render the two fields of operation mutually exclusive, are sufficient to create a presumption that a commodity described as a class A or class B explosive is beyond the purview of "size and weight" authority, and to place on a heavy hauler who proposes to transport such article the burden of providing a sound basis for a contrary conclusion.—International Transport, Inc.—Investigation, 108 M.C.C. 275 (283-92)*.

While showing necessary will vary materially from case to case, in order to establish a class A or B explosive as within the heavy-hauler domain, tradition and precedent require something more than showing (for example) that aggregation or palletization represents industry practice; that that is the most efficient, economical, and expeditious means of handling; that technological developments have rendered hand labor obsolete; or that, when individually shipped, the article is not susceptible to manual lifting by the celebrated "97-pound weakling." Therefore, considered 500- and 750-pound bombs are presumed to be outside the scope of heavy-hauler authority; and showing of record as to size and weight thereof, standing alone, falls far short of overcoming the presumption created by uncontraverted historical status of such articles as traffic peculiarly within the sphere of explosives carriers and in no way a part of heavy-hauling service. Respondent's transportation of palletized shipments of such bombs which moved in standard equipment, and were loaded and unloaded by forklift trucks furnished by shipper, was beyond scope of its heavy-hauler authority.—Id., pp. 279, 292-4.

Applicants holding size and weight commodity authority to transport iron and steel articles weighing 2,000 pounds or more to the single piece are not thereby authorized to transport aggregated shipments of the same commodity. The evidence of the supporting shippers does not give any consideration to the inherent nature of the commodities, nor does such evidence indicate whether aggregation is required as a matter of practical reality. Therefore, the presumption found in 79 MCC 335 that the individual commodity itself, and not the aggregation, is the controlling consideration as respects a carrier's authority to handle such traffic, absent a sound basis for concluding to the contrary, prevails and is not rebutted by the findings in 103 MCC 91 that consideration must be given to whether manual handling is reasonably practical rather than theoretically possible.—Roy L. Jones, Inc., Extension—Iron and Steel, 108 MCC 424 (429-30).

There is a distinction between the use of the phrase "commodities which because of size or weight require the use of special equipment" in a certificate authorizing heavy-hauler service as contrasted with its use as an exception to a grant of authority. When used as a positive grant of authority, the phrase describes a type of service, and it indicates the type of commodity offered and shipped by persons who require this particular type of service. See 91 M.C.C. 91, 100. When this descriptive phrase is used as an exception in a grant of authority, it is designed to preclude the performance by the carrier of a heavy-hauler type of service. A heavy-hauler type of service is normally provided in special equipment. A carrier restricted from providing this type of service may not use specialized equipment for the transportation of commodities which would otherwise be within the scope of its operating authority if transported in ordinary equipment. Consequently, a heavy-hauler restriction in a certificate relates to the equipment which may be used as well as the commodity transported.—Herr's Motor Express, Inc., Extension Wheeling Steel 108 M.C.C. 626 (631, 632)*.

While relatively few articles are at issue in investigation into lawfulness of respondent heavy-hauler's transportation of certain tractors, trailers, etc., proper resolution of their status under such rights has implications that affect the scope of size and weight authorities generally, i.e., question of the activities which may lawfully be conducted under authority to transport "commodities which by reason of size or weight require the use of special equipment," or a substantially similar phrase. Also, review of the prior report as well as other developments in heavy-hauling field since 103 MCC 91 shows a pronounced uncertainty as to intended effect of that decision on the competitive balance between heavy haulers and nonsize-and-weight carriers. Accordingly, resolution of the conflict depends on balanced consideration of not only 103 MCC 91 in its entirety, but also certain other case and historical precedents; however, in light of the numerous thorough reviews of growth of heavy-hauler service, discussion of the precedents is confined to considerations of fundamental significance.—Ace Doran Hauling & Rigging Co. Investigation, 108 M.C.C. 717 (718-31)*.

Delineation in reasonably clear terms of the operations permissible under the imprecise heavy-hauler commodity description is far from an easy task, especially in view of the obligation (under Commission decisions) to bear in mind two overriding and apparently contradictory purposes: (1) the need to preserve the historically recognized limits of heavy-hauler service and (2) necessity for sufficient flexibility in heavy-hauling operations as to permit their use by shippers whenever transportation of a commodity requires that specialized type of service. Nevertheless, the Commission's mandate under the national transportation policy places on it a clear responsibility to resolve the controversy in such a manner that, with as little overlap as possible, heavy haulers, on the one hand, and, on the other, ordinary common carriers, whether of general or specifically described commodities, can grow and prosper within their specialized spheres of service.—Id., pp. 731-2.

The requisite clarity and stability of heavy-hauler rights cannot be achieved through principles of construction that accord sole or controlling weight to industry practice nd such related concepts as economy and efficiency; at the other extreme, a construction that would place undue stress on the theoritical possibility of manual handling of an article must be avoided; however, a solution is available within the framework of the numerous Commission decisions on the subject, including 103 MCC 91 and 79 MCC 335. Based upon comprehensive review of those precedents, the most practicable and readily available solution to the question of whether a commodity requires special equipment lies in a balanced application of established tenets of heavy-hauler case law. Concepts discussed and summarized, i.e., (1) the 79 MCC 335 presumptions and related general principles, (2) prevailing industry practice, (3) historic methods of handling, and (4) traditional sphere of carriage (field of service), properly implemented, will assure maximum fulfillment of the basic regulatory purposes to be achieved.—Id., pp. 732-43, 757-8.

Applying those principles and concepts as guidelines in instant proceeding, therefore, respondent's heavy-hauler certificate covers the transportation of (1) aggregated shipments of steel blanks, tubing, structural steel angles, roof joists and decking, tile roofing sheets, and 282-pound gauge steel plates, (2) 4-inch and 5-inch wrought steel pipe (threaded), (3) steel bars, (4) hot top slabs, (5) highway guard rails, and (6) 240-pound corrugated culvert pipe; however, a properly weighted application of the guidelines to remaining commodities under investigation necessitates a different conclusion and those commodities are found to be beyond the scope of its heavy-hauling authority.—Id., pp. 743-57.

Carriers holding heavy-hauler authority may not transport a consignment solely because it is handled, as a matter of shipper practice, through use of automated equipment. Thus, such authority does not authorize the carriage of plywood and other lumber products which do not by reason of their inherent properties require mechanized handling but are tendered in aggregated form principally for reasons of economy and efficiency. Likewise, transportation of vehicular commodities such as snowmobiles, which can be moved on ordinary flat beds and can be loaded and unloaded under their own power, is not within the purview of heavy hauling authority; and the same is true as to foodstuffs, beer, paper, and other general commodities traditionally regarded as outside the heavy haluing field.—Dealers Transit Inc., Extension—Eight Western States, 110 M.C.C. 317 (338-9)*.

Commission herein reaffirmed and utilized the principles to be applied in construing certificates authorizing carriage of "commodities the transportation of which by reason of size or weight requires use of special equipment" (i.e., heavy hauler rights) as they were summarized in 108 MCC 717, especially the *Dillner* criteria (79 MCC 335) regarding aggregated commodities. Given application of these criteria, the iron and steel articles, including lightweight fence posts and roof decking, are not shown to require special equipment are thus not within protestant's heavy hauler authority. Application granted to extent specified.—Steel Haulers, Inc. Ext.—Tulsa, Okla., 110 M.C.C. 612 (617-620)*.

Commission first summarized the tenets of law applicable herein including the presumption enunicated in the prior report, 108 MCC 275, the so-called *Dillner* rule, 69 MCC 335, 358, whereby aggregated commodities generally are presumed to be outside the size and weight orbit in the absence of a sound basis arising from the article's inherent nature for concluding to the contrary, and the guidelines discussed in 108 MCC 717. Applying such principles to the instant controversy the report, although conceding that since 1966, 500 and 750-pound bombs had almost universally been shipped in palletized form and mechanically loaded and unloaded, found such procedures attributable primarily to factors of economy and efficiency and placed the current bomb model outside the pole of heavy hauler rights. A cease and desist order was entered.—International Transport, Inc.—Investigation, 118 M.C.C. 536 (556-58)*.

See also Case Driveaway, Inc., Petition for Modification, §212(a), n. 30; Daily Exp., Inc., Extension—Cooling and Heating Equipment case, §207(a), n. 25 *Commodity;* Heavy Duty Haulers, Inc. v. United States case, §212(a), n. 1.

Household Goods: [Vols. 11-16, 18, 19, 21],—The scope of motor carrier authority to transport household goods and the distinction, if any, between the broader commodity description "Household goods" as used in certificates and the description "used household goods" as used in exemption provisions of §402(b), discussed.—Routed Thru-Pac, Inc., Freight Forwarder Application, 332 I.C.C. 352 (365-7)*.

Applicant's authority to transport household goods does not include the transportation of new furniture; items of new furniture for shipment from factory to dealers and institutions are not household goods; nor can new home furnishings be transported from a factory or store under household goods authority unless they have been purchased by a householder who intends to use them in his dwelling and who arranges for their transportation as an incident of his moving from one dwelling to another.—Ferree Moving & Storage, Inc., Contract Carrier Applic., 99 M.C.C. 454 (457).

Iron and steel articles: [Vols. 12, 15, 17-19, 21].—See also Smith's Truck Lines Ext.—Iron & Steel Articles case, §207(a), n. 25 *Commodity description.*

In accordance with the decision in 85 MCC 440, authority to transport "iron and steel articles" or "iron and steel products" includes the transportation of rolling mill rolls, except those more complicated rolls or machines which contain gears, valves, wiring and motors; however, stamping dies are not included in such authority, because they are not mentioned in the *Descriptions* case, 61 MCC 209, and because they are not finished products of uncomplicated design and at a stage of manufacture just beyond the in-the-rough or semifinished state when they are shipped.—Charles J. Rogers Transp. Co.—Investigation, 99 M.C.C. 351 (357, 359).

In view of the lack of trade meaning, respondent's authority to transport "steel articles, fabricated beyond the primary stage" is synonymous with the term "manufactured beyond the primary stage," which the evidence shows is the production from the furnace of steel ingots. Therefore, considered authority permits the transportation by respondent carrier of steel plates, steel sheets, steel coils, steel bars, and steel beams.—Aetna Freight Lines, Inc.—Investigation of Operations, 100 M.C.C. 88 (89, 93-4)*.

Liquid chemicals: [Vols. 18, 19, 21].—Citing 88 MCC 127, the Commission found that protestant's authority to transport "liquid chemicals" permits it to transport, in bulk, printers' ink. The policy behind 88 MCC 127 is to allow motor carriers holding said authority to provide a complete service to the chemical industry and thus, insofar as is possible and practical, to embrace all "liquid chemicals" without regard to their ultimate intended use or application. In order that this purpose not be frustrated, the Commission's application of the common usage concept has been limited to products such as liquid potables and, conversely, commodities such as paints, varnishes, and lacquers are included in the "liquid chemicals" classification by common usage when they are shipped, in bulk, to industrial users. Thus, since it appears that printers' ink is produced by chemical companies in their capacities as producers of chemicals and chemical by products, that it is sold in bulk for use in the printing industry, and that it has overall characteristics similar to paints and varnish, printers' ink may properly be classified as a "liquid chemical" for transportation purposes.—Ecoff Trucking, Inc., Extension—Ink, 105 M.C.C. 829 (832-3)*.

Lumber: [Vols. 9, 15-19, 21].—Although flakeboard may be transported under some lumber tariff classifications, respondent's authority to transport lumber does not authorize it to transport flakeboard, a product manufactured by the Formica Corporation (subsidiary of American Cyanamid Company) from wood chips bonded together with synthetic resin and pressed into sheets or boards.—Barnes Truck Line, Inc., Investigation & Revocation, 102 M.C.C. 281 (286-7).

Since laminated wood flooring is of a plied or laminated wood composition similar in construction to regular plywood, and since both plywood and wood flooring have long been included under "lumber" authority, the authority to transport lumber includes the authority to transport laminated wood flooring.—Poole Truck Line, Petition for Declaratory Order, 118 M.C.C. 817 (821).

Machinery, machinery parts: [Vols. 11, 16-19, 21].—See also Roy L. Jones, Inc., Ext.—Earth Drilling Equipment case, §207(a), n. 25 *Commodity description.*

Farm tractors, which are the primary commodity involved here, have consistently found not to be "machinery". See 62 MCC 555. Respondents' contention that its predecessors were granted authority under a "grandfather" certificate to transport farm tractors is invalid as an examination of the relevant proceedings shows that said predecessors were "heavy machinery" haulers which differs from respondents' authority to carry "machinery".—Agricultural Implements, Midwest to Oreg. & Wash., 337 I.C.C. 611 (614-21).

Since respondent's authority to transport (1) road building machinery and equipment which because of size or weight requires the use of special equipment and (2) road building machinery and equipment requiring special equipment is governed by reference to intended future use of such commodities, it does not authorize transportation of items clearly not related to or connected with road construction work; respondent's argument that words "road building" modify only "machinery" and not "equipment" is invalid. Under that authority respondent may transport machinery and equipment requiring special equipment and predominantly used in road construction without investigating as to ultimate use thereof, so long as it has no knowledge or notice that such items are likely to be used in another endeavor; however, if some knowledge or notice of another use is present, respondent has the burden of acquiring knowledge of actual intended use and, if such use is for other than in road construction, then the shipment would be beyond the scope of its pertinent authority.—Heavy Duty Haulers, Inc., Investigation of Operations, 99 M.C.C. 578 (579, 581-2, 584)*.

Protestant has authority to transport machinery, heavy machinery, and building materials. Supporting shipper ships cooling towers used by chemical processing plants, the petroleum industry, the airconditioning industry and power generating stations. Protestant contends that it may transport "cooling towers" under its authority. Division 1 cited *Eclipse Motor Lines, Inc., Interpretation of Certificate,* 52 MCC 391 which concluded that a refrigerator is a composite of metal products and machinery which assembled has a name, character, use and thereby a distinct commodity identity separate from its components. Cooling towers when sold as complete units either in assembled form or in packaged sections ready to be erected have an independent identity, although components thereof include motors and blowers, and cannot be transported as machinery or heavy machinery.—C & H Transportation Co., Inc., Extension—Stockton, Calif., 108 M.C.C. 395 (398, 399)*.

Materials, construction, etc.: [Vol. 19].—See also *Supplies*, below.

While "construction materials" are interpreted by the Commission to mean materials used by a building or construction contractor which are to become permanent parts of a building or other construction project, and "construction supplies" to include only those items which are used or consumed in a contractor's work other than those destined to become part of the structure, the very fact that applicant has been transporting building stone and lumber under its Idaho intrastate authority to transport construction supplies without apparent objection strongly suggests that that State regulatory body places a broader construction on "supplies" than does the Commission. Since a carrier may engage in interstate operations under registered authority to the same extent, in same manner, and subject to same limitations as its lawful intrastate operations under the underlying State authority, scope of such interstate operations is governed by interpretation placed on the intrastate authority by the issuing agency.—Statewide Transport, Inc., Extension—Idaho, 96 M.C.C. 57 (63-4).

Citing 61 MCC 329 (333) and 53 MCC 530 (533), the Commission reaffirmed its distinction between the terms "supplies" and "materials": the term "supplies" means those things consumed in, or necessary to, the maintenance and operation of a plant, factory, or business other than the raw materials or ingredients which go into the finished product or structure, whereas "materials" means those things used as ingredients or parts of the finished structure or product. The term "supplies" has a very broad meaning and should not be confused with "materials" or "ingredients". It embraces those things furnished for the purpose of operation as distinguished from "materials," which are furnished for original construction.—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (14).

Meats, packinghouse products: [Vols. 11-13, 15, 17-19, 21].—Protestant's authority to transport "such commodities as are usually dealt in, or used by, meat, fruit and vegetable packinghouses" clearly limits it to transportation of products "usually dealt in" by meat, fruit and vegetable packinghouses; and since meat packinghouses normally deal in a wide variety of dairy products, concerned dairy products may be transported by protestant regardless of identity of consignor or consignee.—Curtis, Inc., Extension—Dairy Products, 102 M.C.C. 388 (391-2).

Respondent's authority to transport "packinghouse products, and supplies, restricted to items incidental to and directly connected with the business of the slaughtering of animals and the preservation and sale of meats but not including dairy products" does not authorize it to transport cheese, candy, calendars, pickles in barrels, chemicals, or picture cards. Herein the Commission also notes that although a business might preserve and sell meats, this does not necessarily mean that the business, in a substantive sense, qualifies as a packinghouse; however, if the business does none of these things, it is not a packing house.—Commercial Freight Lines, Inc.—Investigation, 103 M.C.C. 683 (684, 689-90).

"Scrap materials" is a term which is sufficiently broad to include scrap meats. The word "scrap" denotes such items as small trimmings or wastematerial being discarded because they are not suitable for the use (i.e., as human food) to which they normally would be put. The items included by that description would not be junk or trash of no value, but rather a commodity which is fit only for other uses thant the human consumption for which the basic cut of meat or offal involved is ordinarily suitable. However, authority to transport "scrap materials" does not include the right to handle every commodity classified as "inedible meat" and "offal". Some items that are classified as offal—such, for example, as beef hearts and edible livers—have substantial nutritional value as human food and thus clearly could not be considered as "scrap meats".—Hilt Truck Line, Inc.—Investigation of Operations, 117 M.C.C. 9 (20-21).

Oilfield commodities: [Vols. 15-19, 21].—See also Home Transp. Co., Inc.—Purchase—Fuchshuber case, §5(2), n. 110 *Certificate under §207.*

Applicant's *Mercer* description authority to transport commodities used in oil and gas industries does not authorize them to transport "anti-pollution systems" and related "equipment, etc." as such commodities are not readily identifiable with the oil and gas industries.—Jones, Inc., Ext.—Antipollution Control Commodities, 118 M.C.C. 253 (271-73).

Paper, paper articles, products: [Vols. 11, 15, 17-19, 21].—"Paper mill material and supplies" authority does not include the transportation of corrugated paper boxes, unless such transportation is to a paper mill to be used as part of the mill's supplies. —Ullery Contract Carrier Application, 99 M.C.C. 86 (91).

Petroleum, petroleum products: [Vols. 9, 14-19, 21].—See also Delaware Exp. Co. Extension case §207(a), n. 25 *Commodity description*, Matlack, Inc., Extension—Ethylene case, §204(b), n. 7 *Gasses*.

Respondent's transportation of kymane and plasticizers was unauthorized under its authority to transport petroleum products; although a small percentage of total composition might have been derived from a recognized petroleum product such as anhydrous ammonia, products containing any amount of petroleum or petroleum derivatives are not automatically classifiable as petroleum products (95 MCC 394). Fact products contain only 1.23 percent of a possible petroleum derivative militates against the possibility of their being classified as petroleum products for transportation purposes.—Zirbel Transport, Inc.—Investigation of Operations, 100 M.C.C. 307 (312).

Although liquid gilsonite asphalt sealer is not listed in the appendix to the report in the *Description* case, 61 MCC 209, on further hearing liquid gilsonite asphalt sealer was found to be a petroleum product because the manner of processing, other than handling in solid form and dewatering, and the refining technique used in processing gilsonite industrially is identical to that used for petroleum and the refining of gilsonite by the usual petroleum refinery processes produces similar refinery fractions. Thus, carriers authorized to transport "petroleum products" may transport liquid gilsonite asphalt sealer.—W. S. Hatch Co. Extension—11 States, 108 M.C.C. 853 (858, 859)*.

Pipe: [Vols. 16-19].—Authority to transport "pipe, pipeline material, machinery, and equipment incidental to and used in connection with the construction, repairing, or dismantling of pipelines" embodies an intended use test and does not include the transportation of waste disposal pipe and pipe fittings because such pipes are service or connecting pipes and not a means by which water, gas, oil, or other liquids are conveyed from one place to another.—C & H Transp. Co., Inc., Extension—Tyler, Tex., 99 M.C.C. 112 (115).

Prefabricated buildings: [Vols. 16, 18, 21].—The Commission's conclusion that plaintiff's certificated authority to transport "prefabricated buildings" and "buildings, complete, knocked down, or in sections" does not authorize it to transport single-unit mobile homes is based on its finding of a valid distinction between the terms "mobile home" and "prefabricated building" as used in commodity descriptions, and that finding is supported by substantial evidence of record. Accordingly, considered order of the Commission on further hearing, being founded on substantial evidence, is sustained.—Pre-Fab Transit Co. v. United States, 321 F. Supp. 1147 (1148-50, 1152)*.
